Abstract

TGCentral 2.1 contains exposure of the TGSecure modules Inactivity Session Lockdown and Resource Manager.

New Features

- Centralized management of Inactivity Session Lockdown (TGSecure integration)
- Centralized management of Resource Manager (TGSecure integration)

Enhancements

- Addition of report cards to expose new regulation mappings in TGAudit
- Additional TGAudit reports to support IBM I 7.4

Bug Fixes

- All description fields restricted the characters allowed to A-Z and 0-9
- Search on Activity History failed
- Function usage details were not shown in the Exit Point Configuration screen
