

Client Login Extension 4.5.1 Release Notes

April 2022

This release of Client Login Extension 4.5.1 includes new features, improves usability, and resolves several previous issues.

These improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs.

If you have suggestions for documentation improvements, click [comment on this topic](#) at the bottom of any page in the HTML version of the documentation posted at the [Client Login Extension Documentation](#) page.

What’s New?

The following sections outline the key enhancement and resolved issues in this release.

Support for Self Service Password Reset 4.5.3

Client Login Extension now supports Self Service Password Reset 4.5.3.

Support for Latest Windows Versions

Client Login Extension now supports the following Windows versions:

- ◆ Windows 11
- ◆ Windows 10 21H2
- ◆ Windows Server 2022

Software Fixes

This release includes the following software fixes.

Bug ID	Issue
213469	CLE in Citrix VDI environment does not force users to configure SSPR challenge responses.
433023	Client Login Extension shows as Emergency Access in the Start menu after installation.
440101	Client Login Extension makes calls to Self Service Password Reset on every login and unlocks to check user's password expiration.
441124	Client Login Extension CP in RDP asks the credentials twice.
479063	Unable to Authenticate to RDP With CLE and ZCM Clients installed unless launching as Administrator.
479064	Duplicate entries in UAC Window when CLE is installed on workstation.

System Requirements

For information about the system requirements, refer [System Requirements](#) in the [Client Login Extension Administration Guide](#).

Installing Client Login Extension

For information about how to install Client Login Extension, see [Installing the Client Login Extension](#) in the [Client Login Extension Administration Guide](#).

Upgrading Client Login Extension

For information about how to upgrade Client Login Extension, see [Upgrading the Client Login Extension](#) in the [Client Login Extension Administration Guide](#).

Known Issue

NetIQ Corporation strives to ensure our products provide quality solutions for your enterprise software needs. The following issue is currently being researched. For release specific issues, see previous releases' release notes. If you need further assistance with any issue, please contact [Technical Support](#).

ZCM and Client Login Extension RDP Requires Re-entering Credentials

Issue: ZCM and CLE RDP is not allowing login until the user re-enters the login credentials. The user should not be asked to re-enter the credentials.

Workaround: Re-enter the credentials when prompted.

Contact Information

Our goal is to provide documentation that meets your needs. If you have suggestions for improvements, please email Documentation-Feedback@netiq.com (<mailto:Documentation-Feedback@netiq.com>). We value your input and look forward to hearing from you.
