TABLE OF CONTENTS .......................................................................................................................................................... III

1. **INTRODUCTION.................................................................................................................................................. 15**
   1.1. **HISTORICAL PERSPECTIVE OF SECURITY.................................................................................................. 15**
   1.2. **TGSECURE OVERVIEW.................................................................................................................................. 15**
   1.3. **FEATURES.................................................................................................................................................... 16**
   1.4. **RULES DECISION ALGORITHM.................................................................................................................... 17**
   1.5. **RULES SUGGESTION ENGINE...................................................................................................................... 18**

2. **GETTING STARTED.............................................................................................................................................. 21**
   2.1. **LOG INTO TGSECURE................................................................................................................................. 21**
   2.2. **GETTING STARTING USING TGSECURE....................................................................................................... 21**
       2.2.1. **Actions.................................................................................................................................................... 21**
       2.2.2. **Process Flow............................................................................................................................................ 22**
       2.2.3. **Implementation Tasks.......................................................................................................................... 22**

3. **NETWORK SECURITY ......................................................................................................................................... 25**
   3.1. **NETWORK SECURITY.................................................................................................................................. 25**
   3.2. **NETWORK SECURITY DEFAULTS................................................................................................................ 26**
       3.2.1. **Working with Network Security Default Settings.................................................................................. 26**
       3.2.2. **Display Network Security Defaults........................................................................................................ 27**
       3.2.3. **Manage Manager Network Defaults...................................................................................................... 28**
           3.2.3.1. Enable Network Security Auditing........................................................................................................ 29
           3.2.3.2. Enable Network Security Change Auditing.......................................................................................... 29
           3.2.3.3. Enable Network Security Alerts.......................................................................................................... 29
           3.2.3.4. Enable Network Security Debug Log.................................................................................................... 30
           3.2.3.5. Enable TELNET Auto Signon.................................................................................................................. 30
       3.2.4. **Run Network Security Reports................................................................................................................ 31**
   3.3. **TRANSACTIONS........................................................................................................................................... 32**
       3.3.1. **Working with Transactions....................................................................................................................... 32**
       3.3.2. **Display List of Incoming Transactions...................................................................................................... 33**
           3.3.2.1. **Display List............................................................................................................................................. 33
           3.3.2.2. **Sort List................................................................................................................................................ 34
           3.3.2.3. **Move to Position in List ........................................................................................................................ 34
           3.3.2.4. **Filter List.............................................................................................................................................. 34
       3.3.3. **Manage Incoming Transactions................................................................................................................ 35**
           3.3.3.1. **Display Incoming Transaction Details.................................................................................................. 35
           3.3.3.2. **Delete Incoming Transaction.............................................................................................................. 36
           3.3.3.3. **Archive Incoming Transactions........................................................................................................... 36
           3.3.3.4. **Create a Rule Based on a Transaction................................................................................................ 37
           3.3.3.5. **Accept a Rule Suggestion.................................................................................................................... 38**
       3.3.4. **Run Transactions (*TRN) Report.................................................................................................................. 39**
           3.3.4.1. **Access the Network Reports Interface................................................................................................ 39
           3.3.4.2. **Run Incoming Transaction Details...................................................................................................... 39
           3.3.4.3. **Run Transaction Summary by Server Report...................................................................................... 39
           3.3.4.4. **Run Transaction Summary by User Report......................................................................................... 40
           3.3.4.5. **Run Network Transaction Report....................................................................................................... 40
3.3.5. Run Socket Transaction (*SOC) Reports .......................................................... 41
  3.3.5.1. Access the Network Reports Interface .......................................................... 41
  3.3.5.2. Run Socket Transaction Report ............................................................... 41
  3.3.5.3. Run Socket Summary by Server Report .................................................. 42
  3.3.5.4. Run Transaction Summary by User Report ........................................... 42

3.4. EXIT POINTS .......................................................................................... 43
  3.4.1. Working with Exit Points ........................................................................... 43
  3.4.2. Display List of Exit Points ......................................................................... 44
  3.4.3. Manage Exit Points ................................................................................. 46
    3.4.3.1. Display Exit Point Details ....................................................................... 46
    3.4.3.2. Enable Exit Point Auditing ................................................................. 48
    3.4.3.3. Enable Exit Point Security .................................................................... 48
    3.4.3.4. Enable Exit Point Alerts ...................................................................... 49
    3.4.3.5. Enable Exit Point Collection ............................................................... 49
    3.4.3.6. Add Exit Program to Exit Point ........................................................... 49
    3.4.3.7. Add Exit Programs to Exit Points (Mass Update) ................................ 50
    3.4.3.8. Remove Exit Program from Exit Point ................................................ 50
    3.4.3.9. Remove Exit Programs from Exit Points (Mass Update) .................... 50
    3.4.3.10. Cycle Server ...................................................................................... 50
    3.4.3.11. Cycle Servers (Mass Update) ............................................................. 51
    3.4.3.12. Update all Exit Points (Mass Update) ................................................ 51

3.4.4. Run Exit Points Report ............................................................................ 52
  3.4.4.1. Access the Network Reports Interface .................................................. 52
  3.4.4.2. Run Exit Point Configuration Report ................................................... 53
  3.4.4.3. Run Exit Point Configuration Changes Report ...................................... 53

3.5. SOCKET RULES .................................................................................. 54
  3.5.1. Working with Socket Rules ............................................................... 54
  3.5.2. Display List of Socket Rules ............................................................... 55
    3.5.2.1. Display List ...................................................................................... 55
    3.5.2.2. Sort List ......................................................................................... 55
    3.5.2.3. Move to Position in List .................................................................... 56
    3.5.2.4. Filter List ....................................................................................... 56

3.5.3. Manage Socket Rules ........................................................................... 56
  3.5.3.1. Add Socket Rule .............................................................................. 57
  3.5.3.2. Edit Socket Rule ............................................................................. 57
  3.5.3.3. Copy Socket Rule ........................................................................... 58
  3.5.3.4. Delete Socket Rule ........................................................................... 58
  3.5.3.5. Display List of Users in a Group ......................................................... 58
  3.5.3.6. Display List of Clients in a Group ...................................................... 59
  3.5.3.7. Display List of Servers in a Group ...................................................... 59
  3.5.3.8. Display List of Operations in a Group ................................................ 59

3.5.4. Run Socket Rule Reports ................................................................. 59
  3.5.4.1. Access the Network Reports Interface ................................................ 60
  3.5.4.2. Run Socket Rule Configuration Report ............................................. 60
  3.5.4.3. Run Socket Rule Configuration Changes Report .............................. 60

3.6. EXIT RULES ...................................................................................... 61
  3.6.1. Working with Exit Rules ....................................................................... 61
  3.6.2. Display List of Exit Rules ...................................................................... 62
    3.6.2.1. Display List ................................................................................... 62
    3.6.2.2. Sort List ....................................................................................... 63
    3.6.2.3. Move to Position in List ................................................................... 63
    3.6.2.4. Filter List ....................................................................................... 64

3.6.3. Manage Exit Rules ............................................................................. 64
5. INACTIVE SESSION LOCKDOWN ........................................................................................................................... 95

5.1. INACTIVE SESSION LOCKDOWN ..................................................................................................................... 95

5.2. INACTIVE SESSION LOCKDOWN DEFAULTS ........................................................................................................ 95

5.2.1. Working with Inactive Session Lockdown Defaults ............................................................................................. 95

5.2.2. Display Inactive Session Lockdown Defaults ...................................................................................................... 96

5.2.3. Manage Inactive Session Lockdown Defaults ..................................................................................................... 98

5.2.3.1. Enable ISL Auditing ........................................................................................................................................... 98

5.2.3.2. Enable ISL Change Auditing ........................................................................................................................ 99

5.2.3.3. Enable ISL Alerts ........................................................................................................................................... 99

5.2.3.4. Set Check Interval ........................................................................................................................................... 99

5.2.3.5. Set Warning Interval ...................................................................................................................................... 100

5.2.3.6. Set Disconnect Message ................................................................................................................................ 100

5.2.3.7. Set Revoke Authority ....................................................................................................................................... 100

5.2.3.8. Start Monitor ................................................................................................................................................. 100

5.2.3.9. End Monitor ..................................................................................................................................................... 101

5.2.3.10. Check Monitor Status .................................................................................................................................. 101

5.2.4. Run Inactive Session Lockdown Reports .................................................................................................................... 101

5.2.4.1. Run Inactivity Disconnect Report .................................................................................................................... 102

5.2.4.2. Run Inactivity Session Configuration Settings Report ...................................................................................... 102

5.2.4.3. Run Inactivity Session Configuration Changes Report .................................................................................. 103

5.3. INACTIVE SESSION RULES ............................................................................................................................ 104

5.3.1. Working with Inactive Session Rules .................................................................................................................. 104

5.3.2. Display Inactive Session Rules .......................................................................................................................... 104

5.3.2.1. Display List ...................................................................................................................................................... 104

5.3.2.2. Sort List .......................................................................................................................................................... 105

5.3.2.3. Move to Position in List ................................................................................................................................ 105

5.3.2.4. Filter List ........................................................................................................................................................ 106

5.3.3. Manage Inactive Session Rules .......................................................................................................................... 106

5.3.3.1. Add Inactive Session Rule .................................................................................................................................. 106

5.3.3.2. Edit Inactive Session Rule .................................................................................................................................. 107

5.3.3.3. Copy Inactive Session Rule .................................................................................................................................. 108

5.3.3.4. Delete Inactive Session Rule .......................................................................................................................... 108

5.3.4. Run Inactive Session Rules Reports ..................................................................................................................... 108

5.3.4.1. Run Inactivity Session Inclusion Exception Rules Report ........................................................................... 109

5.3.4.2. Run Inactivity Session Rules Change Report ............................................................................................... 109

5.4. DISCONNECTION OPTIONS .............................................................................................................................. 110
5.4.1. Working with Disconnect Options ................................................................. 110
5.4.2. Display Disconnect Options ........................................................................ 110
  5.4.2.1. Display List .......................................................................................... 111
  5.4.2.2. Sort List .............................................................................................. 111
  5.4.2.3. Move to Position in List ....................................................................... 112
  5.4.2.4. Filter List ........................................................................................... 112
5.4.3. Manage Disconnect Options ....................................................................... 112
  5.4.3.1. Add Disconnect Option ....................................................................... 113
  5.4.3.2. Edit Disconnect Option ....................................................................... 113
  5.4.3.3. Copy Disconnect Option ...................................................................... 114
  5.4.3.4. Delete Disconnect Option .................................................................... 114
5.4.4. Run Disconnect Option Reports .................................................................. 114
  5.4.4.1. Run Inactivity Session Disconnect Option Report .................................. 115
  5.4.4.2. Run Inactivity Session Disconnect Option Change Report ................ 115

6. RESOURCES MANAGER .................................................................................. 117
6.1. RESOURCE MANAGER .................................................................................. 117
6.2. RESOURCE MANAGER DEFAULTS .............................................................. 117
  6.2.1. Working with Resource Manager Defaults ................................................ 117
  6.2.2. Display Resource Manager Defaults .......................................................... 118
  6.2.3. Manage Resource Manager Defaults .......................................................... 119
    6.2.3.1. Enable Resource Change Auditing ...................................................... 119
    6.2.3.2. Enable Resource Change Alerts .......................................................... 120
  6.2.4. Run Resource Manager Reports ............................................................... 120
    6.2.4.1. Run Resource Manager Configuration Report .................................... 121
    6.2.4.2. Run Resource Manager Configuration Change Report ................... 121
    6.2.4.3. Run Resource Manager Out of Compliance Data ................................ 122
    6.2.4.4. Run Resource Manager Out of Compliance Data Changes Report ........ 122

What's New
This release includes the following:

Enhancement
Use the TGInstall command to cycling of network servers

Fixes

Resource Manager
- Resource Manager now allows you to define exceptions for schemas that use object groups
- Resource Manager now allows object names with special characters (i.e., $, #, underscore (_), period (.) or @)
- Resource Manager compliance report now correctly display report data for similar schema names
- Resource Manager schema defined for object groups now allows you to define exceptions
- Alerting Message ID changed to RSC0001 (Resource Manager Compliance Alert)
- User-defined authorities are now permitted

Network Security
- SQL transaction statements over 512 bytes are now captured correctly
- When multiple *PUBLIC rules exist, the Decision Maker might now uses the correct rule to determine whether to pass or fail the transaction
- When multiple ports exist for the server (e.g., the Management Central server uses port 5544 and 5555), the socket rules now accept multiple rules for the same user
- During a fail, the DDM command transaction parser no longer returns the object and library values of *N
- The DDM file transaction collected no longer returns invalid characters following the file details
- Database transaction no longer returns the action status of *NORULE
- Database transaction no longer returns invalid object name with embedded double quote (") symbol
- Network exit no longer causes the CPU to spike due to opening and closing of CMN20010L2

Profile Management
- Alerting Message ID changed to PRF0001 (Blue Print Alert) and PRF0002 (Inactivity Alert)
1. Introduction

1.1. Historical Perspective of Security

Before we talk about what TGSecure is or does, let’s talk about where it fits. When the IBM® iSeries was introduced in 1988, client/server configurations and Internet-based networks were not widely used. At that time, iSeries servers were accessed through locally attached terminals. Security was controlled through the following structure:

- **Physical Security** - Restrict access by setting up the server in a secure computer room
- **User Authorities** - Restrict the user’s ability to execute i5/OS or user-defined commands
- **Object Authorities** - Restrict the user’s ability to execute commands on objects
- **Application Authorities** - Restrict the user’s ability to access data or commands

Times have changed, and many iSeries servers are accessed via remote connections, which requires additional security structure:

- **Remote Authorities** - Restricting remote client access

TGSecure provides tools to help you manage user, object, application, and remote access.

1.2. TGSecure Overview

TGSecure allows you to manage security threats on IBM® iSeries systems from both external and internal sources. In addition, it provides reports for monitoring the security health of your system.
**Note:** While you can use TGSecure as a standalone product, it is also one component of a powerful security suite. For more information about the suite or other products in the suite, go to TrinityGuard.com.

- **Getting Started Using TGSecure**

### 1.3. Features

To help you design, manage, and maintain a secure system, TGSecure includes the following product features:

#### Network Security

Network Security allows you to monitor remote requests (incoming transactions). The system performs this task by comparing incoming transactions with entry rules (i.e., socket and exit) and assigning each transaction a PASS or FAIL status based on those rules. The rules are evaluated using a decision algorithm.

- Manage Socket Rules
- Manage Exit Rules

#### Access Escalation Management

Access Escalation Management

Network Security

This feature allows you to monitor remote requests (incoming transactions). The system performs this task by comparing incoming transactions with entry rules (i.e., socket and exit) and assigning each transaction a PASS or FAIL status based on those rules. The rules are evaluated using a decision algorithm.

- Manage Socket Rules
- Manage Exit Rules

Access Escalation Management
This feature allows you to manage privilege escalated access using user entitlements.

- Manage Entitlements
- Manage Access Control

Reports
This feature allows you to monitor activities that impact system security using built-in and custom reports.

Note: See Manage Reports for more information.

Groups
This feature enhances your ability to quickly manage security using user, network, operation, or object groups.

Note: Groups are used in conjunction with user entitlements to manage privilege escalated access.

- Manage User Groups
- Manage Network Groups
- Manage Operations Groups
- Manage Object Groups

- Use TGSecure

1.4. Rules Decision Algorithm

The rules evaluation process used to manage network security is controlled through a decision-making algorithm, which coordinates a series of authority checks.

Check 1: Evaluate User
1) Apply rules for a specific user
2) Apply rules for a specific user group
3) Apply rules that apply to all users (*PUBLIC)
Check 2: Evaluate Network (Client Server)
1) Check rules for a specific client IP
2) Check rules for a generic IP (e.g., 11.111*)
3) Check rules for a network group
4) Check rules that apply to all networks (*ALL)

Check 3: Evaluate Operation
1) Check rules for a specific operation
2) Check rules for an operation group
3) Check rules that apply to all operations (*ALL)

Check 4: Evaluate Network (Target Server)
1) Check rules for a specific target IP
2) Check rules for a generic IP (e.g., 11.111*)
3) Check rules for network group
4) Check rules that apply to all networks (*ALL)

Check 5: Evaluate Object
1) Check rules for a specific object
2) Check rules for a generic object (e.g., /home/eve/*...)
3) Check rules for an object group
4) Check rules that apply to all objects (*ALL)

For information about how decisions are made regarding access escalation (the other main feature in the product), see Access Escalation Management.
For information about how to run reports, see Working with Reports.

1.5. Rules Suggestion Engine

Rules (i.e., exit rules or socket rules) are a power tool for managing network security, but to use rules efficiently, they must be used in conjunction with groups.
For example, if a new user is added to the system, and the security administrator determines that the user should have limited access, the administrator can easily create a rule defining the appropriate level of access for that individual, but that would be inefficient if the user was hired to fulfil a role shared by many. In that case, it would be more efficient to create a role-based rule that could be apply to a group of users.

Rule Example
Bob joins the company. Bob is provided with an IBM login. That morning, Bob logs into the system from a workstation set up in a training room for new hires. The administrator can see Bob's SIGNON transaction by viewing the list of incoming transactions. The administrator notices that in the evening Bob logs in again, but from a different client IP address. At this point in Bob's onboarding, he should only access the system while under the supervision of his mentor or trainer. Bob is not doing anything wrong, but he has the potential because of his lack of experience to cause harm. Therefore, the administrator decides to create a rule that limits Bob's access while he is completing his training.

Rule Suggestion Example
The administrator creates a rule limiting Bob's access and tries to save the rule, but the suggestion (intelligence) engine notifies the administrator that a similar rule already exists, and instead of creating a rule specific to Bob, the administrator should instead add Bob to a user group titled: Trainees that was created six months earlier for a group of new hires in a similar situation.

Rule Suggestion Interface
There's no way to directly access the rules suggestion engine. The interface appears at the time you save a new rule and only if the suggestion (intelligence) engine identifies a situation in which updating an existing user group or network group would be more efficient than creating a new rule.

Use TGSecure
2. Getting Started

2.1. Log into TGSecure

Use this task to log into TGSecure.

To log into TGSecure
1) Sign into your IBM i server.
2) At the Selection or command prompt, enter TGMENU.
3) Press Enter.

Note: The TG - Main menu is displayed.
4) At the Selection or command prompt, enter 2 (TGSecure).

Note: The TGSecure Main menu is displayed.

2.2. Getting Starting Using TGSecure

This topic discusses the following:
• Actions
• Process Flow
• Implementation Tasks

2.2.1. Actions

The following TGSecure features allow you to do the following:
• Network Security - Monitor incoming transactions and manage network security threats using rules (i.e., socket rules and exit rules)
• Access Escalation Management - Monitor and manage powerful-user activity and implement the least-privilege model using entitlements
• Reports - Generate reports to monitor network activity evaluate security health (i.e., pass/fail status)
• Groups - Create groups (i.e., user, network, operation, and object) to manage security more efficiently
2.2.2. Process Flow

Manage security more efficiently by creating and utilizing groups

2.2.3. Implementation Tasks

There is no single linear process for implementing TGSecure, but the following describes how a typical implementation might work. It’s important to remember that security management is an iterative process.

**Step 1** Monitor Network Access
To enhance security, you first need to understand who is accessing your network. The **Incoming Transactions** module of TGSecure allows you to display the incoming transactions requesting access and executing commands on the server.

**Step 2** Create Groups
With the vast number of elements that impact security, it might be necessary to group items together for efficiency.

For example, it might not be efficient to create an entitlement for each user. It would be more efficient to apply a single entitlement to a group of users. The same would hold true for a single rule being applied to a group of networks.

The **Grouping** module of TGSecure allows you to create groups for the following elements:

- **Users**
- **Networks**
- **Operations**
- **Objects**
Step 3  Manage Network Access
Once you have a better awareness of who and how your system is accessed and you have created what you feel are logical and useful groupings, you can begin limiting network access. The Exit Point and Socket Rules modules of TGSecure allows you to apply rules to manage network access:
- Application layer (exit rules)
- Transport layer (socket rules)

Step 4  Implement Least-privilege Model
Once the appropriate users have access to your system, you then want to ensure that these users have the appropriate level of authority to perform assigned tasks, but no more than that. The Access Escalation Management (AEM) module of TGSecure allows you to create entitlements to manage system access.

Step 5  Run Reports
Ensuring your server and system remain secure involves continuous and proactive monitoring. The Reporting module of TGSecure allows you to run built-in reports and create custom reports to monitor security health of your server and system.

Note: The built-in reports available to you are dependent on your license agreement.

Features
3. Network Security

3.1. Network Security

In the past, the risk related to network security was limited to internal networks and required limited security measures. With the advancement of technology and availability of open networks, security risks increased. To bridge the security gap caused by open networks, IBM introduced remote exit points, which are hooks that allow you to attach custom exit programs that monitor network traffic (server transactions). You can customize these exit programs not only to monitor, but also limit access with the addition of exit rules, which allow you to establish pass/fail criteria for transactions. The introduction of exit points addressed the security risks associated with many traditional protocols (e.g., FTP, TELNET, and ODBC, etc.), but exit points did not close the security gap completely. Newer protocols (i.e., SSH and SFTP) were introduced to address weaknesses in older protocols in which data was transmitted in clear text. While the newer protocols reduced some security risks, they also opened the door to other risks because they bypassed the established remote exit points, which reside at the application level, and instead used socket communication at the transaction level.

The socket level risk was addressed by IBM with IBM i version 7.1. at which point you could begin monitoring socket communications and applying socket rules.

To access the Network Security interface
1) Log into TGSecure.

Note: The Main menu appears.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.

Note: The Network Security interface is displayed.
3.2. **Network Security Defaults**

3.2.1. **Working with Network Security Default Settings**

This section describes working with network security defaults. Network security defaults define the following:

- Journal in which the network transactions are stored
- Library in which the journal resides
- Message queue in which to store alert data
- Library in which message queue resides
- Whether debugging is enabled (log is created)
- Whether auditing (data collection) is enabled
- Whether to enable alerts

In order to work with network security defaults, you must access the **Network Security Defaults** interface.

To access the **Network Security Defaults** interface

1) Log into TGSecure.

**Note:** The **Main** menu appears.

2) At the **Selection or command** prompt, enter 1 (Network Security).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter 11 (Network Security Defaults).
5) Press **Enter**.

**Note:** The **Network Security Defaults** interface is displayed.

Run Network Security Reports

### 3.2.2. Display Network Security Defaults

Use this task to display network security defaults.

**To display the network security defaults**

1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter **1** (Network Security).
3) Press **Enter**.

**Note:** The **Network Security** interface is displayed.

4) At the **Selection or command** prompt, enter **11** (Network Security Defaults).
5) Press **Enter**.

**Note:** The **Network Security Defaults** interface is displayed.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
</table>
| Audit Status      | Whether auditing is enabled globally (for all exit points). Auditing is required if you plan to run network security reports.  
                   | *YES* - Record incoming transaction data in the audit journal              |
|                   | *NO* - Do not record incoming transaction data in the audit journal         |
| **Tip:** If auditing is disabled at the network security (module) level, then auditing will not occur. The module level setting takes precedence. However, if auditing is enabled at the module level, you must also enable auditing at the secondary level (each exit point) if you want to record auditing data for a specific exit point.  See **Manage Exit Points** for information about setting the audit status for an individual exit point. |
| Audit Journal     | Journal in which to store network security audit data                       |
| **Note:**        | The default audit journal for TG products is TGJRN. This journal resides in the TGDATA library. |
| Audit Journal Library | Library in which the journal resides                                       |
| Audit Configuration Changes | Whether to collect data about network security changes  
                             | **Y** - Enable tracking of changes                                           |
|                   | **N** - Disable tracking of changes                                         |
| **Tip:**          | Set this flag to **Y** to if you plan to run network security change reports. |
| **Note:**         | There are multiple product modules (e.g., network security, access escalation, inactive session lockdown, etc.) in which you can track configuration changes. Therefore, if you see **NONE** in the comment field, this indicates that configuration changes are not being tracked in any module. This is common at the time the product is initially installed. If |

### 3.2.3. Manage Manager Network Defaults

Use this task to do the following:

- [Enable network security auditing](#)
- [Enable network security change auditing](#)
- [Enable network security alerts](#)
- [Enable network security debug log](#)
- [Enable TELNET auto sign on](#)

To manage network defaults, access the **Network Security Defaults** interface.

To access the with Network Security Defaults interface
1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter **1** (Network Security).
3) Press **Enter**.

**Note:** The **Network Security** interface is displayed.

4) At the **Selection or command** prompt, enter **11** (Network Security Defaults).
5) Press **Enter**.

**Note:** The **Network Security Defaults** interface is displayed.

### 3.2.3.1. Enable Network Security Auditing

Use this task to enable network security auditing.

**Tip:** Auditing is required if you plan to run network security reports.

**Note:** If auditing is disabled at the network security (module) level, then auditing will not occur. The module level setting takes precedence. However, if auditing is enabled at the module level, you must also enable it at the secondary level (each exit point) if you want to record auditing data for a specific exit point.

**To enable network security auditing**

1) Access the **Network Security Defaults** interface.
2) In the **Audit Status** field, enter **YES**.
3) In the **Audit Journal** field, enter the name of the journal in which to store the auditing data.
4) In the **Audit Journal Library** field, enter the name of the library in which the journal resides.
5) Press **Enter**.

**Note:** The default audit journal for TG products is TGJRN. This journal resides in the TGDATA library.

### 3.2.3.2. Enable Network Security Change Auditing

Use this task to enable tracking of network security configuration changes.

**Tip:** Tracking is required if you plan to run network security change reports.

**Note:** There are multiple product modules (e.g., network security, access escalation, inactive session lockdown, etc.) in which you can track configuration changes. Therefore, if you see *NONE* in the comment field, this indicates that configuration changes are not being tracked in any module. This is common at the time the product is initially installed. If you see *PARTIAL*, this indicates that configuration changes are being track in at least one module, but not all modules. If you see *ALL*, this indicates that configuration changes are being tracked in all modules.

**To enable network security configuration change tracking**

1) Access the **Network Security Defaults** interface.
2) In the **Audit Configuration Changes** field, enter **Y**.
3) Press **Enter**.

**Note:** There are multiple product modules (e.g., network security, access escalation, inactive session lockdown, etc.) in which you can track configuration changes. Therefore, if you see *NONE* in the comment field, this indicates that configuration changes are not being tracked in any module. This is common at the time the product is initially installed. If you see *PARTIAL*, this indicates that configuration changes are being track in at least one module, but not all modules. If you see *ALL*, this indicates that configuration changes are being tracked in all modules.

### 3.2.3.3. Enable Network Security Alerts

Use this task to enable network security alerts.

**Tip:** Alerting is required if you plan to send alert notifications.
**Note:** If alerts are disabled at the network security (module) level, then alerts are not stored in the message queue even if alerts are enabled at the exit point (secondary) level. The module level setting takes precedence. However, if alerts are enabled at the module level, you must also enable alerts at the secondary level if you want to record alerts for a specific exit point.

To enable network security alerts
1) Access the **Network Security Defaults** interface.
2) In the **Alert Status** field, enter *YES*.
3) In the **Alert Message Queue** field, enter the name of the queue in which to store the alerts.
4) In the **Alert Message Queue Library** field, enter the name of the library in which the queue resides.
5) Press **Enter**.

### 3.2.3.4. Enable Network Security Debug Log

Use this task to enable the network security debugging log.

**Note:** The debug log is not required but might help with troubleshoot issues.

To enable network security debugging log
1) Access the **Network Security Defaults** interface.
2) In the **Enable Debug** field, enter *YES*.
3) Press **Enter**.

### 3.2.3.5. Enable TELNET Auto Signon

Use this task to enable TELNET auto signon.

**Warning:** This feature must be maintained and monitored properly to avoid any security issues.

Enabling TELNET auto signon is a three-step process:

**Step 1.** Update the **QRMTSIGN** system value to enable TELNET auto signon

**Step 2.** Update the **Network Security Defaults** to enable TELNET auto signon

**Step 3.** Update the **Network Security Configuration** to include the TELNET exit program

**Step 1: To update the QRMTSIGN system value for TELNET auto signon**
1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter `WRKSYSVAL QRMTSIGN`.
3) Press **Enter**.

**Note:** The **Work with System Values** interface is displayed.

4) In the **Option** column beside the **QRMTSIGN** system value, enter **2** (Change).
5) Press **Enter**.

**Note:** The **Change System Value** interface is displayed.

6) In the **Remote sign-on control** field, enter *VERIFY*.
7) Press **Enter** twice.

**Step 2: Update the Network Security Defaults for TELNET auto signon**
1) Access the Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.
Note: The Network Security interface is displayed.
4) At the Selection or command prompt, enter 11 (Network Security Defaults).
5) Press Enter.
Note: The Network Security Defaults interface is displayed.
6) In the Telnet AutoSignon Allowed field, enter *YES.
7) Press Enter.

Step 3: Update the Network Security Configuration for TELNET auto signon
1) Access the Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.
Note: The Network Security interface is displayed.
4) At the Selection or command prompt, enter 10 (Exit Point Configuration).
5) Press Enter.
Note: The Network Security Configuration interface is displayed.
2) In the OPT column beside the *TELNET network server, enter 11 (Add Exit Program).
3) Press Enter.
Note: Once an exit program is installed, you will see *YES in the Exit Inst? column for the exit point.

3.2.4. Run Network Security Reports

Use this task to generate network security reports.

Note: Refer to the TGSecure Report Reference for a complete list of report definitions.

To run the Network Security Reports
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (Network Reports).
5) Press Enter.
6) At the Selection or command prompt, enter the category (e.g., 1, 2, 3, 4) of report type you want to run.
7) Press Enter.
8) Choose the desired report from the list.
9) Press Enter.

3.3. Transactions

3.3.1. Working with Transactions

This section describes how to work with transactions. Remote transactions access the server through either a socket or exit point. The transaction can go directly from the client to the server through a socket unless an associated exit point has been defined. In which case, the system then checks for both socket and exit point rules before allowing access to the server.

For example, a user might attempt to access the system via the socket layer using FTP. If a socket rule exists for the FTP transactions, the system will validate that any socket rule criteria is met before allowing the FTP transaction. IBM has also established a standard exit point for FTP transactions, so any FTP transaction must also go through a second layer of security. The system will validate that any exit rules criteria is met before allowing the FTP transaction. Therefore, depending on the protocol used (e.g., FTP, SFTP, etc.), a transaction might go through both socket and exit point validation.

In order to work with incoming transactions, you must access the Incoming Transactions interface.

To access the Incoming Transactions interface
1) Log into to TGSecure.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.

Note: The **Network Security** interface is displayed.

4) At the **Selection or command** prompt, enter 1 (Incoming Transactions).

5) Press Enter.

Note: The **Incoming Transactions** interface is displayed.

- Run Socket (*SOC) Reports

### 3.3.2. **Display List of Incoming Transactions**

Use this task to do the following with **transactions**:

- Display list of transactions
- Sort transactions
- Move to a specific location within list of displayed transactions
- Filter transactions

#### 3.3.2.1. Display List

Use this task to display the list of incoming transactions.

To display the list of incoming transactions

1) Access the TGSecure **Main menu**.
2) At the **Selection or command** prompt, enter 1 (Network Security).
3) Press Enter.

Note: The **Network Security** interface is displayed.

4) At the **Selection or command** prompt, enter 1 (Incoming Transactions).

5) Press Enter.

Note: The **Incoming Transactions** interface is displayed.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tran Type</td>
<td>There are two types of transactions:</td>
</tr>
<tr>

</tbody>
</table>
### Field Description

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
</table>
| SSL?  | Whether SSL is enabled:  
*YES* - SSL enabled  
*NO* - SSL disabled  
*N/A* - SSL Communication is not applicable |
| Client IP | IP address of the server initiating the transaction |
| Tran. Count | Total number of transactions attempted  
**Note:** The incoming transactions displayed in the interface are determined by the Collector Status.  
**Tip:** See Manage Exit Points for information about editing the Collector Status. |
| Object Details | Object effected by the transaction |
| Timestamp | Time at which the transaction was received |

### 3.3.2.2. Sort List

Use this task to sort the list. The column on which the list is currently sorted appears in white text. For example, by default, the list is originally sorted by the **User** column so that column heading initially appears in white text.

**To sort the list**

1) Access the Incoming Transactions interface.  
2) Place your cursor on the desired column heading.  
3) Press the **F10** (Sort) function key.  

**Tip:** The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click **F10** again.

### 3.3.2.3. Move to Position in List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

**To move to a specific position within the list**

1) Access the Incoming Transactions interface.  
2) Sort the list based on the desired column heading.  
3) Place your cursor in the **Position to** field, and enter a letter, word, phrase, or number.  
4) Press **Enter**.  

**Note:** The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

### 3.3.2.4. Filter List

Use this task to limit the objects displayed in the list by defining a subset for filtering purposes.  

**Tip:** Use wildcard asterisk (*) to help define your subset.
To filter the list using a subset

1) Access the **Incoming Transactions** interface.
2) Press the **F8** (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press **Enter**.

**Note:** The system filters the results based on the criteria you defined for the subset.

---

### 3.3.3. Manage Incoming Transactions

Use this task to do the following with incoming transactions:

- Display incoming transactions details
- Delete an incoming transaction
- Archive and then delete incoming transactions
- Create a security rule based on the transaction
- Accept rule suggestion

To manage incoming transactions, access the **Incoming Transactions** interface.

**To access the Incoming Transactions interface**

1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter **1** (Network Security).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter **1** (Incoming Transactions).
5) Press **Enter**.

**Note:** The **Incoming Transactions** interface is displayed.

### 3.3.3.1. Display Incoming Transaction Details

Use this task to display the transaction details. There is limited space in the **Incoming Transactions** interface, so not all the details associated with an incoming transaction are displayed. Therefore, this task allows you to see the complete details for each incoming transaction.

**To display the incoming transaction details**

1) Access the **Incoming Transactions** interface.
2) In the **OPT** column for the desired transaction, enter **5** (Display).
3) Press **Enter**.
### Field Description

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>

</tr>
</tbody>
</table>

### 3.3.3.2. Delete Incoming Transaction

Use this task to delete transactions.

Usage examples:

- You find that a specific transaction adds no value to your analysis
- You want to see what effect a new rule has on transactions from a specific client server
- You want to see what effect a new rule has on transactions for a specific user

To delete an incoming transaction

1) Access the Incoming Transactions interface.  
2) In the OPT column for the desired transaction, enter 4 (Delete).  
3) Press Enter.  
4) Review the record to ensure you are deleting the correct transaction.  
5) Press Enter.

### 3.3.3.3. Archive Incoming Transactions

Use this task to delete all transactions older than a specified date. You also have the option to create an archive before deleting the transactions. This is useful if you need to restore the list of transactions at a later point.
Usage examples:

- You want to delete older transactions to see what new transaction are coming in.
- You want to perform a transaction count.

For example, the customer might state that the product is running slowly. Therefore, you clear (delete) the transactions to get a better picture of what is occurring on the server. You discover that the customer is running hundreds of thousands of connections per second just to read one file. This is very inefficient and the transaction counts helps show this.

To archive incoming transactions

1) Access the Incoming Transactions interface.
2) Press the F16 (Archive/Delete Transactions) function key.

Tip: For function keys higher than F12, you must use a combination of the Shift key and the appropriate function key. For example, to select F16, you must hold down the Shift key and F4.

3) Enter the age (in days) of the transactions you want to keep.

Note: For example, enter 1 to keep all transaction for today, but delete all transaction older than 1 day.

4) Enter *YES to create an archive before deleting the transactions.

3.3.3.4. Create a Rule Based on a Transaction

Use this task to create a security rule to address a security risk identified in your analysis of incoming transactions. For example, while you are reviewing the list of incoming transaction, you might identify suspicious activity coming from a server. You can quickly create a security rule (e.g., socket or exit rule) to block transactions from that server directly from the Incoming Transactions interface.

