# About This Guide

This guide is intended to help you understand and resolve any issues with the event codes that are displayed on error pages or logged in files.

- ♦ Chapter 1, “Event Code Overview,” on page 7
- ♦ Chapter 2, “Administration Console (009),” on page 9
- ♦ Chapter 3, “Identity Server (001),” on page 49
- ♦ Chapter 4, “Linux Access Gateway Appliance(045),” on page 91
- ♦ Chapter 5, “Access Gateway Service (046),” on page 93
- ♦ Chapter 6, “SSL VPN Server (005),” on page 99
- ♦ Chapter 7, “Policy Engine (008),” on page 103
- ♦ Chapter 8, “SOAP Policy Enforcement Point (011),” on page 109
- ♦ Chapter 9, “Backup and Restore (010),” on page 115
- ♦ Chapter 10, “Novell Modular Authentication Class (012),” on page 121

## Audience

This guide is intended for Access Manager Appliance administrators. It is assumed that you have knowledge of evolving Internet protocols, such as:

- ♦ Extensible Markup Language (XML)
- ♦ Simple Object Access Protocol (SOAP)
- ♦ Security Assertion Markup Language (SAML)
- ♦ Public Key Infrastructure (PKI) digital signature concepts and Internet security
- ♦ Secure Socket Layer/Transport Layer Security (SSL/TLS)
- ♦ Hypertext Transfer Protocol (HTTP and HTTPS)
- ♦ Uniform Resource Identifiers (URIs)
- ♦ Domain Name System (DNS)
- ♦ Web Services Description Language (WSDL)

## Feedback

We want to hear your comments and suggestions about this manual and the other documentation included with this product. Please use the User Comments feature at the bottom of each page of the online documentation.

## Documentation Updates

For the most recent version of the *Access Manager Appliance Event Codes Guide*, visit the [NetIQ Documentation Web site \(https://www.netiq.com/documentation/\)](https://www.netiq.com/documentation/).

## Additional Documentation

- ♦ [\*NetIQ Access Manager Appliance 3.2 SP1 Administration Console Guide\*](#)
- ♦ [\*NetIQ Access Manager Appliance 3.2 SP1 Identity Server Guide\*](#)
- ♦ [\*NetIQ Access Manager Appliance 3.2 SP1 Access Gateway Guide\*](#)
- ♦ [\*NetIQ Access Manager Appliance 3.2 Policy Guide\*](#)
- ♦ [\*NetIQ Access Manager Appliance 3.2 Setup Guide\*](#)

---

# 1 Event Code Overview

Event codes for Access Manager Appliance consist of 4 fields that describe the type of code and the module that produced it:

- ◆ Severity (1 digit)
  - ◆ 1 = severe - Describes problems that needs to be resolved in order for the system to run correctly.
  - ◆ 2 = error - Describes that a failure occurred, but the system is operational.
  - ◆ 3 = warn - Describes a situation that may exist that the administrator should be aware of and may need to address. The system is currently running properly
  - ◆ 4 = config - Describes configuration related information.
  - ◆ 5 = info - Describes events that occur.
  - ◆ 6 = debug - Describes execution points within the software.
  - ◆ 9 = internal - Describes an error that is for internal use only. This error code will not be documented in any public documentation.
- ◆ Component issuing the error code (3 digits)
- ◆ Sub-grouping for further classification within a component (2 digits)
- ◆ Event code (three digits)

---

|                 |                        |                     |                   |
|-----------------|------------------------|---------------------|-------------------|
| 0               | 000                    | 00                  | 000               |
| <b>Severity</b> | <b>Component field</b> | <b>Sub-grouping</b> | <b>Event Code</b> |

---

The following sections divide the event codes by component, then describe them:

- ◆ [Chapter 1, “Event Code Overview,” on page 7](#)
- ◆ [Chapter 2, “Administration Console \(009\),” on page 9](#)
- ◆ [Chapter 3, “Identity Server \(001\),” on page 49](#)
- ◆ [Chapter 4, “Linux Access Gateway Appliance\(045\),” on page 91](#)
- ◆ [Chapter 5, “Access Gateway Service \(046\),” on page 93](#)
- ◆ [Chapter 6, “SSL VPN Server \(005\),” on page 99](#)
- ◆ [Chapter 7, “Policy Engine \(008\),” on page 103](#)
- ◆ [Chapter 8, “SOAP Policy Enforcement Point \(011\),” on page 109](#)
- ◆ [Chapter 9, “Backup and Restore \(010\),” on page 115](#)
- ◆ [Chapter 10, “Novell Modular Authentication Class \(012\),” on page 121](#)

---

# 2 Administration Console (009)

## Component 009

- ◆ Subgroup 01: Certificate Manager
- ◆ Subgroup 02: Application
- ◆ Subgroup 03: Platform
- ◆ Subgroup 04: Web UI
- ◆ Subgroup 05: Roma Application
- ◆ Subgroup 06: Policy

---

| <i>Event Code</i> | <i>Description</i>   | <i>Remedy</i>   |
|-------------------|--|---|
|                   | <b>Application</b>   |   |
| 100901001         | Error getting web manager.                                 | <b>Cause:</b> The Administration Console was not installed correctly or has become corrupt.<br><b>Action:</b> Verify installation.  |
| 100901002         | Error in initializing the dirCerts APIs.                   | <b>Cause:</b> The Administration Console was not installed correctly or has become corrupt. Specifically, the PKI and/or certificate management jars may be missing or have mismatched versions.<br><b>Action:</b> Verify that the <code>certmgr.jar</code> file is contained in the <code>/var/opt/novell/tomcat4/webapps/roma/WEB-INF/lib</code> directory and that PKI has been installed.<br>Verify that the Java command line contains the following:<br><pre>-Djava.library.path=/opt/novell/lib</pre> Verify that <code>npki.jar</code> is in the classpath. |
| 100901003         | Error in init.   | <b>Cause:</b> The Administration Console was not installed correctly or has become corrupt.<br><b>Action:</b> Verify installation.  |
| 100901004         | Error in <code>CertHandler.getMultipartParamValue</code> . | <b>Cause:</b> Servlet error when retrieving data from a multipart form.<br><b>Action:</b> Submit log to Novell Support for analysis and resolution.   |

---

| <b>Event Code</b> | <b>Description</b>   | <b>Remedy</b>   |
|-------------------|--|---|
| 100901008         | Could not remove certificate with the given alias from the keystore.                                 | <p><b>Cause:</b> The keystore that contains the certificate might not exist or might have become corrupt.</p> <p><b>Action:</b> View the configuration store and find the keystore object and check that the certificate is no longer in the key list. If it is there, manually remove it.</p> <p>Also, find the keystore on the file system of the device and remove the key manually, using the Java keytool program for JKS keystores.</p>   |
| 100901010         | Error In CertHandler.doGetSigningCertDN.   | <p><b>Cause:</b> Unable to retrieve the DN of the signing cert.</p> <p><b>Cause:</b> The signing cert does not exist.</p> <p><b>Cause:</b> The signing keystore does not exist.</p> <p><b>Action:</b> View the Identity Server Configuration's Signing keystore to verify that it exists and contains a certificate. If the signing keystore does not exist, there has been an error during the import of an Identity Server or during the creation of an Identity Server Configuration.</p> <p>Check to make sure that there are no corrupt Identity Server configurations. If the signing keystore does exist, add or replace a certificate.</p>  |
| 100901011         | Error in creating or configuring one or more of the Identity Server Configuration cluster keystores. | <p><b>Cause:</b> Test certificates might have been accidentally deleted from the file system.</p> <p><b>Cause:</b> Error communicating with the Identity Server(s) while pushing down the test certificates.</p> <p><b>Action:</b> Use the exception stack trace to discover a more detailed description of the error. Go to the Certificates tab and verify that the test-connector, test-signing, test-encryption, test-provider, test-consumer certificates have not been deleted.</p> <p>Also verify they still exist on the file system. Go to the Trusted Roots tab and verify that the configCA trusted root has not been deleted and that it exists in the configuration store. These test certificates are pushed down to each Identity Server during the creation of an Identity Server configuration.</p> <p>You can delete the Identity Server configuration and create a new one and add the Identity Servers back into the new configuration.</p> |

| <b>Event Code</b> | <b>Description</b>   | <b>Remedy</b>   |
|-------------------|--|---|
| 100901012         | keystore already exists.   | <p><b>Cause:</b> You are trying to create a keystore that already exists on the device.</p> <p><b>Action:</b> Use the existing keystore.</p>  |
| 100901013         | Error in init (using reflection to call a method has failed in init).              | <p><b>Cause:</b> The java class is unable to locate another java class through reflection.</p> <p><b>Action:</b> Submit log to Novell Support for analysis and resolution.</p>  |
| 700901014         | Cannot add non-existent key to keystore.   | <p><b>Cause:</b> The certificate you are trying to add to a keystore does not exist.</p> <p><b>Action:</b> Specify a valid key to be added to the keystore.</p>   |
| 700901015         | Cannot add key to non-existent keystore.   | <p><b>Cause:</b> The keystore does not exist.</p> <p><b>Action:</b> Specify a valid keystore or create the keystore.</p>  |
| 700901016         | Could not add key to keystore because the alias was too long.                      | <p><b>Cause:</b> Some platforms and keystore formats only support a limited number of characters in the alias name.</p> <p><b>Action:</b> Use a shorter alias.</p>  |
| 700901017         | Could not add key to keystore because the maximum number of keys has been reached. | <p><b>Cause:</b> Many keystores allow only one key to be contained in it because the keystore has a specific purpose in Access Manager Appliance.</p> <p><b>Action:</b> Remove unused keys from the keystore and try again.</p>                           |
| 700901020         | Cannot remove non-existent key from keystore.                                      | <p><b>Cause:</b> The key no longer exists in Access Manager Appliance.</p> <p><b>Action:</b> View the configuration store and find the keystore object and manually remove the key from the key list.</p>   |
| 700901021         | Cannot remove key from non-existent keystore.                                      | <p><b>Cause:</b> The keystore does not exist.</p> <p><b>Action:</b> Specify a valid keystore.</p>   |
| 100901023         | CertHandler.doGetCertFromServer: Could not connect to server IP and port.          | <p><b>Cause:</b> The server IP or DNS name and port combination is not reachable.</p> <p><b>Action:</b> Verify that the IP address or DNS name exists and that the port is correct. You can try connecting to it with a web browser or other utility.</p> |

