

## **Abstract**

TGSecure 1.7 contains minor bug fixes. The product can be upgraded from any previous release of TGSecure.

## **Details**

### **Enhancements**

- Save Restore TG Configuration Utility (TGS AVRST)
  - Helps you backup your TG configuration
  - Helps you copy configuration from one system to another

### **Bug Fixes**

- License key validator enhanced to handle Spanish character sets
- User groups can now contain generic names (ex AR\*)
- Calendar description allows character data
- Incoming Transactions Subset Data screen allows you to use longer subset criteria
- Network Security Decision Maker honors object groups containing generic object names
- Incoming Transaction screen now correctly shows SSL encryption status for each transaction