To create a security rule based on a transaction

1) Access the Incoming Transactions interface.
2) In the OPT column for the desired transaction, enter 1 (Create).

Note: The Tran Type field identifies the type of transaction: SOC = socket and TRN = exit point transaction. The screen the appears next is dependent on the type of transaction. The Create Rule - Socket screen appears when you are creating a socket rule and the Create Rule - Exit screen appears when you are creating an exit rule.

3) Press Enter.
4) Enter the necessary parameters to define your rule.
5) Press the F23 (Accept Rule) function key.

Tip: For function keys higher than F12, you must use a combination of the Shift key and the appropriate function key. For example, to select F23, you must hold down the Shift key and F11.

6) Press Enter.

Note: At this point, you might receive suggestions from the Rules Suggestion Engine. For example, instead of creating a new rule for a specific user, it might be more efficient to add the user to an existing user group thereby reducing the total number of rules that must be managed. This same concept applies to network groups (client or server) as well.

Tip: If you decide to accept a suggestion, but then change your mind, in the OPT column for the desired rule, enter 6 (Undo Suggestion). Note: The opportunity the undo a suggestion is only available during the current session. Once you exit the session (press F3 or F12), the option to undo the suggestion is lost. Any change after the point must be made manually by updating the group(s).
3.3.3.5. Accept a Rule Suggestion

Use this task to accept a suggestion made by the Rules Suggestion Engine. The intelligence engine provides suggestion when it might be more efficient to update a group versus create a new rule. In other words, a rule might already exist that utilizes a group, and instead of creating a new rule specific to an individual user, it might be more efficient to add the user to an existing user group that is reference by an existing rule. Therefore, a new rule is not created. Instead an existing user group is updated.

Note: You will only see the Rule Suggestion interface when the intelligence engine finds an opportunity to better utilize existing groups.

Tip: You can press 12 (Cancel) to reject any suggestions and exit the Rule Suggestion interface at any time.

To accept a rule suggestion

Obviously, the suggestions provided by the intelligence engine will vary depending on the situation, but expect to see one of the following variations:

<table>
<thead>
<tr>
<th>Situation</th>
<th>If...</th>
<th>Then...</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>The intelligence engine provides one suggestion.</td>
<td>In the Opt column, enter 1 to acknowledge acceptance of the suggestion, and then press Enter to exit the Rule Suggestion interface.</td>
</tr>
<tr>
<td>2</td>
<td>The intelligence engine provides multiple suggestions from which you can select. For example, for socket rules, you could add the user to a user group, or you could add the client IP to a network group, or you could add the server name to a network group. In addition, for exit rules, operation can be added to operation groups, and object can be added to object groups.</td>
<td>In the Opt column, enter 1 beside the suggestion you feel is the most appropriate for your situation, and then press Enter to exit the Rule Suggestion interface.</td>
</tr>
<tr>
<td>3</td>
<td>Multiple groups must be modified in combination. In other words, to eliminate the need for the new rule, you must update a user group and a network group in combination. Therefore, in this situation, multiple groups are modified simultaneously.</td>
<td>Press F23 (Confirm Adding to Group), and then press Enter to exit the Rule Suggestion interface.</td>
</tr>
<tr>
<td>4</td>
<td>You want to reject any and all suggestions.</td>
<td>Press 12 (Cancel) to exit the Rule Suggestion interface.</td>
</tr>
</tbody>
</table>

Tip: Use option 6 (Undo Suggestion) from the Incoming Transactions interface to undo your selection. Once you exit the session (press F3 or F12), the ability to undo a suggestion is lost.

3.3.4. Run Transactions (*TRN) Report

Use this task to generate reports that display the following for incoming transactions:

- Incoming transaction details
- Incoming transaction summary by server
- Incoming transaction summary by user
- Network transaction details

Note: Refer to the TGSecure Report Reference for a complete list of report definitions.

To work with exit point reports, access from the Network Reports interface.

3.3.4.1. Access the Network Reports Interface

To access the Access Escalation Reports interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (Network Reports).
5) Press Enter.

Note: The Network Reports interface is displayed.

3.3.4.2. Run Incoming Transaction Details

Use this report to display incoming transaction details.

To run the Incoming Transactions Details Report

1) Access the Network Reports interface.
2) At the Selection or command prompt, enter 1 (Transaction Reports).
3) Press Enter.
4) At the Selection or command prompt, enter 1 (Incoming Transactions Report).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report when you generate it.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

3.3.4.3. Run Transaction Summary by Server Report

Use this report to display incoming transaction details by server.

To run the Transaction Summary by Server Report
1) **Access** the **Network Reports** interface.
2) At the **Selection or command** prompt, enter 2 (Summary Reports).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter 3 (Transaction Summary by Server).
5) Press **Enter**.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report when you generate it.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press **Enter**.

**Note:** The status of the report is displayed at the bottom of the screen.

### 3.3.4.4. Run Transaction Summary by User Report

Use this report to display incoming transaction details by user.

To run the Transaction Summary by User Report

1) **Access** the **Network Reports** interface.
2) At the **Selection or command** prompt, enter 2 (Summary Reports).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter 4 (Transaction Summary by User).
5) Press **Enter**.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report when you generate it.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press **Enter**.

**Note:** The status of the report is displayed at the bottom of the screen.

### 3.3.4.5. Run Network Transaction Report

Use this report to display network transaction.

To run the Network Transaction Report

1) **Access** the **Network Reports** interface.
2) At the **Selection or command** prompt, enter 1 (Transaction Reports).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter 3 (Network Transaction Report).
5) Press **Enter**.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report when you generate it.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.
7) Enter the desired output format in the **Report output type** field.
8) Press **Enter**.

**Note:** The status of the report is displayed at the bottom of the screen.

**See also:**
- Working with Transactions
- Working with Reports

### 3.3.5. Run Socket Transaction (*SOC) Reports

Use this task to generate reports that display the following for socket rules.
- Socket transactions details
- Socket summary by server
- Socket summary by user

**Note:** Refer to the TGSecure Report Reference for a complete list of report definitions.

To work with socket transaction reports, access from the **Network Reports** interface.

#### 3.3.5.1. Access the Network Reports Interface

To access the Access Escalation Reports interface

1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter **1** (Network Security).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter **20** (Network Reports).
5) Press **Enter**.

**Note:** The **Network Reports** interface is displayed.

#### 3.3.5.2. Run Socket Transaction Report

Use this report to display the socket transaction details.

To run the Socket Transaction Report

1) **Access** the **Network Reports** interface.
2) At the **Selection or command** prompt, enter **1** (Transaction Reports).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter **2** (Socket Transactions Report).
5) Press **Enter**.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see **Run Reports**.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press **Enter**.
3.3.5.3. Run Socket Summary by Server Report

Use this report to display socket transaction details by server.

To run the Socket Summary by Server Report

1. Access the Network Reports interface.
2. At the Selection or command prompt, enter 2 (Summary Reports).
3. Press Enter.
4. At the Selection or command prompt, enter 1 (Socket Summary by Server).
5. Press Enter.
6. Modify the run criteria as necessary.

Note: The status of the report is displayed at the bottom of the screen.

3.3.5.4. Run Transaction Summary by User Report

Use this report to display socket transaction details by user.

To run the Transaction Summary by User Report

1. Access the Network Reports interface.
2. At the Selection or command prompt, enter 2 (Summary Reports).
3. Press Enter.
4. At the Selection or command prompt, enter 2 (Socket Summary by User).
5. Press Enter.
6. Modify the run criteria as necessary.

Note: The status of the report is displayed at the bottom of the screen.

3.4. Exit Points

3.4.1. Working with Exit Points

This section describes working with exit points. In the beginning of computing, the risk related to network security was limited to internal networks and required limited security measures. With the advancement of technology and with the increase in availability of open networks, security risks have increased. To bridge the security gap caused by open networks, IBM introduced remote exit points, which are hooks that allow you to attach custom exit programs that evaluate exit rules, which define the criteria used to determine whether a transaction should be allowed or rejected.

Analogy

The prior paragraph uses a lot of jargon, so here is an analogy to help you conceptualize what an exit point represents. Say that your IBM server is a building. In the past, if someone wanted to access your building, they would just walk to it. Then, at some point, people started riding horses, and then bicycles, and then cars. To accommodate these newer forms of transportation, IBM built a parking lot. In the parking lot, they provided spots (points): a hitching rail for the horses, a bicycle rack for the bikes, and painted parking slots for the cars. You can image exit points as the elements in a parking lot that accommodate the different modes of transportation. So now image your exit program as a vehicle (a car) that you can park in an exit point (parking spot). Your vehicle (exit program) carries in it passengers (exit rules). Once an exit program is parked in an exit point, the rules (passengers) associated with that exit program become linked to the exit point.

Client-Server Communication Process via transport layer:

1. **Exit Point (Parking Spot):** An exit point is a point in the network communication process between a client and a server where control is turned over to an exit program if an exit program exists.

2. **Exit Program (Car):** An exit programs can be created for each type of network communication (FTP, ODBC, JDBC, SQL, etc.). Exit programs control execution of transactions between a client and a server.

3. **Exit Rule (Passenger):** An exit rule defines the criteria by which an exit program determines whether a transaction is allowed or rejected (forbidden).

Note: It's not necessary to manually associate an exit rule to an exit program. That happens programatically, but it is necessary to associate an exit program to an exit point. In other words, you must install (add) a program to a point, and the program (once installed) searches through the list of available exit rules to determine which rules should be applied.
In order to work with exit points, you must access the **Network Security Configuration** interface.

### To access the Network Security Configuration interface

1. Log into TGSecure.
   **Note:** The **TGSecure Main** menu appears.
2. At the **Selection or command** prompt, enter **1** (Network Security).
3. Press **Enter**.
   **Note:** The **Network Security** interface is displayed.
4. At the **Selection or command** prompt, enter **10** (Exit Point Configuration).
5. Press **Enter**.
   **Note:** The **Network Security Configuration** interface is displayed.

### See also

- [Display List of Exit Points](#)
- [Manage Exit Points](#)
- [Run Exit Points Report](#)

#### 3.4.2. Display List of Exit Points

Use this task to display the list of **exit points**.

### To display the list of exit points

1. Access the TGSecure **Main** menu.
2. At the **Selection or command** prompt, enter **1** (Network Security).
3. Press **Enter**.
   **Note:** The **Network Security** interface is displayed.
4. At the **Selection or command** prompt, enter **10** (Exit Point Configuration).
5. Press **Enter**.
   **Note:** The **Network Security Configuration** interface is displayed.

**Tip:** Each row in the display represents an exit point. If **YES** appears in the **Exit Inst?** column, that indicates that an exit program is installed at that exit point.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>

</thead>
<tbody>
<tr>
<td></td>
<td>precedence. However, if auditing is enabled at the module level, you must also enable alerting at the secondary level if you want to record auditing data for a specific exit point. <strong>Note:</strong> See Manage Network Security Defaults for information about enabling/disabling auditing globally.</td>
</tr>
</tbody>
</table>
| Sec Status | Whether security is enabled for a specific exit point. Once you enable security, the exit rules associated with the exit point go into effect. *YES - Apply exit rules (enable network security)*  
*NO - Disable exit rules (disable network security)* |
| Alert Status | Whether alerting is enabled for a specific exit point. Alerts are required if you plan to send alert notifications  
*ALL - Record an alert for all (PASS and FAIL) connection attempts*  
*FAIL - Record only FAIL connection attempts*  
*NONE - Do not record alerts*  
**Tip:** If alerts are disabled at the module level, then this setting is ignored. In other words, if alerts are disabled at the network security (module) level, then alerts are not stored in the message queue even if alerts are enabled at the exit point (secondary) level. The module level setting takes precedence. However, if alerts are enabled at the module level, you must also enable alerts at the secondary level if you want to record alerts for a specific exit point. See Manage Network Security Defaults for information about enabling/disabling alerting globally. |
| Smart Mode | Whether the smart mode (Rules Intelligence Engine) is enabled  
*YES - Enable the intelligence engine to create rules based on AI (artificial intelligence) analysis of incoming transactions*  
*NO - Do not enable the intelligence engine to create rules*  
**Note:** The system administrator can delete rules created by the Rules Intelligence Engine at any time. |
| Collector Status | Which incoming transactions you want to track (collect) in the Incoming Transaction interface  
*ALL - Collect and display all (PASS and FAIL) incoming transactions*  
*FAIL - Collect and display only rejected (FAIL) incoming transactions*  
*NONE - Do not collect or display any incoming transactions* |
| Function Usage | Whether an IBM function usage rule is being applied at the exit point. This indicator is important because it helps to identify conflicts between exit rules and function usage rules. If there is a conflict (e.g., an exit rule states to do one thing, but a function usage rule states to do something different), then the system might produce an unexpected outcome.  
*YES - A function usage rule is applied at the exit point, so the potential for conflict with an exit rule exists*  
*NO - No function usage rule is applied at the exit point*  
*NA - Not applicable because IBM does not provide a function usage rule for this exit point* |
| Exit Inst? | Whether the exit point is installed on the server  
*YES - Exit points are installed and ready for use*  
*NO - Exit points are not installed* |
### 3.4.3. Manage Exit Points

Use this task to do the following with exit points.

- Display exit point details
- Enable exit point auditing
- Enable exit point security
- Enable exit point alerts
- Enable exit point incoming transaction collection
- Add an exit program to exit point
- Remove an exit program from an exit point
- Cycle (restart) a server
- Cycle multiple servers (mass update)
- Update all exit points (mass update)

To manage exit points, access the Work with Network Security Configuration interface.

#### To access the Work with Network Security Configuration

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.

Note: The Network Security interface is displayed.

4) At the Selection or command prompt, enter 10 (Exit Point Configuration).
5) Press Enter.

Note: The Network Security Configuration interface is displayed.

### 3.4.3.1. Display Exit Point Details

Use this task to display the details (definition) for a specific exit point. There is limited space in the Network Security Configuration interface, so not all the details associated with an exit point are displayed. Therefore, this task allows you to see the complete details for each exit point.

#### To display exit point details

1) Access the Network Security Configuration interface.
2) In the OPT column for the desired exit point, enter 5 (Display).
3) Press Enter.
<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Network Server</td>
<td>Name of the server type</td>
</tr>
<tr>
<td>Exit Point</td>
<td>Name assigned to the exit point</td>
</tr>
<tr>
<td>Exit Format</td>
<td>IBM format associated with the exit point</td>
</tr>
<tr>
<td>Exit Description</td>
<td>Description of the exit point</td>
</tr>
<tr>
<td>Exit Program</td>
<td>Indicates whether the exit point is installed on the server</td>
</tr>
<tr>
<td>Exit Program</td>
<td>*YES - Exit points are installed and ready for use</td>
</tr>
<tr>
<td>Exit Program</td>
<td>*NO - Exit points are not installed</td>
</tr>
</tbody>
</table>

Note: The exit rules associated with the exit point are not applied until the exit point is installed and the Security Status is set to *YES.

| Exit Program     | Indicates whether an IBM function usage rule is being applied at the exit point |
| Exit Program     | *YES - A function usage rule is applied at the exit point, so the potential for conflict with an exit rule exists |
| Exit Program     | *NO - No function usage rule is applied at the exit point                    |
| Exit Program     | *NA - Not applicable because IBM does not provide a function usage rule for this exit point |

| Function Usage Rule | Indicates whether auditing is enabled for a specific exit point. Auditing is required if you plan to run network security reports |
| Function Usage Rule | *YES - Record incoming transaction data in the audit journal |
| Function Usage Rule | *NO - Do not record incoming transaction data in the audit journal |

Tip: If auditing is disabled at the module level, then this setting is ignored. In other words, if auditing is disabled at the network security (module) level, then auditing will not occur even if auditing is enabled at the exit point (secondary) level. The module level setting takes precedence. However, if auditing is enabled at the module level, you must also enable alerting at the secondary level if you want to record auditing data for a specific exit point. Note: See Manage Network Security Defaults for information about enabling/disabling auditing globally.

| Audit Status      | Indicates whether security is enabled for a specific exit point. Once you enable security, the exit rules associated with the exit point go into effect. |
| Audit Status      | *YES - Apply exit rules (enable network security) |
| Audit Status      | *NO - Disable exit rules (disable network security) |

| Security Status   | Indicates whether alerts are enabled for a specific exit point. Alerts are required if you plan to send alert notifications |
| Security Status   | *ALL - Record an alert for all (PASS and FAIL) connection attempts |
| Security Status   | *FAIL - Record only FAIL connection attempts |
| Security Status   | *NONE - Do not record alerts |

Tip: If alerts are disabled at the module level, then this setting is ignored. In other words, if alerts are disabled at the network security (module) level, then alerts are not stored in the message queue even if alerts are enabled at the exit point (secondary) level. The module
<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
</table>
| Smart Mode        | Indicates whether the smart mode (Rules Intelligence Engine) is enabled  
*YES - Enable the intelligence engine to create rules based on AI (artificial intelligence) analysis of incoming transactions  
*NO - Do not enable the intelligence engine to create rules  
**Note**: The system administrator can delete rules created by the Rules Intelligence Engine at any time. |
| Collector Status  | Indicates which incoming transactions you want to track (collect) in the Incoming Transaction interface  
*ALL - Collect and display all (PASS and FAIL) incoming transactions  
*FAIL - Collect and display only rejected (FAIL) incoming transactions  
*NONE - Do not collect or display any incoming transactions |

### 3.4.3.2. Enable Exit Point Auditing

Use this task to enable auditing of incoming transactional data for a specific exit point. Auditing is required if you plan to run network security reports.

**Prerequisite**

Auditing must be enabled in the Network Security Module. See Manage Network Security Defaults.

**To enable auditing for an exit point**

1. Access the Network Security Configuration interface.
2. In the OPT column for the desired exit point, enter 2 (Edit).
3. Press Enter.
4. In the Audit Status field, enter *YES.
5. Press Enter.

### 3.4.3.3. Enable Exit Point Security

Use this task to enable security for a specific exit point. Once you enable security, the exit rules associated with the exit point go into effect.

**Prerequisite**

Create the exit rules you want to apply. See Manage Exit Rule.

**Tip**: Ensure that your rules provide the appropriate level of user access. If you fail to design your rules properly, you might block legitimate users from performing necessary work transactions.

**To enable security for an exit point**

1. Access the Network Security Configuration interface.
2. In the OPT column for the desired exit point, enter 2 (Edit).
3. Press Enter.
4) In the Security Status field, enter *YES.
5) Press Enter.

3.4.3.4. Enable Exit Point Alerts
Use this task to enable alerts for a specific exit point. Alerts are required if you plan to send alert notifications.

Prerequisite
Alerts must be enabled in the Network Security module, see Manage Network Security Defaults.

To enable alerts for an exit point
1) Access the Network Security Configuration interface.
2) In the OPT column for the desired exit point, enter 2 (Edit).
3) Press Enter.
4) In the Alert Status field, enter one of the following:
   – *ALL - Record an alert for all (PASS and FAIL) connection attempts
   – *FAIL - Record only FAIL connection attempts
5) Press Enter.

3.4.3.5. Enable Exit Point Collection
Use this task to enable the collection of incoming transactions for a specific exit point in the Incoming Transaction interface.

To enable incoming transaction collection for an exit point
1) Access the Network Security Configuration interface.
2) In the OPT column for the desired exit point, enter 2 (Edit).
3) Press Enter.
4) In the Alert Status field, enter one of the following:
   – *ALL - Collect and display all (PASS and FAIL) incoming transactions
   – *FAIL - Collect and display only rejected (FAIL) incoming transactions
5) Press Enter.

3.4.3.6. Add Exit Program to Exit Point
Use this task to add (install) an exit program to a single exit point. The system provides pre-built exit programs for each of the established IBM exit points. You have control of whether to add (install) a pre-built exit program to an exit point. The exit programs are what house the exit rules.

Note: It’s not necessary to manually associate an exit rule to an exit program. That happens programmatically, but it is necessary to associate an exit program to an exit point. In other words, you must install (add) a program to a point, and the program (once installed) searches through the list of available exit rules to determine which rules should be applied.

To add exit program to exit point
1) Access the Network Security Configuration interface.
2) In the OPT column for the desired exit point, enter 11 (Add Exit Program).
3) Press Enter.

Note: Once an exit program is installed at an exit point, you will see *YES in the Exit Inst? column for the exit point.
3.4.3.7. Add Exit Programs to Exit Points (Mass Update)

Use this task to add (install) exit programs to multiple exit points.

**Note:** Once complete, you will see *YES* in the Exit Inst? column for all modified exit points.

**To add an exit programs to exit points**

1. Access the Network Security Configuration interface.
2. Press the F20 (Add Exit Programs) function key.

**Tip:** For function keys higher than F12, you must use a combination of the Shift key and the appropriate function key. For example, to select F20, you must hold down the Shift key and F8.

3. Enter *All* to add all exit points to an exit program or enter a specific server type.
4. Press Enter.

3.4.3.8. Remove Exit Program from Exit Point

Use this task to remove exit program from single exit point.

**Note:** Once the exit program is uninstalled, you will see *NO* in the Exit Inst? column for the modified exit point.

**To remove an exit program from exit point**

1. Access the Network Security Configuration interface.
2. In the OPT column for the desired exit point, enter 12 (Remove Exit Program).
3. Press Enter.

3.4.3.9. Remove Exit Programs from Exit Points (Mass Update)

Use this task to remove (uninstall) exit programs to multiple exit points.

**Note:** Once complete, you will see *NO* in the Exit Inst? column for all modified exit points.

**To remove an exit programs from exit points**

1. Access the Network Security Configuration interface.
2. Press the F21 (Remove Exit Programs) function key.

**Tip:** For function keys higher than F12, you must use a combination of the Shift key and the appropriate function key. For example, to select F21, you must hold down the Shift key and F9.

3. Enter *All* to remove all exit programs or enter a specific server type.
4. Press Enter.

3.4.3.10. Cycle Server

Use this task to restart a single server. Cycling a server is useful when you add an exit program and you want to ensure that the exit rule(s) associated with that program are applied immediately (including to transactions currently running.) For example, there might be pre-start jobs that are running. In order for a new rule(s) to be applied to the pre-start jobs, the jobs must be stopped and restarted (cycled) for the new exit rule(s) to take effect.
To cycle a single server

1) Access the Network Security Configuration interface.
2) In the OPT column for the desired exit point, enter 13 (Cycle Server).
3) Press Enter.
4) Ensure that the correct server is selected.
5) Enter one of the following options:
   – Y - Initiate cycling immediately (run in interactive mode)
   – N - Place cycling request in queue (run as part of a job queue)
6) Press Enter.

3.4.3.11. Cycle Servers (Mass Update)

Use this task to restart multiple servers.

To cycle multiple servers

1) Access the Network Security Configuration interface.
2) Press the F19 (Cycle Servers) function key.

**Tip:** For function keys higher than F12, you must use a combination of the Shift key and the appropriate function key. For example, to select F19, you must hold down the Shift key and F7.

3) Enter *All to cycle all servers or identify a specific server type.
4) Enter Y to execute the cycling immediately or N to add it a batch.
5) Press Enter.

3.4.3.12. Update all Exit Points (Mass Update)

Use this task to perform a mass update of all exit points.

To update all exit points

1) Access the Network Security Configuration interface.
2) Press the F7 (Update all) function key.
3) Modify the setting as necessary.

**Note:** All editable settings are underlined.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Audit Status</td>
<td>Indicates whether auditing is enabled. Auditing is required if you plan to run network security reports.</td>
</tr>
<tr>

<tr>
<td></td>
<td>*YES - Apply exit rules for all installed exit points</td>
</tr>
<tr>
<td></td>
<td>*NO - Do not apply exit rules for all installed exit points</td>
</tr>
</tbody>
</table>
### Field Description

**Alert Status**
- *SAME* - Do not perform a mass update of the Security Status. In other words, skip this setting during the mass update.
- Indicates whether alerting is enabled. Alerting is required if you plan to send alert notifications.
- *ALL* - Record an alert for all (PASS and FAIL) connection attempts
- *FAIL* - Record only FAIL alerts for all installed exit points
- *NONE* - Do not record alerts for all installed exit points
- *SAME* - Do not perform a mass update of the Alert Status. In other words, skip this setting during the mass update.
- **Tip:** See [Manage Network Security Defaults](#) for information about enabling alerting globally. Global defaults take precedence over local settings.

**Smart Mode**
- Indicates whether the smart mode (Rules Intelligence Engine) is enabled
- *YES* - Enable the intelligence engine to create rules based on AI (artificial intelligence) analysis of incoming transactions
- *NO* - Do not enable the intelligence engine to create rules
- *SAME* - Do not perform a mass update of the Smart Mode. In other words, skip this setting during the mass update.

**Collector Status**
- Indicates which incoming transactions are tracked (collect) in the Incoming Transaction interface.
- *ALL* - Collect and display all (PASS and FAIL) connection attempts
- *FAIL* - Collect and display only FAIL connection attempts
- *NONE* - Do not collect or display any connection attempts
- *SAME* - Do not perform a mass update of the Collector Status. In other words, skip this setting during the mass update.

4) Press **Enter**.

[Working with Exit Point](#)

### 3.4.4. Run Exit Points Report

Use this task to generate reports that display the following for **exit points**:
- Exit point configuration details
- Exit point configuration changes

**Note:** Refer to the TGSecure Report Reference for a complete list of report definitions.

To work with exit point reports, access from the Network Reports interface.

#### 3.4.4.1. Access the Network Reports Interface

To access the Access Escalation Reports interface

1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter 1 (Network Security).
3) Press Enter.
4) At the **Selection or command** prompt, enter 20 (Network Reports).
5) Press Enter.

**Note:** The **Network Reports** interface is displayed.

### 3.4.4.2. Run Exit Point Configuration Report

Use this report to display exit point configuration details for **exit points**.

**To run the Exit Point Configuration Report**

1) **Access** the **Network Reports** interface.
2) **At the Selection or command** prompt, enter 3 (Configuration Reports).
3) Press Enter.
4) At the **Selection or command** prompt, enter 3 (Exit Point Configuration Report).
5) Press Enter.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see **Run Reports**.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press Enter.

**Note:** The status of the report is displayed at the bottom of the screen.

### 3.4.4.3. Run Exit Point Configuration Changes Report

Use this report to display the list of configuration changes made to exit points.

**Tip:** You must enable auditing to produce change reports. See **Manage Network Security Defaults** for additional information.

**To run the Exit Point Configuration Change Report**

1) **Access** the **Network Reports** interface.
2) **At the Selection or command** prompt, enter 4 (Configuration Changes).
3) Press Enter.
4) **At the Selection or command** prompt, enter 3 (Exit Point Configuration Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see **Run Reports**.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press Enter.

**Note:** The status of the report is displayed at the bottom of the screen.
3.5. **Socket Rules**

3.5.1. **Working with Socket Rules**

This section describes working with socket rules. Socket rules allow you to address security risks associated with newer protocols (e.g., SFTP and SSH), which are not covered by exit rules at the application level. The newer protocols were designed to address weakness in older protocols (e.g., FTP, TELNET, ODBC, and SQL) in which data was transmitted in clear text. While the newer protocols reduced some security risks, they opened the door to others. The newer protocols use socket communication at the transaction level, and in some cases might allow users to bypass security established using exit rules at the application level.

**Example Usage:**

A rule might be created to reject an incoming transaction (connection) to the server listening on a specific port or coming from a particular remote IP address after business hours (6pm - 6am).

---

In order to work with socket rules, you must access the Work with Socket Rules interface.

**To access the Work with Socket Rules interface**

1) Log into TGSecure.  
*Note:* The Main menu appears.  
2) At the Selection or command prompt, enter 1 (Network Security).  
3) Press Enter.  
*Note:* The Network Security interface is displayed.  
4) At the Selection or command prompt, enter 2 (Socket Rules).  
5) Press Enter.  
*Note:* The Work with Socket Rules interface is displayed.

See also  
[Log into TGSecure](#)
3.5.2. Display List of Socket Rules

Use this task to do the following with socket rules:

- Display list of socket rules
- Sort socket rules
- Move to a specific location within list of socket rules
- Filter socket rules

3.5.2.1. Display List

Use this task to display the list of socket rules.

To display the list of socket rules

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.
4) At the Selection or command prompt, enter 2 (Socket Rules).
5) Press Enter.

Note: The Network Security interface is displayed.

Note: The Work with Socket Rules interface is displayed.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User</td>
<td>User or user group that initiated the transaction</td>
</tr>
<tr>
<td>Operation Port</td>
<td>Port from which the transaction was initiated</td>
</tr>
<tr>
<td>Client IP</td>
<td>IP address from which the transaction was initiated</td>
</tr>
<tr>
<td>Calendar</td>
<td>Applicable calendar</td>
</tr>
<tr>
<td>Alert Status</td>
<td>Whether alerting is enabled:</td>
</tr>
<tr>
<td></td>
<td>*YES - Alerts enabled</td>
</tr>
<tr>
<td></td>
<td>*NO - Alerts disabled</td>
</tr>
<tr>
<td>Action</td>
<td>The level at which action was taken:</td>
</tr>
<tr>
<td></td>
<td>*EXITLVL - Exit point level</td>
</tr>
<tr>
<td></td>
<td>Note: If the action failed, you will see *FAIL in this column.</td>
</tr>
</tbody>
</table>

3.5.2.2. Sort List

Use this task to sort the list. The column on which the list is currently sorted appears in white text. For example, by default, the list is originally sorted by the User column so that column heading initially appears in white text.

To sort the list
1) Access the Work with Socket Rules interface.
2) Place your cursor on the desired column heading.
3) Press the F10 (Sort) function key.

**Tip:** The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click F10 again.

### 3.5.2.3. Move to Position in List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down to locate a network.

**To move to a specific position within the list**

1) Access the Work with Socket Rules interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the Position to field, and enter a letter, word, phrase, or number.
4) Press Enter.

**Note:** The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

### 3.5.2.4. Filter List

Use this task to limit the objects displayed in the list by defining a subset for filtering purposes.

**Tip:** Use wildcard asterisk (*) to help define your subset.

-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.
-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.
-- Add asterisks around text (e.g., *report*) to find list items that contain specific text anywhere in the name.

**To filter the list using a subset**

1) Access the Work with Socket Rules interface.
2) Press the F8 (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press Enter.

**Note:** The system filters the results based on the criteria you defined for the subset.

**See also**

- Working with Socket Rules
- Manage Socket Rules

### 3.5.3. Manage Socket Rules

Use this task to do the following with socket rules:

- Add a socket rule
- Edit a socket rule
- Copy a socket rule
- Delete a socket rule
To manage socket rules, access the Work with Socket Rules interface.

**To access the Work with Socket Rules interface**

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.

*Note:* The Network Security interface is displayed.

4) At the Selection or command prompt, enter 2 (Socket Rules).
5) Press Enter.

*Note:* The Work with Socket Rules interface is displayed.

### 3.5.3.1. Add Socket Rule

Use this task to add a socket rule.

**Tip:** You can define a socket rule for an individual user, network, or operation, and you can define them for groups of users, networks, or operations.

**To add a socket rule**

1) Access the Work with Socket Rules interface.
2) Press the F6 (Add) function key.
3) Define the rule using the fields provided.

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

4) Press Enter.

*Note:* At this point, you might receive suggestions from the system. For example, instead of creating a new rule for a specific user, it might be more efficient to add the user to an existing user group thereby reducing the total number of rules that must be managed. This same concept applies to network groups (client or server) as well.

**See also**

- Rules Suggestion Engine
- Rules Decision Engine
- Manage User Groups
- Manage Socket Rules
- Manage Exit Rules

### 3.5.3.2. Edit Socket Rule

Use this task to edit an existing socket rule.

**To edit a socket rule**
1) Access the Work with Socket Rules interface.
2) In the OPT column for the desired socket rule, enter 2 (Edit).
3) Press Enter.
4) Modify the parameters as necessary.
   Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.
5) Press Enter twice.

### 3.5.3.3. Copy Socket Rule

Use this task to create a new rule by copying a socket rule.

**To copy a socket rule**

1) Access the Work with Socket Rules interface.
2) In the OPT column for the desired socket rule, enter 3 (Copy).
3) Press Enter.
4) Modify the parameters as necessary.
   Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.
5) Press Enter.

### 3.5.3.4. Delete Socket Rule

Use this task to delete a socket rule.

**To delete a socket rule**

1) Access the Work with Socket Rules interface.
2) In the OPT column for the desired socket rule, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct rule.
5) Press Enter.

### 3.5.3.5. Display List of Users in a Group

Use this task when the User Name field contains a user group. You can access the user group at this point to display its details or modify the group.

**Tip:** Group names always begin with a colon.

**To display the list of users**

1) Access the Work with Socket Rules interface.
2) In the OPT column for the desired socket rule, enter 6 (User Grp).
3) Press Enter.
4) Review the list of users.
   Tip: You can modify the user group at this point as well.
3.5.3.6. Display List of Clients in a Group

Use this task when Client IP field contains a network group. You can access the network group at this point to display its details or modify the group.

**Tip:** Group names always begin with a colon.

**To display the list of clients**

1) Access the Work with Socket Rules interface.
2) In the OPT column for the desired socket rule, enter 7 (Client Grp).
3) Press Enter.
4) Review the list of clients.

**Tip:** You can modify the network group at this point as well.

3.5.3.7. Display List of Servers in a Group

Use this task when the Server Name field contains a network group. You can access the network group at this point to display its details or modify the group.

**Tip:** Group names always begin with a colon.

**To display the list of servers**

1) Access the Work with Socket Rules interface.
2) In the OPT column for the desired socket rule, enter 8 (Server Grp).
3) Press Enter.
4) Review the list of servers.

**Tip:** You can modify the network group at this point as well.

3.5.3.8. Display List of Operations in a Group

Use this task when the Operation/Port field contains an operation group. You can access the operation group at this point to display its details or modify the group.

**Tip:** Group names always begin with a colon.

**To display the list of operations**

1) Access the Work with Socket Rules interface.
2) In the OPT column for the desired socket rule, enter 9 (Opr. Grp).
3) Press Enter.
4) Review the list of operations.

**Tip:** You can modify the operation group at this point as well.

**See also**

[Working with Socket Rules](#)

3.5.4. Run Socket Rule Reports

Use this task to generate reports that display the following for socket rules.
3.5.4.1. Access the Network Reports Interface

To access the Access Escalation Reports interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.

Note: The Network Security interface is displayed.

4) At the Selection or command prompt, enter 20 (Network Reports).
5) Press Enter.

Note: The Network Reports interface is displayed.

3.5.4.2. Run Socket Rule Configuration Report

Use this report to display socket rule configuration details.

To run the Socket Rule Configuration Report

1) Access the Network Reports interface.
2) At the Selection or command prompt, enter 3 (Configuration Reports).
3) Press Enter.
4) At the Selection or command prompt, enter 2 (Socket Rules Report).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

3.5.4.3. Run Socket Rule Configuration Changes Report

Use this report to display the list of configuration changes made to socket rules.

Tip: You must enable auditing to produce change reports. See Manage Network Security Defaults for additional information.

To run the Socket Rule Configuration Changes Report

1) Access the Network Reports interface.
2) At the Selection or command prompt, enter 4 (Configuration Changes).
3) Press Enter.
4) At the Selection or command prompt, enter 2 (Socket Rules Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

3.6. Exit Rules

3.6.1. Working with Exit Rules

This section describes working with exit rules. Exit rules control network traffic associated with a specific application level communication protocol (i.e., FTP, TELNET, and ODB).

Example Usage:

You might need a rule to reject all incoming transaction (connection) initiated by a specific user or member of a user group.

Client-Server Communication Process via transport layer:

(1) Exit Point: An exit point is a point in the network communication process between a client and a server where control is turned over to an exit program if an exit program exists.

(2) Exit Program: An exit programs can be created for each type of network communication (FTP, ODBC, JDBC, SQL, etc.). Exit programs control execution of transactions between a client and a server.