| <b>Event Code</b> | <b>Description</b>   | <b>Remedy</b>  |
|-------------------|--|--|
| 100901024         | CertHandler.doGetCertFromServer: certificate was not obtained from server IP and port.   | <p><b>Cause:</b> The server IP or DNS name and port combination had no certificate to be presented.</p> <p><b>Action:</b> Verify that the IP address or DNS name exists and that the port is correct. Verify that the server you are attempting to import the certificate from has a certificate. You can try connecting to it with a web browser or other utility.</p>  |
| 100901025         | Error in handleException.  | <p><b>Cause:</b> The exception reported has no details associated with it.</p> <p><b>Action:</b> Scroll up in the log to see if there is a stack trace immediately above this error, determine what steps you had taken to create this error condition, and submit the log and steps to Novell Support.</p>  |
| 100901026         | The node keystore does not exist. Cannot add cluster keys to a non-existent keystore.  | <p><b>Cause:</b> The grouping of Identity Servers (Identity Server Configuration) or Access Gateways is trying to locate a keystore on one of the Identity Server or Access Gateway devices but the keystore cannot be found.</p> <p><b>Action:</b> Verify that the Identity Servers and Access Gateway devices had no errors during import to the Administration Console. Try to re-import the devices.</p>               |
| 100901027         | Error in CertHandler.getNIDPDeviceKeystoreName (The name of the device's keystore was not found).  | <p><b>Cause:</b> The cluster keystore representation object was not found.</p> <p><b>Cause:</b> The cluster keystore representation did not have a device type specified.</p> <p><b>Action:</b> Delete and recreate the Identity Server Configuration or Access Gateway Group that is causing the problem and then re-add the members.</p>   |
| 100901028         | Error in CertHandler.isTomcatCert (Unable to determine if the specified certificate is the one being used by Tomcat).                          | <p><b>Cause:</b> The certificate representation has missing or invalid attributes.</p> <p><b>Action:</b> Delete this certificate and re-import it.</p>   |
| 100901030         | Error in CertHandler.getNodeKeystoreNames (The cluster object was not found in the configuration store, or the cluster server list was empty). | <p><b>Cause:</b> The cluster object was not found in the configuration store, the type of the cluster could not be determined, or the cluster server list was empty.</p> <p><b>Action:</b> No action needed unless your devices are unable to communicate. If you are having problems with communication, delete and recreate the Identity Server configuration or Access Gateway cluster that is causing the problem.</p> |

| <b>Event Code</b> | <b>Description</b>  | <b>Remedy</b>  |
|-------------------|---|--|
| 100901031         | Error in CertHandler.getClusterDisplayName (The cluster object was not found in the configuration store). | <b>Action:</b> Delete and recreate the Identity Server configuration or Access Gateway cluster that is causing the problem and then re-add the members.  |
| 100901032         | The device does not exist but the certificate is in a keystore assigned to that device.                   | <b>Cause:</b> It's possible the device is in a partially-imported state.<br><b>Action:</b> Delete the keystore, if possible, and re-import the device.   |
| 100901033         | The device does not exist but the keystore is assigned to that device.                                    | <b>Cause:</b> It's possible the device is in a partially-imported state.<br><b>Action:</b> Delete the keystore, if possible, and re-import the device.   |
| 100901034         | Unable to retrieve the primary member of the group.   | <b>Cause:</b> The group is corrupt.<br><b>Action:</b> Delete the group, re-create it, and re-add the members.  |
| 100901035         | Unable to remove the node keystore setting off the Access Gateway group device.                           | <b>Cause:</b> Could not locate the keystore object in the configuration store.<br><b>Action:</b> No action required.   |
| 700901036         | Unable to set the Update Servers status.  | <b>Cause:</b> Communication error.<br><b>Action:</b> Manually restart or update the device.  |
| 700901037         | Unable to remove all keys from keystore.  | <b>Cause:</b> The keystore doesn't exist.<br><b>Cause:</b> There is a corrupt key in the keystore.<br><b>Action:</b> Manually remove each certificate from the keystore.   |
| 700901038         | Unable to reinitialize keystore contents for a particular device in a group or configuration.             | <b>Cause:</b> One of the device keystores does not exist.<br><b>Action:</b> Re-create the keystore or delete and recreate the group or configuration and then re-add the devices to it.<br><b>Cause:</b> There was an error either removing all certificates from a keystore.<br><b>Action:</b> Manually remove all certificates from the keystore and then remove and re-add that device to the group/configuration.<br><b>Cause:</b> There was an error adding the test certificates to a keystore.<br><b>Action:</b> Verify that the test certificates exist (see error 1.009.01.011 for more detail). Manually add the test certificates to the keystore. Or remove the device from the group/configuration and re-add it. |

| <b>Event Code</b>  | <b>Description</b>   | <b>Remedy</b>  |
|--------------------|--|--|
| 700901039          | Unable to assess whether the keystore contains a tomcat connector certificate.                 | <p><b>Cause:</b> The cluster keystore representation does not exist or is corrupt.</p> <p><b>Cause:</b> Unable to locate the devices in the group/configuration.</p> <p><b>Action:</b> Delete and recreate the group/configuration and re-add the devices to it.</p>                                   |
| 700901040          | Error adding a key to keystore during the renew certificate process.                           | <p><b>Cause:</b> The original certificate information could not be located.</p> <p><b>Action:</b> Manually create a new certificate and place it into all the keystores which previously held the certificate being renewed.</p>   |
| 100901041          | Unable to extract the public key from a key during the auto-import public certificate process. | <p><b>Cause:</b> The source keystore does not exist.</p> <p><b>Action:</b> Select a valid keystore.</p> <p><b>Cause:</b> The specified source key does not exist.</p> <p><b>Action:</b> Verify that the key you have specified to export the public certificate from exists.</p>                       |
| 100901042          | Unable to set up the initial keys for the cluster.   | <p><b>Cause:</b> When trying to locate the cluster keystores so that their contents can be initialized, one or more of those keystore representations could not be found.</p> <p><b>Action:</b> Delete and recreate the Identity Server configuration or Access Gateway cluster.</p>                   |
| 100901043          | The source keystore does not exist. Cannot push keys from a non-existent keystore.             | <p><b>Cause:</b> The source keystore does not exist.</p> <p><b>Action:</b> Usually the source keystore is a cluster keystore representation. Try deleting and recreating the Identity Server configuration or Access Gateway cluster to ensure those cluster keystore representations get created.</p> |
| <b>Application</b> |  |  |
| 100902001          | Error - Exception thrown in eventOccurred of vcdn.application.sc.alert.AlertEventListener      | <p><b>Cause:</b> Cannot post alert to internal subsystem.</p> <p><b>Action:</b> Non-fatal error. No action required.</p>   |
| 100902002          | Error - Exception thrown in eventOccurred of vcdn.application.sc.alert.AlertEventListener.     | <p><b>Cause:</b> Cannot post alert to internal subsystem.</p> <p><b>Action:</b> Submit the <code>app_sc.0.log</code> file for resolution.</p>  |

| <b>Event Code</b> | <b>Description</b>  | <b>Remedy</b>   |
|-------------------|---|---|
| 100902003         | Error - Exception thrown in logAlert of vcdn.application.sc.alert.AlertLogger.              | <p><b>Cause:</b> Problem occurred update the Identity Server Alert count.</p> <p><b>Action:</b> Non-fatal error. May be a symptom of a more serious condition. Submit the <code>app_sc.0.log</code> file for resolution.</p>  |
| 100902004         | Error - Exception thrown in the execute method of vcdn.application.sc.alert.CertUpdateWork. | <p><b>Cause:</b> Could not update or read the list of trusted server certificates.</p> <p><b>Action:</b> Be sure the <code>/var/opt/novell/novlwww/devman.cacerts</code> file exists, is a valid Java keystore, and is not corrupted. To check its status, enter the following command:</p> <pre>/opt/novell/java/bin/keytool -v -list -keystore devman.cacerts</pre> <p>Otherwise, be sure the config store is running and functioning properly.</p> |
| 100902005         | Error - (The specified device) has not been imported. Failed to start device.               | <p><b>Cause:</b> The Identity Server was not properly imported.</p> <p><b>Action:</b> Go to Access Gateway Server List and click <i>Repair Import</i>. (The repair import functionality works for any server type.) Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>  |
| 100902006         | Error importing device (with the specified ID).   | <p><b>Cause:</b> The Server was not properly imported.</p> <p><b>Action:</b> Go to Access Gateway Server List and click <i>Repair Import</i>. (The repair import functionality works for any server type.) If this fails, reinstall the server component.</p>   |
| 100902007         | Error - Import failed. Retrying.  | <p><b>Cause:</b> Unable to communicate with the Server being imported.</p> <p><b>Action:</b> Be sure the firewall is allowing port 1443 traffic. Otherwise allow the system to retry for several minutes. If the server does not appear in the Server List, click <i>Repair Import</i> to resolve the issue. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>   |
| 100902008         | Error auto importing. Retry.  | <p><b>Cause:</b> Unable to communicate with the Server being imported.</p> <p><b>Action:</b> Be sure the firewall is allowing port 1443 traffic. Otherwise allow the system to retry for several minutes. If the server does not appear in the Server List, click <i>Repair Import</i>. to resolve the issue. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>  |

