

NetIQ Identity Console 1.6 Release Notes

January 2023

NetIQ Identity Console 1.6 add various new features and resolves several previous issues. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure our products meet all your needs.

For more information and for the latest release notes, see the [Identity Console Documentation \(https://www.netiq.com/documentation/identity-console/\)](https://www.netiq.com/documentation/identity-console/) Web site. To download this product, see the [NetIQ Downloads \(https://sld.microfocus.com/\)](https://sld.microfocus.com/) Web site.

This release notes have the following sections:

- ♦ [“What’s New” on page 1](#)
- ♦ [“Installing or Upgrading” on page 2](#)
- ♦ [“Supported Upgrade Paths” on page 3](#)
- ♦ [“Known Issues” on page 3](#)
- ♦ [“Legal Notice” on page 4](#)

What’s New

Identity Console 1.6 provides the following updates in this release:

- ♦ [“Supported Browsers” on page 1](#)
- ♦ [“Software Fixes” on page 2](#)
- ♦ [“New Features” on page 2](#)
- ♦ [“System Requirements” on page 2](#)

Supported Browsers

Identity Console 1.6 supports the latest version of the following browsers:

- ♦ Google Chrome.
- ♦ Mozilla Firefox.
- ♦ Microsoft Edge.

Software Fixes

Identity Console 1.6 includes the following software fixes:

LDAP Server Parameters are Displayed Rightly

Identity Console is improvised and fixed to display the LDAP parameters properly as in iManager. (Defect : 525030)

New Features

Identity Console 1.6 comes with the following new features:

- ♦ [“Role and Access Control” on page 2](#)
- ♦ [“Contextless Login” on page 2](#)
- ♦ [“Customized Branding” on page 2](#)

Role and Access Control

This version of Identity Console comes with Role and Access Control (RAC) which gives you the ability to assign specific responsibilities to users and to present them with the tools (and their accompanying rights) that are necessary to perform those sets of responsibilities. For more information see: [Identity Console Admin Guide](https://www.netiq.com/documentation/identity-console/identity_console-admin/data/am757mw.html). (https://www.netiq.com/documentation/identity-console/identity_console-admin/data/am757mw.html)

Contextless Login

This version of Identity Console comes with Contextless Login feature. The Contextless Login feature makes it easier for users to log in with a user-name and password, without knowing their user object context. For more information see: [Identity Console Admin Guide](https://www.netiq.com/documentation/identity-console/identity_console-admin/data/t4kgrqzumxt.html). (https://www.netiq.com/documentation/identity-console/identity_console-admin/data/t4kgrqzumxt.html)

Customized Branding

This version of Identity Console comes with customized branding, where you can add your company favicon, name, or product name to the address bar of the administration console. For more information see: [Customized Branding](https://www.netiq.com/documentation/identity-console/identity_console-admin/data/t4khqismf528.html) (https://www.netiq.com/documentation/identity-console/identity_console-admin/data/t4khqismf528.html).

System Requirements

For information about prerequisites, computer requirements, installation, upgrade, or migration, see [Planning to Install Identity Console](#) in the [Deploying Identity Console](#).

Installing or Upgrading

Log in to the [Software License and Download](https://sld.microfocus.com/) (<https://sld.microfocus.com/>) page and follow the instructions provided on the page to download the software. NetIQ provides a `tar.gz` or `.zip` file to install Identity Console.

Table 1 For example:

For Docker:	IdentityConsole_160_Containers.tar.gz
For Standalone Installation:	IdentityConsole_160_Linux.tar.gz
For Windows workstation:	IdentityConsole_160_workstation_win_x86_64.zip

Installation

This section describes the process for installing Identity Console:

Deploying Identity Console as Docker Container

For more information on installing Identity Console, see [Deploying Identity Console As a Docker Container \(https://www.netiq.com/documentation/identity-console/identity_console-install/data/deploying-identity-console-docker-container.html\)](https://www.netiq.com/documentation/identity-console/identity_console-install/data/deploying-identity-console-docker-container.html) section in the [Identity Console Installation Guide](#).

Deploying Standalone Identity Console (Non-Docker)

For more information on installing Identity Console, see [Deploying Standalone Identity Console \(Non-Docker\) \(https://www.netiq.com/documentation/identity-console/identity_console-install/data/deploying-identity-console-standalone.html\)](https://www.netiq.com/documentation/identity-console/identity_console-install/data/deploying-identity-console-standalone.html) section in the [Identity Console Installation Guide](#).

Deploying Identity Console on Windows as a Workstation

For more information on installing Identity Console, see [Identity Console on Windows as Workstation \(https://www.netiq.com/documentation/identity-console/identity_console-install/data/deploying-identity-console-workstation-windows.html\)](https://www.netiq.com/documentation/identity-console/identity_console-install/data/deploying-identity-console-workstation-windows.html) section in the [Identity Console Installation Guide \(https://www.netiq.com/documentation/identity-console/identity_console-install/data/bookinfo.html\)](https://www.netiq.com/documentation/identity-console/identity_console-install/data/bookinfo.html).

Supported Upgrade Paths

For more information on upgrading to Identity Console 1.6, see [Identity Console Installation Guide](#).

Known Issues

NetIQ Corporation strives to ensure our products provide quality solutions for your enterprise software needs. The following issues are currently being researched. If you need further assistance with any issue, please contact [Technical Support](#).

Tile Level Access

Issue: Users cannot access a few of the tasks without having permission for their respective tiles. When Identity Manager Related Tasks are Assigned, Tile Level Access is Missing. (Defect: 613112)

Workaround: The **IDM Administration Overview** task is mandatory for a user to get access to the following tasks:

- ♦ AssociationStatistics

- ♦ VersionDiscoveryTool
- ♦ AssociationStatistics
- ♦ VersionDiscoveryTool

The **Identity Manager Administration** Overview or **Driver Table View** tasks are mandatory for a user to get access for the following tasks:

- ♦ InspectDriver
- ♦ InspectDriverCache
- ♦ InspectHealthConfig
- ♦ OutofBandSyncCacheInspector

Importing Custom Roles

Issue: Custom Roles cannot be imported. The team is working on this. (Defect : 640003)

Custom Role Creation

Issue: When a Member is associated with a group, the creation of a Custom Role is limited. (Defect : 618010)

Edit Configuration Owner Limitation

Issue: Configuration Owner cannot add or delete other users at Edit Configuration Owner. At present only the Administrator can do it. (Defect : 613017)

Tree Root Selection Scope

Issue: Tree Root cannot be selected as Scope while creating Configurations. (Defect : 611028)

External Certificate Issue

Issue: While using Identity Console against eDirectory versions (prior to 9.2.8) and when an external certificate is viewed by Identity Console 1.6, the eDirectory is crashing.
