

NetIQ® Identity Manager 4.7 Fan-Out Driver for Midrange

February 2018

The documentation on this page applies to the Identity Manager Fan-Out driver when used with the IBM® i (i7.1 and above) operating system.

For specific information about platform version support, follow the link below to the readme file.

The Fan-Out Driver, which synchronizes information from eDirectory™ to the platforms listed above, is a combination of a Core Driver and Platform Services for each supported platform.
