System Requirements

For detailed information on hardware requirements and supported operating systems and browsers, see the [NetIQ DRA Installation Guide](#) or see the [NetIQ DRA Systems Requirement](#) reference.

Installing and Upgrading this Version

This service pack includes a full version of DRA. You can install this version in a clean environment or upgrade an existing installation of DRA 10.x to 10.1.1.

For detailed information about installing or upgrading Directory and Resource Administrator components and modules, see the [NetIQ DRA Installation Guide](#).

Supported Upgrade Paths

Use the table below to determine your applicable upgrade path by version. Note that patch versions (x.x.x.x) are not listed. However, all patches for the versions shown are supported. For example, you can upgrade to DRA 10.1.1 from DRA 10.0.1 or any of its patches: 10.0.1.1, 10.0.1.2 and so forth.

Known Issues

We strive to ensure our products provide quality solutions for your enterprise software needs. The following issue is currently being researched. If you need further assistance with any issue, please contact [Technical Support](#).

Tenants with a custom source anchor are not displayed

When you manage a tenant with a custom source anchor using the **Allow DRA to create the Azure application** option, the managed tenant is not displayed in the **Azure Tenants** view pane in the Delegation Management Console. The tenant cache refresh fails with an error.

Workaround: To manage a tenant with a custom source anchor, use the **Create the Azure application offline** option and create an application offline using the script provided.