(3) Exit Rule: An exit rule defines the criteria by which an exit program determines whether a transaction is allowed or forbidden.
In order to work with exit rules, you must access the **Work with Exit Rules** interface.

**To access the Work with Exit Rules interface**

1) Log into TGSecure.  
   **Note**: The **Main** menu appears.
2) At the **Selection or command** prompt, enter **1** (Network Security).
3) Press **Enter**.  
   **Note**: The **Network Security** interface is displayed.
4) At the **Selection or command** prompt, enter **3** (Remote Exit Rules).
5) Press **Enter**.  
   **Note**: The **Work with Exit Rules** interface is displayed.

**See also**

- [Run Exit Rule Reports](#)

### 3.6.2. Display List of Exit Rules

Use this task to do the following with exit rule:

- Display list of exit rules
- Sort exit rules
- Move to a specific location within list of exit rules
- Filter exit rules

#### 3.6.2.1. Display List

Use this task to display the list of exit rules.

To display the list of exit rules
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter **1** (Network Security).
3) Press **Enter**.

**Note:** The **Network Security** interface is displayed.

4) At the Selection or command prompt, enter **3** (Remote Exit Rules).
5) Press **Enter**.

**Note:** The **Work with Exit Rules** interface is displayed.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User</td>
<td>User or user group that initiated the transaction</td>
</tr>
<tr>
<td>Server</td>
<td>Server from which the transaction was initiated</td>
</tr>
<tr>
<td>Function</td>
<td>Function that was initiated</td>
</tr>
<tr>
<td>Client IP</td>
<td>IP address from which the transaction was initiated</td>
</tr>
<tr>
<td>Calendar</td>
<td>Applicable calendar</td>
</tr>
<tr>
<td>Alert Status</td>
<td>Whether alerting is enabled:</td>
</tr>
<tr>
<td></td>
<td>*YES - Alerts enabled</td>
</tr>
<tr>
<td></td>
<td>*NO - Alerts disabled</td>
</tr>
<tr>
<td>Action</td>
<td>The level at which action is taken:</td>
</tr>
<tr>
<td></td>
<td>*EXITLVL - Exit point level</td>
</tr>
<tr>
<td>Object Details</td>
<td>Short description of the object to which access was attempted</td>
</tr>
</tbody>
</table>

### 3.6.2.2. Sort List

Use this task to sort the list. The column on which the list is currently sorted appears in white text. For example, by default, the list is originally sorted by the **User** column so that column heading initially appears in white text.

**To sort the list**

1) Access the **Work with Exit Rules** interface.
2) Place your cursor on the desired column heading.
3) Press the **F10** (Sort) function key.

**Tip:** The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click **F10** again.

### 3.6.2.3. Move to Position in List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down to locate a network.

**To move to a specific position within the list**

1) Access the **Work with Exit Rules** interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the Position to field, and enter a letter, word, phrase, or number.
4) Press Enter.

Note: The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

3.6.2.4. Filter List

Use this task to limit the objects displayed in the list by defining a subset for filtering purposes.

Tip: Use wildcard asterisk (*) to help define your subset.

-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.
-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.
-- Add asterisks around text (e.g., *report*) to find list items that contain specific text anywhere in the name.

To filter the list using a subset
1) Access the Work with Exit Rules interface.
2) Press the F8 (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press Enter.

Note: The system filters the results based on the criteria you defined for the subset.

See also
Working with Exit Rules
Manage Exit Rules

3.6.3. Manage Exit Rules

Use this task to do the following with exit rule:

- Add an exit rule
- Edit an exit rule
- Copy an exit rule
- Delete an exit rule
- Display list of users
- Display list of client networks
- Display list of server networks
- Display list of operations
- Display list of objects

To manage exit rules, access the Work with Exit Rules interface.

To access the Work with Exit Rules interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.

Note: The Network Security interface is displayed.
4) At the **Selection or command** prompt, enter 3 (Remote Exit Rules).
5) Press **Enter**.

**Note:** The **Work with Exit Rules** interface is displayed.

### 3.6.3.1. Add Exit Rule

Use this task to add an exit rule.

**To add an exit rule**

1) Access the **Work with Exit Rules** interface.
2) Press the **F6** (Add) function key.
3) Define the rule using the fields provided.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.
4) Press **Enter**.

**Note:** At this point, you might receive suggestions from the system. For example, instead of creating a new rule for a specific user, it might be more efficient to add the user to an existing **user group** thereby reducing the total number of rules that must be managed. This same concept applies to network groups (client or server), object groups, and operations groups as well.

**See also**

### 3.6.3.2. Edit Exit Rule

Use this task to edit an existing exit rule.

**To edit an exit rule**

1) Access the **Work with Exit Rules** interface.
2) In the **OPT** column for the desired exit rule, enter **2** (Edit).
3) Press **Enter**.
4) Modify the parameters as necessary.
5) Press **Enter** twice.

### 3.6.3.3. Copy Exit Rule

Use this task to create a new rule by copying an existing rule.

**To copy an exit rule**

1) Access the **Work with Exit Rules** interface.
2) In the **OPT** column for the desired exit rule, enter **3** (Copy).
3) Press **Enter**.
4) Modify the parameters as necessary.

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

5) Press **Enter**.

### 3.6.3.4. Delete Exit Rule

Use this task to delete an exit rule.

**To delete an exit rule**

1) Access the **Work with Exit Rules** interface.
2) In the **OPT** column for the desired exit rule, enter 4 (Delete).
3) Press **Enter**.
4) Review the record to ensure you are deleting the correct rule.
5) Press **Enter**.

### 3.6.3.5. Display List of Users

Use this task when the exit rule definition includes a user group in the **User Name** field. You can access the user group at this point to display its details or modify the group.

**Tip:** Group names always begin with a colon.

**To display the list of users**

1) Access the **Work with Exit Rules** interface.
2) In the **OPT** column for the desired exit rule, enter 6 (User Grp).
3) Press **Enter**.
4) Review the list of users.

**See also**

- Manage Users
- Manage User Groups
- Working with Exit Rules

### 3.6.3.6. Display List of Clients

Use this task when the exit rule definition includes a network group in the **Client IP** field. You can access the network group at this point to display its details or modify the group.

**Tip:** Group names always begin with a colon.

**To display the list of clients**

1) Access the **Work with Exit Rules** interface.
2) In the **OPT** column for the desired exit rule, enter 7 (Client Grp).
3) Press **Enter**.
4) Review the list of clients.

3.6.3.7. Display List of Servers
Use this task when the exit rule definition includes a network group in the Server Name field. You can access the network group at this point to display its details or modify the group.

Tip: Group names always begin with a colon.

To display the list of servers
1) Access the Work with Exit Rules interface.
2) In the OPT column for the desired exit rule, enter 8 (Server Grp).
3) Press Enter.
4) Review the list of servers.

See also
Manage Networks
Manage Network Groups
Working with Exit Rules

3.6.3.8. Display List of Operations
Use this task when the exit rule definition includes an operation group in the Operation/Port field. You can access the operation group at this point to display its details or modify the group.

Tip: Group names always begin with a colon.

To display the list of operations
1) Access the Work with Exit Rules interface.
2) In the OPT column for the desired exit rule, enter 9 (Opr. Grp).
3) Press Enter.
4) Review the list of operations.

See also
Manage Operations
Manage Operation Groups
Working with Exit Rules

3.6.3.9. Display List of Objects
Use this task when the exit rule definition includes an object group in the Object Details field. You can access the object group at this point to display its details or modify the group.
Tip: Group names always begin with a colon.

To display the list of objects
1) Access the Work with Exit Rules interface.
2) In the OPT column for the desired exit rule, enter 10 (Obj. Grp).
3) Press Enter.
4) Review the list of operations.

See also
Manage Objects
Manage Object Groups
Working with Exit Rules

3.6.4. Run Exit Rule Reports

Use this task to generate reports that display the following for exit rules:
- Exit rule configuration details
- Exit rule configuration changes

Note: Refer to the TGSecure Report Reference for a complete list of report definitions.

To work with socket rule reports, access from the Network Reports interface.

3.6.4.1. Access the Network Reports Interface

To access the Access Escalation Reports interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.

Note: The Network Security interface is displayed.
4) At the Selection or command prompt, enter 20 (Network Reports).
5) Press Enter.

Note: The Network Reports interface is displayed.

3.6.4.2. Run Exit Rule Configuration Report

Use this report to display exit rule configuration details.

To run the Exit Rule Configuration Report
1) Access the Network Reports interface.
2) At the Selection or command prompt, enter 3 (Configuration Reports).
3) Press Enter.
4) At the Selection or command prompt, enter 1 (Remote Exit Rules Report).
5) Press Enter.
6) Modify the run criteria as necessary.
Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

3.6.4.3. Run Exit Rule Configuration Changes Report

Use this report to display the list of configuration changes made to exit rules.

Tip: You must enable auditing to produce change reports. See Manage Network Security Defaults for additional information.

To run the Exit Point Configuration Changes Report

1) Access the Network Reports interface.
2) At the Selection or command prompt, enter 4 (Configuration Changes).
3) Press Enter.
4) At the Selection or command prompt, enter 1 (Remote Exit Rules Changes).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

4. Access Escalation Management

4.1. Access Escalation Management

Security threats are not exclusive to rogue users attempting to access your network from outside sources. Threats can also arise from within (unintentional or intentional). For example, you might have a user who is granted more access than necessary and that user might unintentionally perform a transaction that has negative system-wide implications. One way to reduce internal threats is to ensure that your users have appropriate, role-based access, but situations might arise that require a user to perform a task that is outside of his/her access authority. To address such cases, you can create an entitlement, which the user can execute within the Access Escalation Management (AEM) interface. An entitlement allows a user to perform a specific task (as defined by the entitlement) using the privileges of a swap user (as defined by the entitlement).

To access the Access Escalation Management interface

1) Log into TGSecure.

Note: The Main menu appears.

2) At the Selection or command prompt, enter 2 (Access Escalation Management).

3) Press Enter.

Note: The Access Escalation Management interface is displayed.

Run Access Escalation Reports
4.2. Access Escalation Defaults

4.2.1. Working with Access Escalation Management Defaults

This section describes working with Access Escalation Management (AEM) defaults. These defaults apply to all entitlements unless otherwise defined.

Access escalation defaults allow you to define the following:

- Default swap user
- How long an AEM session will last before requiring the user to reenter a password
- Journal in which to store AEM changes
- Library in which to store AEM changes
- Whether to enable auditing of AEM changes
- Queue in which to store AEM user alerts
- Queue library in which to store AEM user alerts

In order to use the access escalation manager, you must access the Work with Access Escalation interface.

To access the Work with Access Escalation interface

1) Log into TGSecure.
   Note: The Main menu appears.
2) At the Selection or command prompt, enter 2 (Access Escalation Management).
3) Press Enter.
   Note: The Access Escalation Management interface is displayed.
4) At the Selection or command prompt, enter 10 (Access Escalation Defaults).
5) Press Enter.
   Note: The Work with Access Escalation interface is displayed.

Working with Access Escalation

4.2.3. Manage Access Escalation

Use this task to do the following:
To manage access escalation, access the **Work with Access Escalation** interface.

**To access the Work with Access Escalation interface**

1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter 2 (Access Escalation Management).
3) Press **Enter**.

**Note**: The **Access Escalation Management** interface is displayed.

4) At the **Selection or command** prompt, enter 10 (Access Escalation Defaults).
5) Press **Enter**.

**Note**: The **Work with Access Escalation** interface is displayed.

### 4.2.3.1. Modify Access Escalation Defaults

Use this task to modify the exiting access escalation defaults. These defaults determine the following:

- Which journal to monitor
- Where to store the alerts
- Whether to collect data about access escalation changes (This flag must be set to **Y** to if you plan to run change reports.)

**To modify access escalation defaults**

1) Access the **Work with Access Escalation** interface.
2) Modify the parameters as necessary.

**Tip**: Place your cursor in a field and press **F1** (Help) to access a field description or press **F4** (Prompt) for a list of valid options.

3) Press **Enter** twice.

### 4.2.3.2. Enable Access Escalation Change Auditing

Use this task to enable tracking of access escalation configuration changes.

**Tip**: Tracking is required if you plan to run access escalation change reports.

**To enable access escalation configuration change tracking**

1) Access the **Work with Access Escalation** interface.
2) In the **Audit Configuration Changes** field, ensure the flag is set to **Y** (Yes).
3) Press **Enter** twice.

**Note**: There are multiple product modules (e.g., network security, access escalation, inactive session lockdown, etc.) in which you can track configuration changes. Therefore, if you see **NONE** in the comment field, this indicates that configuration changes are not being tracked in any module. This is common at the time the product is initially installed. If you see **PARTIAL**, this indicates that configuration changes are being track in at least one module, but not all modules. If you see **ALL**, this indicates that configuration changes are being tracked in all modules.
4.2.4. Run Access Escalation Reports

Use this task to generate access escalation reports.

**Note:** Refer to the TGSecure Report Reference for a complete list of report definitions.

**To run the Access Escalation Reports**

1) Access the TGSecure **Main** menu.
2) At the Selection or command prompt, enter 2 (Access Escalation Management).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (Access Escalation Reports).
5) Press Enter.
6) At the Selection or command prompt, enter the category (e.g., 1, 2, 3) of report type you want to run.
7) Press Enter.
8) Choose the desired report from the list.
9) Press Enter.

**See also:**

*Working with Access Escalation*

*Working with Reports*

4.3. Entitlements

4.3.1. Working with Entitlements

This section describes working with entitilements. Entitlements allow a user to borrow the access rights of a higher-privileged user (swap user) temporarily to execute an activity on an object.

**Tip:** A user can execute entitlements only from within the Access Escalation Management (AEM) interface. The system administrator can limit who has access to the AEM interface, which provides an additional layer of security.

**Usage Example:** Say your company has a day-shift and a night-shift administrator. In this scenario, the night administrator’s only high-level task is creating a daily system backup. Instead of granting the night-shift administrator the same privileges as the day-shift administrator, you could create an entitlement that allows the night-shift administrator to perform the evening backup. In other words, this entitlement allows you to implement a privilege model that reduces your security exposure.
In order to work with entitlements, you must access the **Work with Entitlements** interface.

**To access the Work with Entitlements interface**

1) Log into TGSecure.  
   *Note:* The **Main** menu appears.
2) At the **Selection or command** prompt, enter **2** (Access Escalation Management).
3) Press **Enter**.
   
   *Note:* The **Access Escalation Management** interface is displayed.
4) At the **Selection or command** prompt, enter **1** (Work with Entitlements).
5) Press **Enter**.
   
   *Note:* The **Work with Entitlements** interface is displayed.

**To access the AEM interface**

1) At the **Selection or command** prompt, enter **TGACCMGR**.
2) Press **Enter**.

   *Note:* The **AEM** interface is displayed.

### 4.3.2.2. Sort List

Use this task to sort the list. The column on which the list is currently sorted appears in white text. For example, by default, the list is originally sorted by the **User** column so that column heading initially appears in white text.

**To sort the list**

1) Access the **Work with Entitlements** interface.
2) Place your cursor on the desired column heading.
3) Press the **F10** (Sort) function key.

**Tip:** The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click **F10** again.

### 4.3.2.3. Move to Position in List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.
To move to a specific position within the list

1) Access the **Work with Entitlements** interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the **Position to** field, and enter a letter, word, phrase, or number.
4) Press **Enter**.

**Note**: The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

4.3.2.4. Filter List

Use this task to limit the entitlement displayed in the list by defining a subset for filtering purposes.

**Tip**: Use wildcard asterisk (*) to help define your subset.

-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.

-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.

-- Add asterisks around text (e.g., *report*) to find list items that contain specific text anywhere in the name.

To filter the list using a subset

1) Access the **Work with Entitlements** interface.
2) Press the **F8** (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press **Enter**.

**Note**: The system filters the results based on the criteria you defined for the subset.

**See also**

[Working with Entitlements](#)

[Manage Entitlements](#)

4.3.3. **Manage Entitlements**

Use this task to do the following with **entitlements**:

- **Add entitlements**
- **Edit entitlements**
- **Copy entitlements**
- **Delete entitlements**

To manage entitlements, access the **Work with Entitlements** interface.

**To access the Work with Entitlements interface**

1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter **1** (Network Security).
3) Press **Enter**.

**Note**: The **Access Escalation Management** interface is displayed.

4) At the **Selection or command** prompt, enter **1** (Work with Entitlements).
5) Press **Enter**.
Note: The **Work with Entitlements** interface is displayed.

### 4.3.3.1. Add Entitlement

Use this task to add an entitlement. The entitlement parameters (e.g., object, library, server, etc.) you define allow you to control the access-level for a user or a use group at a granular level.

**To add entitlement**

1) Access the **Work with Entitlement** interface.
2) Press the **F6** (Add) function key.
3) Enter the parameters necessary to define the entitlement.

**Note:** Most parameters require a name. If you see a + sign next to the field, you may enter a group. Press **F4** (Prompt) for a list available groups.

**Tip:** Press **F1** (Help) to access field descriptions.

<table>
<thead>
<tr>

</table>

4) Press **Enter** twice.
4.3.3.2. Edit Entitlement

Use this task to edit an entitlement.

To edit entitlement
1) Access the Work with Entitlement interface.
2) In the OPT column for the desired entitlement, enter 2 (Edit).
3) Press Enter.
4) Modify the parameters as necessary.

Tip: Place your cursor in a field and press F1 (Help) to access a field description or press F4 (Prompt) for a list of available groups.

5) Press Enter twice.

4.3.3.3. Copy Entitlement

Use this task to copy an entitlement. This is a fast way to create a new entitlement based on an existing entitlement.

To copy entitlement
1) Access the Work with Entitlement interface.
2) In the OPT column for the desired entitlement, enter 3 (Copy).
3) Press Enter.
4) Modify the parameters as necessary.

Tip: Place your cursor in a field and press F1 (Help) to access a field description or press F4 (Prompt) for a list of available groups.

5) Press Enter.

4.3.3.4. Delete Entitlement

Use this task to delete an entitlement.

To delete entitlement
1) Access the Work with Entitlement interface.
2) In the OPT column for the desired group, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct entitlement.
5) Press Enter.

See also
Working with Entitlements

4.3.4. Run Entitlement Reports

Use this task to generate reports that display the following for entitlements:

- Entitlement usage details
• Entitlement configuration details
• Entitlement configuration changes

Note: Refer to the TGSecure Report Reference for a complete list of report definitions.
To work with entitlement reports, access from the Access Escalation Reports interface.

4.3.4.1. Access the Access Escalation Reports Interface

To access the Access Escalation Reports interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 2 (Access Escalation Management).
3) Press Enter.

Note: The Access Escalation Management interface is displayed.

4) At the Selection or command prompt, enter 20 (Access Escalation Reports).
5) Press Enter.

Note: The Access Escalation Reports interface is displayed.

4.3.4.2. Run Entitlement Usage Report

Use this report to display entitlement usages details.

To run the Entitlement Usage Report

2) At the Selection or command prompt, enter 1 (Access Escalation Usage Reports).
3) Press Enter.
4) At the Selection or command prompt, enter 5 (Entitlement Usage).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

4.3.4.3. Run Entitlement Configuration Report

Use this report to display entitlement configuration details.

To run the Entitlement Configuration Report

2) At the Selection or command prompt, enter 2 (Access Escalation Configuration Reports).
3) Press Enter.
4) At the Selection or command prompt, enter 3 (Entitlements).
5) Press Enter.
6) Modify the run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see [Run Reports](#).

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press Enter.

**Note:** The status of the report is displayed at the bottom of the screen.

### 4.3.4.4. Run Entitlement Configuration Changes Report

Use this report to display the list of configuration changes made to entitlements.

**Tip:** You must enable auditing to produce change reports. See [Enable AEM Change Auditing](#) for additional information.

**To run the Entitlement Configuration Changes Report**

2) At the **Selection or command** prompt, enter 3 (Access Escalation Change Reports).
3) Press Enter.
4) At the **Selection or command** prompt, enter 3 (Entitlements Changes).
5) Press Enter.
6) Modify the run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see [Run Reports](#).

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press Enter.

**Note:** The status of the report is displayed at the bottom of the screen.

### 4.4. Access Control

#### 4.4.1. Working with Access Control

This section describes how to grant or revoke access to the Access Escalation Management (AEM) interface. The AEM interface is the tool from which a user can execute an entitlement.

The tasks described in this section apply to both users and user groups.
Tip: Until the administrator adds the first user (or user group), all users have access to the AEM interface. Once the first user is explicitly granted access, then only the administrator and the user(s) who have been granted access control can access the AEM interface.

In order to work with access controls, you must access the Work with Access Control interface.

To access the Work with Access Control interface
1) Log into TGSecure.
Note: The Main menu appears.
2) At the Selection or command prompt, enter 2 (Access Escalation Management).
3) Press Enter.
Note: The Access Escalation Management interface is displayed.
4) At the Selection or command prompt, enter 3 (Work with Access Control).
5) Press Enter.
Note: The Work with Access Control interface is displayed.

See also
Log into TGSecure
Display Who Has Access Control
Manage Access Control
Run Access Control Reports
Execute and Entitlement Using the AEM Interface

4.4.2. Display Who Has Access to the AEM Interface
Use this task to do the following with the Access Escalation Management (AEM) interface:

- Display list of users who have authority to use the AEM interface
- Sort users
- Move to a specific position within list of users
- Filter users

4.4.2.1. Display List
Use this task to display the list of users (including user groups).
To display the list of users who have access control

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 4 (Access Escalation Management).
3) Press Enter.

Note: The Access Escalation Management interface is displayed.

4) At the Selection or command prompt, enter 3 (Work with Access Control).
5) Press Enter.

Note: The Work with Access Control interface is displayed.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User</td>
<td>User or user group to which the entitlement applies</td>
</tr>
<tr>
<td>Client IP</td>
<td>IP address from which the transaction was initiated</td>
</tr>
</tbody>
</table>

4.4.2.2. Sort List

Use this task to sort the list. The column on which the list is currently sorted appears in white text. For example, by default, the list is originally sorted by the User column so that column heading initially appears in white text.

To sort the list

1) Access the Work with Access Control interface.
2) Place your cursor on the desired column heading.
3) Press the F10 (Sort) function key.

Tip: The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click F10 again.

4.4.2.3. Move to Position in List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

To move to a specific position within the list

1) Access the Work with Access Control interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the Position to field, and enter a letter, word, phrase, or number.
4) Press Enter.

Note: The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

4.4.2.4. Filter List

Use this task to limit the entitlement displayed in the list by defining a subset for filtering purposes.

Tip: Use wildcard asterisk (*) to help define your subset.

-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.
-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.
To filter the list using a subset

1) Access the Work with Access Control interface.
2) Press the F8 (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press Enter.

Note: The system filters the results based on the criteria you defined for the subset. Type topic text here.

See also

Working with Access Control

4.4.3. Manage Access Control

Use this task to do the following:

- **Add access control**
- **Edit access control**
- **Copy access control**
- **Delete access control**

To manage access control, access the Work with Access Control interface.

To access the Work with Access Control interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 4 (Access Escalation Management).
3) Press Enter.

Note: The Access Escalation Management interface is displayed.

4) At the Selection or command prompt, enter 3 (Work with Access Control).
5) Press Enter.

Note: The Work with Access Control interface is displayed.

4.4.3.1. Add Access Control

Use this task to add access control for a user/user group. Once added, they are granted access to the AEM interface.

**Tip:** Until the first user is added, all users can access the AEM interface. Once the first user is added, only an administrator and the user(s) who have been granted access control (added) can access the AEM interface.

1) Access the Work with Access Control interface.
2) Press the F6 (Add) function key on your keyboard.
3) Enter the parameters necessary to define the control.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User Name</td>
<td>User or <a href="https://example.com">user group</a> to which the entitlement applies</td>
</tr>
<tr>
<td>Client IP</td>
<td>IP address from which the transaction was initiated</td>
</tr>
</tbody>
</table>
Note: Most parameters require a name. If you see a + sign next to the field, you may enter a group. Press F4 (Prompt) for a list available groups.
Tip: Press F1 (Help) to access field descriptions.
4) Press Enter twice.

4.4.3.2. Edit Access Control
Use this task to modify an exiting access control record.

To edit entitlement
1) Access the Work with Access Control interface.
2) In the OPT column for the desired access control record, enter 2 (Edit).
3) Press Enter.
4) Modify the parameters as necessary.
Tip: Place your cursor in a field and press F1 (Help) to access a field description or press F4 (Prompt) for a list of valid entries.
5) Press Enter twice.

4.4.3.3. Copy Access Control
Use this task to create a new access control record based on an existing access control record.

To copy access control
1) Access the Work with Access Control interface.
2) In the OPT column for the user control record you want to copy, enter 3 (Copy).
3) Press Enter.
4) Modify the parameters as necessary.
Tip: Place your cursor in a field and press F1 (Help) to access a field description or press F4 (Prompt) for a list of valid entries.
5) Press Enter.

4.4.3.4. Delete Access Control
Use this task to delete an access control record.

To delete entitlement
1) Access the Work with Entitlement interface.
2) In the OPT column for the desired group, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the right user.
5) Press Enter.

See also
Working with Access Control
4.4.4. Run Access Control Reports

Use this task to generate the following reports:

- Access control configuration details
- Access control configuration changes

Note: Refer to the TGSecure Report Reference for a complete list of report definitions.

To work with access control reports, access from the Access Escalation Reports interface.

4.4.4.1. Access the Escalation Reports interface

To access the Access Escalation Reports interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 2 (Access Escalation Management).
3) Press Enter.

Note: The Access Escalation Management interface is displayed.

4) At the Selection or command prompt, enter 20 (Access Escalation Reports).
5) Press Enter.

Note: The Access Escalation Reports interface is displayed.

4.4.4.2. Run Access Control Configuration Report

Use this report to display the users who have access to the AEM interface.

To run the Access Control Configuration Report

2) At the Selection or command prompt, enter 2 (Access Escalation Configuration Reports).
3) Press Enter.
4) At the Selection or command prompt, enter 4 (Access Controls).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

4.4.4.3. Run Access Control Change Report

Use this report to display the list of configuration changes made to access control. In other words, which users have been added or delete.

Tip: You must enable auditing to produce change reports. See Enable AEM Change Auditing for additional information.
To run the Access Control Change Report

2) At the Selection or command prompt, enter 3 (Access Escalation Change Reports).
3) Press Enter.
4) At the Selection or command prompt, enter 4 (Access Control Changes).
5) Press Enter.
6) Modify the run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

**Note:** The status of the report is displayed at the bottom of the screen.

### 4.4.5. Execute an Entitlement Using the AEM Interface

Use this task to access the Access Escalation Management (AEM) interface and execute an entitlement (which allows the users to borrow the privileges of a swap profile).

The following requirements must be met for a user to access the AEM interface and execute a task (e.g., download a highly sensitive HR document) using a swap profile:

**Requirement 1:** The user must have access to the AEM interface.

**Requirement 2:** An entitlement must be defined for the user.

**Requirement 3:** The criteria in the entitlement must be met.

**Requirement 4:** A user with appropriate privileges to perform the task must be identified as the swap user within the entitlement.

**Tip:** If you are unable to access the AEM interface, contact your system administrator and request that an access control record be added for your user profile.

To access the AEM interface

1) At the Selection or command prompt, enter TGACCMGR.
2) Press Enter.
3) Enter the program/command you want to execute.
4) Enter the appropriate swap profile.  
**Note:** This is the user who has the privilege to perform the command/program you are attempting to execute.

5) Enter your user password (for some entitlements this is optional).

6) Enter a description for why you are performing this task.

7) Press **Enter**.

### 4.5. File Editor

#### 4.5.1. Working with File Editor

This section describes working with the **File Editor** tool. The file editors are third-party commands used to modify files (objects). These commands might be used in conjunction with the standard IBM iSeries commands or they might be used as replacement commands. In any case, the third-party commands you plan to use must be registered using the File Editor tool in order for TG products to recognize those commands.

**Usage Example:** Your company might have purchased a third-party DFU (data file utility). Most, but not all, IBM clients use the standard IBM DFU. TG products recognize all standards IBM i Series commands. If your company plans to use third-party commands, you must use the File Editor tool to register those third-party commands so that they are recognized and executed properly by TG products.

In order to work with the file editor, you must access the **Work with File Editor** interface.

**To access the Work with File Editors interface**

1) Log into TGSecure.  
**Note:** The **Main** menu appears.

2) At the **Selection or command** prompt, enter **2** (Access Escalation Management).

3) Press **Enter**.

4) At the **Selection or command** prompt, enter **11** (Work with File Editors).

5) Press **Enter**.  
**Note:** The **Work with File Editors** interface is displayed.

Working with File Editor

Manage File Editors

### 4.5.3. Manage File Editors

Use these tasks to do the following with file editors:

- Add file editor
- Edit file editor
- Copy file editor
- Delete file editor

To access the Work with File Editors interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 2 (Access Escalation Management).
3) Press Enter.
4) At the Selection or command prompt, enter 11 (Work with File Editors).
5) Press Enter.

**Note:** The Work with File Editors interface is displayed.

### 4.5.3.1. Add File Editor

Use this task to add a file editor.

To add file editor

1) Access the Work with File Editors interface.
2) Press the F6 (Add) function key on your keyboard.
3) Enter the parameters necessary to define the file editor.

**Tip:** Press F1 (Help) to access field descriptions.
4) Enter a description for the file editor.
5) Press Enter twice.
4.5.3.2. Edit File Editor
Use this task to edit a file editor.

To edit file editor
1) Access the Work with File Editor interface.
2) In the OPT column for the desired file editor, enter 2 (Edit).
3) Press Enter.
4) Modify the parameters as necessary.
5) Press Enter twice.

4.5.3.3. Copy File Editor
Use this task to copy a file editor. This is a fast way to reference a new file editor based on an existing file editor record.

To copy file editor
1) Access the Work with File Editor interface.
2) In the OPT column for the desired file editor, enter 3 (Copy).
3) Press Enter.
4) Modify the parameters as necessary.
5) Press Enter.

4.5.3.4. Delete File Editor
Use this task to delete a file editor.

To delete file editor
1) Access the Work with File Editor interface.
2) In the OPT column for the desired file editor, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct file editor.
5) Press Enter.

See also
Working with File Editor

4.5.4. Run File Editor Reports
Use these tasks to generate reports that display the following for file editors.

- File editor configuration details
- File editor configuration changes

Note: Refer to the TGSecure Report Reference for a complete list of report definitions.

To work with file editor reports, access from the Access Escalation Reports interface.
4.5.4.1. Access the Access Escalation Reports Interface

To access the Access Escalation Reports interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 2 (Access Escalation Management).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (Access Escalation Reports).
5) Press Enter.

Note: The Access Escalation Reports interface is displayed.

4.5.4.2. Run File Editors Configuration Report

Use this task to display file editor configuration details.

To run File Editor Report
1) Access the Access Escalation Reports interface
2) At the Selection or command prompt, enter 2 (Access Escalation Configuration Reports).
3) Press Enter.

Note: The Access Escalation Configuration Reports interface is displayed
4) At the Selection or command prompt, enter 2 (File Editors).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

4.5.4.3. Run File Editor Change Report

Use this task to display the list of configuration changes made to file editors.

Tip: You must enable auditing to produce change reports. See Enable AEM Change Auditing for additional information.

To run File Editor Change Report
1) Access the Access Escalation Reports interface.
2) At the Selection or command prompt, enter 3 (Access Escalation Change Reports).
3) Press Enter.

Note: The Access Escalation Change Reports interface is displayed
4) At the Selection or command prompt, enter 2 (File Editors Changes).
5) Press Enter.
6) Modify the run criteria as necessary.
**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press **Enter**.

**Note:** The status of the report is displayed at the bottom of the screen.

[Working with Reports](#)
5. Inactive Session Lockdown

5.1. Inactive Session Lockdown

The Inactive Session Lockdown (ISL) feature allows you to customize how and when to end a user's session or lock a user's session when the system detects user inactivity for a specified duration (which is defined by an ISL rule). For security purpose, an inactive session has the potential to expose the system to unauthorized access and abuse.

**Note:** An inactive session is a session in which the user has not interacted with their keyboard or mouse and/or when the system is not pulling resources. For example, if a job or report is running in the background, the system is consuming resource, so even though the user might not interact with their keyboard or mouse (i.e., user inactivity), the session is considered active because of the consumption of resources.

In addition, the Inactive Session Lockdown feature allows you to do the following:

- Work with inactive session lockdown defaults
- Work with inactive session rules
- Work with disconnect options

**To access the Inactive Session Lockdown interface**

1) Log into TGSecure.

**Note:** The Main menu appears.

2) At the Selection or command prompt, enter 3 (Inactive Session Lockdown).
3) Press Enter.

**Note:** The Inactive Session Lockdown interface is displayed.

See also

- Log into TGSecure
- Use TGSecure
- Working with Inactive Session Lockdown
- Manage Inactive Session Lockdown
- Run Inactive Session Lockdown Reports

5.2. Inactive Session Lockdown Defaults

5.2.1. Working with Inactive Session Lockdown Defaults

This section describes working with Inactivity Session Lockdown (ISL) defaults. These defaults apply to all ISL rules unless otherwise defined.

Inactive session lockdown defaults allow you to define the following:
• How often the system checks for inactive sessions (e.g., every 30 seconds)
• Whether to track data about sessions disconnected by ISL
• Journal in which to store the data about sessions disconnected by ISL
• Library in which to store the data about sessions disconnected by ISL
• Whether to store changes to ISL rules or defaults
• Queue in which to store ISL admin alerts
• Queue library in which to store ISL admin alerts
• Warning message to share with user before session disconnect
• How often to share warning messages before session disconnect
• Whether to revoke user privileges when at least one of their sessions is in lockdown

In order to work with ISL defaults, you must access the **Work with Inactive Session Lockdown Settings** interface.

**To access the Interactive Session Lockdown interface**

1) Log into to TGSecure.

   **Note:** The **Main** menu appears.

2) At the **Selection or command** prompt, enter 3 (Interactive Session Lockdown).
3) Press **Enter**.

   **Note:** The **Inactive Session Lockdown** interface is displayed.

4) At the **Selection or command** prompt, enter 10 (ISL Defaults).
5) Press **Enter**.

   **Note:** The **Work with Inactive Session Lockdown Settings** interface is displayed.

**See also**

</tr>
</tbody>
</table>

**Note:** When a user’s authority is revoked, the user is prohibited from performing tasks in any concurrent sessions. In other words, the lockdown is not limited to one session; it impacts all sessions associated with a specific user ID.

**Warning:** Consider the workflow consequences thoroughly before enabling this feature.

[Working with Inactive Session Lockdown](#)

### 5.2.3. Manage Inactive Session Lockdown Defaults

Use this task to do the following:

- Enable ISL auditing
- Enable ISL change auditing
- Enable ISL alerts
- Set check interval
- Set warning interval
- Set disconnect message
- Set revoke authority
- Start monitor
- End monitor
- Check monitor status

To manager Interactive Session Lockdown (ISL) defaults, access from the **Work with Inactive Session Lockdown Settings** interface.

**To access the Work with Interactive Session Lockdown Settings interface**

1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter **3** (Inactive Session Lockdown).
3) Press **Enter**.

**Note:** The **Inactive Session Lockdown** interface is displayed.

4) At the **Selection or command** prompt, enter **10** (ISL Defaults).
5) Press **Enter**.

**Note:** The **Work with Inactive Session Lockdown Settings** interface is displayed.

### 5.2.3.1. Enable ISL Auditing

Use this task to enable inactive session auditing.

**Tip:** Auditing is required if you plan to run [ISL usage reports](#).

To enable the ISL auditing
1) Access the Work with Inactive Session Lockdown Settings interface.
2) In the Audit Status field, enter *YES.
3) In the Audit Journal field, enter the name of the journal in which to store the auditing data.
4) In the Audit Journal Library field, enter the name of the library in which the journal resides.
5) Press Enter twice.

