

# NetIQ iManager 3.2 SP1 Release Notes

February 2020

NetIQ iManager 3.2 SP1 resolves previous issues. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure our products meet all your needs. You can post feedback in the iManager Community Support Forums, our community Web site that also includes product notifications, blogs, and product user groups.

For a full list of all issues resolved in NetIQ iManager 3.x, including all patches and service packs, refer to [TID 7016795, "History of Issues Resolved in NetIQ iManager 3.x"](#).

For more information about this release and for the latest release notes, see the [iManager Documentation](#) Web site. To download this product, see the [NetIQ Downloads](#) Web site.

- ◆ [Section 2, "System Requirements," on page 2](#)
- ◆ [Section 3, "Installing or Upgrading," on page 2](#)
- ◆ [Section 4, "Legal Notice," on page 3](#)

## 1 What's New

iManager 3.2 SP1 provides the following key features, enhancements, and fixes in this release:

- ◆ [Section 1.1, "New Features," on page 1](#)
- ◆ [Section 1.2, "Fixed Issues," on page 2](#)

### 1.1 New Features

This release introduces the following new features:

#### 1.1.1 Updates for Dependent Components

This release adds support for the following components:

- ◆ Azul OpenJDK 1.8.0\_232
- ◆ OpenSSL 1.0.2t
- ◆ Tomcat 9.0.30

#### 1.1.2 Operating System Support

In addition to the platforms introduced in previous releases of iManager, this release adds support for the following operating system:

- ◆ Red Hat Linux Enterprise (RHEL) 8.1
- ◆ SUSE Linux Enterprise Server (SLES) 12 SP5

## 1.2 Fixed Issues

This release includes software fixes for the following components:

### 1.2.1 Resolved Security Vulnerabilities

This release updates iManager to resolve the following security vulnerability:

- ♦ CVE-2020-9515
- ♦ CVE-2020-9516

### 1.2.2 iManager Collector Displays an Error Message When Started with SLM for IGA

**Issue:** iManager Collector 2011 r5 fails to start with SLM for Identity Governance and Access (IGA). This occurs due to the mismatch in package name. (Bug 1108930)

### 1.2.3 iManager Plug-Ins that Use LDAPS Fail When Keystore File Is Generated or Re-created

**Issue:** When the IMKS (Keystore) file is generated or re-created, few iManager plug-ins that use LDAPS fail. (Bug 1124352)

### 1.2.4 iManager Displays an Error Message While Setting Universal Password with OSE 2018 SP1

**Issue:** While setting the universal password with OES 2018 SP1, iManager displays an error message. (Bug 1135218)

## 2 System Requirements

For information about prerequisites, computer requirements, installation, upgrade or migration, see [Planning to Install iManager](#) in the [NetIQ iManager Installation Guide](#).

---

**NOTE:** iManager uses the modified version of `XULRunner` on Windows. The source code for the modified `XULRunner` is available under the Mozilla Public License version 2.0. If you need further assistance with any issue, contact [Technical Support \(http://www.netiq.com/support\)](http://www.netiq.com/support).

---

## 3 Installing or Upgrading

To upgrade to iManager 3.2 SP1, you need to be on iManager 2.7.7 P11 or higher.

For more information on upgrading to iManager 3.2 SP1, see the [iManager Installation Guide](#).

---

**IMPORTANT:** This version of iManager supports only eDirectory 9.2.1 or above when both are installed on the same machine. If you are upgrading iManager 2.7.7 P11 to 3.2 SP1, ensure that your eDirectory is also upgraded to 9.2.1 before upgrading iManager.

---