| <b>Event Code</b> | <b>Description</b>   | <b>Remedy</b>   |
|-------------------|--|---|
| 100902009         | Error - Could not create subcontext: cn=(The specified Context)                        | <p><b>Cause:</b> Error creating Server object in config store during import.</p> <p><b>Action:</b> Go to Access Gateway Server List and click <i>Repair Import</i>. (The repair import functionality works for any server type.) Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>   |
| 100902010         | Error - (The given ESP) does not exist!  | <p><b>Cause:</b> There was a error during the Administration Console installation.</p> <p><b>Action:</b> Reinstall the Administration Console.</p>  |
| 100902011         | Error - Exception reading (the given ESP)  | <p><b>Cause:</b> The file required during the import process could not be read.</p> <p><b>Action:</b> Be sure the indicated file can be read by the <code>novlwww</code> user.</p>  |
| 100902012         | Error - Could not import LDIF.   | <p><b>Cause:</b> The error occurred while creating the configuration for the Embedded Service Provider.</p> <p><b>Action:</b> Go to Access Gateway Server List and click <i>Repair Import</i>. (The repair import functionality works for any server type.) Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>  |
| 100902013         | Error - Could not find (the specified DN)  | <p><b>Cause:</b> Error connecting to the config store while importing the Embedded Service Provider.</p> <p><b>Action:</b> Go to Access Gateway Server List and click <i>Repair Import</i>. (The repair import functionality works for any server type.) Otherwise, submit the <code>app_sc.0.log</code> file for resolution. You might need to restart the Administration Console.</p> |
| 100902014         | Error - ESP Configuration was not found, so auto-import failed.                        | <p><b>Cause:</b> Could not find the configuration for the imported Embedded Service Provider.</p> <p><b>Action:</b> Go to Access Gateway Server List and click <i>Repair Import</i>. | 100904029         | Error - Exception thrown in do_refreshConfig of ConfigXmlUpdateDispatcher.   | <p><b>Cause:</b> Error occurred while refreshing configuration manager panel.</p> <p><b>Action:</b> Ensure the server component is functioning correctly. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>   |
| 100904030         | Error - Exception thrown in setLastModParams of ConfigXmlUpdateDispatcher.   | <p><b>Cause:</b> Error occurred while setting an XML attribute.</p> <p><b>Action:</b> Ensure the server component is functioning correctly. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>   |
| 100904031         | Error - IOException thrown in getXPathMap of ConfigXmlUpdateDispatcher.      | <p><b>Cause:</b> Error occurred while xpath mapping on the current panel.</p> <p><b>Action:</b> Ensure the server component is functioning correctly. Cancel changes on the current panel, return, and try again. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p> |

| <b>Event Code</b> | <b>Description</b>   | <b>Remedy</b>  |
|-------------------|--|--|
| 100904032         | Error decoding: {0}.   | <p><b>Cause:</b> Error occurred while xpath mapping on the current panel.</p> <p><b>Action:</b> Ensure the server component is functioning correctly. Cancel changes on the current panel, return, and try again. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p> |
| 100904033         | Error - Exception thrown in processRequest of ExceptionDispatcher.             | <p><b>Cause:</b> Error occurred while processing request.</p> <p><b>Action:</b> Ensure the server component is functioning correctly. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>   |
| 100904034         | Error - Exception thrown in the service method of ServletDispatcher.           | <p><b>Cause:</b> Error occurred while processing request.</p> <p><b>Action:</b> Ensure the server component is functioning correctly. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>   |
| 100904035         | Error - Exception thrown in ServletDispatcher.                                 | <p><b>Cause:</b> Error occurred while inserting dispatchers.</p> <p><b>Action:</b> Ensure the server component is functioning correctly. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>  |
| 100904036         | Error - Exception thrown in processRequest of DeviceCommandHandler.            | <p><b>Cause:</b> Error occurred while processing request.</p> <p><b>Action:</b> Ensure the server component is functioning correctly. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>   |
| 100904037         | Error - VException thrown in setNIDPCommandState of DeviceCommandHandler.      | <p><b>Cause:</b> Error occurred while accessing data store.</p> <p><b>Action:</b> Ensure the data store is functioning correctly. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>   |
| 100904038         | Error - NamingException thrown in setNIDPCommandState of DeviceCommandHandler. | <p><b>Cause:</b> Error occurred while accessing data store.</p> <p><b>Action:</b> Ensure the data store is functioning correctly. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>   |
| 100904039         | Error - Could not find signing keystore for {0}.                               | <p><b>Cause:</b> An error occurred during the import of the device.</p> <p><b>Action:</b> Consult the documentation and re-import the device into the Administration Console.</p>  |

| <b>Event Code</b> | <b>Description</b>   | <b>Remedy</b>   |
|-------------------|--|---|
| 100904040         | Error - Could not find encryption keystore for {0}.                      | <p><b>Cause:</b> An error occurred during the import of the device.</p> <p><b>Action:</b> Consult the documentation and re-import the device into the Administration Console.</p>   |
| 100904041         | Error - Could not find connector keystore for {0}.                       | <p><b>Cause:</b> An error occurred during the import of the device.</p> <p><b>Action:</b> Consult the documentation and re-import the device into the Administration Console.</p>   |
| 100904042         | Error - Could not find trust keystore for {0}.                           | <p><b>Cause:</b> An error occurred during the import of the device.</p> <p><b>Action:</b> Consult the documentation and re-import the device into the Administration Console.</p>   |
| 100904043         | Error - Could not find OCSP trust keystore for {0}.                      | <p><b>Cause:</b> An error occurred during the import of the device.</p> <p><b>Action:</b> Consult the documentation and re-import the device into the Administration Console.</p>   |
| 100904044         | Error - No keys were assigned to keystore: {0}.                          | <p><b>Cause:</b> The keystore does not have any certificates in it. This may or may not be a bad condition. For instance, the OCSP trust store can be empty and that should not cause a problem. The signing, encryption, connector, provider, and consumer keystores should have one certificate in them. If it is empty, either the device import failed or the user manually removed the certificate from the keystore.</p> <p><b>Action:</b> Check the keystore using the UI. If the keystore shows that it has a certificate, then the device import probably failed. Consult the documentation and re-import the device and also try deleting and re-creating the NIDP configuration. Also, try replacing the certificate in the keystore through the UI.</p> |
| 100904045         | Error - Exception thrown in processRequest of UpgradeDeviceGroupHandler. | <p><b>Cause:</b> Error occurred while processing request.</p> <p><b>Action:</b> Ensure the server component is functioning correctly. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>  |
| 100904046         | Error - Exception thrown in processRequest of UpgradeDeviceHandler.      | <p><b>Cause:</b> Error occurred while processing request.</p> <p><b>Action:</b> Ensure the server component is functioning correctly. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>  |

| <b>Event Code</b>           | <b>Description</b>  | <b>Remedy</b>   |
|-----------------------------|---|---|
| 100904047                   | Error - Exception thrown in getUpgradeInfo of UpgradeDeviceHandler. | <p><b>Cause:</b> Error occurred while getting update information.</p> <p><b>Action:</b> Ensure the server component is functioning correctly. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>  |
| <b>Application Handlers</b> |   |   |
| 100905001                   | Error during repair import.   | <p><b>Cause:</b> Error occurred while attempting to repair import.</p> <p><b>Action:</b> Delete the server from the list and reinstall. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p>  |
| 100905002                   | Error - Failed to remove server.                                    | <p><b>Cause:</b> Error occurred while attempting to remove server.</p> <p><b>Action:</b> Submit the <code>app_sc.0.log</code> file for resolution.</p>  |
| 100905003                   | Error setting device groups.  | <p><b>Cause:</b> Error occurred while attempting to mark a server as a member of a group.</p> <p><b>Action:</b> Delete the server from the group and retry or delete the group and recreate. Otherwise, submit the <code>app_sc.0.log</code> file for resolution.</p> |
| 100905004                   | Error setting device admin.   | <p><b>Cause:</b> Error occurred while attempting to give an Administrator access to a server.</p> <p><b>Action:</b> Submit the <code>app_sc.0.log</code> file for resolution.</p>   |
| 100905005                   | Error - Exception thrown while importing appliance.                 | <p><b>Cause:</b> Error occurred while importing a server.</p> <p><b>Action:</b> Delete the server from the list and reinstall. | Event Code | Message                                  | Remedy  |
|------------|--|---|
| 100100001  |  | Type: SEVERE:NIDP:INITIALIZE:001  |
| 100100002  |  | Type: SEVERE:NIDP:INITIALIZE:002  |
| 100101001  | No binding available or set for profile. | Type: SEVERE:NIDP:USERMSG:001<br><b>Cause:</b> An action using Liberty or SAML protocols could not be completed because the server and trusted provider are not compatibly configured to interact to complete the action.<br><b>Action:</b> Set the desired protocol profiles in the administration tool to match those supported at the trusted provider.  |
| 100101043  | IDP is unable to load ESP metadata.      | Type: SEVERE:NIDP:USERMSG:043<br><b>Cause:</b> The IDP cannot connect to the metadata URL for the ESP. The IDP may not be able to resolve the domain name for the ESP or if HTTPS is being used, the IDP may not trust the SSL certificate for the ESP. The ESP might also not be running.<br><b>Action:</b> Make sure that certificates for ESP are imported and trusted into IDP configuration. Check the metadata URL for the ESP and make sure the metadata can be retrieved from a browser: <code>http://&lt;DNS_name&gt;/nesp/idff/metadata</code><br>If you are seeing this error after changing the IP address of the Access Gateway, restart Tomcat on the Identity Server.<br><b>Cause:</b> The IDP needs to have access to the internet to resolve and reach the CRL and OCSP URLs for ESP certificate validation.<br><b>Action:</b> Make sure the internet access is enabled, else the IDP will not trust the ESP certificate even if it has the signing and intermediary certificates. |