Note: The default audit journal for TG products is TGJRN. This journal resides in the TGDATA library.

5.2.3.2. Enable ISL Change Auditing

Use this task to enable tracking of configuration changes to inactive session defaults.

Tip: Auditing is required if you plan to run ISL change reports.

To enable tracking of configuration changes in the ISL module

1) Access the Work with Inactive Session Lockdown Settings interface.
2) In the Audit Configuration Changes field, enter Y.
3) Press Enter twice.

Note: There are multiple product modules (e.g., network security, access escalation, inactive session lockdown, etc.) in which you can track configuration changes. Therefore, if you see *NONE in the comment field, this indicates that configuration changes are not being tracked in any module. This is common at the time the product is initially installed. If you see *PARTIAL, this indicates that configuration changes are being track in at least one module, but not all modules. If you see *ALL, this indicates that configuration changes are being tracked in all modules.

5.2.3.3. Enable ISL Alerts

Use this task to enable ISL alerts.

Tip: Alerting is required if you plan to send alert notifications.

To enable ISL alerts

1) Access the Work with Inactive Session Lockdown Settings interface.
2) In the Alert Status field, enter *YES.
3) In the Alert Message Queue field, enter the name of the queue in which to store the alerts.
4) In the Alert Message Queue Library field, enter the name of the library in which the queue resides.
5) Press Enter twice.

5.2.3.4. Set Check Interval

Use this task to determine how often the system checks for inactive sessions.

To set the check interval

1) Access the Work with Inactive Session Lockdown Settings interface.
2) In the Check Interval field, enter the desired time interval in seconds.

Note: This value must be less than or equal to the warning interval.
3) Press Enter twice.
5.2.3.5. Set Warning Interval

Use this task to enable ISL warnings and to determine when the system sends out a warning to the user that their inactive session is about to be terminated.

To set the warning interval
1) Access the Work with Inactive Session Lockdown Settings interface.
2) In the Send Warning field, enter one of the following:
   – *YES - Enable the warning feature
   – *NO - Disable the warning feature
3) In the Warning Interval field, enter the desired time interval in seconds.
   Note: This indicates how much time the user has to perform an action before the inactive session is terminated. This value must be greater or equal to the check interval.
4) Press Enter twice.

5.2.3.6. Set Disconnect Message

Use this task to define the message you want to send to the user warning them that their inactive session is about to be terminated.

To set the disconnect message
1) Access the Work with Inactive Session Lockdown Settings interface.
2) In the Temporary Disconnect Message field, enter the desired message.
3) In the Temporary Sign on Screen Header field, enter the desired disconnect dialog box heading.
4) Press Enter twice.

5.2.3.7. Set Revoke Authority

Use this task to revoke a user's authority to perform system tasks when inactivity triggers a session lockdown.

Warning: When a user's authority is revoked, the user is prohibited from performing tasks in any concurrent sessions. In other words, the lockdown is not limited to one session; it impacts all sessions associated with a specific user ID.

Tip: Revoking a user's authority can have a serious impact on workflow, depending on the user's level of responsibility and access, so consider the downstream consequences of enabling this feature.

To set the revoke authority
1) Access the Work with Inactive Session Lockdown Settings interface.
2) In the Revoke Authority field, enter one of the following:
   – *YES - Enable the revoke feature
   – *NO - Disable the revoke feature
3) Press Enter twice.

5.2.3.8. Start Monitor

Use this task to start ISL monitoring.

Note: Once started, the monitor status (which appears in the upper right corner of the screen) should display a status of *ACTIVE.
To monitor status

1) Access the Work with Inactive Session Lockdown Settings interface.
2) Press F22 (Start monitor) function key on your keyboard.

**Tip:** For function keys higher than F12, you must use a combination of the Shift key and the appropriate function key. For example, to select F22, you must hold down the Shift key and F10.

3) Press Enter.

### 5.2.3.9. End Monitor

Use this task to end ISL monitoring.

**Note:** Once ended, the monitor status (which appears in the upper right corner of the screen) should show status of *INACTIVE.*

To monitor status

1) Access the Work with Inactive Session Lockdown Settings interface.
2) Press F23 (Stop monitor) function key on your keyboard.

**Tip:** For function keys higher than F12, you must use a combination of the Shift key and the appropriate function key. For example, to select F23, you must hold down the Shift key and F11.

3) Press Enter.

### 5.2.3.10. Check Monitor Status

Use this task to check the status of the monitor. This might be useful during troubleshooting.

To monitor status

1) Access the Work with Inactive Session Lockdown Settings interface.
2) Press F21 (Monitor status) function key on your keyboard.

**Tip:** For function keys higher than F12, you must use a combination of the Shift key and the appropriate function key. For example, to select F21, you must hold down the Shift key and F9.

3) Press Enter.

### 5.2.4. Run Inactive Session Lockdown Reports

Use this task to generate the following reports:

**Usage Report**

- [Inactivity Disconnect Report](#)

**Configuration Report**
Change Report

- Inactivity Session Configuration Changes Report

To work with ISL reports, access from the Inactivity Session Reports interface.

To access the Inactivity Session Reports interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 3 (Inactive Session Lockdown).
3) Press Enter.

Note: The Inactive Session Lockdown interface is displayed.

4) At the Selection or command prompt, enter 20 (Inactive Session Reports).
5) Press Enter.

Note: The Inactivity Session Reports interface is displayed.

5.2.4.1. Run Inactivity Disconnect Report

Use this report to display the list of instances that triggered a disconnection due to user inactivity.

Tip: ISL monitoring must be started for data to be present in this report. See Start Monitor for additional information.

To run the Inactivity Disconnect report

1) Access the Inactivity Session Reports interface.
2) At the Selection or command prompt, enter 1 (Inactive Session Usage Reports).
3) Press Enter.

Note: The Inactivity Session Usage Reports interface is displayed.

4) At the Selection or command prompt, enter 1 (Inactivity Disconnect Report).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

5.2.4.2. Run Inactivity Session Configuration Settings Report

Use this report to view the ISL configuration settings.

Tip: You must enable auditing to produce change reports. See Enable ISL Auditing for additional information.

To run the Inactivity Session Configuration Settings report
1) Access the Inactivity Session Reports interface.
2) At the Selection or command prompt, enter 2 (Inactivity Session Configuration Reports).
3) Press Enter.

Note: The Inactivity Session Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 1 (Inactivity Session Configuration Settings).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

5.2.4.3. Run Inactivity Session Configuration Changes Report

Use this report to view the changes made to the ISL configuration settings.

Tip: ISL Change auditing must be enabled for data to be present in this report. See Enable ISL Change Auditing for additional information.

To run the Inactivity Session Configuration Changes report
1) Access the Inactivity Session Reports interface.
2) At the Selection or command prompt, enter 3 (Inactivity Session Changes Reports).
3) Press Enter.

Note: The Inactivity Session Changes Reports interface is displayed.

4) At the Selection or command prompt, enter 1 (Inactivity Session Configuration Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

5.3. Inactive Session Rules

5.3.1. Working with Inactive Session Rules

This section describes working with inactive session rules. Inactive session rules allow you to define when a user is automatically logged out of the system after a period of inactivity. For example, if a user forgets to log out of the system before leaving for lunch, a meeting, or at the end of the day, you can establish an inactivity session rule that will log the user out.

Tip: Any unattended workstations present a security vulnerability. User should never leave active sessions unattended.

In order to work with inactive session rules, you must access the Working with Inactive Session Rules interface.

To access the Work with Inactive Session Rules interface

1) Log into TGSecure.

Note: The Main menu appears.

2) At the Selection or command prompt, enter 3 (Inactive Session Lockdown).

3) Press Enter.

Note: The Inactive Session Lockdown interface is displayed.

4) At the Selection or command prompt, enter 1 (Work with Inactive Session Rules).

5) Press Enter.

Note: The Work with Inactive Session Rules interface is displayed.

5.3.2. Display Inactive Session Rules

Use this task to do the following with inactive session rules:

• Display list
• Sort list
• Move to position in list
• Filter list

5.3.2.1. Display List

Use this task to display the list of inactive session rules.

To display the list of inactive session rules

1) Access the TGSecure Main menu.
2) At the **Selection or command** prompt, enter **3** (Inactive Session Lockdown).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter **1** (Work with Inactive Session Rules).
5) Press **Enter**.

**Note:** The **Work with Inactive Session Rules** interface is displayed.

<table>
<thead>

</tr>
</tbody>
</table>

**5.3.2.2. Sort List**

Use this task to sort the list. The column on which the list is currently sorted appears in white text.

To sort the list

1) Access the **Work with Inactive Session Rules** interface.
2) Place your cursor on the desired column heading.
3) Press the **F10** (Sort) function key.

**Tip:** The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click **F10** again.

**5.3.2.3. Move to Position in List**

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

To move to a specific position within the list

1) Access the **Work with Inactive Session Rules** interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the Position to field, and enter a letter, word, phrase, or number.
4) Press Enter.

**Note:** The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

### 5.3.2.4. Filter List

Use this task to limit the objects displayed in the list by defining a subset for filtering purposes.

**Tip:** Use wildcard asterisk (*) to help define your subset.

-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.
-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.
-- Add asterisks around text (e.g., *report*) to find list items that contain specific text anywhere in the name.

**To filter the list using a subset**

1) Access the **Work with Inactive Session Rules** interface.
2) Press the F8 (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press Enter.

**Note:** The system filters the results based on the criteria you defined for the subset.

### 5.3.3. Manage Inactive Session Rules

Use this task to do the following with inactive session rules:

- Add inactive session rule
- Edit inactive session rule
- Copy inactive session rule
- Delete inactive session rule

To manage ISL rules, access the **Work with Inactive Session Rules** interface.

**To access the Work with Inactive Session interface**

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 3 (Inactive Session Lockdown).
3) Press Enter.

**Note:** The Inactive Session Lockdown interface is displayed.

4) At the Selection or command prompt, enter 1 (Work with Inactive Session Rules).
5) Press Enter.

**Note:** The Work with Inactive Session Rules interface is displayed.
5.3.3.1. Add Inactive Session Rule

Use this task to add an inactive session rule.

To add an inactive session rule
1) Access the Work with Inactive Session Rules interface.
2) Press the F6 (Add) function key.
3) Define the rule using the fields provided.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rule Type</td>
<td>Enter the type of rule:</td>
</tr>
<tr>
<td></td>
<td>*PGM - Rule that affects a program</td>
</tr>
<tr>
<td></td>
<td>*WRKSTN - Rule that affects a workstation</td>
</tr>
<tr>
<td></td>
<td>*SBSD - Rule that affects a subsystem (e.g., country, region, department)</td>
</tr>
<tr>
<td></td>
<td>*CTL - Rule that affects a controller</td>
</tr>
<tr>
<td></td>
<td>*USER - Rule that affects a user</td>
</tr>
<tr>
<td>Note: If *USER is specified, then enter user name or user group the Object field.</td>
<td></td>
</tr>
<tr>
<td>Object</td>
<td>Enter the object name or object group to which the rule is applicable</td>
</tr>
<tr>
<td>Tip: Enter *ALL to apply the rule to all objects, except when Rule Type is defined as *USER.</td>
<td></td>
</tr>
<tr>
<td>Library</td>
<td>Enter the name of the library to which the rule is applicable</td>
</tr>
<tr>
<td>Tip: Leave the field blank to apply to all libraries.</td>
<td></td>
</tr>
<tr>
<td>Calendar</td>
<td>Enter the name of the calendar that defines when the rule is applicable</td>
</tr>
<tr>
<td>Tip: Enter *NONE if no calendar is applicable.</td>
<td></td>
</tr>
<tr>
<td>Disconnect Option</td>
<td>Enter the disconnect option to use when the rule is applicable</td>
</tr>
<tr>
<td>Rule Action</td>
<td>Identify whether the rule includes or excludes</td>
</tr>
<tr>
<td></td>
<td>*INCLUDE - Who and what is affected by a rule</td>
</tr>
<tr>
<td></td>
<td>*EXCLUDE - Who and what is not affected by a rule</td>
</tr>
<tr>
<td>Rule Description</td>
<td>Enter a description of the rule</td>
</tr>
</tbody>
</table>

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

4) Press Enter twice.

5.3.3.2. Edit Inactive Session Rule

Use this task to edit an existing ISL rule.

To edit an inactive session rule
1) Access the Work with Inactive Session Rules interface.
2) In the OPT column for the desired rule, enter 2 (Edit).
3) Press Enter.
4) Modify the parameters as necessary.
Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

5) Press Enter twice.

5.3.3.3. Copy Inactive Session Rule
Use this task to create a new ISL rule by copying an existing rule.

To copy an inactive session rule
1) Access the Work with Inactive Session Rules interface.
2) In the OPT column for the desired rule, enter 3 (Copy).
3) Press Enter.
4) Modify the parameters as necessary.
Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.
5) Press Enter twice.

5.3.3.4. Delete Inactive Session Rule
Use this task to delete an ISL rule.

To delete an inactive session rule
1) Access the Work with Inactive Session Rules interface.
2) In the OPT column for the desired transaction, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct rule.
5) Press Enter twice.

See also
Working with Inactive Session Rules

5.3.4. Run Inactive Session Rules Reports
Use this task to generate the following reports:

- Run inactivity session inclusion exception rules report
- Run inactivity session rules change report

To work with ISL reports, access from the Inactive Session Reports interface.

To access the Inactive Sessions Reports interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 3 (Inactive Session Lockdown).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (Inactive Session Reports).
5) Press Enter.

Note: The Inactivity Session Reports interface is displayed.
5.3.4.1. Run Inactivity Session Inclusion Exception Rules Report

Use this report to view the list of inclusion exception rules.

Tip: ISL auditing must be enabled to run ISL reports. See Enable ISL Auditing for additional information.

To run the Inactivity Session Inclusion Exception Rules report
1) Access the Inactivity Session Reports interface.
2) At the Selection or command prompt, enter 2 (Inactivity Session Configuration Reports).
3) Press Enter.

Note: The Inactivity Session Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 3 (Inactivity Session Inclusion Exception Rules).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

5.3.4.2. Run Inactivity Session Rules Change Report

Use this report to view the changes made to ISL rules.

Tip: You must enable auditing to produce change report. See Enable ISL Change Auditing for additional information.

To run the Inactivity Session Rules Change report
1) Access the Inactivity Session Reports interface.
2) At the Selection or command prompt, enter 3 (Inactivity Session Changes Reports).
3) Press Enter.

Note: The Inactivity Session Change Reports interface is displayed.

4) At the Selection or command prompt, enter 3 (Inactivity Session Rule Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

5.4. Disconnection Options

5.4.1. Working with Disconnect Options

This section describes working with the methods used to disconnect a user when the user’s session is deemed inactive and therefore, vulnerable to attach.

You have choices (and therefore decisions to make) regarding how to disconnect a user when the user’s session is deemed to be inactive:

- Disconnect (pause) the job
- Hold (freeze) the job (only an admin can unfreeze a job)
- End the job (user remains logged into the server, but the user must restart the job)
- End the session (user is logged off the server, and the user must restart the session and job)

In order to work with disconnect options, you must access the **Working with Disconnect Options** interface.

To access the Work with Disconnect Option interface

1) Log into TGSecure.

**Note:** The Main menu appears.

2) At the **Selection or command** prompt, enter 3 (Interactive Session Lockdown).
3) Press **Enter**.

**Note:** The Inactive Session Lockdown interface is displayed.

4) At the **Selection or command** prompt, enter 11 (Work with Disconnect Options).
5) Press **Enter**.

**Note:** The **Work with Disconnect Options** interface is displayed.

See also

- Log into TGSecure
- Display Disconnect Options
- Manage Disconnect Options
- Run Disconnect Option Reports

5.4.2. Display Disconnect Options

Use this task to do the following with disconnect options:

- **Display list**
- **Sort list**
5.4.2.1. Display List

Use this task to display the list of disconnect options.

To display the list of disconnect options

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 3 (Inactive Session Lockdown).
3) Press Enter.

Note: The Inactive Session Lockdown interface is displayed.

4) At the Selection or command prompt, enter 11 (Work with Disconnect Options).
5) Press Enter.

Note: The Work with Disconnect Options interface is displayed.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disconnect Option</td>
<td>Name assigned to the disconnect option</td>
</tr>
<tr>
<td>Time Limit</td>
<td>Time the system must remain inactive to trigger the disconnect</td>
</tr>
<tr>
<td>Disconnect Type</td>
<td>The type of disconnect:</td>
</tr>
<tr>
<td></td>
<td>ENDJOB - End the job (user must restart their job)</td>
</tr>
<tr>
<td></td>
<td>DSCJOB - Disconnect (pause) the job and show the IBM standard disconnect message</td>
</tr>
<tr>
<td></td>
<td>TGDSCJOB - Disconnect (pause) the job and show a custom disconnect message</td>
</tr>
<tr>
<td></td>
<td>HLDJOB - Hold (freeze) the job (only an admin can unfreeze a job)</td>
</tr>
<tr>
<td></td>
<td>SIGNOFF - End the session (user must restart their session and job)</td>
</tr>
</tbody>
</table>

Tip: If TGDSCJOB is defined as the disconnect type, ensure that program ISL80001P in library TGPROD is defined as the user's initial.

To see which program is defined as the initial program for the user, at the Selection or command prompt, enter DSPUSRPRF. Enter the desired user in the User Profile field. Press Enter. Page down until you see Initial Program and Library entries. If ISL80001P is not defined as the initial program, you must either use a different disconnect type, or change the user's initial program.

5.4.2.2. Sort List

Use this task to sort the list. The column on which the list is currently sorted appears in white text.

To sort the list

1) Access the Work with Disconnect Options interface.
2) Place your cursor on the desired column heading.
3) Press the F10 (Sort) function key.

Tip: The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click F10 again.
5.4.2.3. Move to Position in List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

To move to a specific position within the list
1) Access the Work with Disconnect Options interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the Position to field, and enter a letter, word, phrase, or number.
4) Press Enter.

Note: The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

5.4.2.4. Filter List

Use this task to limit the objects displayed in the list by defining a subset for filtering purposes.

Tip: Use wildcard asterisk (*) to help define your subset.

-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.
-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.
-- Add asterisks around text (e.g., *report*) to find list items that contain specific text anywhere in the name.

To filter the list using a subset
1) Access the Work with Disconnect Options interface.
2) Press the F8 (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press Enter.

Note: The system filters the results based on the criteria you defined for the subset.

See also
Working with Disconnect Options

5.4.3. Manage Disconnect Options

Use this task to do the following with disconnect options:

• Add disconnect option
• Edit disconnect option
• Copy disconnect option
• Delete disconnect option

To manage disconnect options, access the Work with Disconnect Options interface.

To access the Work with Disconnect Options interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 3 (Inactive Session Lockdown).
3) Press Enter.
Note: The Inactive Session Lockdown interface is displayed.

4) At the Selection or command prompt, enter 11 (Work with Disconnect Options).
5) Press Enter.

Note: The Work with Disconnect Options interface is displayed.

5.4.3.1. Add Disconnect Option

Use this task to add a disconnect option.

To add a disconnect option

1) Access the Work with Disconnect Options interface.
2) Press the F6 (Add) function key on your keyboard.
3) Define the disconnect option using the fields provided.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disconnect Option</td>
<td>Enter the name you want to assign the disconnect option</td>
</tr>
<tr>
<td>Time Limit</td>
<td>Enter the time the system must remain inactive to trigger the disconnect option</td>
</tr>
</tbody>
</table>
| Disconnect Type | Enter one of the following:
  ENDJOB - End the job (user must start the job over)
  DSCJOB - Disconnect (pause) the job and show the IBM standard disconnect message
  TGDSCJOB - Disconnect (pause) the job and show a custom disconnect message
  HLDJOB - Hold (freeze) the job (only an admin can unfreeze a job)
  SIGNOFF - Signoff from the server

Warnings: Do not select HLDJOB if a trained admin will not be available to unfreeze the job.

Tip: If you select TGDSCJOB, ensure that program ISL80001P in library TGPROD is defined as the as the user's initial program.

To see which program is defined as the initial program for the user, at the Selection or command prompt, enter DSPUSRPRF. Enter the desired user in the User Profile field. Press Enter. Page down until you see Initial Program and Library entries. If ISL80001P is not defined as the initial program, you must either use a different disconnect type, or change the user's initial program.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

4) Press Enter twice.

5.4.3.2. Edit Disconnect Option

Use this task to edit an existing disconnect option.

To edit a disconnect option

1) Access the Work with Disconnect Options interface.
2) In the OPT column for the desired rule, enter 2 (Edit).
3) Press Enter.
4) Modify the parameters as necessary.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

5) Press Enter twice.

5.4.3.3. Copy Disconnect Option

Use this task to create a new disconnect option by copying an existing disconnect option.

To copy a disconnect option
1) Access the Work with Disconnect Options interface.
2) In the OPT column for the desired rule, enter 3 (Copy).
3) Press Enter.
4) Modify the parameters as necessary.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

5) Press Enter twice.

5.4.3.4. Delete Disconnect Option

Use this task to delete a disconnect option.

To delete a disconnect option
1) Access the Work with Disconnect Options interface.
2) In the OPT column for the desired rule, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct rule.
5) Press Enter twice.

Working with Disconnect Options

5.4.4. Run Disconnect Option Reports

Use this task to generate the following reports:

- Inactivity Session Disconnect Options Report
- Inactivity Session Disconnect Option Change Report

To work with ISL reports, access from the Inactive Session Reports interface.

To access the Inactive Sessions Reports interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 3 (Inactive Session Lockdown).
3) Press Enter.
4) At the **Selection or command** prompt, enter **20** (Inactive Session Reports).
5) Press **Enter**.

**Note:** The **Inactive Session Reports** interface is displayed.

### 5.4.4.1. Run Inactivity Session Disconnect Option Report

Use this report to view the list of disconnect options.

**Tip:** ISL auditing must be enabled to run ISL reports. See [Enable ISL Auditing](#) for additional information.

#### To run the Inactivity Session Disconnect Option report

1) Access the **Inactive Session Reports** interface.
2) At the **Selection or command** prompt, enter **2** (Inactive Session Configuration Reports).
3) Press **Enter**.

**Note:** The **Inactive Session Configuration Reports** interface is displayed.

4) At the **Selection or command** prompt, enter **2** (Inactive Session Disconnect Options).
5) Press **Enter**.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see [Run Reports](#).

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press **Enter**.

**Note:** The status of the report is displayed at the bottom of the screen.

### 5.4.4.2. Run Inactivity Session Disconnect Option Change Report

Use this report to view changes made to ISL disconnection options.

**Tip:** You must enable auditing to produce change reports. See [Enable ISL Change Auditing](#) for additional information.

#### To run the Inactivity Session Disconnect Option Change report

1) Access the **Inactive Session Reports** interface.
2) At the **Selection or command** prompt, enter **3** (Inactive Session Changes Reports).
3) Press **Enter**.

**Note:** The **Inactive Session Change Reports** interface is displayed.

4) At the **Selection or command** prompt, enter **2** (Inactive Session Disconnect Option Changes).
5) Press **Enter**.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see [Run Reports](#).
**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press **Enter**.

**Note:** The status of the report is displayed at the bottom of the screen.

6. Resource Manager

6.1. Resource Manager

The Resource Manager allows you to manage object-level security using authority schemas. Think of an authority schema as a template that defines authority best practices. Once you create an authority schema, you can use it to evaluate and modify the authority levels of multiple users.

In addition, the Resource Manager allows you to do the following:

- Work with Resource Manager Defaults
- Work with Authority Schemas
- Work with Authority Collections

To access the Resource Manager interface

1) Log into TGSecure.

Note: The Main menu appears.

2) At the Selection or command prompt, enter 4 (Resource Manager).
3) Press Enter.

Manage Resource Manager Defaults
Run Resource Manager Reports

6.2. Resource Manager Defaults

6.2.1. Working with Resource Manager Defaults

This section describes working with Resource Manager defaults.

Resource Manager defaults allow you to define the following:

- Whether to send resource change alerts
- Whether to track resource changes (required if you plan to run reports)
- Journal in which to store resource changes
- Library in which to store resource changes
• Queue in which to store resource alerts
• Queue library in which to store resource alerts

In order to work with the resource manager, you must access the **Resource Manager Defaults** interface.

### To access the Resource Manager interface

1) Log into TGSecure.

   **Note:** The **Main** menu appears.

2) At the **Selection or command** prompt, enter 4 (Resource Manager).

3) Press **Enter**.

   **Note:** The **Resource Manager** interface is displayed.

4) At the **Selection or command** prompt, enter 4 (Resource Manager Defaults).

5) Press **Enter**.

   **Note:** The **Resource Manager Defaults** interface is displayed.

**See also**

- [Run Resource Manager Reports](#)

### 6.2.2. Display Resource Manager Defaults

Use this task to display the **Resource Manager** defaults.

### To display the Resource Manager defaults

1) Access the TGSecure **Main** menu.

2) At the **Selection or command** prompt, enter 4 (Resource Manager).

3) Press **Enter**.

   **Note:** The **Resource Manager** interface is displayed.

4) At the **Selection or command** prompt, enter 4 (Resource Manager Defaults).

5) Press **Enter**.

   **Note:** The **Resource Manager Defaults** interface is displayed.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Audit Journal</strong></td>
<td>Journal in which to store resource manager usage data</td>
</tr>
<tr>
<td></td>
<td><strong>Note:</strong> The default audit journal for TG products is TGJRN. This journal resides in the TGDATA library.</td>
</tr>
<tr>
<td></td>
<td><strong>Tip:</strong> The Audit Journal and Library fields must be filled with a valid values if you plan to run Resource Manager usage reports.</td>
</tr>

</table>

---

118
Field | Description
--- | ---
Audit Configuration Changes | Whether to collect data about resource changes:
Y - Enable tracking of changes
N - Disable tracking of changes
Tip: Set this flag to Y if you plan to run the resource manager change reports.
Note: There are multiple product modules (e.g., network security, access escalation, inactive session lockdown, etc.) in which you can track configuration changes. Therefore, if you see *NONE in the comment field, this indicates that configuration changes are not being tracked in any module. This is common at the time the product is initially installed. If you see *PARTIAL, this indicates that configuration changes are being tracked in at least one module, but not all modules. If you see *ALL, this indicates that configuration changes are being tracked in all modules.

Alert Status | Whether alerts are enabled:
*YES - Enable alerts (create admin alert)
*NO - Disable alerts

Alert Message Queue | Queue in which to store alerts

Alert Message Queue Library | Library in which to store the queue

Working with Resource Manager Defaults

6.2.3. Manage Resource Manager Defaults

Use this task to do the following:
- Enable resource change auditing
- Enable resource change alerts

To manage Resource Manager defaults, access the Resource Manager Defaults interface.

To access the Resource Manager Defaults interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 4 (Resource Manager).
3) Press Enter.
Note: The Resource Manager interface is displayed.
4) At the Selection or command prompt, enter 4 (Resource Manager Defaults).
5) Press Enter.
Note: The Resource Manager Defaults interface is displayed.

6.2.3.1. Enable Resource Change Auditing

Use this task to enable resource change auditing.
Tip: Auditing is required if you plan to run resource manager change reports.
To enable the resource auditing

1) Access the Resource Manager Defaults interface.
2) In the Audit Configuration Change field, enter Y.
3) In the Audit Journal field, enter the name of the journal in which to store changes.
4) In the Audit Journal Library field, enter the name of the library in which the journal resides.
5) Press Enter.

Note: There are multiple product modules (e.g., network security, access escalation, inactive session lockdown, etc.) in which you can track configuration changes. Therefore, if you see *NONE in the comment field, this indicates that configuration changes are not being tracked in any module. This is common at the time the product is initially installed. If you see *PARTIAL, this indicates that configuration changes are being tracked in at least one module, but not all modules. If you see *ALL, this indicates that configuration changes are being tracked in all modules.

6.2.3.2. Enable Resource Change Alerts

Use this task to enable inactive session alerts.

Tip: Alerting is required if you plan to send alert notifications.

To enable resource alerts

1) Access the Resource Manager Defaults interface.
2) In the Alert Status field, enter *YES.
3) In the Alert Message Queue field, enter the name of the queue in which to store the alerts.
4) In the Alert Message Queue Library field, enter the name of the library in which the queue resides.
5) Press Enter.

6.2.4. Run Resource Manager Reports

Use this task to generate the following reports:

Usage Report

- Resource Manager Out of Compliance Data

Configuration Report

- Resource Manager Configuration

Change Reports

- Resource Manager Configuration Change
- Resource Manager Out of Compliance Data Changes

To work with Resource Manager reports, access from the Resource Manager Reports interface.
To access the Resource Manager Reports interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 4 (Resource Manager).
3) Press Enter.

Note: The Resource Manager interface is displayed.
4) At the Selection or command prompt, enter 20 (Resource Manager Reports).
5) Press Enter.

Note: The Resource Manger Reports interface is displayed.

6.2.4.1. Run Resource Manager Configuration Report

Use this report to view the Resource Manager configuration details.

To run the Resource Manager Configuration Report
1) Access the Resource Manager Reports interface.
2) At the Selection or command prompt, enter 2 (Resource Manager Configuration Reports).
3) Press Enter.

Note: The Resource Manager Configuration Reports interface is displayed.
4) At the Selection or command prompt, enter 1 (Resource Manager Configuration).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

6.2.4.2. Run Resource Manager Configuration Change Report

Use this report to view changes made to the Resource Manager configuration details.

Tip: You must enable auditing to produce change reports. See Enable Resource Change Auditing for additional information.

To run the Resource Manager Configuration Change Report
1) Access the Resource Manager Reports interface.
2) At the Selection or command prompt, enter 3 (Resource Manager Change Reports).
3) Press Enter.

Note: The Resource Manager Change Reports interface is displayed.
4) At the Selection or command prompt, enter 1 (Resource Manager Configuration Changes).
5) Press Enter.
6) Modify the run criteria as necessary.
Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

6.2.4.3. Run Resource Manager Out of Compliance Data

Use this report to view user authorities that are deemed out of compliance based on a defined authority schema.

To run the Resource Manager Out of Compliance Report
1) Access the Resource Manager Reports interface.
2) At the Selection or command prompt, enter 2 (Resource Manager Configuration Reports).
3) Press Enter.

Note: The Resource Manager Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 4 (Resource Manager Out of Compliance Data).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

6.2.4.4. Run Resource Manager Out of Compliance Data Changes Report

Use this report to view changes made to user authorities that are deemed out of compliance based on a defined authority schema.

To run the Resource Manager Out of Compliance Data Changes Report
1) Access the Resource Manager Reports interface.
2) At the Selection or command prompt, enter 3 (Resource Manager Change Reports).
3) Press Enter.

Note: The Resource Manager Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 4 (Resource Manager Out of Compliance Data Changes).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.
Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

6.3. Authority Schemas

6.3.1. Working with Authority Schemas

This section describes working with authority schemas. Authority schemas allow you to define an architecture (template) for granting user authorities. Each authority scheme is the ideal model of how your organization should implemented user authorities. Therefore, each authority schema should be unique to an organization and be based on a well-defined security policy.

The following is the process used to define and implement authorities schemas:

In order to work with authority schemas, you must access the Working with Authority Schemas interface.

To access the authority schemas interface
1) Log into to TGSecure.

Note: The Main menu appears.

2) At the Selection or command prompt, enter 4 (Resource Manager).
3) Press Enter.

Note: The Resource Manager interface is displayed.

4) At the Selection or command prompt, enter 1 (Authority Schema Configuration).
5) Press Enter.

Note: The Work with Authority Schemas interface is displayed.

6.3.2. Display Authority Schemas

Use this task to do the following with inactive session rules:

Schemas

- Display list of schemas
- Sort list of schemas
- Move to position in list of schemas
- Filter list of schemas

Schema Details (exceptions)

- Display list of schemas details
- Sort list of schemas details
- Move to position in list of schemas details
- Filter list schemas details

6.3.2.1. Display List of Schemas

Use this task to display the list of available authority schemas.

To display the list of authority schemas

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 4 (Resource Manager).
3) Press Enter.
   
   Note: The Resource Manager interface is displayed.

4) At the Selection or command prompt, enter 1 (Authority Schema Configuration).
5) Press Enter.

   Note: The Work with Authority Schemas interface is displayed.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Schema ID</td>
<td>ID assigned to the schema</td>
</tr>
<tr>
<td>Compliances</td>
<td>Date and time at which the last check for authority schema compliance was performed</td>
</tr>
<tr>
<td>Enforcement</td>
<td>Date and time at which user authorities where compared to the authority schema and compliance with the schema was enforced</td>
</tr>
<tr>
<td>Alert Status</td>
<td>Whether alerts are enabled:</td>
</tr>
<tr>
<td></td>
<td>*YES - Enable alerts (create admin alerts)</td>
</tr>
<tr>
<td>Field</td>
<td>Description</td>
</tr>
<tr>
<td>------------</td>
<td>-----------------------------------------------------------------------------</td>
</tr>
<tr>
<td>*NO - Disable alerts</td>
<td></td>
</tr>
</tbody>
</table>

**Schema Description**  Description of the authority schema

**Compliance Status**  Whether the current authority levels comply with the schema

- **PASS** - User authorities comply with the current authority scheme
- **FAIL** - User authorities do not comply with the current authority scheme

**Note**: See [Manage Authority Scheme](#) for instruction on enforcing an authority schema.

### 6.3.2.2. Sort List of Schemas

Use this task to sort the list. The column on which the list is currently sorted appears in white text.

**To sort the list**

1) Access the [Work with Authority Schemas](#) interface.
2) Place your cursor on the desired column heading.
3) Press the **F10** (Sort) function key on your keyboard.

**Tip**: The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click **F10** again.

### 6.3.2.3. Move to Position in List of Schemas

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

**To move to a specific position within the list**

1) Access the [Work with Authority Schemas](#) interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the Position to field, and enter a letter, word, phrase, or number.
4) Press **Enter**.

**Note**: The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

### 6.3.2.4. Filter List Schemas

Use this task to limit the objects displayed in the list by defining a subset for filtering purposes.

**Tip**: Use wildcard asterisk (*) to help define your subset.

-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.
-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.
-- Add asterisks around text (e.g., *report*) to find list items that contain specific text anywhere in the name.

**To filter the list using a subset**

1) Access the [Work with Authority Schemas](#) interface.
2) Press the **F8** (Subset) function key on your keyboard.
3) Enter the criteria you want to use to define the subset.
4) Press **Enter**.

**Note:** The system filters the results based on the criteria you defined for the subset.

### 6.3.2.5. Display List of Schemas Details

Use this task to display the list of available schema details and exceptions.

**To display the list of authority schema details**

1) Access the **Work with Authority Schemas** interface.
2) In the **OPT** column for the desired schema, enter **10** (Work with Authority Schema Details).
3) Press **Enter**.

**Note:** The **Work with Authority Schema Details** interface is displayed.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>File Sys</td>
<td>File system to monitor</td>
</tr>
<tr>
<td>Path or ASP</td>
<td>File path or ASP to monitor</td>
</tr>
<tr>
<td>Library</td>
<td>Library to monitor</td>
</tr>
<tr>
<td>Object Name</td>
<td>Object name to monitor</td>
</tr>
<tr>
<td>Object Type</td>
<td>Object type to monitor</td>
</tr>
<tr>
<td>Object Owner</td>
<td>Name of the object owner</td>
</tr>
<tr>
<td>Auth List</td>
<td>Name of the authority list</td>
</tr>
<tr>
<td>User Object</td>
<td>Name of the user (or group) that has access to the object</td>
</tr>
</tbody>
</table>

**Auth**
- User or group authority level:
  - **ALL** - All authorities (i.e., change, exclude, use, etc.)
  - **CHANGE** - Change authority
  - **EXCLUDE** - Prohibit the user from performing operations on the object
  - **USE** - Allow the user to use the object (but not change it)
  - **AUTL** - Default level of authority defined for public users (**PUBLIC**)

**Exception**
- Whether exceptions are defined
  - **YES** - This entry is an exception to the default rules for this schema
  - **NO** - This entry is a default rule for this schema

**Note:** Exceptions are defined as **schema details**.

### 6.3.2.6. Sort List of Schemas Details

Use this task to sort the list. The column on which the list is currently sorted appears in white text.

