## Introduction

#### About This Document

## **Purpose of the Document**

This Flash Drive Authentication Provider User's Guide is intended for all user categories and describes how to use the client part of NetIQ Advanced Authentication Framework solution. In particular, it gives instructions as for how to manage Flash Drive type of authentication.

For more general information on NetIQ Advanced Authentication Framework<sup>™</sup> and the authentication software you are about to use, see NetIQ Advanced Authentication Framework – Client User's Guide.

Information on managing other types of authenticators is given in separate guides.

## **Document Conventions**

This document uses the following conventions:

**Warning.** This sign indicates requirements or restrictions that should be observed to prevent undesirable effects.

Simportant notes. This sign indicates important information you need to know to use the product successfully.

**ONDES.** This sign indicates supplementary information you may need in some cases.

**?** Tips. This sign indicates recommendations.

- Terms are italicized, e.g.: *Authenticator*.
- Names of GUI elements such as dialogs, menu items, and buttons are put in bold type, e.g.: the **Logon** window.

# Managing Flash Driver Authenticator

In this chapter:

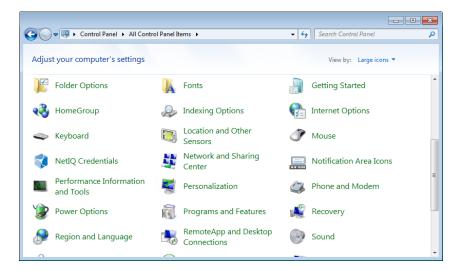

- Microsoft Windows Vista/7/Microsoft Windows Server 2008/2008 R2
- Microsoft Windows Server 2003
- Microsoft Windows 8/Microsoft Windows Server 2012

Microsoft Windows Vista/7/Microsoft Windows Server 2008/2008 R2

Authenticator management options are available in the Authenticators window.

**U** The **Authentication Wizard** window is shown at system start if there are no enrolled authenticators.

To open the **Authenticators** window from **Control Panel**, in **Control Panel** by categories select **User Accounts > NetIQ Credentials:** 

To open Authenticators window, user should undertake authorization procedure:

1. In the Authorization window, choose authentication method.

So If there are no enrolled authenticators, then the only way to get authorized is **By password**. Otherwise, authentication by password will make enrollment unavailable (i.e. the button **Enroll**, **Re-enroll** and **Remove** will be greyed out).

- 2. Get authenticated with the selected method.
- 3. Once you are authenticated, page for managing authenticators is opened.

		Close

**1** Testing can also be performed in the **Enroll authenticator** and **Re-enroll authenticator** windows.

- 2. In the **Logon** window select device from the list and enter PIN-code.
- 3. When a confirmation message saying: "Authenticators match" appears, click OK.

4. When authenticators do not match an error message appears. Click **OK**.

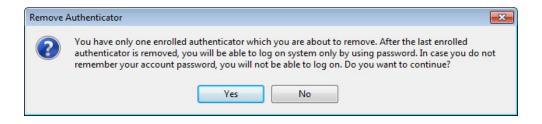

## **Removing Flash Drive Authenticator**

This operation may be forbidden by the NetIQ administrator. In such cases the **Remove** button in the **Authenticators** window is greyed out.

If you are allowed to remove your authenticator, do not do this just because you do not like your current authenticator. Instead, you can re-enroll it (see <u>Re-enrolling Flash Drive</u> <u>Authenticator</u>).

Lo not remove the only authenticator you have. If you have no authenticators, you can log on with your password only. If a random password was generated for your account and you have removed the only authenticator, you cannot log on in any way.

NetIQ Advanced Authentication Framework<sup>™</sup> prevents you from accidentally removing your only authenticator by showing the following dialog:

If you removed the only authenticator and do not know your password, contact the system administrator.

# Troubleshooting

 $oldsymbol{0}$  This chapter provides solutions for known issues. If you encounter any problems that are not listed here, please contact the technical support service.

#### Before contacting the support service:

We strongly request that you give a possibly detailed description of your problem to the support technicians and attach logs from the faulty computer. To obtain the logs, use the LogCollector.exe tool (\Tools\LogCollector). Follow the steps below:

1. Copy LogCollector.exe to the local C:\ disk on the faulty computer.

1 The tool may not work from a network drive.

2. Run LogCollector.exe.

3. In the dialog that opens, click Enable all. As a result, all items in the Debugged components section are selected. Close the dialog.

4. Reproduce the steps that caused the problem.

5. Run LogCollector.exe. again and click Save logs.

Save the logs to archive.

## **Cannot Enroll Authenticator**

#### **Description:**

Authenticator is not enrolled because

- a. The **Type** list in the **Enroll Authenticators** window is empty or Flash Drive authenticator type is absent.
- b. The Enroll button in the Authenticators window is greyed out.

#### Cause:

- a. The Flash Drive authenticator type is not supported (no proper authentication provider is installed).
- b. The operation is forbidden or you have reached the limit on authenticators number.

#### Solution:

- a. Contact NetIQ administrator.
- b. No authenticators can be added. For more information, contact NetIQ administrator.