---

| Event Code | Message  | Remedy  |
|------------|--|---|
| 100101044  | ESP is unable to load IDP metadata   | <p>Type: SEVERE:NIDP:USERMSG:044</p> <p><b>Cause:</b> The ESP cannot connect to the metadata URL for the IDP. The ESP may not be able to resolve the domain name for the IDP or if HTTPS is being used, the ESP may not trust the SSL certificate for the IDP. The IDP may also not be running</p> <p><b>Action:</b> Make sure the IDP is running and that all certificates are imported and trusted. Check the metadata URL for the IDP and make sure the metadata can be retrieved from a browser: <code>http://&lt;DNS_name&gt;/nidp/idff/metadata</code> A common cause is the base URL on the IDP is set incorrectly.</p> <p>For additional help, see <a href="#">“Troubleshooting 100101043 and 100101044 Liberty Metadata Load Errors”</a> in the <i>NetIQ Access Manager Appliance 3.2 SP1 Identity Server Guide</i>.</p> |
| 100101045  | An error happened while the request was being sent to the correct cluster member for processing.   | <p>Type: SEVERE:NIDP:USERMSG:045</p> <p><b>Cause:</b> The target cluster member may be unavailable.</p> <p><b>Action:</b> Ensure that all cluster devices are operating correctly.</p>  |
| 100102001  | Incomplete web service configuration.  | <p>Type: SEVERE:NIDP:WSF:001</p> <p><b>Cause:</b> The web service instance type (attribute <code>nidsWsfServiceInstanceType</code> on the <code>nidsWsfService</code> object) is not available in the service definition.</p> <p><b>Action:</b> Delete the associated web service definition and recreate it.</p>   |
| 100102002  | Invalid web service configuration.   | <p>Type: SEVERE:NIDP:WSF:002</p> <p><b>Cause:</b> The web service configuration XML (attribute <code>nidsConfigXML</code> on the <code>nidsWsfService</code> object) has invalid XML.</p> <p><b>Action:</b> Delete the associated web service definition and recreate it.</p>   |
| 100102003  | Unable to instantiate the web service provider authority class. This class will be <code>com.novell.nidp.liberty.wsf.config.authority.Idap.WSFConfigAuthorityLdap</code> . | <p>Type: SEVERE:NIDP:WSF:003</p> <p><b>Cause:</b> Some Java error (probably a classpath issue) is causing the main authority class to not instantiate.</p> <p><b>Action:</b> Review how the Access Manager product was installed and attempt to determine if Java class files are being accessed from an unexpected source.</p>   |
| 100102004  | Unable to load web services.   | <p>Type: SEVERE:NIDP:WSF:004</p> <p><b>Cause:</b> This error catches all failures encountered while trying to load all web services. The reason will be different depending on where the error happened.</p> <p><b>Action:</b> Try to delete and recreate the web services.</p>   |

| Event Code | Message  | Remedy   |
|------------|--|--|
| 100102005  | Unable to access Novell Secret Store.          | <p>Type: SEVERE:NIDP:WSF:005</p> <p><b>Cause:</b> The LDAP connection between the IDP and the User Store must be secure LDAP if Novell Secret Store is to be used as the back end storage for Credential Profile.</p> <p><b>Action:</b> Go to the associated user store and change the connection type to secure LDAP.</p> |
| 100102006  | Unable to create user profile object.          | <p>Type: SEVERE:NIDP:WSF:006</p> <p><b>Cause:</b> A Liberty User Profile Object did not exist for the current user, so an attempt was made to create one. That attempt failed!</p> <p><b>Action:</b> Determine if the named container exists and that the administrator user has rights to create objects there.</p>       |
| 100102007  | Unable to instantiate password callback class. | <p>Type: SEVERE:NIDP:WSF:007</p> <p><b>Cause:</b> Could not find the password callback class in the classpath.</p> <p><b>Action:</b> Make sure the password callback class to check UsernameToken that decrypts an encrypted message in WSS is in the classpath.</p>   |
| 100102008  | Unable to convert XML into Document.           | <p>Type: SEVERE:NIDP:WSF:008</p> <p><b>Cause:</b> This error occurred when converting XML to Document in WSS (Receiver side). It may happen due to incorrect WSC requests.</p> <p><b>Action:</b> Check the WSC (Sender side) request and resend it.</p>  |
| 100102009  | Unable to process WSSecurity (WSS) message.    | <p>Type:SEVERE:NIDP:WSF:009</p> <p><b>Cause:</b> This error occurred when processing WSS headers (Receiver side). It may happen due to incorrect WSS headers in WSC requests.</p> <p><b>Action:</b> Check the WSS headers in WSC (Sender side) request and resend it.</p>  |
| 100102010  | No WSS header found                            | <p>Type: SEVERE:NIDP:WSF:010</p> <p><b>Cause:</b> This error occurred when processing WSS headers (Receiver side). It may happen due to no WSS headers in WSC requests.</p> <p><b>Action:</b> Check the WSS headers in WSC (Sender side) request and resend it.</p>  |

| Event Code | Message   | Remedy   |
|------------|---|--|
| 100102011  | No processed WSS header found                           | Type: SEVERE:NIDP:WSF:011<br><br><b>Cause:</b> This error occurred after processing WSS headers (Receiver side). It may happen due to incorrect or no WSS headers in WSC requests.<br><br><b>Action:</b> Check the WSS headers in WSC (Sender side) request and resend it.   |
| 100102012  | WSS untrusted certificate                               | Type: SEVERE:NIDP:WSF:012<br><br><b>Cause:</b> This error occurred when validating signature on WSS headers (Receiver side). The certificate used for the signature is not trusted.<br><br><b>Action:</b> Check the certificate used to sign the message. The certificate is trusted if either it itself or the certificate of the issuer is installed in the trust store. |

|------------|--|---|
| 100105008  | The audit logging system is not operational.                                       | Type: SEVERE:NIDP:APP:008<br><b>Cause:</b> The audit logging system can, in rare circumstances, become non-operational.<br><b>Action:</b> Examine the error description supplied and take appropriate action.   |
| 100106001  |  | Type: SEVERE:NIDP:IDFF:001  |
| 200102001  | Invalid access code found for web service specific user interaction query policy.  | Type: ERROR:NIDP:WSF:001<br><b>Cause:</b> The web service definition has a service level user interaction policy that is not ALWAYS or NEVER. Disallowed values are NO and ONCE.<br><b>Action:</b> Using Access Manager Appliance management tools, edit the policy associated with the web service.                                  |
| 200102002  | Invalid access code found for web service specific user interaction modify policy. | Type: ERROR:NIDP:WSF:002<br><b>Cause:</b> The web service definition has a service level user interaction policy that is not ALWAYS or NEVER. Disallowed values are NO and ONCE.<br><b>Action:</b> Using Access Manager Appliance management tools, edit the policy associated with the web service.                                  |
| 200102003  | Unrecognized web service.  | Type: ERROR:NIDP:WSF:003<br><b>Cause:</b> The web service definition has a service type specifier (attribute nidsWsfServiceInstanceType on object nidsWsfService) that is not recognized.<br><b>Action:</b> Using Access Manager Appliance management tools, delete the associated web service and recreate it.                       |
| 200102004  | Error writing user interaction access policy to the data store.                    | Type: ERROR:NIDP:WSF:004<br><b>Cause:</b> The IDP received user interaction access policy from the user, but was unable to persist it to the data store.<br><b>Action:</b> Check the Access Manager Appliance Configuration datastore to see if it is available.  |
| 200102005  | Cannot read or write web service data because zero data locations are specified.   | Type: ERROR:NIDP:WSF:005<br><b>Cause:</b> When an IDP web service is reading or writing data it follows the configured data locations to know where to perform its operations. If the administrator has not set up any data locations then the operation must fail.<br><b>Action:</b> Add at least one data location the web service. |