**To sort the list**
1) Access the **Work with Authority Schemas** interface.
2) Place your cursor on the desired column heading.
3) Press the **F10** (Sort) function key on your keyboard.

**Tip:** The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click **F10** again.

### 6.3.2.7. Move to Position in List of Schemas Details

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

**To move to a specific position within the list**

1) Access the **Work with Authority Schemas** interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the **Position to** field, and enter a letter, word, phrase, or number.
4) Press **Enter**.

**Note:** The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

### 6.3.2.8. Filter List Schemas Details

Use this task to limit the objects displayed in the list by defining a subset for filtering purposes.

**To filter the list using a subset**

1) Access the **Work with Authority Schemas** interface.
2) Press the **F8** (Subset) function key on your keyboard.
3) Enter the criteria you want to use to define the subset.
4) Press **Enter**.

**Note:** The system filters the results based on the criteria you defined for the subset.

**See also**

[Working with Authority Schemas](#)

### 6.3.3. Manage Authority Schemas

Use this task to do the following with **authority schemas**:

**Authority Schema**

- [Add authority schema](#)
- [Edit authority schema](#)
- [Copy authority schema](#)
- [Delete authority schema](#)

**Authority Schema Details (exceptions)**

- [Add schema details](#)
• Edit schema details
• Copy schema detail
• Delete schema detail

Authority Schema Enforcement
• Display authority schema compliance issues
• Enforce authority schema

To manage authority schemas, access the Work with Authority Schemas interface.

To access the Work with Authority Schemas interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 4 (Resource Manager).
3) Press Enter.

Note: The Resource Manager interface is displayed.

4) At the Selection or command prompt, enter 1 (Authority Schema Configuration).
5) Press Enter.

Note: The Work with Authority Schemas interface is displayed.

Authority Schema

Add Authority Schema
Use this task to add an authority schema.

To add an authority schema
1) Access the Work with Authority Schemas interface.
2) Press the F6 (Create) function key on your keyboard.
3) Complete the following fields.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Schema ID</td>
<td>ID you want to assign to the schema</td>
</tr>
<tr>
<td>Schema Description</td>
<td>Text describing the purpose of the schema</td>
</tr>
<tr>
<td>Alert Status</td>
<td>Whether alerts are enabled: *YES - Enable alerts (create admin alerts) *NO - Disable alerts</td>
</tr>
</tbody>
</table>

4) Define the object scope.

Note: The values you enter in the following fields limit the scope of the schema to a single object or an object group.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Object Name</td>
<td>Enter a specific object name or object group to which this schema applies</td>
</tr>
</tbody>
</table>
### Field Description

You can also choose one of the following options:

* **NONE** - No objects
* **ALL** - All objects

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Object Library</strong></td>
<td>Enter the name of the library to which this authority schema applies, or enter <strong>ALL</strong> to include all libraries</td>
</tr>
<tr>
<td><strong>Object Type</strong></td>
<td>Enter the object type to which this authority schema applies, or enter <strong>ALL</strong> to include all object types</td>
</tr>
<tr>
<td><strong>ASP Name</strong></td>
<td>Enter the ASP to which this authority schema applies or enter <strong>SYSBAS</strong> Note: If you enter <strong>SYSBAS</strong>, the system ASP and all basic user ASPs will be searched to locate the object.</td>
</tr>
</tbody>
</table>

5) Define the object authorities.

**Note:** The values you enter in the following fields define the recommended object authority settings for the object or object group associated with the schema.

### Field Description

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Object Owner</strong></td>
<td>Enter the name of the object owner</td>
</tr>
</tbody>
</table>
| **Authorization List** | Enter the name of the authority list to which this authority schema applies, or enter **NONE** if not applicable  
**Note:** An authority list displays the users who have authority to access a specific object. |
| **Object Primary Group** | Enter the name of the primary group to which the object belongs or enter **NONE** if not applicable |
| **Adopt User Profile** | Enter the name of the user profile to adopt when the schema is enforced |
| **Adopt Authority** | Whether to allow the ability to adopt authority:  
* **YES** - Enable the program to adopt the authorities from the previous program  
* **NO** - Disable the program from adopting the authorities from the previous program |

6) Define the user authorities.

**Note:** The values you enter in the following fields define the recommended user authority settings for the user or user group associated with the schema.

### Field Description

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
</table>
| **User Name** | Enter the authority level you want to assign to public users (**Public**):  
**Note:** Public users do not have the following:  
-- They do not have specific authority to use the function  
-- They do not appear on the authorization list  
-- They are not members of a user group that has specific authority to the object  
Select the level of authority you want to grant public users:  
* **ALL** - Grant public users all authorities (i.e., change, exclude, use, etc.)  
* **CHANGE** - Grant public users change authority |

* **Public Authority**
<table>

<tr>
<td><em>EXCLUDE</em></td>
<td>Prohibit public users from performing operations on the object</td>
</tr>
<tr>
<td><em>USE</em></td>
<td>Grant access to the object attributes and allow public users to use of the object (but not change the object)</td>
</tr>
<tr>
<td><em>AUTL</em></td>
<td>Grant public users the default level of authority specified for the authority list</td>
</tr>
</tbody>
</table>

7) Press Enter twice.

### 6.3.3.1. Edit Authority Schema

Use this task to edit an existing authority schema.

**To edit an authority schema**

1) Access the Work with Authority Schemas interface.
2) In the OPT column for the desired schema, enter 2 (Edit).
3) Press Enter.
4) Modify the parameters as necessary.
5) Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.
6) Press Enter twice.

### 6.3.3.2. Copy Authority Schema

Use this task to create a new authority schema by copying an existing authority schema.

**To copy an authority schema**

1) Access the Work with Authority Schemas interface.
2) In the OPT column for the desired schema, enter 3 (Copy).
3) Press Enter.
4) Modify the parameters as necessary.
5) Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.
6) Press Enter.

### 6.3.3.3. Delete Authority Schema

Use this task to delete an authority schema.

**To delete an authority schema**

1) Access the Work with Authority Schemas interface.
2) In the OPT column for the desired schema, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct schema.
5) Press Enter twice.
6.3.3.4. Add Schema Details

Use this task to add an authority schema details. The details are the exceptions that are allowed.

To add an authority schema details

1) Access the Work with Authority Schemas interface.
2) In the OPT column for the desired schema, enter 10 (Work with Authority Schema Details).
3) Press Enter.

Note: The Work with Authority Schema Details interface is displayed.

4) Press the F6 (Create) function key on your keyboard.
5) Complete the following fields.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Schema ID</td>
<td>ID assigned to the schema (not editable)</td>
</tr>
<tr>
<td>Schema Description</td>
<td>Text describing the purpose of the schema (not editable)</td>
</tr>
<tr>
<td>File Type</td>
<td>Enter the appropriate file type:</td>
</tr>
<tr>
<td></td>
<td>*SYS - QSYS.Lib (tradition) file types</td>
</tr>
<tr>
<td></td>
<td>*IFS - IFS (Integrated File System) file types</td>
</tr>
<tr>
<td></td>
<td>Note: For more information about IBM file systems, refer to the IBM Knowledge Center.</td>
</tr>
<tr>
<td>Object Owner</td>
<td>Enter the name of the object owner</td>
</tr>
<tr>
<td>Authorization List</td>
<td>Enter the name of the authority list to which this authority schema applies, or enter *NONE if not applicable</td>
</tr>
<tr>
<td>Object Primary Group</td>
<td>Enter the name of the object primary group to which this authority schema applies or enter *NONE if not applicable</td>
</tr>
<tr>
<td>User Name</td>
<td>Enter the name of the user (or group) to which the exception applies or enter *PUBLIC to apply to all users.</td>
</tr>
<tr>
<td>Object Authority</td>
<td>Enter the authority level:</td>
</tr>
<tr>
<td></td>
<td>*ALL - Grant public users all authorities (i.e., change, exclude, use, etc.)</td>
</tr>
<tr>
<td></td>
<td>*CHANGE - Grant public users change authority</td>
</tr>
<tr>
<td></td>
<td>*EXCLUDE - Prohibit public users from performing operations on the object</td>
</tr>
<tr>
<td></td>
<td>*USE - Grant access to the object attributes and allow public users to use of the object (changes to object not allowed)</td>
</tr>
<tr>
<td></td>
<td>*AUTL - Grant public users the public authority specified in the authority list</td>
</tr>
</tbody>
</table>

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

6) Press Enter twice.

6.3.3.5. Edit Schema Details

Use this task to edit schema details.
To edit schema details
1) Access the Work with Authority Schema Details interface.
2) In the OPT column for the desired schema, enter 2 (Edit).
3) Press Enter.
4) Modify the parameters as necessary.
Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.
5) Press Enter twice.

6.3.3.6. Copy Schema Detail
Use this task to create a new schema detail by copying an existing schema detail.

To copy schema details
1) Access the Work with Authority Schema Details interface.
2) In the OPT column for the desired schema, enter 3 (Copy).
3) Press Enter.
4) Modify the parameters as necessary.
Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.
5) Press Enter.

6.3.3.7. Delete Schema Detail
Use this task to delete a schema detail.

To delete a schema detail
1) Access the Work with Authority Schema Details interface.
2) In the OPT column for the desired schema, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct schema.
5) Press Enter twice.

6.3.3.8. Display Authority Schema Compliance Issues
Use this task to display authority schema compliance issues.
Tip: Run this task before you attempt to enforce authority schema to determine if exceptions (details) are required (see Add Schema Details).

To display authority schema compliance issues
1) Access the Main menu.
2) At the Selection or command prompt, enter 4 (Resource Manager).
3) Press Enter.
4) At the Selection or command prompt, enter 10 (Enforcement based on Authority Schema).
5) Press Enter.
6) Complete the following fields.
### 6.3.3.9. Enforce Authority Schema

Use this task to enforce an authority schema.

**Tip:** Before enforcing an authority schema, first identify where non-compliance is occurring (see Display Authority Schema Compliance Issues). In some cases, an issue of non-compliance might identify an exception (authority detail) that must be added. In other words, you might need to update the scheme.

**To enforce authority schemas**

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter 4 (Resource Manager).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter 10 (Enforcement based on Authority Schema).
5) Press **Enter**.
6) Complete the following fields.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scheme ID</td>
<td>ID assigned to the scheme you want to analyze for compliance</td>
</tr>
<tr>
<td>Audit report</td>
<td>Enter *YES to enable auditing (tracking)</td>
</tr>
<tr>
<td>Report output type</td>
<td>Enter the desired report output format (*HTML, *PRINT, etc.)</td>
</tr>
<tr>
<td>Enforcement</td>
<td>Enter *NO to display only (not enforce) compliance issues. <strong>Tip:</strong> Always display and investigate before enforcing.</td>
</tr>
<tr>
<td>Run interactively</td>
<td>Whether to run interactively or add to batch:</td>
</tr>
<tr>
<td></td>
<td>*YES - Run the report immediately</td>
</tr>
<tr>
<td></td>
<td>*NO  - Add the report to a batch job to be run when most efficient for the system</td>
</tr>
</tbody>
</table>

**Note:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Press **Enter**.

[Working with Authority Schemas](#)
Run Authority Schema Reports

6.3.4. Run Authority Schema Reports

Use this task to generate the following reports:

Usage Report
• Run Authority Schema Compliance Report

Configuration Reports
• Resource Manager Schema Details
• Resource Manager Schema Header

Change Reports
• Resource Manager Schema Details Changes
• Resource Manager Schema Header Changes

To work with Resource Manager reports, access from the Resource Manager Reports interface.

To access the Inactive Sessions Reports interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 4 (Resource Manager).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (Resource Manager Reports).
5) Press Enter.

Note: The Resource Manager Reports interface is displayed.

6.3.4.1. Run Resource Manager Schema Details Report

Use this report to view the list of details (exceptions) associated with each authority schema.

To run the Resource Manager Schema Details Report
1) Access the Resource Manager Reports interface.
2) At the Selection or command prompt, enter 2 (Resource Manager Configuration Reports).
3) Press Enter.

Note: The Resource Manager Configuration Reports interface is displayed.
4) At the Selection or command prompt, enter 2 (Resource Manager Schema Details).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

6.3.4.2. Run Resource Manager Schema Details Changes Report

Use this report to view the list of changes made to the details (exceptions) associated with each authority schema.

Tip: You must enable auditing to produce change reports. See Enable Resource Change Auditing for additional information.

To run the Resource Manager Schema Details Changes Report

1) Access the Resource Manager Reports interface.
2) At the Selection or command prompt, enter 3 (Resource Manager Change Reports).
3) Press Enter.

Note: The Resource Manager Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 2 (Resource Manager Schema Details Changes).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

6.3.4.3. Run Resource Manager Schema Header Report

Use this report to display the list of schema headers.

To run the Resource Manager Schema Header Report

1) Access the Resource Manager Reports interface.
2) At the Selection or command prompt, enter 2 (Resource Manager Configuration Reports).
3) Press Enter.

Note: The Resource Manager Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 3 (Resource Manager Schema Header).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

6.3.4.4. Run Resource Manager Schema Header Changes Report

Use this report to display the list of changes to schema headers.

To run the Resource Manager Schema Header Changes Report

1) Access the Resource Manager Reports interface.
2) At the Selection or command prompt, enter 3 (Resource Manager Change Reports).
3) Press Enter.

Note: The Resource Manager Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 3 (Resource Manager Schema Header Changes).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

6.3.4.5. Run Authority Schema Compliance Report

Use this task to display authority schema compliance issues.

Tip: Run this task before you attempt to enforce an authority schema to determine if exceptions (details) are required (see Add Schema Details).

To run the authority schema compliance report

1) Access the Main menu.
2) At the Selection or command prompt, enter 4 (Resource Manager).
3) Press Enter.
4) At the Selection or command prompt, enter 10 (Enforcement based on Authority Schema).
5) Press Enter.
6) Complete the following fields.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scheme ID</td>
<td>ID assigned to the scheme you want to analyze for compliance</td>
</tr>
<tr>
<td>Audit report</td>
<td>Enter *YES to enable auditing (tracking)</td>
</tr>
<tr>
<td>Report output type</td>
<td>Enter the desired report output format (*HTML, *PRINT, etc.)</td>
</tr>
<tr>
<td>Enforcement</td>
<td>Enter *NO to display (not enforce) compliance issues. Tip: Always display and investigate before enforcing.</td>
</tr>
</tbody>
</table>
**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

# 6.4. Authority Collection Configuration

## 6.4.1. Working with Authority Collections

This section describes working with the authority collections to compare IBM's least-privileges model with your current authority state in order to help define an authority schema that best meets the security needs of your organization.

**Tip:** It’s good practice is to compare IBM's least privilege model with your current authority state to determine if a user has been granted more authority than necessary. This helps you to eliminate unnecessary over-authorization.

In order to work with authority collections, you must access the **Work with Authority Collection Configuration Users** interface.

To access the Work with Authority Collection Configuration Users interface

1) Access the Main menu.
2) At the **Selection or command** prompt, enter 4 (Resource Manager).
3) Press Enter.

**Note:** The Resource Manager interface is displayed.

4) At the **Selection or command** prompt, enter 2 (Authority Collection Configuration).
5) Press Enter.

**Note:** The Work with Authority Collection Configuration Users interface is displayed.

6.4.2. Display Authority Collection Configuration

Use this task to do the following:

- Display list of authority collections
- Display authority collection details

6.4.2.1. Display List of Authority Collections

Use this task to display the list of authority collections.

Important: Authority collection is only available with OS IBM i 7.3. or higher.

To display the list of authority collections

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 4 (Resource Manager).
3) Press Enter.

Note: The Resource Manager interface is displayed.

4) At the Selection or command prompt, enter 2 (Authority Collection Configuration).
5) Press Enter.

Note: The Work with Authority Collection Configuration Users interface is displayed.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>

6.4.3. Manage Authority Collection Configuration

Use this task to do the following with:

- Start authority collection
- End authority collection
- Delete authority collection

To manage authority collections, access the Work with Authority Collection Users interface.

To access the Work with Authority Collections Users interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 4 (Resource Manager).
3) Press Enter.

Note: The Resource Manager interface is displayed.

4) At the Selection or command prompt, enter 2 (Authority Collection Configuration).
5) Press Enter.

Note: The Work with Authority Collection Users interface is displayed.

6.4.3.1. Start Authority Collection

Use this task to add an authority collection.

To add an authority collection

1) Access the Work with Authority Collections Users interface.
2) Press the F6 (Start Collection) function key on your keyboard.
3) Complete the following fields.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User profile</td>
<td>Name of the user for which you want to begin collecting authority data</td>
</tr>
<tr>

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

4) Press **Enter** twice.

### 6.4.3.2. End Authority Collection

Use this task to end an authority collection.

**To edit an authority collection**

1) Access the **Work with Authority Collections Users** interface.
2) In the **OPT** column for the desired schema, enter 3 (End Collection).
3) Press **Enter**.
4) Review the record to ensure you are ending the correct collection.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

5) Press **Enter** twice.

### 6.4.3.3. Delete Authority Collection

Use this task to delete an authority collection.

**To delete an authority collection**
1) Access the **Work with Authority Collections Users** interface.
2) In the **OPT** column for the desired schema, enter **4** (Delete).
3) Press **Enter**.
4) Review the record to ensure you are deleting the correct collection.
5) Press **Enter** twice.

**See also:**
- [Working with Authority Collections](#)
- [Run Authority Collection Reports](#)

### 6.4.4. Run Authority Collection Configuration Reports

Use this task to generate the following reports:

**Usage Reports**
- Authority Collection Report (QSYS)
- Authority Collection Report (IFS)
- Authority Compliance Report (Single Schema)
- Authority Compliance Report (All Schemas)

To work with authority collection reports, access from the **Resource Manger Reports** interface.

**To access the Resource Manager Reports interface**

1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter **4** (Resource Manager).
3) Press **Enter**.

**Note**: The **Resource Manager** interface is displayed.

4) At the **Selection or command** prompt, enter **20** (Resource Manager Reports).
5) Press **Enter**.

**Note**: The **Resource Manger Reports** interface is displayed.

### 6.4.4.1. Run Authority Compliance Report (Single Schema)

Use this report to identify compliance issues with your authority schema(s). You can use this report to identify two states:
- Instances in which your authority scheme is being enforced (i.e., in compliance with your schema)
- Instances in which your authority scheme is not being enforced (i.e., out of compliance with your schema)

**To run the Authority Compliance report for all schemas**

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter **4** (Resource Manager).
3) Press **Enter**.

**Note**: The **Resource Manager** interface is displayed.

4) At the **Selection or command** prompt, enter **1** (Authority Schema Configuration).
5) Press **Enter**.
Note: The Work with Authority Schemas interface is displayed.
6) In the OPT column for the desired schema, enter 22 (Run Compliance Report).
7) Press Enter.
8) In the Audit report field, enter *YES.
9) Enter the desired output format in the Report output type field.
10) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

6.4.4.2. Run Authority Compliance Report (All Schemas)

Note: Running authority compliance for all reports might take a lot time and system resources.

Use this report to identify compliance issues with your authority schema(s). You can use this report to identify two states:

- Instances in which your authority scheme is being enforced (i.e., in compliance with your schema)
- Instances in which your authority scheme is not being enforced (i.e., out of compliance with your schema)

To run the Authority Compliance report for all schemas
1) Access the Resource Manager Reports interface.
2) At the Selection or command prompt, enter 1 (Resource Manager Usage Reports).
3) Press Enter.

Note: The Resource Manager Usage Reports interface is displayed.
4) At the Selection or command prompt, enter 1 (Authority Compliance Report).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.
7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

6.4.4.3. Run Authority Collection Report (QSYS)

Use this task to generate the authority collection report for QSYS.

Note: QSYS is the traditional file management structure used to control the storing and accessing of traditional file objects (*FILE objects in the QSYS.LIB library). For more information about IBM file systems, refer to the IBM Knowledge Center.

To run the Authority Collection report (QSYS)
1) Access the Resource Manager Reports interface.
2) At the Selection or command prompt, enter 1 (Resource Manager Usage Reports).
3) Press Enter.
4) At the Selection or command prompt, enter 3 (Authority Collection Report - QSYS).
5) Press Enter.
6) Modify the run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see [Run Reports](#).

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press Enter.

**Note:** The status of the report is displayed at the bottom of the screen.

### 6.4.4.4. Run Authority Collection Report (IFS)

Use this task to generate the authority collection report for Integrated File System (IFS).

**Note:** IFS a newer file management structure that supports stream input/output and is similar to the structure used by personal computers and UNIX operating systems. For more information about IBM file systems, refer to the [IBM Knowledge Center](#).

**To run the Authority Collection report (IFS)**

1) Access the **Resource Manager Reports** interface.
2) At the **Selection or command** prompt, enter 1 (Resource Manager Usage Reports).
3) Press Enter.
4) At the **Selection or command** prompt, enter 2 (Authority Collection Report - IFS).
5) Press Enter.
6) Modify the run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see [Run Reports](#).

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press Enter.

**Note:** The status of the report is displayed at the bottom of the screen.

[Working with Reports](#)
7. User Profile Management

7.1. User Profile Management

The User Profile Management feature allows you to manage user profiles using blueprints. Think of a blueprint as a template that defines user profile best practices. Once you create a blueprint, you can use it to evaluate, create, or modify user profiles.

In addition, the Profile Manager allows you to do the following:

- Work with profile manager defaults
- Work with blueprints
- Work with user exclusions
- Work with archived profiles
- Work with inactive profiles
- Work with user profiles
- Work with password rules

To access the Profile Manager interface

1) Access the Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Manager).
3) Press Enter.

7.2. User Profile Management Defaults

7.2.1. Working with Profile Management Defaults

This section describes working with User Profile Management defaults.

User Profile Manager defaults allow you to define the following:

- Whether to send profile change alerts
- Whether to track profile changes (required if you plan to run reports)
- Journal in which to store profile changes
- Library in which to store profile changes
- Queue in which to store profile alerts
Queue library in which to profile alerts

In order to work with profile manager defaults, you must access the User Profile Management Defaults interface.

To access the User Profile Management Defaults interface

1) Log into TGSecure.

Note: The Main menu appears.

2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.

Note: The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 7 (Profile Manager Defaults).
5) Press Enter.

Note: The Profile Manager Defaults interface is displayed.

7.2.2. Display User Profile Management Defaults

Use this task to display the User Profile Management defaults.

To display the Profile Manager defaults

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.

Note: The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 7 (Profile Manager Defaults).
5) Press Enter.

Note: The User Profile Management Defaults interface is displayed.

- Run User Exclusion Reports
- Run Archived Profile Reports
- Run Inactive Profile Reports
7.2.3. Manage User Profile Management Defaults

Use this task to do the following:

- Enable profile auditing
- Enable profile alerts
- Enable profile archiving
- Add profile exit programs
- Remove profile exit programs

To manage Profile Manager defaults, access the User Profile Management Defaults interface.

To access the User Profile Management Defaults interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.

Note: The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 7 (User Profile Management Defaults).
5) Press Enter.

Note: The User Profile Management Defaults interface is displayed.

7.2.3.1. Enable Profile Auditing

Use this task to enable profile change auditing.

Tip: Auditing is required if you plan to run profile change reports.

To enable profile auditing

1) Access the User Profile Management Defaults interface.
2) In the Audit Journal field, enter the name of the journal in which to store changes.
3) In the Audit Journal Library field, enter the name of the library in which the journal resides.
4) In the Audit Configuration Change field, enter Y.
5) Press Enter.

Note: There are multiple product modules (e.g., network security, access escalation, inactive session lockdown, etc.) in which you can track configuration changes. Therefore, if you see *NONE in the comment field, this indicates that configuration changes are not being tracked in any module. This is common at the time the product is initially installed. If you see *PARTIAL, this indicates that configuration changes are being track in at least one module, but not all modules. If you see *ALL, this indicates that configuration changes are being tracked in all modules.

7.2.3.2. Enable Profile Alerts

Use this task to enable profile change alerts.

Tip: Alerting is required if you plan to send alert notifications.

To enable profile alerts
1) Access the User Profile Management Defaults interface.
2) In the Alerting Status field, enter *YES.
3) In the Alert Message Queue field, enter the name of the queue in which to store the alerts.
4) In the Alert Message Queue Library field, enter the name of the library in which the queue resides.
5) Press Enter.

7.2.3.3. Enable Profile Archiving

Use this task to enable archiving of inactive user profiles.

**Tip:** The exit programs are required (must be installed) if you plan to use the Program Manager feature.

To enable profile archiving

1) Access the User Profile Management Defaults interface.
2) In the Archive User Profile field, enter *YES.
3) In the Archive Profiles Retention field, enter the number of days the archived should be retained.
4) Press Enter.

7.2.3.4. Add Profile Exit Programs

Use this task to add (install) the User Profile Management exit program.

**Tip:** This exit program is required to enable Program Manager features.

To add Profile Manager exit programs

1) Access the User Profile Management Defaults interface.
2) Press the F20 (Add Exit Program) function key on your keyboard.

7.2.3.5. Remove Profile Exit Programs

Use this task to remove (uninstall) the User Profile Management exit program.

**Tip:** The exit program is required to enable Program Manager features.

To remove profile exit programs

1) Access the User Profile Management Defaults interface.
2) Press the F21 (Remove Exit Program) function key on your keyboard.

See also

- Working with User Profile Management Defaults
- Run User Profile Management Reports

7.2.4. Run User Profile Management Default Reports

The following Profile Manager reports are available:

**Configuration Report**

- User Profile Management Defaults
Change Report

- **User Profile Management Defaults Changes**

**Tip:** You can schedule the Profile Manager Default reports (like all other reports) to run when most convenient.

To work with Profile Manager Default reports, access from the **User Profile Reports** interface.

**To access the User Profile Reports interface**

1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter 5 (User Profile Management).
3) Press Enter.
4) At the **Selection or command** prompt, enter 20 (User Profile Reports).
5) Press Enter.

**Note:** The **User Profile Reports** interface is displayed.

### 7.2.4.1. Run User Profile Management Defaults Report

**To run the User Profile Manager Default Report**

1) Access the **User Profile Reports** interface.
2) At the **Selection or command** prompt, enter 2 (User Profile Configuration Reports).
3) Press Enter.

**Note:** The **User Profile Configuration Reports** interface is displayed.

4) At the **Selection or command** prompt, enter 11 (Profile Manager Defaults).
5) Press Enter.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see **Run Reports**.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Press Enter.

**Note:** The status of the report is displayed at the bottom of the screen.

### 7.2.4.2. Run User Profile Management Defaults Changes Report

**Tip:** You must enable auditing to produce change reports. See **Enable Profile Auditing** for additional information.

**To run the Profile Manager Default Changes Report**

1) Access the **User Profile Reports** interface.
2) At the **Selection or command** prompt, enter 3 (User Profile Change Reports).
3) Press Enter.

**Note:** The **User Profile Change Reports** interface is displayed.

4) At the **Selection or command** prompt, enter 11 (Profile Manager Defaults Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.
Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.3. Blueprints

7.3.1. Working with Blueprints

This section describes working with a blueprints. Blueprints allow you to design a 'template' by which to create new user profiles. In addition, you can use a blueprint to perform a mass update to all profiles assigned to a specific user group. To determine if the profiles within a user group conform to a blueprint, run the blueprint compliance report. The report identifies any discrepancies. You can then enforce a blueprint to eliminate the discrepancies (modify the user profiles within a group to 'match' the blueprint.

The following is the process used to define and implement blueprints:

1. Add User to a Group
2. Define Blueprint (Include link to user group)
3. Run Blueprint Compliance Report
4. Enforce Blueprint

In order to work with blueprints, you must access the Work with Blueprints interface.

To access the Work with Blueprint interface

1) Log into to TGSecure.

Note: The Main menu appears.

2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.

Note: The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 1 (Work with Blueprints).
5) Press Enter.

Note: The Work with Blueprints interface is displayed.

### 7.3.2. Display Blueprints

Use this task to do the following with blueprints:

- Display list of blueprints
- Sort list of blueprints
- Move to position in list of blueprints
- Filter list blueprint

#### 7.3.2.1. Display List of Blueprints

Use this task to display the list of available blueprints.

To display the list of blueprints

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.

Note: The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 1 (Work with Blueprints).
5) Press Enter.

Note: The Work with Blueprints interface is displayed.

</tbody>
</table>

### 7.3.2.2. Sort List of Blueprint

Use this task to sort the list. The column on which the list is currently sorted appears in white text.

**To sort the list**

1. Access the *Work with Blueprint* interface.
2. Place your cursor on the desired column heading.
3. Press the *F10* (Sort) function key.

**Tip:** The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click *F10* again.

### 7.3.2.3. Move to Position in List of Blueprints

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

**To move to a specific position within the list**

1. Access the *Work with Blueprint* interface.
2. Sort the list based on the desired column heading.
3. Place your cursor in the *Position to* field, and enter a letter, word, phrase, or number.
4) Press Enter.

**Note:** The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

### 7.3.2.4. Filter List Blueprint

Use this task to limit the objects displayed in the list by defining a subset for filtering purposes.

**Tip:** Use wildcard asterisk (*) to help define your subset.

-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.
-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.
-- Add asterisks around text (e.g., *report*) to find list items that contain specific text anywhere in the name.

**To filter the list using a subset**

1) Access the **Work with Blueprint** interface.
2) Press the **F8** (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press Enter.

**Note:** The system filters the results based on the criteria you defined for the subset.

**See also**

- Working with Blueprints
- Manage Blueprints
- Run Blueprint Reports

### 7.3.3. Manage Blueprints

Use this task to do the following with blueprints:

- **Blueprints**
  - Add blueprint
  - Copy blueprint
  - Delete blueprint
  - Display blueprint details
  - Display inactivity overrides
  - Edit blueprint details
  - Edit blueprint profile parameters
  - Edit blueprint profile authorities
  - Edit blueprint authority lists
  - Edit blueprint 3rd party scripts
  - Edit blueprint permissions

- **Blueprint Users**
  - Add blueprint user
To access the Work with Blueprints interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.

Note: The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 1 (Work with Blueprints).
5) Press Enter.

Note: The Work with Blueprints interface is displayed.

7.3.3.1. Add Blueprint

Use this task to add a blueprint. There are a number of details that need to be included in each blueprint, so a wizard has been designed to help you complete this multi-step process.

- **Step 1: Add blueprint details**
- **Step 2: Add profile parameters to a blueprint**
- **Step 3: Add object authorities to a blueprint**
- **Step 4: Add authority list settings to a blueprint**
- **Step 5: Add 3rd party scripts to a blueprint**
- **Step 6: Add permissions to a blueprint**

Tip: Press the F12 (Cancel) function key if you make a mistake in the wizard and you want to return to a previous step to make modifications.

**Step 1: Add Blueprint Details**

To add blueprint details

1) Access the Work with Blueprints interface.
2) Press the F6 (Add Wizard) function key on your keyboard.

Note: The Blueprint - Add interface is displayed.

3) Complete the following fields.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blueprint ID</td>
<td>ID you want to assign to the blueprint</td>
</tr>
<tr>
<td>Blueprint Description</td>
<td>Text describing the purpose of the blueprint</td>
</tr>
<tr>
<td>Alert Status</td>
<td>Whether alerts are enabled:</td>
</tr>
<tr>
<td>Field</td>
<td>Description</td>
</tr>
<tr>
<td>--------------------------------------------</td>
<td>-----------------------------------------------------------------------------</td>
</tr>
<tr>
<td>User Scope</td>
<td>Enter the user group you want to associate with the blueprint.</td>
</tr>
<tr>
<td></td>
<td>*Note: If you create a new profile based on this blueprint, the group you</td>
</tr>
<tr>
<td></td>
<td>enter in this field will be the user group to which you can add new profiles.</td>
</tr>
<tr>
<td></td>
<td>This is also the user group whose member are updated when a blueprint is</td>
</tr>
<tr>
<td></td>
<td>enforced.</td>
</tr>
<tr>
<td></td>
<td>*(See Manager User Profiles, for information about adding a user profile</td>
</tr>
<tr>
<td></td>
<td>based on an exiting blueprint.)*</td>
</tr>
<tr>
<td>Inactivity until User Profile is disabled</td>
<td>Number of days a profile must remain inactive profile before it is disabled</td>
</tr>
<tr>
<td>(days)</td>
<td>*Note: *DFT (Default) indicates that the standard number of days defined by</td>
</tr>
<tr>
<td></td>
<td>IBM should be applied</td>
</tr>
<tr>
<td>Inactivity until User Profile is deleted</td>
<td>Number of days a profile must remain inactive profile before it is deleted</td>
</tr>
<tr>
<td>(days)</td>
<td>*Note: *DFT (Default) indicates that the standard number of days defined by</td>
</tr>
<tr>
<td></td>
<td>IBM should be applied</td>
</tr>
<tr>
<td>Object owner for objects owned by deleted</td>
<td>Name of the user whom should take over ownership of objects when/if a</td>
</tr>
<tr>
<td>profiles</td>
<td>profile is disabled or deleted</td>
</tr>
<tr>
<td></td>
<td>*Note: *DFT (Default) indicates that the standard owner defined by IBM</td>
</tr>
<tr>
<td></td>
<td>should be applied</td>
</tr>
</tbody>
</table>

4) Press Enter.

*Note: The User Profile Parameter Settings interface is displayed.*

*Tip: Press the F12 (Cancel) function key if you make a mistake in the wizard and you want to return to a previous step to make modifications.*

**Step 2: Add Profile Parameters to a Blueprint**

*Tip: You can skip this step by pressing Enter.*

To add profile parameters to your blueprint

1) Do one of the following:

<table>
<thead>
<tr>
<th>If</th>
<th>Then</th>
</tr>
</thead>
<tbody>
<tr>
<td>If you want to see only the system-suggested parameters</td>
<td>Press the F7 (Add Suggested) function key</td>
</tr>
<tr>
<td></td>
<td><em>Note: This option adds only the profile parameters suggested by the intelligence engine.</em></td>
</tr>
<tr>
<td>If you want to see all available parameters</td>
<td>Press the F6 (Add All) function key</td>
</tr>
<tr>
<td></td>
<td>*Note: This option adds all available profile parameters (and their associated default values). You can edit the default value if necessary.</td>
</tr>
<tr>
<td></td>
<td>*Tip: *ANY is not a valid parameter value. If <em>ANY is the default value, you will be required to enter a specific value before you can save the blueprint.</em></td>
</tr>
</tbody>
</table>

*Note: The Parameter Selection dialog appears.*

2) In the Sel column, enter 1 beside the parameter(s) you want to add.
**Step 3: Add Object Authorities to a Blueprint**

**Tip:** You can skip this step by pressing **Enter**.

To add object authorities to your blueprint

1) In the **USRPRF Object** area, complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Object Owner** | Enter one of the following:  
[Name] - Enter the user name you want to assign as the owner of user profile objects  
*DFT* - Assign user profile object ownership to the default (IBM) user  
*USRPRF* - Assign user profile object ownership to the user running the program  
**Note:** If *DFT* appears in this column, the two fields below should be left blank. |
| **Owner Authority** | Enter the authority level you want to assign the object owner:  
**ALL** - Grant owner all authorities (i.e., change, exclude, use, etc.)  
**CHANGE** - Grant owner change authority  
**EXCLUDE** - Prohibit owner from performing operations on the object  
**USE** - Grant access to the object attributes and allow owner to use of the object (but not change the object) |
| **PUBLIC Authority** | Enter the authority level you want to assign to public users (*Public):  
**ALL** - Grant public users all authorities (i.e., change, exclude, use, etc.)  
**AUTL** - Grant public users the default level of authority specified by the authority list  
**CHANGE** - Grant public users change authority  
**EXCLUDE** - Prohibit public users from performing operations on the object  
**USE** - Grant access to the object attributes and allow public users to use of the object (but not change the object) |

2) In the **MSGQ Object** area, complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Object Owner** | Enter one of the following:  
[Name] - Enter the user name you want to assign as the owner of message queue objects  
*DFT* - Assign message queue object ownership to the default (IBM) user  
*USRPRF* - Assign message queue object ownership to the user running the program  
**Note:** If *DFT* appears in this column, the two fields below should be left blank. |
| **Owner Authority** | Enter the authority level you want to assign the object owner:  
**ALL** - Grant owner all authorities (i.e., change, exclude, use, etc.) |
### Field Description

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>*CHANGE</td>
<td>Grant owner change authority</td>
</tr>
<tr>
<td>*EXCLUDE</td>
<td>Prohibit owner from performing operations on the object</td>
</tr>
<tr>
<td>*USE</td>
<td>Grant access to the object attributes and allow owner to use of the object (but not change the object)</td>
</tr>
</tbody>
</table>

3) Press Enter.

