

NetIQ Workflow Automation 10.1 Release Notes

June 2021

NetIQ Workflow Automation 10.1 includes new features, improves usability, and resolves several previous issues.

Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs. You can post feedback in the [Aegis forum](#) on Micro Focus Community, our online community that also includes product information, blogs, and links to helpful resources.

The documentation for this product is available on the NetIQ website in HTML and PDF formats on a page that does not require you to log in. If you have suggestions for documentation improvements, click **comment on this topic** at the bottom of any page in the HTML version of the documentation posted at the [NetIQ Directory and Resource Administrator Documentation](#) page. To download this product, see the [Product Upgrade](#) web site.

What’s New?

This version of Workflow Automation includes the following new features and enhancements:

- ♦ [“Updated DRA Workflow Automation Templates” on page 2](#)
- ♦ [“PDF2 Table Activity” on page 2](#)
- ♦ [“IQMail OAuth Support” on page 2](#)
- ♦ [“Send EWS Mail with Voting \(Approve/Reject\)” on page 2](#)

Updated DRA Workflow Automation Templates

This version of Workflow Automation removed two existing templates and added two new DRA workflow templates:

- ♦ **Removed templates:** The following templates were removed from WFA:
 - ♦ DRA_Request_For_with_Approval
 - ♦ Request Group Approval
- ♦ **New templates** The following DRA templates were added to WFA:
 - ♦ Empty DRA Workflow With Approval (NetIQ)
 - ♦ Empty DRA Email Approval Workflow (NetIQ)

PDF2 Table Activity

The new PDF2 table activity converts PDF forms to a WFA table for a PDF form-based approval process.

IQMail OAuth Support

This version added OAuth protocol support for IQMail activity.

Send EWS Mail with Voting (Approve/Reject)

This version added support for the Exchange Web Services (EWS) **Approve** or **Reject** mail voting feature.

Addressed Customer Issues

This release includes the following stabilizing fixes:

- ♦ Resolved an issue where Telnet activity failed to handle the prompts of Windows Server 2012 R2. (ENG351552)
- ♦ Resolved an issue that caused the Workflow Automation installer to fail when using a custom SQL port. (284175)
- ♦ Resolved an issue that caused a “send mail” process from the IQ Exchange Adapter to send to an email address with a Null activity, restarts the adapter and ends an other send mail activities. (285296)
- ♦ Resolved an issue that caused the CollectInputFormUser activity to stall, because there were no input rows. (ENG351551)

Known Issues

We strive to ensure our products provide quality solutions for your enterprise software needs. The following issue is currently being researched. If you need further assistance with any issue, please contact [Technical Support](#).

Cannot open Operations Console due to duplication of certification binding in IIS Manager

If you install Workflow Automation and import a certificate for SSL on a server that already has a certification binding on port 443 > https with an empty IP address, another binding gets created for that port and the Default Web Server will not start when attempting to open the Workflow Automation Operations Console after the installation.

Workaround: To avoid this situation, follow these steps:

- 1 Before running the Workflow Automation installer, open IIS Manager, expand the server tree, and select **Default Web Site**.
- 2 Click **Bindings** in the Action panel.
 - ♦ If there is not already an https binding type for port 443 in the Site Bindings dialog box, you can close IIS Manager and proceed with the Workflow Automation installation.
 - ♦ If there is an https binding type for port 443 with no IP address in the Site Bindings dialog box, proceed to Step 3.
- 3 Select the https > port 443 binding in the Site Bindings dialog box, and click **Remove**.
- 4 Proceed with the Workflow Automation installation.

NOTE: If you do happen to install WFA before seeing this workaround, you can still remove the duplicate binding, but you need to update the remaining binding to use the most recently imported certificate and start the Default Web Server in IIS Manager.

Contact Information

Our goal is to provide documentation that meets your needs. If you have suggestions for improvements, please email Documentation-Feedback@netiq.com. We value your input and look forward to hearing from you.