| Event Code | Message   | Remedy   |
|------------|---|--|
| 200102006  | Cannot read or write web service data because the first data location is unknown. | Type: ERROR:NIDP:WSF:006<br><b>Cause:</b> When an ID SIS web service is reading or writing data it follows the configured data locations to know where to perform its operations.<br><b>Action:</b> Delete all data locations from the associated web service and add them back into the list. |
| 200102007  | Unexpected error writing data to web service.                                     | Type: ERROR:NIDP:WSF:007<br><b>Cause:</b> Writing to web services is prone to various unexpected errors.<br><b>Action:</b> Evaluate the reason for the error and take appropriate action.  |
| 200102008  | Unable to locate the cached NIDPSession object given session id.                  | Type: ERROR:NIDP:WSF:008<br><b>Cause:</b> The user session has expired.<br><b>Action:</b> The user must login again.   |
| 200102009  | Cached NIDPPrincipal object has zero NIDPSubject objects.                         | Type: ERROR:NIDP:WSF:009<br><b>Cause:</b> The user session has expired.<br><b>Action:</b> The user must login again.   |
| 200102010  | No web service authority available.   | Type: ERROR:NIDP:WSF:010<br><b>Cause:</b> A web service of the provided type did not initialize correctly.<br><b>Action:</b> Delete the web service and recreate it.   |
| 200102011  | No web service available.   | Type: ERROR:NIDP:WSF:011<br><b>Cause:</b> A web service of the provided type does not exist, or is not enabled.<br><b>Action:</b> Create or enable a web service of this type.   |
| 200102012  | Unable to understand the web service request's XML.                               | Type: ERROR:NIDP:WSF:012<br><b>Cause:</b> A web service sent a request to the IDP that cannot be parsed or it is missing data such that the request cannot be understood.<br><b>Action:</b> Notify your system administrator that invalid web service requests are being made to the system.   |
| 200102013  | Error processing web service query request.                                       | Type: ERROR:NIDP:WSF:013<br><b>Cause:</b> Processing web service requests may result in a number of unexpected errors.<br><b>Action:</b> Evaluate the reason given in the error message, and take appropriate action.  |

| Event Code | Message  | Remedy   |
|------------|--|--|
| 200102014  | Error processing web service modify request.   | Type: ERROR:NIDP:WSF:014<br><b>Cause:</b> Processing web service requests may result in a number of unexpected errors.<br><b>Action:</b> Evaluate the reason given in the error message, and take appropriate action.  |
| 200102015  | Unable to locate the user's local identifier in the resource id.   | Type: ERROR:NIDP:WSF:015<br><b>Cause:</b> The web service resource id, an identifier indicating what user the request is destined for, did not contain the information required to identify the user.<br><b>Action:</b> Notify your system administrator that invalid web service requests are being made to the system.                               |
| 200102016  | Unable to locate a cached NIDPPrincipal object given the local id.   | Type: ERROR:NIDP:WSF:016<br><b>Cause:</b> The user session has expired.<br><b>Action:</b> The user must login again.   |
| 200102017  | Unable to locate a NIDPIdentity object given the local id.   | Type: ERROR:NIDP:WSF:017<br><b>Cause:</b> The user session has expired.<br><b>Action:</b> The user must login again.   |
| 200103001  | The indicated web service is not available or it has been disabled! An attempt was made to access this service to operate on the indicated data. | Type: ERROR:NIDP:WSC:001<br><b>Cause:</b> The Web Service Consumer received a request and one of the data tokens referenced a data item that is not available in any of the services known to the Access Manager Appliance.<br><b>Action:</b> The system has encountered an invalid configuration and should be restarted by the system administrator. |
| 200103002  | Cannot make web service request because there are zero web service resource offerings available.   | Type: ERROR:NIDP:WSC:002<br><b>Cause:</b> The Web Service Consumer received a request but there were zero service resource offerings provided. So, the web service has no destination service to which a request can be made.<br><b>Action:</b> The user must login again.   |
| 200103003  | Unable to locate an identity id from the authentications available in the provided NIDPSession.  | Type: ERROR:NIDP:WSC:003<br><b>Cause:</b> The user session has expired.<br><b>Action:</b> The user must login again.   |
| 200104001  | Could not get client certificate.  | Type: ERROR:NIDP:USERAUTH:001<br><b>Cause:</b> Could not get user certificate from the client browser<br><b>Action:</b> Install user X509 certificate on the client browser and try again.   |

| Event Code | Message                                | Remedy   |
|------------|--|--|
| 200104003  | Could not read configuration           | Type: ERROR:NIDP:USERAUTH:003<br><b>Cause:</b> Could not read configuration out of file<br><b>Action:</b> Make sure the X509 config properties file is present.  |
| 200104004  | User Certificate Authentication Failed | Type: ERROR:NIDP:USERAUTH:004<br><b>Cause:</b> User Certificate Authentication Failed due to the reasons in detailed message<br><b>Action:</b> Take appropriate action as per the reasons in the detailed message  |
| 200104005  | No matching Principal found.           | Type: ERROR:NIDP:USERAUTH:005<br><b>Cause:</b> No Principal from X509Certificate found in User store<br><b>Action:</b> Check the X509Class Method and it's attribute mapping profile as defined using administration tool. Also, make sure the matched user exists in the User store.  |
| 200104006  | More than one Principal matched.       | Type: ERROR:NIDP:USERAUTH:006<br><b>Cause:</b> Principal from X509Certificate Multiple users found in User store which matched Principal from X509Certificate based on X509Class attribute mapping profile.\)<br><b>Action:</b> Check the X509Class Method and it's attribute mapping profile as defined using administrator tool. Also, check if multiple user exists in the User store(s). |
| 200104008  | Error loading Trust store              | Type: ERROR:NIDP:USERAUTH:008  |
| 200104009  | Client certificate not yet valid.      | Type: ERROR:NIDP:USERAUTH:009<br><b>Cause:</b> X509 certificate is valid in the future<br><b>Action:</b> Use a valid certificate   |
| 200104010  | Client certificate no longer valid.    | Type: ERROR:NIDP:USERAUTH:010<br><b>Cause:</b> X509 certificate is expired<br><b>Action:</b> Use a valid certificate   |
| 200104011  | The Certificate has been revoked.      | Type: ERROR:NIDP:USERAUTH:011<br><b>Cause:</b> The Certificate has been revoked<br><b>Action:</b> Use a valid certificate which is not revoked.  |
| 200104012  | Error Parsing Certificate.             | Type: ERROR:NIDP:USERAUTH:012<br><b>Cause:</b> Error Parsing Certificate when performing certificate validations<br><b>Action:</b> Use a valid X509 certificate.   |

| Event Code | Message   | Remedy  |
|------------|---|---|
| 200104017  | Error getting CRL/OCSP.                             | Type: ERROR:NIDP:USERAUTH:017<br><br><b>Cause:</b> Could not get to the CRL/OCSP URL for validations.<br><br><b>Action:</b> Make sure the CRL/OCSP URLs are accessible Or disable validations in administration. Additionally, can define a different CRL/OCSP URL in the administration tool which the X509Class can also use for validations. |
| 200104018  | Could not verify CRL signature.                     | Type: ERROR:NIDP:USERAUTH:018<br><br><b>Cause:</b> Could not verify signature on the fetched CRL<br><br><b>Action:</b> Make sure the CRL server public key/certificate is in NIDP/ESP trust store.  |
| 200104019  | Could not find Key for this server.                 | Type: ERROR:NIDP:USERAUTH:019<br><br><b>Cause:</b> Could not find Key/Cert for NIDP/ESP server towards authenticating to OCSP server<br><br><b>Action:</b> Make sure the NIDP/ESP Signing keystore has appropriate Key/Cert in it.  |
| 200104020  | CRL/OCSP is too old; New version already available. | Type: ERROR:NIDP:USERAUTH:020<br><br><b>Cause:</b> During validations, the fetched CRL Or OCSP is stale. Newer version will be available<br><br><b>Action:</b> In case of CRLs, next attempt to fetch CRL should get a fresh CRL after purging the cached one. In case of OCSP, notify the OCSP server administrator.                           |
| 200104021  | No Issuer Certificate found.                        | Type: ERROR:NIDP:USERAUTH:021<br><br><b>Cause:</b> Issuer of user certificate not found which is required for OCSP validations<br><br><b>Action:</b> Make sure the issuer of user/client certificate is either found in certificate-chain or in NIDP/ESP trust store.   |
| 200104022  | Error getting OCSP Response.                        | Type: ERROR:NIDP:USERAUTH:022<br><br><b>Cause:</b> Could not get OCSP Response from the OCSP server<br><br><b>Action:</b> Make sure its going to the right OCSP server.   |
| 200104023  | Error processing OCSP Response.                     | Type: ERROR:NIDP:USERAUTH:023<br><br><b>Cause:</b> OCSP response could not be processed<br><br><b>Action:</b> Make sure its going to the right OCSP server and that it is operating correctly.  |

| Event Code | Message  | Remedy   |
|------------|--|--|
| 200104024  | At least one parameter of OCSPProcessor was uninitialized. | Type: ERROR:NIDP:USERAUTH:024<br><b>Cause:</b> At least one parameter of OCSPProcessor was uninitialized during OCSP validations<br><b>Action:</b> Make sure the NIDP/ESP Signing keystore has appropriate Key/Cert in it. Also, that the NIDP/ESP OCSP trust store has the valid public-key/certificate of OCSP server. |
| 200104025  | Request was already generated.                             | Type: ERROR:NIDP:USERAUTH:025<br><b>Cause:</b> OCSP request was already generated for certificate(s)<br><b>Action:</b> Check the client certificate chain.   |
| 200104026  | OCSP response was already processed                        | Type: ERROR:NIDP:USERAUTH:026  |
| 200104027  | Internal error occurred in the OCSP Server.                | Type: ERROR:NIDP:USERAUTH:027<br><b>Cause:</b> OCSP server responded to the request with an internal error.<br><b>Action:</b> Contact OCSP server administrator.   |
| 200104028  | Your request did not fit the RFC 2560 syntax.              | Type: ERROR:NIDP:USERAUTH:028<br><b>Cause:</b> OCSP server responded to the request with malformed request message.<br><b>Action:</b> Contact OCSP administrator and check the request.  |
| 200104029  | Your request was not signed.                               | Type: ERROR:NIDP:USERAUTH:029<br><b>Cause:</b> Request to OCSP server needs to be signed.<br><b>Action:</b> Enable signing of OCSP requests in X509Class administration.   |
| 200104030  | The server was too busy to answer you.                     | Type: ERROR:NIDP:USERAUTH:030<br><b>Cause:</b> OCSP server is too busy to respond to requests.<br><b>Action:</b> Contact OCSP server administrator.  |
| 200104031  | The server could not authenticate you.                     | Type: ERROR:NIDP:USERAUTH:031<br><b>Cause:</b> OCSP server could not authenticate Novell Identity server.<br><b>Action:</b> Make sure Signing of OCSP requests is enabled and NIDP signing keystore has appropriate key in it. Also, make sure the OCSP server trusts Nidp server.                                       |