**Note:** The Authority List Settings interface is displayed.

**Tip:** Press the F12 (Cancel) function key if you make a mistake in the wizard and you want to return to a previous step to make modifications.

### Step 4: Add Authority List Settings to a Blueprint

**Tip:** You can skip this step by pressing Enter.

#### To add authority list settings to your blueprint

1) Press the F6 (Add) function key on your keyboard.

**Note:** The Authority List Settings interface is displayed.

2) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Authority List</td>
<td>Enter the name of the authority list to which this blueprint applies</td>
</tr>
<tr>
<td>Authority Value</td>
<td>Enter the authority level you want to assign users who are members of the authority list:</td>
</tr>
<tr>
<td></td>
<td>*ALL - Grant users all authorities (i.e., change, exclude, use, etc.)</td>
</tr>
<tr>
<td></td>
<td>*CHANGE - Grant users change authority</td>
</tr>
<tr>
<td></td>
<td>*EXCLUDE - Prohibit uses from performing operations on the object</td>
</tr>
<tr>
<td></td>
<td>*USE - Grant access to the object attributes and allow users to use of the object (but not change the object)</td>
</tr>
</tbody>
</table>

3) Press Enter to add the authority list and return to the User Authority List Settings interface.

4) Press Enter.

**Note:** The 3rd Party Integration interface is displayed.

**Tip:** Press the F12 (Cancel) function key if you make a mistake in the wizard and you want to return to a previous step to make modifications.

### Step 5: Add 3rd Party Scripts to a Blueprint

**Tip:** You can skip this step by pressing Enter.
To add 3rd party scripts to your blueprint

1) Press the F6 (Add) function key on your keyboard.

**Note:** The 3rd Party Integration interface is displayed.

2) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Script Type</td>
<td>Type of third-party script</td>
</tr>
<tr>
<td>Script Statement</td>
<td>3rd party script text</td>
</tr>
</tbody>
</table>

3) Press Enter.

**Tip:** Press the F12 (Cancel) function key if you make a mistake in the wizard and you want to return to a previous step to make modifications.

**Step 6: Add Permissions to a Blueprint**

**Tip:** You can skip this step by pressing Enter.

To add permissions to a blueprint

1) Press the F6 (Add) function key on your keyboard.

**Note:** The Blueprint Permissions interface is displayed.

2) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User/Group</td>
<td>User or user group that has permission to use the blueprint to create and change user profiles</td>
</tr>
<tr>
<td></td>
<td><strong>Tip:</strong> Press the F4 (List) function key to see list of available options.</td>
</tr>
<tr>
<td>Create Permission</td>
<td>Whether the user/user group has permission to create new user profiles based on blueprint</td>
</tr>
<tr>
<td></td>
<td>*YES - Enable create</td>
</tr>
<tr>
<td></td>
<td>*NO - Disable create</td>
</tr>
<tr>
<td>Change Permission</td>
<td>Whether the user/user group has permission to change user profiles based on blueprint</td>
</tr>
<tr>
<td></td>
<td>*YES - Enable change</td>
</tr>
<tr>
<td></td>
<td>*NO - Disable change</td>
</tr>
</tbody>
</table>

3) Press Enter.

**Tip:** Press the F12 (Cancel) function key if you make a mistake in the wizard and you want to return to a previous step to make modifications.

7.3.3.2. Copy Blueprint

Use this task to create a new blueprint by copying an existing blueprint.

To copy a blueprint

1) Access the Work with Blueprint interface.
2) In the OPT column for the desired blueprint, enter 3 (Copy).
3) Press Enter.
4) Modify the parameters as necessary.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

5) Press Enter twice.

### 7.3.3.3. Delete Blueprint

Use this task to delete a blueprint.

**To delete a blueprint**

1) Access the **Work with Blueprint** interface.
2) In the **OPT** column for the desired blueprint, enter **4** (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct blueprint.
5) Press Enter twice.

### 7.3.3.4. Display Blueprint Details

Use this task to display blueprint details.

**To display blueprint details**

1) Access the **Work with Blueprints** interface.
2) In the **OPT** column for the desired blueprint, enter **5** (Display).
3) Press Enter.

<table>
<thead>

<td>Name of the user whom should take over ownership of objects when a profile is disabled or deleted</td>
</tr>
</tbody>
</table>

**Note:** *DFT (Default) indicates that the standard number of days defined by IBM should be applied
7.3.3.5. Display Inactivity Overrides

Use this task to display inactivity overrides. When you create a blueprint, you have the option to use the default (*DFT) IBM policy to determine when an inactive user profile is disabled or deleted (and to whom object ownership should be transferred in such a case).

To display inactive overrides

1) Access the Work with Blueprints interface.
2) In the OPT column for the desired blueprint, enter 14 (Inactivity Overrides).
3) Press Enter.

<table>
<thead>
<tr>

</tbody>
</table>

7.3.3.6. Edit Blueprint Details

Use this task to edit the details of an existing blueprint.

To edit blueprint details

1) Access the Work with Blueprints interface.
2) In the OPT column for the desired blueprint, enter 2 (Edit).
3) Press Enter.
4) Modify the parameters as necessary.
5) Press Enter twice.

7.3.3.7. Edit Blueprint Profile Parameters

Use this task to edit the profile parameters for an existing blueprint.

To edit blueprint profile parameters

1) Access the Work with Blueprints interface.
2) In the OPT column for the desired blueprint, enter 10 (Profile Parameters).
3) Press Enter.
4) Modify the parameters as necessary.

Note: You also have the ability to add and delete parameters.

5) Press Enter twice.
7.3.3.8. Edit Blueprint Profile Authorities

Use this task to edit the profile authorities for an existing blueprint.

To edit blueprint profile authorities
1) Access the Work with Blueprints interface.
2) In the OPT column for the desired blueprint, enter 11 (Profile Authorities).
3) Press Enter.
4) Modify the parameters as necessary.
   Note: You also have the ability to add and delete profile authorities.
5) Press Enter twice.

7.3.3.9. Edit Blueprint Authority Lists

Use this task to edit the authority list for an existing blueprint.

To edit blueprint authority list
1) Access the Work with Blueprints interface.
2) In the OPT column for the desired blueprint, enter 12 (Authority Lists).
3) Press Enter.
4) Modify the parameters as necessary.
   Note: You also have the ability to add and delete authority lists.
5) Press Enter twice.

7.3.3.10. Edit Blueprint 3rd Party Scripts

Use this task to edit 3rd party scripts associated with an existing blueprint.

To edit blueprint 3rd party scripts
1) Access the Work with Blueprints interface.
2) In the OPT column for the desired blueprint, enter 13 (3rd Party).
3) Press Enter.
4) Modify the parameters as necessary.
   Note: You also have the ability to add and delete 3rd party scripts.
5) Press Enter twice.

7.3.3.11. Edit Blueprint Permissions

Use this task to manage who can use a blueprint (as a template) to create and change user profiles.

To edit blueprint permissions
1) Access the Work with Blueprints interface.
2) In the OPT column for the desired blueprint, enter 30 (Blueprint Permissions).
3) Press Enter.
4) Modify the following fields as necessary.
### 7.3.3.12. Add Blueprint User

Use this task to add a user (member) to a blueprint user group.

**To add blueprint user**

1. Access the **Work with Blueprints** interface.
2. In the OPT column for the desired blueprint, enter **15** (Work with Users).
3. Press **Enter**.

**Note:** The **Work with Users** interface is displayed.

4. Press the **F6** (Add) function key on your keyboard.

**Note:** The **Work with Users - Add Record** interface is displayed.

5. Complete the following fields.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User Name</td>
<td>Name of user</td>
</tr>
<tr>
<td>User Description</td>
<td>Description of user</td>
</tr>
</tbody>
</table>

6. Press **Enter**.

**Note:** If the system locates the user on the server, then a **YES** appears in the **Exists on Server** field.

### 7.3.3.13. Edit Blueprint User

Use this task to edit the user details of a user (member) assigned to a blueprint group.

**To edit a blueprint user**

1. Access the **Work with Blueprints** interface.
2. In the OPT column for the desired blueprint, enter **15** (Work with Users).
3. Press **Enter**.

**Note:** The **Work with Users** interface is displayed.

4. In the OPT column for the desired user, enter **2** (Edit).
5. Press **Enter**.
6) Modify the parameters as necessary.

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter twice.

### 7.3.3.14. Delete Blueprint User

Use this task to delete a user (member) from a blueprint group.

**To delete a blueprint user**

1) Access the Work with Blueprints interface.
2) In the OPT column for the desired blueprint, enter 15 (Work with Users).
3) Press Enter.

**Note:** The Work with Users interface is displayed.

4) In the OPT column for the desired user, enter 4 (Delete).
5) Press Enter.
6) Review the record to ensure you are deleting the correct blueprint.
7) Press Enter twice.

### 7.3.3.15. Display Blueprint Compliance Issues

Use this task to display blueprint compliance issues. This is another way of running the blueprint compliance report.

**To display blueprint compliance issues**

1) Access the Work with Blueprints interface.
2) In the OPT column for the desired blueprint, enter 22 (Run Compliance Report).
3) Press Enter.
4) Complete the following fields.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Component</td>
<td>Name of blueprint</td>
</tr>
<tr>
<td>Audit report</td>
<td>Enter *YES to enable auditing (tracking)</td>
</tr>
<tr>
<td>Report output type</td>
<td>Enter the desired report output format (*HTML, *PRINT, etc.)</td>
</tr>
<tr>
<td>Enforcement</td>
<td>Enter *NO to display only (not enforce them) compliance issues</td>
</tr>
<tr>
<td></td>
<td><strong>Tip:</strong> Always display and investigate before enforcing.</td>
</tr>
<tr>
<td>Run interactively</td>
<td>Whether to run interactively or add to batch:</td>
</tr>
<tr>
<td></td>
<td>*YES - Run the report immediately</td>
</tr>
<tr>
<td></td>
<td>*NO - Add the report to a batch job to be run when most efficient for the system</td>
</tr>
</tbody>
</table>

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

5) Press Enter.
7.3.3.16. Display List of Non-Compliant Profiles

Use this task to display blueprint compliance issues identified when the blueprint compliance report was last run.

Tip: Before you can display compliance issues you must run the blueprint compliance report.

To display blueprint compliance issues

1) Access the Work with Blueprints interface.
2) In the OPT column for the desired blueprint, enter 20 (Non-Compliant).
3) Press Enter.
4) Complete the following fields.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User Name</td>
<td>Name of the user</td>
</tr>
<tr>
<td>Violation</td>
<td>How the user’s profile is in violation of the blueprint: Category - Category of violation Keyword - Parameter that is in violation Description - Description of object in violation</td>
</tr>
<tr>
<td>Blueprint Value</td>
<td>Parameter value defined in the blueprint</td>
</tr>
<tr>
<td>Actual Value</td>
<td>Parameter value defined in the user profile</td>
</tr>
</tbody>
</table>

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

5) Press Enter.

7.3.3.17. Enforce Blueprint

Use this task to enforce a blueprint.

Tip: Before enforcing a blueprint, first display the blueprint compliance issues to identify where non-compliance is occurring. In some cases, an issue of non-compliance might identify the need for an exclusion to be added. In other words, you might need to update the blueprint.

To enforce authority blueprint

1) Access the Work with Blueprints interface.
2) In the OPT column for the desired blueprint, enter 24 (Run Enforcement).
3) Press Enter.
4) Complete the following fields.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Component</td>
<td>Name of blueprint</td>
</tr>
<tr>
<td>Audit report</td>
<td>Enter *YES to enable auditing (tracking)</td>
</tr>
<tr>
<td>Report output type</td>
<td>Enter the desired report output format (*HTML, *PRINT, etc.)</td>
</tr>
<tr>
<td>Enforcement</td>
<td>Enter *YES to enforce the blueprint Tip: Always display and investigate before enforcing.</td>
</tr>
<tr>
<td>Run interactively</td>
<td>Whether to run interactively or add to batch:</td>
</tr>
<tr>
<td>Field</td>
<td>Description</td>
</tr>
<tr>
<td>-----------</td>
<td>-----------------------------------------------------------------------------</td>
</tr>
<tr>
<td>*YES</td>
<td>Run the report immediately</td>
</tr>
<tr>
<td>*NO</td>
<td>Add the report to a batch job to be run when most efficient for the system.</td>
</tr>
</tbody>
</table>

**Tip**: Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

5) Press **Enter**.

**See also**
- Working with Blueprints

- Manage User Profiles

### 7.3.4. Run Blueprint Reports

Use this task to generate the following blueprint reports:

**Usage Report**
- Run Blueprint Compliance Report

**Configuration Reports**
- Blueprint Master
- Blueprint Permission File
- Blueprint Parameter File
- Blueprint Object Authority File
- Blueprint Authority List Settings File
- Blueprint Non-Compliance User Profiles
- Blueprint 3rd Party Integration File

**Change Reports**
- Blueprint Master Changes
- Blueprint Permission File Changes
- Blueprint Parameter File Changes
- Blueprint Object Authority File Changes
- Blueprint Authority List Settings File Changes
- Blueprint Non-Compliance User Profiles Changes
- Blueprint 3rd Party Integration File Changes

**Tip**: You can schedule the blueprint reports (like all other reports) to run when most convenient.

To work with blueprint reports, access from the **User Profile Reports** interface.

**To access the User Profile Reports interface**
1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter **5** (User Profile Management).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (User Profile Reports).
5) Press Enter.

Note: The User Profile Reports interface is displayed.

7.3.4.1. Run Blueprint Compliance Report

Use this task to run the blueprint compliance issues report. This report lists the users whose profile authorities do not meet blueprint requirements.

Tip: Run this task before you attempt to enforce a blueprint to determine if exclusions are required (see Add Exclusions).

To run the Blueprint Compliance Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 1 (User Profile Usage Reports).
3) Press Enter.

Note: The User Profile Usage Reports interface is displayed.

4) At the Selection or command prompt, enter 1 (Blueprint Compliance Report).
5) Press Enter.

4) Complete the following fields.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Component</td>
<td>Enter BSBP</td>
</tr>
<tr>
<td>Audit report</td>
<td>Enter *YES to enable auditing (tracking)</td>
</tr>
<tr>
<td>Report output type</td>
<td>Enter the desired report output format (*HTML, *PRINT, etc.)</td>
</tr>
<tr>
<td>Enforcement</td>
<td>Enter *NO to display only (not enforce) compliance issues</td>
</tr>
<tr>
<td></td>
<td>Tip: Always display and investigate before enforcing.</td>
</tr>
<tr>
<td>Run interactively</td>
<td>Whether to run interactively or add to batch:</td>
</tr>
<tr>
<td></td>
<td>*YES - Run the report immediately</td>
</tr>
<tr>
<td></td>
<td>*NO - Add the report to a batch job to run when most efficient for the system</td>
</tr>
</tbody>
</table>

5) Press Enter.

7.3.4.2. Run Blueprint Master Report

Use this task to display the list of blueprints.

To run the Blueprint Master Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 2 (User Profile Configuration Reports).
3) Press Enter.

Note: The User Profile Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 1 (Blueprint Master).
5) Press Enter.
6) Modify the report run criteria as necessary.
Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, seeRun Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.3.4.3. Run Blueprint Permission File Report

Use this task to display permissions associated with blueprints. Permissions determine who can use a blueprint to create or modify user profiles.

To run the Blueprint Permission File Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 2 (User Profile Configuration Reports).
3) Press Enter.

Note: The User Profile Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 2 (Blueprint Permission File).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.3.4.4. Run Blueprint Parameter File Report

Use this task to display parameters associated with blueprints. For a user profile to be in compliance with a blueprint, the parameter values in the blueprint must match the parameter values in the associated user profile.

To run the Blueprint Parameter File Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 2 (User Profile Configuration Reports).
3) Press Enter.

Note: The User Profile Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 3 (Blueprint Parameter File).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.
7)  Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.3.4.5. Run Blueprint Object Authority File Report

Use this task to display object authorities associated with blueprints.

To run the Blueprint Object Authority File Report

1)  Access the User Profile Reports interface.
2)  At the Selection or command prompt, enter 2 (User Profile Configuration Reports).
3)  Press Enter.

Note: The User Profile Configuration Reports interface is displayed.

4)  At the Selection or command prompt, enter 4 (Blueprint Object Authority File).
5)  Press Enter.
6)  Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7)  Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.3.4.6. Run Blueprint Authority List Settings Report

Use this task to display authority list associated with blueprints.

To run the Blueprint Authority List Settings Report

1)  Access the User Profile Reports interface.
2)  At the Selection or command prompt, enter 2 (User Profile Configuration Reports).
3)  Press Enter.

Note: The User Profile Configuration Reports interface is displayed.

4)  At the Selection or command prompt, enter 5 (Blueprint Authority List Settings).
5)  Press Enter.
6)  Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7)  Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.3.4.7. Run Blueprint Non-Compliance User Profiles Report

Use this task to display list of user profiles that are not compliant with blueprints.
To run the Blueprint Non-Compliance User Profiles Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 2 (User Profile Configuration Reports).
3) Press Enter.

Note: The User Profile Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 6 (Blueprint Non-Compliance User Profiles).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.3.4.9. Run Blueprint Master Change Report

Use this task to display changes made to the blueprint master.

Tip: You must enable auditing to produce change reports. See Enable Profile Auditing for additional information.

To run the Blueprint Master Change Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 3 (User Profile Change Reports).
3) Press Enter.
Note: The User Profile Change Reports interface is displayed.

4) At the Selection or command prompt, enter 1 (Blueprint Master Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.
7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.3.4.10. Run Blueprint Permission File Change Report

Use this task to display changes made to blueprint permissions. Permissions determine who can use a blueprint to create or modify user profiles.

To run the Blueprint Permission File Change Report
1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 3 (User Profile Change Reports).
3) Press Enter.

Note: The User Profile Change Reports interface is displayed.

4) At the Selection or command prompt, enter 2 (Blueprint Permission File Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.
7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.3.4.11. Run Blueprint Parameter File Change Report

Use this task to display changes made to blueprint parameters.

To run the Blueprint Parameter File Change Report
1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 3 (User Profile Change Reports).
3) Press Enter.

Note: The User Profile Change Reports interface is displayed.

4) At the Selection or command prompt, enter 3 (Blueprint Parameter File Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.
Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.3.4.12. Run Blueprint Object Authority File Change Report

Use this task to display changes made to blueprint object authorities.

To run the Blueprint Object Authority File Change Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 3 (User Profile Change Reports).
3) Press Enter.

Note: The User Profile Change Reports interface is displayed.

4) At the Selection or command prompt, enter 4 (Blueprint Object Authority File Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.3.4.13. Run Blueprint Authority List Settings Change Report

Use this task to display changes made to blueprint authority lists.

To run the Blueprint Authority List Settings Change Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 3 (User Profile Change Reports).
3) Press Enter.

Note: The User Profile Change Reports interface is displayed.

4) At the Selection or command prompt, enter 5 (Blueprint Authority List Settings Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.
Note: The status of the report is displayed at the bottom of the screen.

7.3.4.14. Run Blueprint Non-Compliance User Profiles Change Report

Use this task to display changes made to non-compliant user profiles.

To run the Blueprint Non-Compliance User Profiles Change Report

1)  Access the User Profile Reports interface.
2)  At the Selection or command prompt, enter 3 (User Profile Change Reports).
3)  Press Enter.

Note: The User Profile Change Reports interface is displayed.

4)  At the Selection or command prompt, enter 6 (Blueprint Non-Compliance User Profiles Changes).
5)  Press Enter.
6)  Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7)  Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.3.4.15. Run Blueprint 3rd Party Integration File Change Report

Use this task to display changes made to 3rd party scripts.

To run the 3rd Party Integration File Change Report

1)  Access the User Profile Reports interface.
2)  At the Selection or command prompt, enter 3 (User Profile Change Reports).
3)  Press Enter.

Note: The User Profile Change Reports interface is displayed.

4)  At the Selection or command prompt, enter 7 (Blueprint 3rd Party Integration File Changes).
5)  Press Enter.
6)  Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7)  Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.4. User Exclusions

7.4.1. Working with User Exclusions

This section describes working with user exclusions.

In order to work with user exclusions, you must access the Work with User Exclusions interface.

To access the Work with User Exclusions interface

1) Log into TGSecure.

   Note: The Main menu appears.

2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.

   Note: The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 2 (Work with User Exclusions).
5) Press Enter.

   Note: The Work with User Exclusions interface is displayed.

See also

Log into TGSecure
Display User Exclusions
Manage User Exclusions
Run User Exclusion Reports

7.4.2. Display User Exclusions

Use this task to do the following with user exclusions:

- Display list of user exclusions
- Sort list of user exclusions
- Move to position in list of user exclusions
- Filter list of user exclusions
7.4.2.1. Display List of User Exclusions

Use this task to display the list of available user exclusions.

To display the list of user exclusions

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.

Note: The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 2 (Work with User Exclusions).
5) Press Enter.

Note: The Work with User Exclusions interface is displayed.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User Group</td>
<td>Name of the user group to which exclusions apply</td>
</tr>
<tr>
<td>Exclusion Type</td>
<td>Type of exclusion</td>
</tr>
<tr>
<td>*ALL</td>
<td>- All types</td>
</tr>
<tr>
<td>*ACTIVITY</td>
<td>- Exclude the user group from being checked for inactivity</td>
</tr>
<tr>
<td>*SYNC</td>
<td>- Exclude the user group from being synchronized with other iseries systems</td>
</tr>
</tbody>
</table>

7.4.2.2. Sort List of User Exclusions

Use this task to sort the list. The column on which the list is currently sorted appears in white text.

To sort the list

1) Access the Work with User Exclusion interface.
2) Place your cursor on the desired column heading.
3) Press the F10 (Sort) function key.

Tip: The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click F10 again.

7.4.2.3. Move to Position in List of User Exclusions

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

To move to a specific position within the list

1) Access the Work with User Exclusion interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the Position to field, and enter a letter, word, phrase, or number.
4) Press Enter.

Note: The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.
7.4.2.4. Filter List User Exclusions

Use this task to limit the objects displayed in the list by defining a subset for filtering purposes.

Tip: Use wildcard asterisk (*) to help define your subset.

-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.
-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.
-- Add asterisks around text (e.g., *report*) to find list items that contain specific text anywhere in the name.

To filter the list using a subset

1) Access the Work with User Exclusion interface.
2) Press the F8 (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press Enter.

Note: The system filters the results based on the criteria you defined for the subset.

Working with User Exclusions
Run User Exclusion Reports

7.4.3. Manage User Exclusions

Use this task to do the following:

• Add exclusion
• Edit exclusion
• Copy exclusion
• Delete exclusion

To manage user exclusions, access the Work with User Exclusions interface.

To access the Work with User Exclusions interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.

Note: The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 2 (Work with User Exclusions).
5) Press Enter.

Note: The Work with User Exclusions interface is displayed

7.4.3.1. Add Exclusion

Use this task to create a new user exclusion.

To copy an exclusion
1) Access the Work with User Exclusions interface.
2) Press the F6 (Add) function key on your keyboard.
3) Press Enter.

**Note:** The Work with User Exclusion - Add interface is displayed.

3) Complete the following fields.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User Group</td>
<td>Name of the user group to which exclusions apply</td>
</tr>
<tr>
<td>Exclusion</td>
<td>Type of exclusion</td>
</tr>
<tr>
<td>Type</td>
<td>*ALL - All types</td>
</tr>
<tr>
<td></td>
<td>*ACTIVITY - Exclude the user group from being checked for inactivity</td>
</tr>
<tr>
<td></td>
<td>*SYNC - exclude the user group from being synchronized with other systems (e.g., TGCentral)</td>
</tr>
</tbody>
</table>

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

5) Press Enter twice.

### 7.4.3.2. Edit Exclusion

Use this task to edit an existing user exclusion.

**To edit an exclusion**

1) Access the Work with User Exclusions interface.
2) In the OPT column for the desired exclusion, enter 2 (Edit).
3) Press Enter.
4) Modify the parameters as necessary.

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

5) Press Enter twice.

### 7.4.3.3. Copy Exclusion

Use this task to create a new user exclusion by copying an existing user exclusion.

**To copy an exclusion**

1) Access the Work with User Exclusions interface.
2) In the OPT column for the desired exclusion, enter 3 (Copy).
3) Press Enter.
4) Modify the parameters as necessary.

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

5) Press Enter twice.
7.4.3.4. Delete Exclusion

Use this task to delete an exclusion.

To delete an exclusion
1) Access the Work with User Exclusions interface.
2) In the OPT column for the desired exclusion, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct exclusion.
5) Press Enter twice.

Working with User Exclusions
Run User Exclusion Reports

7.4.4. Run User Exclusion Reports

Use this task to generate the following user exclusion reports:

Configuration Report
- User Profile Exclusions

Change Report
- User Profile Exclusions Changes

Tip: You can schedule the user exclusion reports (like all other reports) to run when most convenient.

To work with user exclusion reports, access from the User Profile Reports interface.

To access the User Profile Reports interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (User Profile Reports).
5) Press Enter.

Note: The User Profile Reports interface is displayed.

7.4.4.1. Run User Profile Exclusions Report

Use this report to view the list of user profile exclusions.

To run the User Profile Exclusions Report
1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 2 (User Profile Configuration Reports).
3) Press Enter.
**Note:** The User Profile Configuration Reports interface is displayed.

4) At the **Selection or command** prompt, enter **8** (User Profile Exclusions).
5) Press **Enter**.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see [Run Reports](#).

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Press **Enter**.

**Note:** The status of the report is displayed at the bottom of the screen.

### 7.4.4.2. Run User Profile Exclusions Changes Report

Use this report to view the changes made to user profile exclusions.

**Tip:** You must enable auditing to produce change reports. See [Enable Profile Auditing](#) for additional information.

**To run the User Profile Exclusions Changes Report**

1) Access the **User Profile Reports** interface.
2) At the **Selection or command** prompt, enter **3** (User Profile Change Reports).
3) Press **Enter**.

**Note:** The **User Profile Change Reports** interface is displayed.

4) At the **Selection or command** prompt, enter **8** (User Profile Exclusions Changes).
5) Press **Enter**.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see [Run Reports](#).

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Press **Enter**.

**Note:** The status of the report is displayed at the bottom of the screen.

7.5. Archived Profiles

7.5.1. Working with Archived Profiles

This section describes working with archived profiles.

In order to work with archived profiles, you must access the **Work with Archived Profiles** interface.

To access the **Work with Archived Profiles** interface

1) Log into TGSecure.

   **Note:** The **Main** menu appears.

2) At the **Selection or command** prompt, enter **5** (User Profile Management).
3) Press **Enter**.

   **Note:** The **User Profile Management** interface is displayed.

4) At the **Selection or command** prompt, enter **3** (Work with Archived Profiles).
5) Press **Enter**.

   **Note:** The **Work User Archived Profiles** is displayed.

See also

7.5.2. Display Archived Profiles

Use this task to do the following with archived profiles:

- Display list of archived profiles
- Sort list of archived profiles
- Move to position in list of archived profiles
- Filter list of archived profiles

7.5.2.1. Display List of Archived Profiles

Use this task to display the list of available archived profiles.

To display the list of archived profiles

1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter **5** (User Profile Management).
3) Press **Enter**.

   **Note:** The **User Profile Management** interface is displayed.

4) At the **Selection or command** prompt, enter **3** (Work with Archived Profiles).
5) Press **Enter**.
**Note:** The **Work with Archived Profiles** is displayed.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User Name</td>
<td>Name of user whose profile has met inactivity limits and should therefore be disabled or deleted</td>
</tr>
<tr>
<td>Archived Date</td>
<td>Date on which the user profile was archived</td>
</tr>
<tr>
<td>User Description</td>
<td>Description of the user</td>
</tr>
<tr>
<td>Arch Available</td>
<td>Where archive is available</td>
</tr>
<tr>
<td>Archived Library</td>
<td>Name of the archive library</td>
</tr>
<tr>
<td>Archived File</td>
<td>Name of the archive file</td>
</tr>
</tbody>
</table>

### 7.5.2.2. Sort List of Archived Profiles

Use this task to sort the list. The column on which the list is currently sorted appears in white text.

**To sort the list**

1) Access the **Work with Archived Profiles** interface.
2) Place your cursor on the desired column heading.
3) Press the **F10** (Sort) function key on your keyboard.

**Tip:** The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click **F10** again.

### 7.5.2.3. Move to Position in List of Archived Profiles

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

**To move to a specific position within the list**

1) Access the **Work with Archived Profiles** interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the **Position to** field, and enter a letter, word, phrase, or number.
4) Press **Enter**.

**Note:** The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

### 7.5.2.4. Filter List Archived Profiles

Use this task to limit the objects displayed in the list by defining a subset for filtering purposes.

**Tip:** Use wildcard asterisk (*) to help define your subset.

-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.
-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.
-- Add asterisks around text (e.g., *report*) to find list items that contain specific text anywhere in the name.
To filter the list using a subset

1) Access the Work with Archived Profiles interface.
2) Press the F8 (Subset) function key on your keyboard.
3) Enter the criteria you want to use to define the subset.
4) Press Enter.

Note: The system filters the results based on the criteria you defined for the subset.

7.5.3. Manage Archived Profiles

Use this task to do the following:

- Reactivate profile
- Delete archived file

To manage archived profiles, access the Work with Archived Profiles interface.

To access the Work with Archived Profiles interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.

Note: The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 3 (Work with Archived Profiles).
5) Press Enter.

Note: The Work with Archived Profiles is displayed.

7.5.3.1. Reactivate Profile

Use this task to reactivate a profile.

Note: Profiles are archived (retired from the system and stored in an archive file) once they meet inactivity requirements that are set in the profile settings.

To reactivate a profile

1) Access the Work with Archived Profiles interface.
2) In the OPT column for the desired profile, enter 6 (Reactivate Profile).
3) Press Enter.

7.5.3.2. Delete Archived File

Warning: Before deleting an archive file, ensure you have a back-up of the file.

Use this task to delete an archive file, which contains multiple archived user profiles.
To delete an archive file

1) Access the Work with Archived Profiles interface.
2) In the OPT column for the desired archive file, enter 9 (Delete Archive File).
3) Press Enter twice.

See also

Working with Archived Profiles

7.5.4. Run Archived Profile Reports

Use this task to generate the following archived profile reports:

Configuration Report

• User Profile Archive

Change Report

• User Profile Archive Changes

Tip: You can schedule the archived profile reports (like all other reports) to run when most convenient.

To access the User Profile Reports interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (User Profile Reports).
5) Press Enter.

Note: The User Profile Reports interface is displayed.

7.5.4.1. Run User Profile Archive Report

Use this report to view the list of archived profiles.

To run the User Profile Archive Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 2 (User Profile Configuration Reports).
3) Press Enter.

Note: The User Profile Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 9 (User Profile Archive).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.
Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.5.4.2. Run User Profile Archive Changes Report

Use this report to view the list of changes made to archived profiles.
Tip: You must enable auditing to produce change reports. See Enable Profile Auditing for additional information.

To run the User Profile Archive Changes Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 3 (User Profile Change Reports).
3) Press Enter.

Note: The User Profile Change Reports interface is displayed.

4) At the Selection or command prompt, enter 9 (User Profile Archive Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

## 7.6.3. Manage Inactive Profile

Use this task to do the following:

- [Edit Inactive Profile Settings](#)
- [Display a list of inactive profiles](#)
- [Enforce inactive profile rules](#)

To manage Profile Manager defaults, access the **Profile Inactivity Settings** interface.

### To access the Profile Inactivity Settings interface

1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter 5 (User Profile Management).
3) Press Enter.

**Note:** The **User Profile Management** interface is displayed.

4) At the **Selection or command** prompt, enter 5 (Profile Inactivity Settings).
5) Press Enter.

**Note:** The **Profile Inactivity Settings** interface is displayed.

## 7.6.3.1. Edit Inactive Profile Settings

### To display inactive profile settings

1) Access the **Profile Inactivity Settings** interface.
2) Modify the necessary parameters:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inactivity until user profile is disabled</td>
<td>Number of days before an inactive user profile is flagged as needing to be disabled</td>
</tr>
<tr>
<td>Inactivity until user profile is deleted</td>
<td>Number of days before an inactive user profile is flagged as needing to be deleted</td>
</tr>
<tr>
<td>Field</td>
<td>Description</td>
</tr>
<tr>
<td>-------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Delete profiles with password of *NONE</td>
<td>Whether to delete profiles with the password value of *NONE&lt;br&gt;*YES - Delete the profiles&lt;br&gt;*NO - Keep the profiles</td>
</tr>
<tr>
<td>Object owner for objects owned by deleted profiles</td>
<td>The name of the user who will inherit ownership of objects from deleted or disabled user profiles&lt;br&gt;Note: All objects must be assigned an owner.</td>
</tr>
<tr>
<td>Remove deleted profiles from TG user group</td>
<td>Whether to remove deleted profiles from TG user groups&lt;br&gt;*YES - Delete the user profile from TG groups&lt;br&gt;*NO - Keep the user profile as member of TG groups</td>
</tr>
<tr>
<td>Remove deleted profiles from TG rules</td>
<td>Whether to remove rules that are no longer associated with a user because the user profile for which the rule was defined is no longer present in the system&lt;br&gt;*YES - Delete the rule&lt;br&gt;*NO - Keep the rule</td>
</tr>
<tr>
<td>Alert when inactivity found</td>
<td>Whether to send an alert to the admin when inactive profiles are detected&lt;br&gt;*YES - Enable alerts&lt;br&gt;*NO - Disable alerts</td>
</tr>
</tbody>
</table>

3) Press Enter twice.

### 7.6.3.2. Display the List of Inactive Profiles

Use this task to display the list of user profiles that the system (based on the inactive profile settings) has deemed as inactive.

To display the list of inactive user profiles

1) Access the Profile Inactivity Settings interface.
2) Press the F22 (Run Inactive Report) function key on your keyboard.

**Tip:** For function keys higher than F12, you must use a combination of the Shift key and the appropriate function key. For example, to select F24, you must hold down the Shift key and F12.

3) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

4) Press Enter.

**Note:** The status of the report is displayed at the bottom of the screen.

### 7.6.3.3. Enforce Inactive Profile Rules

Use this task to enforce the inactive profile rules.

**Note:** Whether a profile is disabled or deleted during enforcement is based on the inactive profile settings.
To enforce profile inactivity rules

1) Access the **Profile Inactivity Settings** interface.
2) Press the **F23** (Run Inactivity Enforcement) function key on your keyboard.

**Tip:** For function keys higher than **F12**, you must use a combination of the **Shift** key and the appropriate function key. For example, to select **F23**, you must hold down the **Shift** key and **F11**.

3) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see **Run Reports**.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

4) Press **Enter**.

**Note:** The status of the report is displayed at the bottom of the screen.

### 7.6.4. Run Inactive Profile Reports

Use this task to generate the following inactive profile report.

