What’s Changed?

eDirAPI 1.6 provides the following changes in this release:

Role and Access Control (RAC)

This version of Identity Console comes with Role and Access Control (RAC) which gives you the ability to assign specific responsibilities to users and to present them with the tools (and their accompanying rights) that are necessary to perform those sets of responsibilities. For more information see: [Identity Console Admin Guide](https://www.netiq.com/documentation/identity-console/identity_console-admin/data/am757mw.html). (https://www.netiq.com/documentation/identity-console/identity_console-admin/data/am757mw.html)

Contextless Login

This version of Identity Console comes with Contextless Login feature. The Contextless Login feature makes it easier for users to log in with a user-name and password, without knowing their user object context. For more information see: [Identity Console Admin Guide](https://www.netiq.com/documentation/identity-console/identity_console-admin/data/t4kgrqzumxt.html). (https://www.netiq.com/documentation/identity-console/identity_console-admin/data/t4kgrqzumxt.html)

System Requirements

For information about prerequisites, hardware requirements, and supported operating systems, see the [NetIQ eDirectory Installation Guide \(https://www.netiq.com/documentation/edirectory-92/edir_install/\)](https://www.netiq.com/documentation/edirectory-92/edir_install/).

Installing or Upgrading