| Event Code | Message  | Remedy  |

| 300101030  | SOAP fault.   | <p>Type: WARN:NIDP:USERMSG:030</p> <p><b>Cause:</b> An error was detected in the transmission of protocols using SOAP.</p> <p><b>Action:</b> Turn tracing on and look for any obvious causes for the problem.</p>   |
| 300101031  | Received an identity that does not resolve to the current logged in user. | <p>Type: WARN:NIDP:USERMSG:031</p> <p><b>Cause:</b> This is caused when a user is logged in with one identity and then attempts to authenticate as the identity of another user. For a given session, all authentications must resolve to the same user.</p> <p><b>Action:</b> Log out of the current user and log in again as the desired user.</p>  |
| 300101032  | Assertion is expired.   | <p>Type: WARN:NIDP:USERMSG:032</p> <p><b>Cause:</b> The use of the assertion to authenticate the server did not occur within the time limits specified by the assertion.</p> <p><b>Action:</b> Try and re-authenticate. Determine if there are any network latencies that may cause the assertion not to arrive in a timely fashion. Look for misuse of the assertion.</p>  |
| 300101033  | IDP return authentication failure.  | <p>Type: WARN:NIDP:USERMSG:033</p> <p><b>Cause:</b> An IDP's attempt to authenticate the server was unsuccessful. This particular authentication came from the IDP's intersite transfer service and was not requested by the server.</p> <p><b>Action:</b> Check at the IDP for a reason why the authentication was a failure. It may just be necessary to attempt authentication again.</p>  |

| Event Code | Message   | Remedy   |
|------------|---|--|
| 300101034  | No target is defined.                             | Type: WARN:NIDP:USERMSG:034<br><br><b>Cause:</b> A request was made of the server's intersite transfer service without specifying a target resource.<br><br><b>Action:</b> Requests for the intersite transfer service must include an id of the intended service provider to be authenticated as well as the target resource to be displayed. To avoid this error, provide an &TARGET="value" on the URL. |
| 300101035  |   | Type: WARN:NIDP:USERMSG:035  |
| 300101036  | Not enough memory to process request.             | Type: WARN:NIDP:USERMSG:036<br><br><b>Cause:</b> The system does not have enough memory to complete the requested action.<br><br><b>Action:</b> Wait a few moments for memory to free up and retry request. It may be necessary to add additional memory to the server.  |
| 300101037  | Server is not in a running state.                 | Type: WARN:NIDP:USERMSG:037<br><br><b>Cause:</b> A request was made of the server that can only be performed when the server is in a running state.<br><br><b>Action:</b> Start the server.  |
| 300101038  | JSP file not found.                               | Type: WARN:NIDP:USERMSG:038<br><br><b>Cause:</b> An attempt was made to load a JSP page that does not exist.<br><br><b>Action:</b> Determine the JSP not loading and make sure it is in the correct location.  |
| 300101039  | Invalid authentication credentials were provided. | Type: WARN:NIDP:USERMSG:039<br><br><b>Cause:</b> A user has attempted to authenticate to the system with credentials that are not valid for the account.<br><br><b>Action:</b> User needs to enter correct credentials.  |
| 300101040  | User password has expired.                        | Type: WARN:NIDP:USERMSG:040<br><br><b>Cause:</b> A user has attempted to authenticate to the system with a password that is expired.<br><br><b>Action:</b> The user needs to create a new password.  |

| Event Code | Message   | Remedy   |
|------------|---|--|
| 300101041  | User account identification failed.                                   | <p>Type: WARN:NIDP:USERMSG:041</p> <p><b>Cause:</b> Account identification can fail due to: 1. User cancels authentication request 2. User cannot be uniquely identified by Matching Expression 3. Necessary attributes to do user matching or provisioning were not obtained.</p> <p><b>Action:</b> Check Account Identification configuration for the trusted provider and make sure that necessary attributes are available. If using Matching Expressions, make sure that they include attributes that can resolve to a single user. If using Provisioning, make sure required attributes are all available in the defined attribute set for the trusted provider.</p> <p>For more information, see “<a href="http://www.novell.com/support/php/search.do?cmd=displayKC&amp;docType=kc&amp;externalId=3219302&amp;sliceId=1&amp;docTypeID=DT_TID_1_1&amp;dialogID=69780245&amp;statId=0%20%2069778277">Access Manager Error 300101041 Provisioning New Users Using SAML2</a>” (<a href="http://www.novell.com/support/php/search.do?cmd=displayKC&amp;docType=kc&amp;externalId=3219302&amp;sliceId=1&amp;docTypeID=DT_TID_1_1&amp;dialogID=69780245&amp;statId=0%20%2069778277">http://www.novell.com/support/php/search.do?cmd=displayKC&amp;docType=kc&amp;externalId=3219302&amp;sliceId=1&amp;docTypeID=DT_TID_1_1&amp;dialogID=69780245&amp;statId=0%20%2069778277</a>).</p> |
| 300101042  | Invalid assertion conditions.   | <p>Type: WARN:NIDP:USERMSG:042</p> <p><b>Cause:</b> A set of conditions that are not understood were sent as part of an assertion.</p> <p><b>Action:</b> Check with the provider of the assertion to determine what these conditions are and why they are being sent.</p>  |
| 300101046  | Unknown URL host.   | <p>Type: WARN:NIDP:USERMSG:046</p> <p><b>Action:</b> Use logs to determine the problematic host and determine why DNS is failing.</p>  |
| 300101047  | An untrusted provider is being referenced in a request or a response. | <p>Type: WARN:NIDP:USERMSG:047</p> <p><b>Action:</b> Use logs to determine the provider that is untrusted and then create a trusted relationship if desired.</p>   |
| 300101048  | The LDAP servers are too busy to accept more users.                   | <p>Type: WARN:NIDP:USERMSG:048</p> <p><b>Cause:</b> There are too many threads waiting to get an available LDAP connection. The LDAP servers are too busy to accept more users.</p> <p><b>Action:</b> Wait a few moments for the LDAP requests to be processed and retry the request. It may be necessary to add additional LDAP servers or upgrade the hardware specifications of the existing LDAP servers.</p>  |
| 300101049  | The HTTPS protocol was not used to access this authentication card.   | <p>Type: WARN:NIDP:USERMSG:049</p> <p><b>Cause:</b> Accessing the site was done via http, not https.</p> <p><b>Action:</b> Access the site again using https.</p>  |

| Event Code | Message  | Remedy  |
|------------|--|---|
| 300101050  | The Authentication Card specified is not valid.                                  | Type: WARN:NIDP:USERMSG:050<br><b>Cause:</b> An invalid card identifier was used, most likely due to modifying a url.<br><b>Action:</b> Specify cards to use only by clicking them. Ensure that the PID in the login URL exactly matches the entity ID specified in the metadata.   |
| 300101051  | The user's session limit has been reached.                                       | Type: WARN:NIDP:USERMSG:051<br><b>Cause:</b> User has already logged in the maximum allowable times.<br><b>Action:</b> Logout of one or more sessions.  |
| 300101052  | A response was expected at the url but none was found.                           | Type: WARN:NIDP:USERMSG:052<br><b>Cause:</b> The wrong endpoint may be accessed for the operation desired.<br><b>Action:</b> Check the action being performed against the url/endpoint being accessed.  |
| 300101053  | CardSpace authentication profile failed to load.                                 | Type: WARN:NIDP:USERMSG:053<br><b>Cause:</b> Trusted provider failed to load (probably due to certificate errors).<br><b>Action:</b> Check the certificates for the trusted provider and make sure they are valid.  |
| 300101054  | CardSpace authentication fails because a required attribute is not in assertion. | Type: WARN:NIDP:USERMSG:054<br><b>Cause:</b> A required attribute was not returned in the assertion provided by an STS.<br><b>Action:</b> Check the attribute value at the STS, or make the attribute optional.   |
| 300101057  | Request to broker an authentication to a target SP denied                        | Type: WARN:NIDP:USERMSG:057<br><b>Cause:</b> Request to broker an authentication to a target Service Provider denied, either the Identity Provider or target Service Provider are part of a brokering group, but both does not belong to same group.<br><b>Action:</b> Check the brokering group to verify if the Identity Provider and target Service Provider belong to the same group. |
| 300101058  | Request to broker on authentication to a target SP denied                        | Type: WARN:NIDP:USERMSG:058<br><b>Cause:</b> Request to broker on authentication to a target Service Provider denied because broker policy evaluation resulted in denying.<br><b>Action:</b> Check the brokering rule and try to access with the valid user.  |

