

# Advanced Authentication 5.6 Patch Update 4 Release Notes

April 2018

Advanced Authentication 5.6 Patch Update 4 resolves specific previous issues. This document outlines why you should install this patch update.

Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs. You can post feedback in the [Advanced Authentication forum](#) on NetIQ Communities, our online community that also includes product information, blogs, and links to helpful resources.

The documentation for this product is available on the NetIQ website in HTML and PDF formats. If you have suggestions for documentation improvements, click **comment on this topic** at the bottom of any page in the HTML version of the documentation posted at the [Advanced Authentication NetIQ Documentation](#) page. To download this product, see the [Advanced Authentication Product](#) website.

## 1 What's New?

Advanced Authentication 5.6 Patch Update 4 provides the following enhancements and fixes in this release:

- ◆ [Section 1.1, "Enhancements," on page 1](#)
- ◆ [Section 1.2, "Software Fixes," on page 2](#)

### 1.1 Enhancements

This release introduces the following enhancement:

- ◆ [Section 1.1.1, "Option to Specify User Groups for RADIUS Authentication," on page 1](#)

#### 1.1.1 Option to Specify User Groups for RADIUS Authentication

Previously, Advanced Authentication RADIUS server returned all the groups of a user in the `filter-id` attribute in an authentication response to the RADIUS Client. However, in large environments, user can be a part of many groups and as a result the list of all groups can be large. The size of RADIUS response exceeded the maximum size of RADIUS packet.

As a solution, **Return user groups** along with **User groups white list** option to specify a list of groups of a user has been added to the **RADIUS** event that must be returned by the RADIUS server. The usage of this option is summarized in the following three scenarios:

- ◆ The option is turned **OFF**: The `filter-id` attribute does not exist in the RADIUS response.
- ◆ The option is turned **ON** and the **User groups white list** is empty: All the groups of a user are returned in the `filter-id` attribute.
- ◆ The option is turned **ON** with the group list in the **User groups white list**: Only the groups of a user from the specified list are returned.

For more information, see “[RADIUS Server](#)” in the *Advanced Authentication - Administration* guide.

## 1.2 Software Fixes

Advanced Authentication 5.6 Patch Update 4 includes the following software fix:

- ♦ [Section 1.2.1, “Issue While Requesting to Resend the OTP Through REST API,” on page 2](#)

### 1.2.1 Issue While Requesting to Resend the OTP Through REST API

**Issue:** When a request to resend the SMS or Email OTP methods is initiated through REST API, an error that states the current OTP has not yet expired is displayed.

**Fix:** The issue has been fixed to resend the same OTP if the OTP has not expired for a request made through the REST API for the SMS and Email methods.

## 2 Upgrading

You can upgrade to Advanced Authentication 5.6 Patch Update 4 from any one of the following versions:

- ♦ 5.5
- ♦ 5.5 Patch Update 1
- ♦ 5.6
- ♦ 5.6 Patch Update 1
- ♦ 5.6 Patch Update 2
- ♦ 5.6 Patch Update 3

---

**NOTE:** After you upgrade to 5.6 Patch Update 4, the Database (DB) slave servers are susceptible to a replication conflict. To resolve this conflict, click **Fix** in the **Conflicts** section on both the DB master and slave servers. Such conflicts will not occur again.

---

For more information about upgrading, see “[Upgrading Advanced Authentication](#)” in the *Advanced Authentication Installation and Upgrade* guide.

## 3 Contact Information

Our goal is to provide documentation that meets your needs. If you have suggestions for improvements, please email [Documentation-Feedback@netiq.com](mailto:Documentation-Feedback@netiq.com). We value your input and look forward to hearing from you.

For detailed contact information, see the [Support Contact Information website](#).

For general corporate and product information, see the [NetIQ Corporate website](#).

For interactive conversations with your peers and NetIQ experts, become an active member of our [community](#). The NetIQ online community provides product information, useful links to helpful resources, blogs, and social media channels.