**Usage Report**

- Inactivity Compliance Report

**Configuration Report**

- Profile Inactivity Settings

**Change Report**

- Profile Inactivity Settings Changes

**Tip:** You can schedule the Archived Profile reports (like all other reports) to run when most convenient.

To work with Archived Profile reports, access from the **User Profile Reports** interface.

**To access the User Profile Reports interface**

1) Access the TGSecure **Main** menu.
2) At the **Selection or command** prompt, enter **5** (User Profile Management).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter **20** (User Profile Reports).
5) Press **Enter**.
**Note**: The User Profile Reports interface is displayed.

### 7.6.4.1. Run Inactivity Compliance Report

Use this report to display the list of inactive profiles.

**To run the Inactivity Compliance Report**

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 1 (User Profile Usage Reports).
3) Press Enter.

**Note**: The User Profile Usage Reports interface is displayed.

4) At the Selection or command prompt, enter 2 (Inactivity Compliance Report).
5) Press Enter.
6) Modify the report run criteria as necessary.

**Note**: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

**Tip**: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

**Note**: The status of the report is displayed at the bottom of the screen.

### 7.6.4.2. Run Profile Inactivity Settings Report

Use this report to view the list of profile inactivity settings.

**To run the Profile Inactivity Settings Report**

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 2 (User Profile Configuration Reports).
3) Press Enter.

**Note**: The User Profile Configuration Reports interface is displayed.

4) At the Selection or command prompt, enter 10 (Profile Inactivity Settings).
5) Press Enter.
6) Modify the report run criteria as necessary.

**Note**: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

**Tip**: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

**Note**: The status of the report is displayed at the bottom of the screen.

### 7.6.4.3. Run Profile Inactivity Settings Changes Report

Use this report to view the list of changes made to the profile inactivity settings.

**Tip**: You must enable auditing to produce change reports. See Enable Profile Auditing for additional information.
To run the Profile Inactivity Settings Changes Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 3 (User Profile Change Reports).
3) Press Enter.

**Note:** The User Profile Change Reports interface is displayed.

4) At the Selection or command prompt, enter 10 (Profile Inactivity Settings Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

**Note:** The status of the report is displayed at the bottom of the screen.

**See also:**

### 7.7. User Profiles

#### 7.7.1. Working with User Profiles

This section describes working with user profiles.

In order to work with user profiles, you must access the TG User Profile Manager interface.

**To access the TG User Profile Manager interface**

1) Log into to TGSecure.

**Note:** The Main menu appears.

2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.

**Note:** The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 4 (Create/Change User Profile - TGUSRMGR).
5) Press Enter.

**Note:** The TG User Profile Manager interface is displayed.
7.7.2. Manage User Profiles

Use this task to do the following:

- Create user profile based on a blueprint
- Change user profile based on a blueprint

To manage user profiles using blueprints, access the TG User Profile Manager interface.

To access the TG User Profile Manager interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.

**Note:** The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 4 (Create/Change User Profile - TGPRFMGR).
5) Press Enter.

**Note:** The TG User Profile Manager interface is displayed.

7.7.2.1. Create User Profile Based on a Blueprint

Use this task to create a user profile based on a blueprint.

**Tip:** Ensure you have permission to use the blueprint to create profiles before attempting this task.

To create a user profile based on a blueprint

1) Access the TG User Profile Manager interface.
2) In the Action type field, enter *CRT*.
3) Press Enter.
4) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blueprint ID</td>
<td>Name of the blueprint on which to base the user profile</td>
</tr>
<tr>
<td>User Name</td>
<td>Name of the user</td>
</tr>
<tr>
<td>User Description</td>
<td>Description of the user</td>
</tr>
<tr>
<td>Add to Blueprint user group</td>
<td>Whether to add the user to the user group associated with the named blueprint</td>
</tr>
<tr>
<td></td>
<td><em>YES</em> - Add the user to the blueprint user group</td>
</tr>
<tr>
<td></td>
<td><em>NO</em> - Based the user profile on the blueprint only, but do not add the user to the blueprint user group</td>
</tr>
</tbody>
</table>

5) Press Enter.
7.7.2.2. Change User Profile Based on a Blueprint

Use this task to change a user profile based on a blueprint.
Tip: Ensure you have permission to use the blueprint to change profiles before attempting this task.

To change a user profile based on a blueprint
1) Access the TG User Profile Manager interface.
2) In the Action type field, enter *CHG.
3) Press Enter.
4) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blueprint ID</td>
<td>Name of the blueprint on which to base the user profile</td>
</tr>
<tr>
<td>User Name</td>
<td>Name of the user</td>
</tr>
<tr>
<td>User Description</td>
<td>Description of the user</td>
</tr>
<tr>
<td>Add to Blueprint user group</td>
<td></td>
</tr>
<tr>
<td></td>
<td>*YES - Add the user to the blueprint user group</td>
</tr>
<tr>
<td></td>
<td>*NO - Based the user profile on the blueprint only, but do not add the user to the blueprint user group</td>
</tr>
</tbody>
</table>

5) Press Enter.

7.7.3. Run User Profile Reports

Use this task to run the following reports:

Usage Reports
- User Profile Create/Change via TGPRFMGR
- User Profile Activity
- User Profile Changes
- Invalid Sign-on Attempts
- Run Authority Failures For User

Tip: You can schedule the user profile reports (like all other reports) to run when most convenient.

To work with user profile reports, access from the User Profile Reports interface.

To access the User Profile Reports interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (User Profile Reports).
5) Press Enter.
7.7.3.1. Run User Profile Create/Change via TGPRFMGR Report

Use this report to view the profiles either created or changed using the profile manager feature.

To run the User Profile Create/Change via TGPRFMGR Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 1 (User Profile Usage Reports).
3) Press Enter.

Note: The User Profile Usage Reports interface is displayed.

4) At the Selection or command prompt, enter 3 (User Profile Create/Change via TGPRFMGR).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.7.3.2. Run User Profile Activity Report

Use this report to view modifications made to user profiles. The information is presented in two-row partners. The first row shows the previous state and the second row shows the change state.

Tip: This report has numerous columns. If you are interested in only a subset of user profile parameters, consider creating a custom report based on this built in report.

To run the User Profile Activity Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 1 (User Profile Usage Reports).
3) Press Enter.

Note: The User Profile Usage Reports interface is displayed.

4) At the Selection or command prompt, enter 4 (User Profile Activity).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.
7.7.3.3. Run User Profile Changes Report

Use this report to view who has modified user profiles and what they have changed.

Tip: You must enable auditing to produce change reports. See Enable Profile Auditing for additional information.

To run the User Profile Change Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 1 (User Profile Usage Reports).
3) Press Enter.

Note: The User Profile Usage Reports interface is displayed.

4) At the Selection or command prompt, enter 6 (User Profile Changes).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.7.3.4. Run Invalid Sign-on Attempts Report

Use this report to view the list of unsuccessful sign-on attempts.

To run the Invalid Sign-on Attempts Report

1) Access the User Profile Reports interface.
2) At the Selection or command prompt, enter 1 (User Profile Usage Reports).
3) Press Enter.

Note: The User Profile Usage Reports interface is displayed.

4) At the Selection or command prompt, enter 5 (Invalid Sign-on Attempts).
5) Press Enter.
6) Modify the report run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

7.7.3.5. Run Authority Failures For User Report

Use this report to view job failures due to inadequate user authorities.

To run the Invalid Sign-on Attempts Report
1) Access the **User Profile Reports** interface.
2) At the **Selection or command** prompt, enter **1** (User Profile Usage Reports).
3) Press **Enter**.

**Note:** The **User Profile Usage Reports** interface is displayed.

4) At the **Selection or command** prompt, enter **7** (Authority Failures For User).
5) Press **Enter**.
6) Modify the report run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report. To see field descriptions of common report criteria, see Run Reports.

**Tip:** Place your cursor in a field and press **F1** (Help) to access a field description. Press **F4** (Prompt) for a list of valid field options.

7) Press **Enter**.

**Note:** The status of the report is displayed at the bottom of the screen.

### 7.8. Password Rules

#### 7.8.1. Working with Password Rules

This section describes working password rules.

In order to work with inactive profiles, you must access the **Password Rule Settings** interface.

**To access the Password Rules Settings interface**

1) Log into to TGSecure.

**Note:** The **Main** menu appears.

2) At the **Selection or command** prompt, enter **5** (User Profile Management).
3) Press **Enter**.

**Note:** The **User Profile Management** interface is displayed.

4) At the **Selection or command** prompt, enter **6** (Password Rule Settings).
5) Press **Enter**.

**Note:** The **Password Rules Settings** interface is displayed.
7.8.2. Manage Password Rules

Use this task to do the following:

- Add password exit program
- Remove password exit program
- Edit password rules

To manage password rules, access the Password Rules Setting interface.

To access the Work with Archived Profiles interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 5 (User Profile Management).
3) Press Enter.
   
   Note: The User Profile Management interface is displayed.

4) At the Selection or command prompt, enter 6 (Password Rules Settings).
5) Press Enter.
   
   Note: The Password Rules Setting is displayed.

7.8.2.1. Add Password Exit Program

Use this task to add (install) the password exit program.

Note: Before using the Profile Manager to modify password rules, you must install the password exit program.

To add password exit programs

1) Access the Password Rule Settings interface.
2) Press the F20 (Add Password Exits) function key on your keyboard.

Tip: For function keys higher than F12, you must use a combination of the Shift key and the appropriate function key. For example, to select F20, you must hold down the Shift key and F8.

7.8.2.2. Remove Password Exit Program

Use this task to remove the password exit program.

To remove password exit programs

1) Access the Password Rule Settings interface.
2) Press the F21 (Remove Password Exits) function key on your keyboard.

Tip: For function keys higher than F12, you must use a combination of the Shift key and the appropriate function key. For example, to select F21, you must hold down the Shift key and F9.
7.8.2.3. Edit Password Rules

Use this task to edit password rules.

**Tip:** Changes made in this interface will not impact password rules unless the password exit program is installed.

**Note:** IBM provides documentation for all password rule parameters. To access the IBM documentation, enter the following at the Selection or command prompt:

WRKSYSVAL SYSVL(map(new_password_rules)) and then press F1 (Help).

**To edit password rules**

1) Access the **Password Rules Setting** interface.
2) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current password level (QPWDLVL)</td>
<td>Enter the desired password level</td>
</tr>
<tr>
<td>Password rule value set to *PWDSYVAL</td>
<td>Whether to use default system values or custom rules</td>
</tr>
<tr>
<td></td>
<td>*YES - Use default password system values</td>
</tr>
<tr>
<td></td>
<td>*NO - Allow the admin to customize password rules</td>
</tr>
<tr>
<td></td>
<td><strong>Tip:</strong> This value must be set to *NO if you want to use the profile manager feature to update password rules.</td>
</tr>
<tr>
<td>Number of Mixed case letters (*MIXCASEn)</td>
<td>[0-9] - Number of mix-case letters required in the password</td>
</tr>
<tr>
<td>Limit Repeat Characters (*CHRLMTREP)</td>
<td>Whether a password to contain characters that repeat (appears next to each other)</td>
</tr>
<tr>
<td></td>
<td>Y - Disallow consecutive use of characters</td>
</tr>
<tr>
<td></td>
<td>N - Allow consecutive use of characters</td>
</tr>
<tr>
<td>Limit Same Character (*LMTSAMPOS)</td>
<td>Whether characters can be used in the same position as the previous password</td>
</tr>
<tr>
<td></td>
<td>Y - Disallow characters in same position</td>
</tr>
<tr>
<td></td>
<td>N - Allow characters in the same position</td>
</tr>
<tr>
<td>Require Upper/Lower/Digits/Special Char (*REQANY3)</td>
<td>Whether a password is required to contain the following types of characters: uppercase, lowercase, special characters or digits</td>
</tr>
<tr>
<td></td>
<td>Y - Require character variation</td>
</tr>
<tr>
<td></td>
<td>N - Do not require character variation</td>
</tr>
<tr>
<td>Limit Profile Name (*LMTPRFNAME)</td>
<td>Whether password can contain the user's profile name.</td>
</tr>
<tr>
<td></td>
<td>Y - Disallow user's profile name in password</td>
</tr>
<tr>
<td></td>
<td>N - Allow user's profile name in password</td>
</tr>
<tr>
<td>Password cannot be same as last</td>
<td>[0-32] - Number of times before a password can be repeated</td>
</tr>
<tr>
<td>Block password change (Hours)</td>
<td>[1-99] - Number of hours allowed between password changes</td>
</tr>
<tr>
<td></td>
<td><strong>Note:</strong> Enter *NONE to ignore this rule.</td>
</tr>
<tr>
<td>Password expiration interval (Days)</td>
<td>[1-366] - Number of days a password is valid</td>
</tr>
<tr>
<td></td>
<td><strong>Note:</strong> Enter *NOMAX to ignore this rule.</td>
</tr>
<tr>
<td>Field</td>
<td>Description</td>
</tr>
<tr>
<td>-------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Password expiration warning (Days)</td>
<td>[1-99] - Number of days before a password expiration warning is issued to user</td>
</tr>
<tr>
<td>Limit Adjacent</td>
<td>Whether to allow adjacent elements:</td>
</tr>
<tr>
<td></td>
<td>Y - Disallow adjacent characters, digits, or special Characters</td>
</tr>
<tr>
<td></td>
<td>N - Allow adjacent characters, digits, or special Characters</td>
</tr>
<tr>
<td>Limit First Char</td>
<td>Whether to place limits on the first character</td>
</tr>
<tr>
<td></td>
<td>Y - Disallow password to start with a character, digit, or special character</td>
</tr>
<tr>
<td></td>
<td>N - Allow password to start with a character, digit, or special character</td>
</tr>
<tr>
<td>Limit Last Char</td>
<td>Whether to place limits on the last character</td>
</tr>
<tr>
<td></td>
<td>Y - Disallow password to end with a character, digit, or special character</td>
</tr>
<tr>
<td></td>
<td>N - Allow password to end with a character, digit, or special character</td>
</tr>
<tr>
<td>Maximum</td>
<td>[0-9] - Maximum number of characters, digits, or special characters allowed in the password</td>
</tr>
<tr>
<td>Minimum</td>
<td>[0-9] - Minimum number of characters, digits, or special characters allowed in the password (0-9)</td>
</tr>
</tbody>
</table>

3) Press the **F8** (Save Settings) function key on your keyboard.

[Working with Password Rules](#)
8. Reports

8.1. Working with Reports

This section describes working with built-in reports.

Note: See the Report Reference Guide for details about a specific report.

To work with built-in reports, access the Work with Reports interface.

To access the Work with Reports interface

1) Access the Main menu.
2) At the Selection or command prompt, enter 30 (Work with Reports).
3) Press Enter.

See also

Display List of Reports
Run Reports
Custom Reports

8.2. Display List of Reports

Use this task to do the following:

- Display the list
- Sort the list
- Move to a specific location within the list
- Filter the list

8.2.1. Display list

Use this task to display the list of available reports.

To display the list of reports

1) Access the Main menu.
2) At the Selection or command prompt, enter 30 (Work with Reports).
3) Press Enter.

Note: The Work with Reports interface is displayed.
8.2.2. Sort List

Use this task to sort the list of available reports. The column on which the list is currently sorted appears in white text. For example, by default, the list is originally sorted by the Collector ID column so that column heading initially appears in white text.

To sort the list
1) Access the Work with Reports interface.
2) Place your cursor on a column heading (e.g., Collector ID, Report Name, or Category).
3) Press the F10 (Sort) function key.

Tip: The system sorts the list of reports in ascending order based on the selected column heading. To reverse the sort (descending order), click F10 again.

8.2.3. Move to Location in List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down to locate a report.

To move to a specific position within the list
1) Access the Work with Reports interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the Position to field, and enter a letter, word, phrase, or number.
4) Press Enter.

Note: The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

8.2.4. Filter List

Use this task to limit the reports displayed in the list by defining a subset for filtering purposes.

To filter the list using a subset
1) Access the Work with Reports interface.
2) Press the F8 (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press Enter.

Note: The system filters the results based on the criteria you defined for the subset.

See also
Working with Reports
Working with Report Outputs

8.3. Run Reports

Use this task to run a built-in or custom report using the Work with Reports interface:

Note: See the Report Reference Guide for information about individual reports.
• Run reports with start and end time requirements
• Run reports without start and end timer requirements

Tip: You can schedule reports to run when most convenient.

8.3.1. Run Reports with Start and End Time Requirements

Use these instructions when the report requires a start and end time entries.

Identifying a start and end time helps you filter the data reported and is required for some types of reports that have the potential to contain a huge amount of data.

To run a report with start and end time requirements

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter **30** (Work with Reports).
3) Press **Enter**.
4) Enter 7 in the **Opt** column for the report you want to run.
5) Press **Enter**.
6) Modify the run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report when you generate it.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Collector ID</td>
<td>ID identifying the collector from which report data is obtained (not an editable field)</td>
</tr>
<tr>
<td>Collector Name</td>
<td>Name assigned to the collector (not an editable field)</td>
</tr>
<tr>
<td>Report ID</td>
<td>ID assigned to the report you want to run (not an editable field)</td>
</tr>
<tr>
<td>Starting date</td>
<td>Select from the options available:</td>
</tr>
<tr>
<td></td>
<td>*CUR - Use the current date</td>
</tr>
<tr>
<td></td>
<td>*CMS - Use the current month’s start date</td>
</tr>
<tr>
<td></td>
<td>*LMS - Use the last month’s start date</td>
</tr>
<tr>
<td></td>
<td>*LME - Use the last month end date</td>
</tr>
<tr>
<td></td>
<td>*LYS - Use the last year’s start date</td>
</tr>
<tr>
<td></td>
<td>*LYE - Use the last year's end date</td>
</tr>
<tr>
<td></td>
<td>*LWS - Use the last week's start date (last 7 days)</td>
</tr>
<tr>
<td></td>
<td>*LDS - Use the last day's start date</td>
</tr>
<tr>
<td>Starting time</td>
<td>Enter time in the format (hhmmss): hour, minute, second</td>
</tr>
<tr>
<td>Ending date</td>
<td>Select from the options available</td>
</tr>
<tr>
<td>Ending time</td>
<td>Enter time in the format (hhmmss): hour, minute, second</td>
</tr>
<tr>
<td>Override report defaults?</td>
<td>Whether to override report defaults:</td>
</tr>
<tr>
<td></td>
<td>*YES - Ignore run-time collector defaults</td>
</tr>
<tr>
<td></td>
<td>*NO - Apply Run-time collector defaults</td>
</tr>
<tr>
<td>Reload collector data</td>
<td>Whether to reload the collector data:</td>
</tr>
<tr>
<td>Field</td>
<td>Description</td>
</tr>
<tr>
<td>------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Collector ID</td>
<td>ID identifying the collector (not an editable field)</td>
</tr>
<tr>
<td>Collector</td>
<td>Name assigned to the collector (not an editable field)</td>
</tr>
<tr>
<td>Report ID</td>
<td>ID assigned to the report you want to run (must be a report associated with the collector)</td>
</tr>
<tr>
<td></td>
<td><strong>Note:</strong> Multiple reports can be produced from a single collector, so at this point you could change the report ID to any of the reports linked to the identified collector.</td>
</tr>
<tr>
<td>Override report defaults</td>
<td>Whether to override report defaults:</td>
</tr>
<tr>
<td></td>
<td>*YES - Ignore run-time collector defaults</td>
</tr>
<tr>
<td></td>
<td>*NO - Apply Run-time collector defaults</td>
</tr>
<tr>
<td></td>
<td><strong>Tip:</strong> Run-time collector defaults maximize report efficiency. Collector defaults allow you to filter collector data before attempting to generate your report.</td>
</tr>
<tr>
<td></td>
<td>See Create Reports for additional information about setting up run-time collector defaults.</td>
</tr>
<tr>
<td>Reload collector data</td>
<td>Whether to reload the collector data:</td>
</tr>
<tr>
<td></td>
<td>*AI - Allow the artificial intelligence engine to determine if data source collection should be re-run</td>
</tr>
<tr>
<td></td>
<td>*YES - Re-run data source collection before producing the report output</td>
</tr>
<tr>
<td></td>
<td>*NO - Used cached version of data source collection</td>
</tr>
</tbody>
</table>

### 8.3.2. Run Reports without Start and End Time Requirements

Use these instructions when the report does not require a start and end time.

**To run a report without start and end time requirements**

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter **30** (Work with Reports).
3) Press **Enter**.
4) Enter **7** in the **Opt** column for the report you want to run.
5) Press **Enter**.
6) Modify the run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report when you generate it.
<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Report output type</td>
<td>Enter the desired report output format (*HTML, *PRINT, etc.)</td>
</tr>
<tr>
<td>Run interactively?</td>
<td>Whether to run interactively or add to batch:</td>
</tr>
<tr>
<td></td>
<td>*YES - Run the report immediately</td>
</tr>
<tr>
<td></td>
<td>*NO - Add the report to a batch job to be run when most efficient for the system</td>
</tr>
</tbody>
</table>

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press **Enter**.

**Note:** The status of the report is displayed at the bottom of the screen.

**See also**

- Working with Reports
- Working with Report Outputs

### 8.4. Create Reports

Use this task to create a custom report. Creating a report is a multi-step process:

**Step 1** - Add report

**Step 1** - Select source from which to collect report data

**Step 2** - Name the report

**Step 3** - Select the columns you want to include in the report

**Step 4** - Define the filter criteria

**Step 5** - Define the run-time collector defaults

**Step 6** - Confirm the report details

To create reports, access the **Work with Reports** interface.

**To access the Work with Reports interface**

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter 30 (Work with Reports).
3) Press **Enter**.

### 8.4.1. Add Report

**To add a Report**

1) Access the **Work with Reports** interface.
2) Press the F6 (Add Report) function key on your keyboard.
3) Follow the steps in the report wizard.
8.4.2. Select Data Source Collector

Use this task to select the data source collector for your custom report.

To select the data source collector

1) In the Opt column for the collector that you want to use as the data source for your report, enter 1 (Select).
2) Press Enter.

8.4.3. Name the Report

Use this task to assign a name, ID, and category to your custom report.

To identify the report

1) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Report ID</td>
<td>ID you want to assign to the report</td>
</tr>
<tr>
<td></td>
<td><strong>Tip</strong>: The name cannot contain spaces.</td>
</tr>
<tr>
<td>Report Name</td>
<td>Name you want to assign the report</td>
</tr>
<tr>
<td></td>
<td><strong>Tip</strong>: Use a name that describes the data that will appear in the report.</td>
</tr>
<tr>
<td>Category</td>
<td>The report category under which you want to group the report</td>
</tr>
<tr>
<td></td>
<td><strong>Tip</strong>: There are four standard categories: Configuration, Resources, Profiles, Network.</td>
</tr>
</tbody>
</table>
2) Press Enter.

Note: The report should now be linked to the collector and appear in your list of available reports under the identified category.

8.4.4. Select Report Fields

Use this task to select the collector fields that you want to appear as columns in your report.

Note: By default, all collector fields are selected when you create a custom report.

Tip: To customize which collector fields to include, press the F4 (Select Fields) function key on your keyboard.

To select report fields

1) Press the F4 (Select Fields) function key on your keyboard.
2) Enter 1 in the Sel column for each field you want to include as a column in your custom report.
3) Press Enter.
To change the order of the selected fields

Use this task to define the order in which fields should appear in the report.

Tip: The column with the lowest sequence number appears as the first column. The column with the highest sequence number appears as the last column.

1) Adjust the sequence numbers in the Seq column.
2) Press Enter.

8.4.5. Define Report Filter Criteria

Use this task to define the filter criteria for your custom report.

Note: Filters are not necessary but might improve the performance of your report.

To build report filter criteria

1) Press the F4 (Select Fields) function key on your keyboard.
2) Enter 1 in the Sel column for each field to which you want to apply a filter.
3) Press Enter.

To add filter criteria

1) Add operators and comparison values as necessary.
2) Press Enter.

Tip: An SQL-like format is used to create report filters. For a list of supported operators, press F10.

Note: You can use up to five levels of nesting. To begin a nested condition, enter an open parenthesis “(“ in the Nest Str column. Likewise, to end a nested condition, enter a closing parenthesis “)” in the Nest End column.
To delete filter criteria

1) Enter 4 (Delete) in the Opt column for the filter criteria you want to delete.
2) Press Enter.

8.4.6. Define Run-time Collector Defaults

Use this task to customize the defaults for the data source collection. This enables you to maximize how efficiently the report runs. Report defaults provide options specific to the data source collector on which the report is based, so you can filter the actual data source before the report filter is even applied.

An example of when report defaults are very useful is in the case of reports based on QAUDJRJ journal data or database file journal data, where very large amounts of data can potentially accumulate and take a long time to process in a typical reporting scheme. With report defaults, you can specify particular date ranges so that any report filters are only run across a subset of data instead of the entire range of available data.

Report defaults are processed before any report run-time options, except when a user selects *YES in the Override report defaults field at the time they run a report.

(See Run Reports for additional information about the Override report defaults field.)

Tip: Collector defaults are highly recommended, but they are not required. Click the F2 function key to skip this step.

To define report defaults

1) Enter the desired run-time collector default values.
2) Press Enter.

8.4.7. Confirm Report Creation

Use this task to confirm that you want to create the report that you have just defined.

Tip: Click the F12 function key to go back one step at a time if you want to make changes or verify that you entered the correct information.

To confirm report creation

1) Review the information.
2) Press Enter.
8.5. Manage Reports

Use this task to do the following:

- **Edit reports**
- **Copy reports**
- **Delete reports**

To manage reports, access the **Work with Reports** interface.

**To access the Work with Reports interface**

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter 30 (Work with Reports).
3) Press **Enter**.

*Note*: The **Work with Reports Interface** is displayed.

Alternatively, at the IBM i command line, enter **TGWRKRPT**, and press **Enter**.

8.5.1. Edit Report

Use this task to edit a report.

**Important**: The **Report ID** cannot be edited after the report is created.

**To edit a report**

1) Access the **Work with Reports** interface.
2) Enter the appropriate option in the **Opt** column for the report you want to modify:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
</table>
| 2 (Edit) | Modify the report name, category, and regulation details  
*Note*: Only available for custom reports, not built-in reports (those shipped with the product) |
| 6 (Defaults) | Modify the run-time **collector** defaults, which help to filter collector data  
*Note*: See **Create Reports** for additional information about run-time collector defaults. |
| 8 (Field Lists) | Modify which **collector** fields you want to display in your report  
*Note*: Modifications cannot be made to built-in reports |
| 9 (Filter) | Modify the filters you want applied to the data obtained from the collector  
*Note*: Modifications cannot be made to built-in reports |

8.5.2. Copy Report

Use this task to copy a report. This is useful when an existing report provides results that are close to what you need, but still do not quite meet your requirements. You can save time by copying the report and customizing it instead of beginning from scratch.

**To copy a report**

1) Access the **Work with Reports** interface.
2) In the **Opt** column for the report you want to copy, enter 3 (Copy).
3) Enter a unique Report ID and continue customization as desired. Please refer to “Creating Reports” for details.

### 8.5.3. Delete Report

Use this task to delete a report.

**Note:** You can delete only customer reports, not built-in reports.

**To delete a report**

1) Access the **Work with Reports** interface.
2) In the **Opt** column for the report you want to delete, enter 4 (Delete).
9. Groups

9.1. Working with Groups

There are several types of groups that you can create.

- **User**
- **Network**
- **Operation**
- **Object**

To access the Work with Groups interface

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter **31** (Work with Groups).
3) Press **Enter**.

*Note:* The **Work with Groups** interface is displayed.

9.2. Users

9.2.1. Working with User Groups

This section describes what you need to know about user groups.

To work with user groups, you must access the **Work with User Groups** interface.

To access the Work with User Groups interface

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter **31** (Work with Groups).
3) Press Enter.
4) At the **Selection or command** prompt, enter 1 (Work with User Groups).
5) Press Enter.

**Note:** The **Work with User Groups** interface is displayed.

**To access the Work with User Groups interface**

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter 10 (Work with User Groups).
3) Press Enter.

**Note:** The **Work with User Groups** interface is displayed.

**See also**

- **Display List of User Groups**
- **Display List of Users**
- **Manage User Groups**
- **Manage Users**
- **Run User Groups Report**

### 9.2.2. Display List of User Groups

Use this task to do the following with user groups:

- Display the list of user groups
- Sort the list of user groups
- Move to a specific location within the list of user groups
- Filter the list user groups

#### 9.2.2.1. Display List

Use this task to display the list of user groups.

**To display the list of user groups**

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter 31 (Work with Groups).
3) Press Enter.
4) At the **Selection or command** prompt, enter 1 (Work with User Groups).
5) Press Enter.

**Note:** The **Work with User Groups** interface is displayed.

**To display the list of user groups**

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter 10 (Work with User Groups).
3) Press Enter.

**Note:** The **Work with User Groups** interface is displayed.
9.2.2.2. Sort List

Use this task to sort the list of available networks. The column on which the list is currently sorted appears in white text. For example, by default, the list is originally sorted by the **Group Name** column so that column heading initially appears in white text.

**To sort the list**

1) Access the **Work with User Groups** interface.
2) Place your cursor on the desired column heading.
3) Press the **F10** (Sort) function key.

**Tip:** The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click **F10** again.

9.2.2.3. Move to Position in List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

**To move to a specific position within the list**

1) Access the **Work with User Groups** interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the **Position to** field, and enter a letter, word, phrase, or number.
4) Press **Enter**.

**Note:** The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

9.2.2.4. Filter List

Use this task to limit the user groups displayed in the list by defining a subset for filtering purposes.

**Tip:** Use wildcard asterisk (*) to help define your subset.

-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.
-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.
-- Add asterisks around text (e.g., *report*) to find list items that contain specific text anywhere in the name.

**To filter the list using a subset**

1) Access the **Work with User Groups** interface.
2) Press the **F8** (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press **Enter**.

**Note:** The system filters the results based on the criteria you defined for the subset.

9.2.3. Display List of Users in a Group

Use this task to do the following with user groups:

- Display the list of users within a group
- Sort the list of users within a group
- Move to a specific location within the list of users

9.2.3.1. Display List

Use this task to display the list of users assigned to a user group.

To display the list of users assigned to a group

1) Access the Main menu.
2) At the Selection or command prompt, enter 31 (Work with Groups).
3) Press Enter.
4) At the Selection or command prompt, enter 1 (Work with User Groups).
5) Press Enter.
6) In the OPT column, enter 10 (Work with Users).
7) Press Enter.

Note: The Work with Users interface is displayed.

9.2.3.2. Sort List

Use this task to sort the list of available users.

To sort the list

1) Access the Work with Users interface.
2) Place your cursor on the desired column heading.
3) Press the F10 (Sort) function key.

Tip: The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click F10 again.

9.2.3.3. Move to Position in List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

To move to a specific position within the list
1) Access the **Work with Users** interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the **Position to** field, and enter a letter, word, phrase, or number.
4) Press **Enter**.

**Note:** The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

### 9.2.4. Manage User Groups

Use this task to do the following with user groups:

- Add user groups
- Edit user groups
- Copy user group
- Delete user groups

To manage user groups, access the **Work with User Groups** interface.

---

**To access the Work with User Groups interface**

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter 31 (Work with Groups).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter 1 (Work with User Groups).
5) Press **Enter**.

**Note:** The **Work with User Groups** interface is displayed.

---

### 9.2.4.1. Add User Group

Use this task to add a user group.

---

**To add user group**

1) Access the **Work with User Groups** interface.
2) Press the **F6** (Add) function key.
3) Enter the name (ID) you want to assign to the group.

**Tip:** Group names must begin with a colon (:) and cannot contain spaces.

4) Enter a description for the group.
5) Press **Enter** twice.

---

### 9.2.4.2. Edit User Group

Use this task to edit a user group.

---

**To edit user group**

1) Access the **Work with User Groups** interface.
2) In the OPT column for the desired group, enter 2 (Edit).
3) Press Enter.
4) Modify the description as necessary.

Note: You cannot edit the name.

5) Press Enter twice.

9.2.4.3. Copy User Group

Use this task to copy a user group.

To copy user group
1) Access the Work with User Groups interface.
2) In the OPT column for the desired group, enter 3 (Copy).
3) Press Enter.
4) Modify the description as necessary.
5) Press Enter twice.

9.2.4.4. Delete User Group

Use this task to delete a user group

To delete user group
1) Access the Work with User Groups interface.
2) In the OPT column for the desired group, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct group.
5) Press Enter twice.

See also
Working with User Groups

9.2.5. Manage Users Within a Group

Use this task to do the following with user groups:

- Add users
- Edit users
- Delete users

To manage users, access the Work with Users interface.

To access the Work with Users interface
1) Access the Main menu.
2) At the Selection or command prompt, enter 31 (Work with Groups).
3) Press Enter.
4) At the Selection or command prompt, enter 1 (Work with User Groups).
5) Press Enter.
6) In the OPT column of the user group you want to manage, enter 10 (Work with Users).
Note: The Work with Users interface is displayed.

9.2.5.1. Add a User

Use this task to add a user.

To add user
1) Access the Work with Users interface.
2) Press the F6 (Add) function key.
3) Enter the name (ID) you want to assign to the user.

Tip: Names cannot contain spaces.
4) Enter a description for the user.
5) Press Enter twice.

Note: If the user already exists, you will see a *YES in the Exists on Server field the first time you press Enter. If the user does not exist, you will see *No in the Exists on Server field the first time you press Enter.

9.2.5.2. Edit a User

Use this task to edit a user.

Note: You can only edit the user description, not the user name.

To edit user
1) Access the Work with Users interface.
2) In the OPT column for the desired user, enter 2 (Edit).
3) Press Enter.
4) Modify the user description as necessary.

Note: You cannot edit the user name.
5) Press Enter twice.

9.2.5.3. Delete a User

Use this task to delete a user.

To delete user
1) Access the Work with Users interface.
2) In the OPT column for the desired user, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct user.
5) Press Enter twice.

Working with User Groups
9.2.6. Run User Groups Report

Use this task to generate reports that display the following for user groups.

- User group configuration details
- User group configuration changes

9.2.6.1. Run User Group Configuration Report

Use this task to display user group configuration details.

To run User Group Configuration Report

1) Access the Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (Network Reports).
5) Press Enter.
6) At the Selection or command prompt, enter 3 (Configuration Reports).
7) Press Enter.
8) At the Selection or command prompt, enter 4 (User Groups Report).
9) Press Enter.
10) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report when you generate it.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

11) Enter the desired output format in the Report output type field.
12) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

9.2.6.2. Run User Group Configuration Changes Report

Use this task to display the list of configuration changes made to user groups.

Tip: You must enable auditing to produce change reports. See Enable Access Escalation Change Auditing for additional information.

To run User Group Configuration Changes Report

1) Access the Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (Network Reports).
5) Press Enter.
6) At the Selection or command prompt, enter 4 (Configuration Changes).
7) Press Enter.
8) At the Selection or command prompt, enter 4 (User Groups Changes Report).
9) Press Enter.
10) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report when you generate it.
Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

11) Enter the desired output format in the Report output type field.
12) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

### 9.3.3. Display List of Networks in a Group

Use this task to do the following with network groups:

- Display the list of networks within a group
- Sort the list of networks within a group
- Move to a specific location within the list of networks

#### 9.3.3.1. Display List

Use this task to display the list of networks assigned to a network group.

**To display the list of networks assigned to a group**

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter **31** (Work with Groups).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter **2** (Work with Network/Server Groups).
5) Press **Enter**.
6) In the **OPT** column, enter **10** (Work with Networks).
7) Press **Enter**.

**Note:** The **Work with Networks** interface is displayed.

#### 9.3.3.2. Sort List

Use this task to sort the list of available networks.

**To sort the list**

1) Access the **Work with Networks** interface.
2) Place your cursor on the desired column heading.
3) Press the **F10** (Sort) function key.

**Tip:** The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click **F10** again.
9.3.3.3. Move to Position in List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

To move to a specific position within the list

1) Access the Work with Networks interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the Position to field, and enter a letter, word, phrase, or number.
4) Press Enter.