| Event Code | Message  | Remedy   |
|------------|--|--|
| 300101059  | Error in processing the broker request.  | Type: WARN:NIDP:USERMSG:059<br><br><b>Cause:</b> Could not validate the request to broker on authentication to a target service provider.<br><br><b>Action:</b> Read the error description supplied and take appropriate action.   |
| 300101060  | Assertion does not contain valid authentication statement.                         | Type: WARN:NIDP:USERMSG:060<br><br><b>Cause:</b> An assertion has been received, which does not contain valid declaration/class statement.<br><br><b>Action:</b> Authentication response statement will be validated against the authentication request statement. Check the contract definition in the service provider for the authentication statement received from the Identity Provider. Check if the requested statement matches the response statement or response statement's authentication level is greater than the requested one. |
| 300101061  | Failed to obtain consent for the federation.                                       | Type: ERROR:NIDP:USERMSG:061<br><br><b>Cause:</b> This is a message to users if they have declined the consent. If it is a valid federation consent, accept the consent in the next attempt, else deny the same.<br><br><b>Action:</b> In a federated setup using the name identifier as persistent, if you make an Intersite Transfer Service request for the first time federation, users will be asked to provide their consent and they select No.   |
| 300102001  | No Discovery Service Configured! Unable to create the requested resource offering! | Type: WARN:NIDP:WSF:001<br><br><b>Cause:</b> The system administrator did not create or enable a Discovery service.<br><br><b>Action:</b> Create or enable a Discovery web service.  |
| 300102002  | Unable to find user object with identifier.  | Type: WARN:NIDP:WSF:002<br><br><b>Cause:</b> An LDAP search was performed for a user object with a given identifier. This identifier may be a GUID. The search resulted in zero hits. This usually means that web service data cannot be read or written for the user.<br><br><b>Action:</b> The user needs to login again.  |
| 300102003  | Unrecognized select string for service.  | Type: WARN:NIDP:WSF:003<br><br><b>Cause:</b> The select string (XPath) is either incorrectly formed or not supported by the web service.<br><br><b>Action:</b> The system administrator must enable services to support the select string.   |

| Event Code | Message  | Remedy  |
|------------|--|---|
| 300102004  | Unable to process web service query request! Select string missing!  | Type: WARN:NIDP:WSF:004<br><b>Cause:</b> The select string (XPath) is not in the web service query request.<br><b>Action:</b> Inform your system administrator that an improperly formatted web service request is being made.  |
| 300102005  | Unable to perform trusted user interaction service request. Web service authority was not found.   | Type: WARN:NIDP:WSF:005<br><b>Cause:</b> An internal system error.<br><b>Action:</b> The system has encountered an invalid configuration and should be restarted by the system administrator.   |
| 300102006  | Unable to perform trusted user interaction service request. Unable to obtain trusted user interaction service description from SOAP headers. | Type: WARN:NIDP:WSF:006<br><b>Cause:</b> The web service making the request did not provide valid or complete information about the trusted user interaction service.<br><b>Action:</b> The system administrator must complete the definition of the trusted interaction service. |
| 300102007  | Unable to perform trusted user interaction service request. No trusted user interaction service description provided in SOAP headers.        | Type: WARN:NIDP:WSF:007<br><b>Cause:</b> The web service making the request did not provide valid or complete information about the trusted user interaction service.<br><b>Action:</b> The system administrator must complete the definition of the trusted interaction service. |
| 300102008  | Trusted user interaction service failed.   | Type: WARN:NIDP:WSF:008<br><b>Cause:</b> There are various unexpected reasons for the failure of a trusted user interaction service request to fail.<br><b>Action:</b> Evaluate the reason and take the appropriate actions.  |
| 300102009  | Error creating user interaction redirection request.   | Type: WARN:NIDP:WSF:009<br><b>Cause:</b> There was an error converting the redirect request to an XML DOM.<br><b>Action:</b> Evaluate the reason and take the appropriate actions.  |
| 300102010  | Unable to perform user interaction redirection request. User intervention service not found.   | Type: WARN:NIDP:WSF:010<br><b>Cause:</b> There must be an interaction service on the IDP creating the user interaction redirection request.<br><b>Action:</b> If it does not exist, using Access Manager Appliance management tools, create one.                                  |

| Event Code | Message   | Remedy  |
|------------|---|---|
| 300102011  | Error reading data from LDAP data attribute plugin.   | Type: WARN:NIDP:WSF:011<br><br><b>Cause:</b> If a web service's data locations includes LDAP, then LDAP data attribute plugins are used to read data from the LDAP user store. This error provides descriptions of various errors that can happen while doing this.<br><br><b>Action:</b> Evaluate the reason and take the appropriate actions.   |
| 300102012  | Error writing data to LDAP data attribute plugin.   | Type: WARN:NIDP:WSF:012<br><br><b>Cause:</b> If a web service's data locations includes LDAP, then LDAP data attribute plugins are used to write data to the LDAP user store. This error provides descriptions of various errors that can happen while doing this.<br><br><b>Action:</b> Evaluate the reason and take the appropriate actions.  |
| 300102013  | Cannot read/write Credential Profile data because the user's LDAP user store distinguished name is not available.   | Type: WARN:NIDP:WSF:013<br><br><b>Cause:</b> All Credential Profile reads and writes end up operating on a user object in a user store. If this user object cannot be found, then the operation must fail. This may happen if a temporary identifier is being used for the authentication.<br><br><b>Action:</b> Use a permanent federation to the service provider if your system allows it. |
| 300102014  | A Web Service request was received for a user, but the session for that user is not found.  | Type: WARN:NIDP:WSF:014<br><br><b>Cause:</b> The user's login has timed out and has been removed from the system.<br><br><b>Action:</b> The user must login again.  |
| 300102015  | A Web Service request was received for a user, but the session for that user has insufficient data in it.   | Type: WARN:NIDP:WSF:015<br><br><b>Cause:</b> An internal error has occurred.<br><br><b>Action:</b> The user must login again.   |
| 300102016  | A Web Service request was received for a user, but the Liberty User Profile object for that user is unavailable.  | Type: WARN:NIDP:WSF:016<br><br><b>Cause:</b> An internal error has occurred.<br><br><b>Action:</b> Make sure the administrator user has rights to read, write and create Liberty User Profile objects in the configuration data store.  |
| 300102017  | A Web Service request was received for a user, and attempt to read the requested attributes from the Liberty User Profile object was made, but an error occurred. | Type: WARN:NIDP:WSF:017<br><br><b>Cause:</b> An internal error has occurred.<br><br><b>Action:</b> Evaluate the reason and take the appropriate actions.  |

| Event Code | Message  | Remedy  |
|------------|--|---|
| 300102018  | A Web Service request was received for a user, While reading user data from an LDAP user object, a mismatch occurred because the LDAP attribute is multi-valued, but the Liberty attribute is single-valued.   | Type: WARN:NIDP:WSF:018<br><b>Cause:</b> A multi-valued LDAP attribute has been mapped to a single-valued Liberty attribute.<br><b>Action:</b> Change the attribute mapping.  |
| 300102019  | The user used an X509 Certificate to authenticate and we tried to put the cert into the SecretStore as a Base64 DER encoded cert, but we got an encoding error from the security layer when trying to get the DER encoded cert. Result is that there will not be a X509 Certificate in Secret Store for this user. | Type: WARN:NIDP:WSF:019<br><b>Cause:</b> The X509 certificate cannot be encoded.<br><b>Action:</b> Review the type of X509 certificates that are being used for authentication.   |
| 300102020  | A SAMLAssertion was requested for a given user. While generating the SAMLAssertion an error occurred.  | Type: WARN:NIDP:WSF:020<br><b>Cause:</b> The SAMLAssertion cannot be created.<br><b>Action:</b> Review the reason for the failure and take appropriate actions.   |
| 300102021  |  | Type: WARN:NIDP:WSF:021   |
| 300102022  |  | Type: WARN:NIDP:WSF:022   |
| 300103001  | The web service request did not return a response within the protocol timeout limit. Request abandoned.  | Type: WARN:NIDP:WSC:001<br><b>Cause:</b> The web service consumer waited for the web service request to return a response, but it did not during the allowed waiting period.<br><b>Action:</b> This waiting period may be increased by click Access Manager > Identity Servers > Edit > Liberty > Web Service Consumer, and setting the Protocol Timeout to a higher value. |
| 300103002  | An unexpected error happened in the web service consumer while processing a web service request.   | Type: WARN:NIDP:WSC:002<br><b>Cause:</b> There are various reasons why a web service request could fail.<br><b>Action:</b> Evaluate the reason and take appropriate actions.  |

