

iManager 2.7.7 Patch 11 Release Notes

September 2017

iManager 2.7.7 Patch 11 resolves specific previous issues. This document outlines why you should install this patch. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable inputs. We hope you continue to help us ensure our products meet all your needs.

For a full list of all issues resolved in NetIQ iManager 2.7, including all patches and service packs, refer to [TID 7010166, "History of Issues Resolved in NetIQ iManager 2.7"](#).

For more information about this release and for the latest Release Notes, see the [iManager Documentation](#) Web site.

For the list of software fixes and enhancements in the previous releases, see [iManager 2.7.7 Patch 10 Release Notes](#).

To download this product, see the [NetIQ Downloads](#) Web site.

1 What's New

The following sections outline the enhancement and issue resolved in this release:

- ◆ [Section 1.1, "New Features," on page 1](#)
- ◆ [Section 1.2, "Operating System Support," on page 1](#)
- ◆ [Section 1.3, "Fixed Issues," on page 2](#)

1.1 New Features

This release introduces the following new features:

1.1.1 Updates for Dependent Components

This release adds support for the following components:

- ◆ Java 1.8.0_144 (32-bit)
- ◆ Tomcat 7.0.81

1.2 Operating System Support

In addition to the platforms introduced in previous releases of iManager, this release adds support for Red Hat Enterprise Linux (RHEL) 7.4.

1.3 Fixed Issues

This release includes software fixes for the following components:

1.3.1 iManager Workstation Does Not Install NICI Automatically

Issue: iManager Workstation is unable to install NICI automatically if the user had uninstalled NICI manually earlier. Also if any older version of NICI is installed, iManager Workstation is unable to upgrade the same. (Bug 1029861)

Fix: NICI is installed automatically while installing iManager Workstation. If you have any older version of NICI installed, system prompts you to upgrade NICI to the latest version.

1.3.2 iManager Displays Warning Message When No Changes Are Made in the Edit User Object Window

Issue: iManager displays a warning message on the edit user object window. This occurs when the user clicks on the **Cancel** button without making any change to the user object. (Bug 992077)

Fix: This issue is fixed.

1.3.3 iManager Does Not Displays Any Value for the Timezone Attribute

Issue: iManager displays empty timezone value while modifying an user attribute. (Bug 1044618)

Fix: This issue is fixed.

1.3.4 iManager Displays an Error Message While Checking Status Log

Issue: iManager displays an error message while checking the status log entries of the users. (Bug 1045485)

Fix: This issue is fixed.

1.3.5 iManager Does Not List the Group Members As Set in the Object Selector

Issue: iManager does not list the group members as set in the **Object Selector** under **Preferences**. (Bug 988525)

Fix: This issue is fixed.

1.3.6 iManager Does Not Display Any Task After Selecting Multiple Objects

Issue: iManager does not display the list of available tasks once you select multiple objects in the View Objects window. (Bug 986230)

Fix: This issue is fixed and iManager displays a warning message when multiple objects are selected.

1.3.7 User Cannot Uninstall Plug-Ins from the iManager Workstation

Issue: User cannot uninstall plug-ins from iManager workstation when both iManager 2.7 and 3.0 are installed on the same machine. (Bug 1037834)

Fix: This issue is fixed.

1.3.8 Installation of Plug-Ins for iManager Fails

Issue: Installation of designer plug-ins (eDirectory, PKI and NMAS) fail on iManager. (Bug 990034)

Fix: This issue is fixed.

1.3.9 iManager Displays an Error Message While Modifying a User Object

Issue: iManager displays an error message while modifying a user object if the Home Directory Path has any special character. (Bug 1039060)

Fix: This issue is fixed.

2 System Requirements

For information about system requirements, see the [NetIQ iManager Installation Guide](#).

3 Upgrading to iManager 2.7.7 Patch 11

You can download the software from the [NetIQ Downloads](#) page. To upgrade to iManager 2.7.7 Patch 11, you need to be using iManager 2.7.7.x.

For information about upgrading iManager, see [Upgrading iManager](#) in the [NetIQ iManager Installation Guide](#).
