Advanced Authentication 6.2 Patch Update 2 Hotfix 1 includes the following software fix:

- ♦ [Section 1.1, “Issue with the RADIUS Server,” on page 1](#)

1.1 Issue with the RADIUS Server

This hotfix release improves the stability of the built-in RADIUS server. The RADIUS authentication fails abruptly in Advanced Authentication 6.2 Patch Update 1 and 6.2 Patch Update 2. This issue happens randomly.

Now, the RADIUS authentication does not cause these sudden failures.