Note: The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

9.3.4. Manage Network Groups

Use this task to do the following with network groups:

- Add network groups
- Edit networks groups
- Copy network groups
- Delete network groups

To manage network groups, access the Work with Network Groups interface.

To access the Work with Network Groups interface

1) Access the Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.
4) At the Selection or command prompt, enter 4 (Work with Groups).
5) Press Enter.
6) At the Selection or command prompt, enter 2 (Work with Network/Server Groups).
7) Press Enter.

Note: The Work with Network Groups interface is displayed.

9.3.4.1. Add Network Group

Use this task to add a network group.

To add network group

1) Access the Work with Network Groups interface.
2) Press the F6 (Add) function key.
3) Enter the name (ID) you want to assign the network group.

Tip: Group names must begin with a colon (:) and cannot contain spaces.
4) Enter a description for the network group.
5) Press Enter twice.

9.3.4.2. Edit Network Group

Use this task to edit a network group.

To edit network group

1) Access the Work with Network Groups interface.
2) In the OPT column for the desired group, enter 2 (Edit).
3) Press Enter.
4) Modify the description as necessary.
5) Press Enter twice.

9.3.4.3. Copy Network Group

Use this task to copy a network group. This is a fast way to create a new group based on an existing group.

To copy network group

1) Access the Work with User Groups interface.
2) In the OPT column for the desired group, enter 3 (Copy).
3) Press Enter.
4) Enter the name (ID) you want to assign the group.
5) Enter a description for the group.
6) Press Enter.

9.3.4.4. Delete Network Group

Use this task to delete a network group

To delete network group

1) Access the Work with Network Groups interface.
2) In the OPT column for the desired group, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct group.
5) Press Enter twice.

9.3.5. Manage Networks Within a Group

Use this task to do the following with network groups:

- Add networks
- Edit networks
• **Delete networks**

To manage networks, access the Work with Networks interface.

**To access the Work with Networks interface**

1) Access the Main menu.
2) At the Selection or command prompt, enter 31 (Work with Groups).
3) Press Enter.
4) At the Selection or command prompt, enter 2 (Work with Network/Server Groups).
5) Press Enter.
6) In the OPT column of the network group you want to manage, enter 10 (Work with Networks)
7) Press Enter.

**Note:** The Work with Networks interface is displayed.

**9.3.5.1. Add Network**

Use this task to add a network.

**To add network**

1) Access the Work with Networks interface.
2) Press the F6 (Add) function key.
3) Enter the name (ID) you want to assign to the network.

**Tip:** Names cannot contain spaces.
4) Enter a description for the network.
5) Press Enter twice.

**9.3.5.2. Edit Network**

Use this task to edit a network.

**To edit network**

1) Access the Work with Networks interface.
2) In the OPT column for the desired network, enter 2 (Edit).
3) Press Enter.
4) Modify the network parameters as necessary.

**Note:** You cannot edit the network name.
5) Press Enter twice.

**9.3.5.3. Delete Network**

Use this task to delete a network.

**To delete network**

1) Access the Work with Networks interface.
2) In the OPT column for the desired network, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct network.
5) Press Enter twice.

9.3.6. Run Network Groups Report

Use this task to run a report that displays the list of network groups.

- Network group configuration details
- Network group configuration changes

Note: Refer to the TGSecure Report Reference for a complete list of report definitions.

To work with Network Group reports, access the Network Reports interface.

9.3.6.1. Access the Network Reports Interface

To access the Network Reports interface

1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (Network Reports).
5) Press Enter.

Note: The Network Reports interface is displayed.

9.3.6.2. Run Network Group Configuration Report

Use this task to display user group configuration details.

To run the Network Group Configuration Report

1) Access the Network Reports interface.
2) At the Selection or command prompt, enter 3 (Configuration Reports).
3) Press Enter.
4) At the Selection or command prompt, enter 5 (Network Groups Report).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report when you generate it.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

9.3.6.3. Run Network Group Configuration Changes Report

Use this task to display the list of configuration changes made to network groups.
To run the Network Group Configuration Changes Report

1) Access the Network Reports interface.
2) At the Selection or command prompt, enter 4 (Configuration Changes).
3) Press Enter.
4) At the Selection or command prompt, enter 5 (Network Groups Changes Report).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report when you generate it.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

9.4.4. Manage Operation Groups

Use this task to do the following with operation groups:

- Add operation groups
- Edit operation groups
- Copy operation groups
- Delete operation groups

To manage operation groups, access the Work with Operation Groups interface.

To access the Work with Operation Groups interface
1) Access the Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.
4) At the Selection or command prompt, enter 4 (Work with Groups).
5) Press Enter.
6) At the Selection or command prompt, enter 3 (Work with Operation Groups).
7) Press Enter.
Note: The Work with Operation Groups interface is displayed.

9.4.4.1. Add Operation Group

Use this task to add an operation group.

To add operation group

1) Access the Work with Operation Groups interface.
2) Press the F6 (Add) function key.
3) Enter the name (ID) you want to assign the group.

Tip: Group names must begin with a colon (:) and cannot contain spaces.
4) Enter a description for the group.
5) Press Enter twice.

9.4.4.2. Edit Operation Group

Use this task to edit an operation group.

To edit operation group

1) Access the Work with Operation Groups interface.
2) In the OPT column for the desired group, enter 2 (Edit).
3) Press Enter.
4) Modify the description as necessary.
5) Press Enter twice.

9.4.4.3. Copy Operation Group

Use this task to copy an operation group. This is a fast way to create a new group based on an existing group.

To copy network group

1) Access the Work with Operation Groups interface.
2) In the OPT column for the desired group, enter 3 (Copy).
3) Press Enter.
4) Enter the name (ID) you want to assign the group.

Tip: Group names must begin with a colon (:) and cannot contain spaces.
5) Enter a description for the group.
6) Press Enter.

9.4.4.4. Delete Operation Group

Use this task to delete an operation group.

To delete operation group

1) Access the Work with Operation Groups interface.
2) In the OPT column for the desired group, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct group.
5) Press Enter twice.

Working with Operations

9.4.5. Manage Operations Within a Group

Use this task to do the following with operation groups:

- Add operations
- Edit operations
- Delete operations

To manage operations, access the Work with Operations interface.

To access the Work with Operations interface

1) Access the Main menu.
2) At the Selection or command prompt, enter 31 (Work with Groups).
3) Press Enter.
4) At the Selection or command prompt, enter 3 (Work with Operation Groups).
5) Press Enter.
6) In the OPT column, enter 10 (Work with Operations).
7) Press Enter.

Note: The Work with Operations interface is displayed.

9.4.5.1. Add Operation

Use this task to add an operation.

To add operation

1) Access the Work with Operations interface.
2) Press the F6 (Add) function key.
3) Enter the name (ID) you want to assign to the operation.

Tip: Names cannot contain spaces.
4) Enter a description for the operation.
5) Press Enter twice.

9.4.5.2. Edit Operation

Use this task to edit an operation.

To edit operation

1) Access the Work with Operations interface.
2) In the OPT column for the desired operation, enter 2 (Edit).
3) Press Enter.
4) Modify the operation parameters as necessary.
Note: You cannot edit the name.

5) Press Enter twice.

9.4.5.3. Delete Operation

Use this task to delete an operation.

To delete an operation
1) Access the Work with Operations interface.
2) In the OPT column for the desired operation, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct operation.
5) Press Enter twice.

Working with Operations

9.4.6. Run Operation Groups Report

Use this task to run a report that displays the list of operation groups.
- Operation group configuration details
- Operation group configuration changes

Note: Refer to the TGSecure Report Reference for a complete list of report definitions.

To work with Network Group reports, access the Network Reports interface.

9.4.6.1. Access the Network Reports Interface

To access the Network Reports interface
1) Access the TGSecure Main menu.
2) At the Selection or command prompt, enter 1 (Network Security).
3) Press Enter.
4) At the Selection or command prompt, enter 20 (Network Reports).
5) Press Enter.

Note: The Network Reports interface is displayed.

9.4.6.2. Run Operation Groups Configuration Report

Use this task to display operation group configuration details.

To run the Operation Group Configuration Report
1) Access the Network Reports interface.
2) At the Selection or command prompt, enter 3 (Configuration Reports).
3) Press Enter.
4) At the Selection or command prompt, enter 6 (Operation Groups Report).
5) Press Enter.
6) Modify the run criteria as necessary.
Note: The criteria allow you to limit the data returned in the report when you generate it.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

9.4.6.3. Run Operation Group Configuration Changes Report

Use this task to display the list of configuration changes made to operation groups.

Tip: You must enable auditing to produce change reports. See Enable Access Escalation Change Auditing for additional information.

To run the Operation Group Configuration Changes Report

1) Access the Network Reports interface.
2) At the Selection or command prompt, enter 4 (Configuration Changes).
3) Press Enter.
4) At the Selection or command prompt, enter 6 (Operation Groups Changes Report).
5) Press Enter.
6) Modify the run criteria as necessary.

Note: The criteria allow you to limit the data returned in the report when you generate it.

Tip: Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the Report output type field.
8) Press Enter.

Note: The status of the report is displayed at the bottom of the screen.

9.5. Objects

9.5.1. Working with Objects

This section describes what you need to know about objects and object groups.

To work with object groups, you must access the Work with Object Groups interface.
To access the Work with Object Groups interface

1) Access the Main menu.
2) At the Selection or command prompt, enter 31 (Work with Groups).
3) Press Enter.
4) At the Selection or command prompt, enter 4 (Work with Object Groups).
5) Press Enter.

Note: The Work with Object Groups interface is displayed.

See also
Display List of Object Groups
Display List of Objects
Manage Object Groups
Manage Objects
Run Object Groups Report

9.5.2. Display List of Object Groups
Use this task to do the following with object groups:

- Display the list objects within a group
- Sort the list of objects within a group
- Move to a specific location within the list of objects
- Filter the list of objects within a group

9.5.2.1. Display List
Use this task to display the list of object groups.

To display the list of object groups

1) Access the Main menu.
2) At the Selection or command prompt, enter 31 (Work with Groups).
3) Press Enter.
4) At the Selection or command prompt, enter 4 (Work with Object Groups).
5) Press Enter.

Note: The Work with Object Groups interface is displayed.

9.5.2.2. Sort List
Use this task to sort the list. The column on which the list is currently sorted appears in white text. For example, by default, the list is originally sorted by the Group Name column so that column heading initially appears in white text.

To sort the list

1) Access the Work with Object Groups interface.
2) Place your cursor on the desired column heading.
3) Press the F10 (Sort) function key.
Tip: The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click **F10** again.

### 9.5.2.3. Move to a Position in the List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

**To move to a specific position within the list**
1) Access the **Work with Object Groups** interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the **Position to** field, and enter a letter, word, phrase, or number.
4) Press **Enter**.

**Note:** The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

### 9.5.2.4. Filter List

Use this task to limit the object groups displayed in the list by defining a subset for filtering purposes.

**Tip:** Use wildcard asterisk (*) to help define your subset.

-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.
-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.
-- Add asterisks around text (e.g., *report*) to find list items that contain specific text anywhere in the name.

**To filter the list using a subset**
1) Access the **Work with Object Groups** interface.
2) Press the **F8** (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press **Enter**.

**Note:** The system filters the results based on the criteria you defined for the subset.

### 9.5.3. Display a List of Object in a Group

Use this task to do the following with object groups:

- Display the list of objects within a group
- Sort the list of objects within a group
- Move to a specific location within the list of objects

### 9.5.3.1. Display List

Use this task to display the list of operations assigned to an operations group.
To display the list of operations assigned to a group

1) Access the **Main** menu.
2) At the **Selection or command** prompt, enter **31** (Work with Groups).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter **4** (Work with Object Groups).
5) Press **Enter**.
6) In the **OPT** column, enter **10** (Work with Objects).
7) Press **Enter**.

**Note:** The **Work with Objects** interface is displayed.

9.5.3.2. Sort List

Use this task to sort the list of available objects.

To sort the list

1) Access the **Work with Objects** interface.
2) Place your cursor on the desired column heading.
3) Press the **F10** (Sort) function key.

**Tip:** The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click **F10** again.

9.5.3.3. Move to Position in List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

To move to a specific position within the list

1) Access the **Work with Objects** interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the **Position to** field, and enter a letter, word, phrase, or number.
4) Press **Enter**.

**Note:** The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

9.5.4. **Manage Object Groups**

Use this task to do the following with **object** groups:

- **Add objects groups**
- **Edit objects groups**
- **Copy object groups**
- **Delete object groups**

To manage object groups, access the **Work with Object Groups** interface.
To access the Work with Object Groups interface

1) Access the Main menu.
2) At the Selection or command prompt, enter 31 (Work with Groups).
3) Press Enter.
4) At the Selection or command prompt, enter 4 (Work with Object Groups).
5) Press Enter.

Note: The Work with Object Groups interface is displayed.

9.5.4.1. Add Object Group
Use this task to add an object group.

To add object group

1) Access the Work with Object Groups interface.
2) Press the F6 (Add) function key.
3) Enter the name (ID) you want to assign the group.

Tip: Group names must begin with a colon (:) and cannot contain spaces.

4) Enter a description for the group.
5) Press Enter twice.

9.5.4.2. Edit Object Group
Use this task to edit an object group.

To edit object group

1) Access the Work with Object Groups interface.
2) In the OPT column for the desired group, enter 2 (Edit).
3) Press Enter.
4) Modify the description as necessary.
5) Press Enter twice.

9.5.4.3. Copy Object Group
Use this task to copy an object group. This is a fast way to create a new group based on an existing group.

To copy object group

1) Access the Work with Object Groups interface.
2) In the OPT column for the desired group, enter 3 (Copy).
3) Press Enter.
4) Enter the name (ID) you want to assign the group.

Tip: Group names must begin with a colon (:) and cannot contain spaces.

5) Enter a description for the group.
6) Press Enter.
9.5.4.4. Delete Object Group

Use this task to delete an object group

To delete object group

1) Access the Work with Object Groups interface.
2) In the OPT column for the desired group, enter 4 (Delete).
3) Press Enter.
4) Review the record to ensure you are deleting the correct group.
5) Press Enter twice.

9.5.5. Manage Objects Within a Group

Use this task to do the following with object groups:

- Add object
- Edit object
- Delete object

To manage objects, access the Work with Objects interface.

To access the Work with Objects interface

1) Access the Main menu.
2) At the Selection or command prompt, enter 31 (Work with Groups).
3) Press Enter.
4) At the Selection or command prompt, enter 4 (Work with Object Groups).
5) Press Enter.
6) In the OPT column, enter 10 (Work with Objects).
7) Press Enter.

Note: The Work with Objects interface is displayed.

9.5.5.1. Add Object

Use this task to add an object.

To add operation

1) Access the Work with Objects interface.
2) Press the F6 (Add) function key.
3) Enter the name (ID) you want to assign to the object.

Tip: Names cannot contain spaces.

4) Enter a description for the object.
5) Press Enter twice.
9.5.5.2. Edit Object

Use this task to edit an object.

To edit object

1) Access the **Work with Objects** interface.
2) In the **OPT** column for the desired object, enter **2** (Edit).
3) Press **Enter**.
4) Modify the object parameters as necessary.

**Note**: You cannot edit the name.

5) Press **Enter** twice.

9.5.5.3. Delete Object

Use this task to delete an object.

To delete an object

1) Access the **Work with Objects** interface.
2) In the **OPT** column for the desired object, enter **4** (Delete).
3) Press **Enter**.
4) Review the record to ensure you are deleting the correct object.
5) Press **Enter** twice.

9.5.6. Run Object Groups Report

Use this task to run a report that displays the list of **object groups**.

- **Object group configuration details**
- **Object group configuration changes**

**Note**: Refer to the TGSecure Report Reference for a complete list of report definitions.

To work with Network Group reports, access the **Network Reports** interface.

9.5.6.1. Access the Network Reports Interface

To access the Network Reports interface

1) Access the **TGSecure Main** menu.
2) At the **Selection or command** prompt, enter **1** (Network Security).
3) Press **Enter**.
4) At the **Selection or command** prompt, enter **20** (Network Reports).
5) Press **Enter**.

**Note**: The **Network Reports** interface is displayed.
9.5.6.2. Run Object Group Configuration Report

Use this task to display operation group configuration details.

To run the Object Group Configuration Report

1) Access the **Network Reports** interface.
2) At the **Selection or command** prompt, enter 3 (Configuration Reports).
3) Press Enter.
4) At the **Selection or command** prompt, enter 7 (Object Groups Report).
5) Press Enter.
6) Modify the run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report when you generate it.

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press Enter.

**Note:** The status of the report is displayed at the bottom of the screen.

9.5.6.3. Run Object Group Configuration Changes Report

Use this task to display the list of configuration changes made to object groups.

**Tip:** You must enable auditing to produce change reports. See [Enable Access Escalation Change Auditing](#) for additional information.

To run the Object Groups Configuration Changes Report

1) Access the **Network Reports** interface.
2) At the **Selection or command** prompt, enter 4 (Configuration Changes).
3) Press Enter.
4) At the **Selection or command** prompt, enter 7 (Object Groups Changes Report).
5) Press Enter.
6) Modify the run criteria as necessary.

**Note:** The criteria allow you to limit the data returned in the report when you generate it.

**Tip:** Place your cursor in a field and press F1 (Help) to access a field description. Press F4 (Prompt) for a list of valid field options.

7) Enter the desired output format in the **Report output type** field.
8) Press Enter.

**Note:** The status of the report is displayed at the bottom of the screen.

10. Calendars

10.1. Working with Calendars

This section describes how to work with calendars. Calendars allow you to enable a rule or entitlement for a specific duration (e.g., after hours, during weekends, on a holiday, etc.).

To work with calendars, you must access the Work with Calendar Interface.

To access the Work with Calendar interface

1) Access the Main menu.
2) At the Selection or command prompt, enter 32 (Work with Calendars).
3) Press Enter.

Note: The Work with Calendar interface is displayed.

See also

10.2. Display List of Calendars

Use this task to do the following with calendars:

- Display the list of calendars
- Sort the list of calendars
- Move to a specific location within the list of calendars
- Filter the list of calendars

10.2.1. Display List

Use this task to display the list of calendars.

To display the list of calendars
1) Access the Main menu.
2) At the Selection or command prompt, enter 32 (Work with Calendars).
3) Press Enter.

Note: The Work with Calendar interface is displayed.

10.2.2. Sort List

Use this task to sort the list. The column on which the list is currently sorted appears in white text. For example, by default, the list is originally sorted by the Calendar column so that column heading initially appears in white text.

To sort the list
1) Access the Work with Calendar interface.
2) Place your cursor on the desired column heading.
3) Press the F10 (Sort) function key.

Tip: The system sorts the list in ascending order based on the selected column heading. To reverse the sort (descending order), click F10 again.

10.2.3. Move to a Position in the List

Use this task to jump to a specific location within a sorted list. This is useful if you have a long list and you want to avoid paging down.

To move to a specific position within the list
1) Access the Work with Calendar interface.
2) Sort the list based on the desired column heading.
3) Place your cursor in the Position to field, and enter a letter, word, phrase, or number.
4) Press Enter.

Note: The system jumps to the location within the sorted column where the letter, word, phrase, or number first appears.

10.2.4. Filter List

Use this task to limit the calendars displayed in the list by defining a subset for filtering purposes.
Tip: Use wildcard asterisk (*) to help define your subset.
-- Add an asterisk before text (e.g., *report) to find list items that end with specific text.
-- Add an asterisk after text (e.g., report*) to find list items that start with specific text.
-- Add asterisks around text (e.g., *report*) to find list items that contain specific text anywhere in the name.

To filter the list using a subset
1) Access the Work with Calendar interface.
2) Press the F8 (Subset) function key.
3) Enter the criteria you want to use to define the subset.
4) Press Enter.

Note: The system filters the results based on the criteria you defined for the subset.

Working with Calendars
Manage Calendars

10.3. Manage Calendars

Use this task to do the following with calendars:

- Display calendar duration details
- Display calendar day/time access details
- Edit calendar duration details
- Edit calendar day/time access details
- Add calendar
- Copy calendar
- Delete calendar

To manage calendars, access the Work with Calendar interface.

To access the Work with Calendar interface
1) Access the Main menu.
2) At the Selection or command prompt, enter 32 (Work with Calendars).
3) Press Enter.

Note: The Work with Calendar interface is displayed.

10.3.1. Display Calendar Duration Details

Use this task to display the calendar duration details. The duration details identify the period for which a calendar is valid. For example, you could create a calendar to enable a rule or entitlement to be valid only during the month of December in the calendar year 2020.

To display the calendar duration details
1) Access the Work with Calendar interface.
2) In the OPT column for the desired calendar, enter 5 (Display).
3) Press Enter.
10.3.2. Display Calendar Day/Time Access Details

Use this task to display the calendar day/time access details. The day/time access details identify the days of the week and specific time for which the calendar is valid. For example, you could create a calendar to enable a rule or entitlement to be valid only on Sundays between 12:00am to 6:00am.

To display the calendar day/time access details
1) Access the Work with Calendar interface.
2) In the OPT column for the desired calendar, enter 10 (Day/Time Access).
3) Press Enter.
4) Review the day/time access details for the selected calendar.

10.3.3. Edit Calendar Duration Details

Use this task to edit the duration of a calendar.

To edit calendar duration
1) Access the Work with Calendar interface.
2) In the OPT column for the desired calendar, enter 2 (Edit).
3) Press Enter.
4) Modify the duration details as necessary.
5) Press Enter twice.

10.3.4. Edit Calendar Day/Time Access Details

Use this task to edit the day/time access for a calendar

To edit calendar day/time access
1) Access the Work with Calendar interface.
2) In the OPT column for the desired group, enter 10 (Day/Time Access).
3) Press Enter.
4) In the OPT column for the desired day/time access entry, enter 2 (Edit).
5) Modify the day/time access details as necessary.

Tip: You can add a new day/time access entry by pressing the F6 (Add) function key. For example, your calendar might require two day/time access entries: the first entry for Monday-Friday with a start time of 08:00:00 and an end time of 17:00:00, and the second entry for Saturday only with a start time of 08:00:00 and an end time of 12:00:00.
6) Press Enter twice.

See also
Manage Calendar Day/Time Access

10.3.5. Add Calendar

Use this task to add a calendar.
To add calendar

1) Access the **Work with Calendar** interface.
2) Press the **F6** (Add) function key on your keyboard.
3) Enter the parameters necessary to define the duration for which the calendar is valid.

**Tip:** Press **F1** (Help) to access field descriptions.

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Calendar Name</td>
<td>ID used to identify the calendar</td>
</tr>
<tr>
<td>Start Date</td>
<td>Start date on which the calendar is valid</td>
</tr>
<tr>
<td>Start Time</td>
<td>Start time on which the calendar is valid</td>
</tr>
<tr>
<td>End Date</td>
<td>End date on which the calendar becomes invalid</td>
</tr>
<tr>
<td>End Time</td>
<td>End time on which the calendar becomes invalid</td>
</tr>
<tr>
<td>Description</td>
<td>Short description identifying the purpose of the calendar</td>
</tr>
</tbody>
</table>

4) Press **Enter** twice.
5) Enter the days of the week for which the calendar is valid.

**Tip:** For example, to limit the application of a rule or entitlement to Monday-Friday, remove the X value beside Saturday and Sunday.

6) Enter the start and end time for which the calendar is valid for the selected day(s).

**Note:** The system applies the start/end time to all selected days. To enter different day/time access combinations, you must edit the calendar once it is saved.

7) Press **Enter**.

Working with Calendars

10.4. Manage Calendar Day/Time Access

Use this task to do the following with calendars:

- Display day/time details
- Add day/time details
- Edit day/time details
- Copy a day/time details
- Delete a day/time details

To manage the calendar day/time details, access the Work with Calendar interface.

To access the Work with Calendar interface

1) Access the Main menu.
2) At the Selection or command prompt, enter 32 (Work with Calendars).
3) Press Enter.

Note: The Work with Calendar interface is displayed.

10.4.1. Display Day/Time Details

Use this task to display the details for a specific day/time access requirement.

To display the day/time requirement details

1) Access the Work with Calendar interface.
2) In the OPT column for the desired calendar, enter 10 (Day/Time Access).
3) Press Enter.
4) In the OPT column for the desired day/time requirement, enter 5 (Display).

Note: The Day/Time Access interface is displayed.

10.4.2. Add Day/Time Requirement

Use this task to add a day/time access requirement.

To add day/time requirement

1) Access the Day/Time Access interface.
2) Press the F6 (Add) function key on your keyboard.
3) Add an X beside the day(s) of the week for which you want to add a requirement.
4) Enter a start and time.

Tip: For example, enter 00:00:00 as the start time and 24:00:00 as the end time to indicate 24 hours.
5) Press **Enter** twice.

### 10.4.3. Edit Day/Time Requirement

Use this task to edit a day/time access requirement.

**To edit day/time requirement**

1) Access the **Day/Time Access** interface.
2) In the **OPT** column, enter 2 (Edit) for the desired day/time requirement.
3) Press **Enter**.
4) Modify the day/time requirement as necessary.
5) Press **Enter** twice.

### 10.4.4. Copy Day/Time Requirement

Use this task to copy a day/time access requirement. This is a fast way to create a requirement based on an existing requirement.

**To copy day/time requirement**

1) Access the **Day/Time Access** interface.
2) In the **OPT** column for the desired requirement, enter 3 (Copy).
3) Press **Enter**.
4) Modify the requirement details as necessary.
5) Press **Enter**.

### 10.4.5. Delete Day/Time Requirement

Use this task to delete a day/time access requirement.

**To delete day/time requirement**

1) Access the **Day/Time Access** interface.
2) In the **OPT** column for the desired requirement, enter 4 (Delete).
3) Press **Enter**.
4) Review the record to ensure you are deleting the correct requirement.
5) Press **Enter** twice.

11. Save and Restore Configuration

11.1. Save/Restore TG Configuration

The Save/Restore TG Configuration tool allows you to save the configuration of a specific instance of TGSecure or TGAudit. Once you save a configuration, you can then use that saved configuration file to do the following:

- Create a back-up (archive) of the current configuration to be used later to restore the configuration of an agent (server)
- Create multiple instances with identical configuration

Note: A saved file store the configuration for the following:

- Calendars
- Entitlement
- Groups
- Networks
- Reports
- Rules

See also
Manager Configuration

11.2. Manage Configuration

Use the Save/Restore TG Configuration feature to do the following:

- Save the configuration definition of a specific agent
- Restore the configuration of an agent
- Copy the configuration of an agent

11.2.1. Save Configuration

Use this task to save the configuration of a specific agent for later restoration or to transfer the configuration to another agent.

To save the configuration

1) Access the IBM i Main menu.
2) At the Selection or command prompt, enter TGSavrst.
3) Press the F4 (Prompt) function key.

Note: The Save/Restore TG Configuration (TGSavrst) interface is displayed.

4) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Product component</td>
<td>Identify the configuration component(s) you want to save. The options available are as follows:</td>
</tr>
</tbody>
</table>
### Field Description

<table>

<td></td>
<td>the Save/Restore TG Configuration interface.</td>
</tr>
</tbody>
</table>

#### Operation to perform

Enter *SAVE* to create a configuration file—which creates an archive of the current configuration settings-- for the selected product components.

5) Click Enter.

6) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Save file</td>
<td>Enter the name you want to assign the save file or enter <em>DEFAULT</em> to use</td>
</tr>
<tr>
<td></td>
<td>the default name (i.e., TGSAVCFG).</td>
</tr>
<tr>
<td>Library</td>
<td>Enter the name of the library in which to store the save file or enter</td>
</tr>
<tr>
<td></td>
<td><em>CURLIB</em> to store the file in the current library.</td>
</tr>
<tr>
<td>Run interactively</td>
<td>Whether to run interactively or add to batch:</td>
</tr>
<tr>
<td></td>
<td><em>YES</em> - Run the report immediately</td>
</tr>
<tr>
<td></td>
<td><em>NO</em> - Add the report to a batch job to be run when most efficient for the</td>
</tr>
<tr>
<td></td>
<td>system</td>
</tr>
</tbody>
</table>

7) Click Enter.

**Note:** If a saved configuration file already exists with the defined name in the preferred library, you will receive an information message. You can choose to cancel the save (C) or replace (G) the file.

### 11.2.2. Restore Configuration

Use this task to restore the configuration of your agent to a previous state using an existing save file.

#### To restore the configuration

1) Access the IBM i Main menu.
2) At the Selection or command prompt, enter TGSAVRST
3) Press the F4 (Prompt) function key.

**Note:** The Save/Restore TG Configuration (TGSAVRST) interface is displayed.

4) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Product</td>
<td>Identify the configuration component(s) you want to restore. Your options</td>
</tr>
<tr>
<td>component</td>
<td>are as follows:</td>
</tr>
<tr>
<td></td>
<td><em>ALL</em> - Restore all components</td>
</tr>
<tr>
<td></td>
<td><em>RPT</em> - Restore reports, report cards settings, and audit configuration</td>
</tr>
</tbody>
</table>
### Field Description

*JAM* - Restore JAM (Job Activity Monitoring) rules, groups, monitored subsystems, and monitored commands

*NTW* - Restore network socket and exit rules, groups, calendars, exit point configuration, and defaults

*ACC* - Restore AEM (Access Escalation Manager) entitlements, groups, calendars, editors, defaults, and access control

**Tip:** If you want to add multiple of components (RPT + JAM), then in the *+ for more values* field, enter a plus sign (+) and then press Enter. A column of empty rows appears. Enter each component on a separate row. When you have entered all the desired components, press Enter again to return to the Save/Restore TG Configuration interface.

<table>
<thead>
<tr>
<th>Operation to perform</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Enter</strong></td>
<td><em>RESTORE</em> to use an existing save file to restore the configuration to a previous state.</td>
</tr>
</tbody>
</table>

1) Click **Enter**.
2) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Save file</td>
<td>Enter the name of the save file you want to use to restore the configuration or enter <em>DEFAULT</em> to use the default name (i.e., TGSAVCFG).</td>
</tr>
<tr>
<td>Library</td>
<td>Enter the name of the library in which the save file is stored.</td>
</tr>
</tbody>
</table>
| Run Interactively | Enter one of the following options:  
*YES* - Run the restore job immediately  
*NO* - Add the restore job to the queue |

3) Click **Enter**.

### 11.2.3. Copy Configuration

Use this task to copy the configuration of one agent to another agent.

**To copy the configuration**

1) Follow the instructions to save a configuration instance.
2) Use whatever method (e.g., FTP) you are most comfortable with to transfer the save file (e.g., TGSAVCFG).

**Tip:** You must transfer the save file manually onto each server on which you want to restore a specific configuration.

3) Follow the instruction to restore a configuration instance.

12. Troubleshooting

12.1. FAQ

This section provides troubleshooting information you can use to resolve issues you might encounter.

12.1.1. Why does my report have no data?

If you generate a report and it contains no data, you need to ensure that auditing has been enabled (see Audit Configuration).

12.2. Error Messages

12.2.1. IBM Error Messages

Use this section to learn more about error messages you might encounter.

12.2.1.1. CPF4169 While Accessing Menu Options

If you encounter a run-time error with message ID CPF4169 while accessing any of the menu options, it is likely that the emulator you are using has a display size of 24x80. The TG interface requires the use of a larger screen size (27x132). To resolve the issue, simply change the emulator session size to 27x132.

To change the emulator display size

1) Access the IBM i Main menu.
2) From the session menu, click Communication | Configure.
3) In the Type of emulation group box, change Size to 27x132.
4) Click OK.
5) From the Session menu, select File | Save. This will update your .ws (Windows JScript) file.

12.3. Fixes

12.3.1. Fix Files

TGFix is a tool introduced in version 2.0 that allows you to install fixes via the TG menu quickly and easily. The feature also includes verification features that ensure the fix is installed properly.

Save Fix to Agent Server
Manage Fixes
Display List of Fixes

12.3.2. Save Fix to Agent Server

Use this task to save the TGFix file to the agent server. You must FTP the fix file to the server before you can apply it.

To save the fix to the agent server

1) Open a DOS or command window.
2) Type the following command, substituting the name of the iSeries server for [system-name].

   FTP [system-name]

Alternatively: You can use the iSeries IP (internet address) instead of the system name.

3) Use the iSeries command GO TCPADM to find the address.
4) Select option 7.
5) Select option 1.
6) Type a user ID at the FTP prompt and press Enter.
7) Type the password at the FTP prompt and press Enter.
8) Type the following command to create the TGFIX library if it does not exist on your iSeries server:

   quote rcmd crtlib TGFIX

9) Type the following command to create the save file if it does not exist on your iSeries server:

   quote rcmd crtsavf TGFIX/TGF018001

10) Type the following command to transfer the file using binary image mode:

    binary

11) Type the following command to identify the path, where [path] is the folder where you saved the file in Step 2:

    lcd [path]

12) Type the following command to transfer the file from the PC to the iSeries:

    put TGF018001.svf TGFIX/TGF018001

13) Type the following command to end FTP:

    quit

14) Type the following command to close the DOS window:

    exit

Fix Files
Apply Fix
12.3.3. Manage Fixes

Use this task to do the following:

- Apply fix
- Remove fix

Note: If you are working with a newly release version, there might not be fixes necessary/available. You will be notified as fixes become available.

12.3.3.1. Apply Fix

Use this task to apply a fix.

Tip: The fix file must be saved on the agent server before attempting to apply it.

To apply a fix

1) Access the TG Main menu.
2) At the Selection or command prompt, enter TGFIX.
3) Press the F4 (Prompt) function key.

Note: The TG Fix Manager (TGFIX) interface is displayed.

4) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fix ID</td>
<td>Enter the fix ID, which should be provided to you in the following format:</td>
</tr>
<tr>
<td></td>
<td>(TGFVVVXXX)</td>
</tr>
<tr>
<td></td>
<td>Where:</td>
</tr>
<tr>
<td></td>
<td>TGF = TG Fix</td>
</tr>
<tr>
<td></td>
<td>VVV = Three-digit version number.</td>
</tr>
<tr>
<td></td>
<td>FFF = Three-digit numeric number (assigned sequentially) to each fix</td>
</tr>
<tr>
<td></td>
<td>Note: For example, TGF020001 would be the 1st (001) TG fix for version 2.0 (020)</td>
</tr>
</tbody>
</table>

5) Press Enter.

Note: The TGFix program performs validations before applying the fix (e.g., is the fix file present on the agent server, has the fix already been applied, etc.)

12.3.3.2. Remove Fix

Use this task to remove a fix.

To remove a fix

1) Access the TG Main menu.
2) At the Selection or command prompt, enter TGFIX.
3) Press the F4 (Prompt) function key on your keyboard.

Note: The TG Fix Manager (TGFIX) interface is displayed.
4) Complete the following fields:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fix ID</td>
<td>Enter the fix ID, which should be provided to you in the following format:</td>
</tr>
<tr>
<td></td>
<td>(TGFVVVXXX) Where:</td>
</tr>
<tr>
<td></td>
<td><strong>TGF</strong> = TG Fix</td>
</tr>
<tr>
<td></td>
<td><strong>VVV</strong> = Three-digit version number.</td>
</tr>
<tr>
<td></td>
<td><strong>FFF</strong> = Three-digit numeric number (assigned sequentially) to each fix</td>
</tr>
<tr>
<td>Note:</td>
<td>For example, TGF020001 would be the 1st (001) TG fix for version 2.0 (020)</td>
</tr>
</tbody>
</table>

| Fix action to perform | Enter *RMV                                                                 |

5) Press Enter.

12.3.4. Display List of Fixes

Use this task to display the list of fixes applied to the agent.

To display the list of fixes
1) Access the TG Main menu.
2) At the Selection or command prompt, enter 80 (Licensing Status).
3) Press Enter.
4) Press the F6 (Add Key) function key on your keyboard.
5) Enter the license key.
6) Press Enter.