| Event Code | Message  | Remedy  |
|------------|--|---|
| 300103003  | Web service consumer request pending data packet id is not available in request.   | <p>Type: WARN:NIDP:WSC:003</p> <p><b>Cause:</b> After user interaction, processing of the original request returns to the web service consumer. A data packet containing information about how to continue the request is cached on the web service consumer. The id of that packet must be passed through all redirections and requests associated with the user interaction. If that id is not available when the web service consumer regains control, then the request cannot continue.</p> <p><b>Action:</b> Submit the request again.</p>   |
| 300103004  | The Web service consumer request pending data packet with the indicated id is not available in web service consumer's cache. | <p>Type: WARN:NIDP:WSC:004</p> <p><b>Cause:</b> After user interaction, processing of the original request returns to the web service consumer. A data packet containing information about how to continue the request is cached on the web service consumer. The id of that packet must be passed through all redirections and requests associated with the user interaction. That id will be used to access the pending data packet when the web service consumer regains control. If the pending data packet with the corresponding id is no longer available on the system, then the request cannot continue. The data packet may have timed out.</p> <p><b>Action:</b> Submit the request again.</p> |
| 300104049  | Could not find NIDP PKIX Certificate Path Checker Class.   | <p>Type: WARN:NIDP:USERAUTH:049</p> <p><b>Cause:</b> PKIX Certificate Path Checker Class not found.</p> <p><b>Action:</b> Warning message that PKIX Certificate Path Checker Class not found. This optional class is used to process custom certificate extensions. If required, this class needs to be in NIDP classpath. It may not be present on ESP.</p>  |
| 300104050  | Could not instantiate NIDP PKIX Certificate Path Checker Class.  | <p>Type: WARN:NIDP:USERAUTH:050</p> <p><b>Cause:</b> Incorrect class constructor.</p> <p><b>Action:</b> Make sure the class has the right constructor.</p>  |
| 300105001  | No user Login Policy Check LDAP Extension method available on user store.  | <p>Type: WARN:NIDP:APP:001</p> <p><b>Cause:</b> User authenticated using X509. An additional check of the directory's user login policy needs to be made using an LDAP method extension. However, the directory indicated does not support the required LDAP extension method.</p> <p><b>Action:</b> Make sure the LDAP extension method with OID 2.16.840.1.113719.1.39.42.100.25 is present in the user store. Versions 8.7.3 and greater of eDirectory should support this method.</p>   |

| Event Code                  | Description                                      | Remedy  |
|-----------------------------|--|---|
| URL Request Processing (00) |  |   |
| 304600404                   | Authentication Request: Unknown Contract         | <b>Cause:</b> An unknown contract was received from the Embedded Service Provider. This can happen if the configuration of the Identity Server and Access Gateway are not synchronized.<br><br><b>Action:</b> Check to see if the Access Gateway or the Identity Server need to be updated. If their status is current, make a small change to both and update their configuration. |
| 504600000                   | URL Accessed                                     | A request for access to an unprotected URL has been received.   |
| 504600100                   | Protected Resource Accessed                      | A request for access to a protected URL has been received.  |
| 504600400                   | Authentication Request: Successful               | The user authenticated successfully.  |
| 504600401                   | Login Request: Redirect To ESP                   | The authentication request was redirected to the Embedded Service Provider  |
| 504600402                   | Authentication Request: Set Cookie               | The request has been redirected to set the cookie.  |
| 504600403                   | Authentication Request: Redirect URL with Cookie | The original URL request has been redirected to the Embedded Service Provider with a cookie.  |

---

| Event Code                    | Description  | Remedy  |
|-------------------------------|--|---|
| 504600405                     | Authentication Request: NRL Request                  | The protected resource is configured for non-redirected login.  |
| 604600001                     | URL Accessed: Trace Summary                          | This event accesses the URL trace summary.  |
| 604600002                     | URL Accessed: Scheme Redirect                        | The URL accessed on wrong scheme is redirected.   |
| 604600003                     | URL Accessed: Pinned                                 | The URL in the PIN list is accessed.  |
| 604600301                     | Session Broker: Cookie Not Found                     | The session broker returns the status of cookie not found.  |
| 604600302                     | Session Broker: Add User                             | The session broker requests to add user.  |
| 604600303                     | Session Broker: Get Cookie                           | The session broker requests cookie.   |
| 604600304                     | Session Broker: Delete User                          | The session broker deletes user sent from SOAP request.   |
| 604600306                     | Session Broker: Update User                          | The session broker updates the user sent from SOAP request.   |
| 604600307                     | Session Broker: Cookie Found                         | The session broker returned requested cookie.   |
| 604600308                     | Session Broker: Add User SOAP Request                | The session broker adds the user sent from SOAP request.  |
| 604600309                     | Session Broker: User Added                           | The session broker adds user request which are successfully processed.  |
| 604600310                     | Session Broker: Delete User Successful               | The session broker deletes the user successfully.   |
| 604600311                     | Session Broker: Delete User Failed                   | The session broker failed to delete user.   |
| Authorization Processing (01) |  |   |
| 204601102                     | Policy Configuration Reply: Policy Error             | <b>Cause:</b> An error was detected while processing a policy configuration request.<br><br><b>Action:</b> Check the health of the configuration database. If it is unhealthy, repair it or restore it from a backup. |
| 204601302                     | Policy Evaluation Reply: Policy Error                | <b>Cause:</b> An error was detected while processing a policy evaluation request.<br><br><b>Action:</b> Verify that the Embedded Service Provider and the proxy service are running.                                  |
| 504601003                     | ACL Policy Configuration Request                     | ACL configuration request is being processed.   |
| 504601100                     | Policy Configuration Reply: Success                  | The Authorization policy has been configured successfully.  |
| 504601203                     | Policy Evaluation Request                            | A policy evaluation request has been received; the evaluation has started.  |
| 504601300                     | Policy Configuration Reply: Access allowed, no match | The Authorization policy evaluation results allowed access due to policy default action.  |

| Event Code                         | Description   | Remedy  |
|------------------------------------|---|---|
| 504601301                          | Policy Configuration Reply: Access allowed            | The Authorization policy evaluation results allowed access.   |
| 504601302                          | Policy Configuration Reply: Access denied             | The Authorization policy evaluation results denied access.  |
| Identity Injection Processing (02) |   |   |
| 204602102                          | Policy Configuration Reply: Policy Error              | <b>Cause:</b> An error was detected while processing a policy configuration request.<br><br><b>Action:</b> Check the health of the configuration database. If it is unhealthy, repair it or restore it from a backup. |
| 204602302                          | Policy Evaluation Reply: Policy Error                 | <b>Cause:</b> An error was detected while processing a policy evaluation request.<br><br><b>Action:</b> Verify that the Embedded Service Provider and the proxy service are running.                                  |
| 504602100                          | Policy Configuration Reply: Success                   | The Identity Injection policy has been configured successfully.   |
| 504602300                          | Policy Evaluation Reply: Inject Authentication Header | This policy injects an authentication header  |
| 504602301                          | Policy Evaluation Reply: Inject Custom Headers        | This policy injects custom headers.   |
| 504602302                          | Policy Evaluation Reply: Inject Query Parameters      | This policy injects query parameters.   |
| Form Fill Processing (03)          |   |   |
| 204603101                          | Policy Configuration Reply: No Policy ID              | The policy ID is not included with policy configuration request.  |
| 204603102                          | Policy Configuration Reply: Policy Error              | <b>Cause:</b> An error was detected while processing a policy configuration request.<br><br><b>Action:</b> Check the health of the configuration database. If it is unhealthy, repair it or restore it from a backup. |
| 204603302                          | Policy Evaluation Reply: Policy Error                 | <b>Cause:</b> An error was detected while processing a policy evaluation request.<br><br><b>Action:</b> Verify that the Embedded Service Provider and the proxy service are running.                                  |
| 204603304                          | Policy Evaluation Reply: Parse Error: Unknown field   | <b>Cause:</b> A parsing error was detected while processing a policy evaluation request.<br><br><b>Action:</b> Check the Form Fill policy and make sure it matches the form.  |
| 504603100                          | Policy Configuration Reply: Success                   | The Form Fill policy has been configured successfully.  |
| 504603300                          | Policy Evaluation Reply: Success                      | The Form Fill policy evaluation was successful.   |

| <b>Event Code</b>                      | <b>Description</b>                 | <b>Remedy</b>   |

| 20050101203               | Server sockd conf file could not be opened   | <b>Cause:</b> The <code>/etc/opt/novell/sslvpn/sockd.conf</code> file may be corrupted or not present<br><br><b>Action:</b> Configuration may be bad. Check for other configuration errors in the logs  |
| 20050101204               | Could not find core config file              | <b>Cause:</b> The <code>/etc/opt/novell/sslvpn/config.xml</code> file is not present or corrupted<br><br><b>Action:</b> Restart the sslvpn service. Apply the changes from device manager and observe for any other errors while applying the changes on the device |

---

| <b>Event Code</b> | <b>Description</b>  | <b>Remedy</b>  |
|-------------------|---|--|
| 40050101205       | Configuration file does not have proper contents. Parsing configuration failed. Connection Manager has bad configuration data. Could not add new connection | <p><b>Cause:</b> The <code>/etc/opt/novell/sslvpn/config.xml</code> file is not properly formatted. XML data corruption could have happened</p> <p><b>Action:</b> Restart the sslvpn service. Apply the changes from device manager and observe for any other errors while applying the changes on the device</p>  |
| 20050101206       | Resource allocation failed  | <p><b>Cause:</b> Might be a potential issue</p> <p><b>Action:</b> Collect all error logs and report to Support</p>   |
| 20050101207       | Failed to send stunnel response "1231" to fd "5"  | <p><b>Cause:</b> Stunnel program may have been stop or not running correctly</p> <p><b>Action:</b> Collect error log reports Restart the sslvpn service</p>  |
| 20050101208       | Could not open the file <code>/opt/novell/sslvpn/connmansocket</code> exiting! Could not get File Lock for ConnMan. Another instance may be already running | <p><b>Cause:</b> The <code>/opt/novell/sslvpn/connmansocket</code> file may have been locked by another instance</p> <p><b>Action:</b> Forcefully delete this file and restart sslvpn service</p>  |
| 20050101209       | Could not open the Unix domain socket   | <p><b>Cause:</b> The <code>/opt/novell/sslvpn/connman</code> file may have been locked</p> <p><b>Action:</b> Forcefully delete this file and restart sslvpn service</p>  |
| 4005010120A       | Could not bind the Local socket. TCP socket could not be opened   | <p><b>Cause:</b> Invalid configuration or that particular port may be being used by another service</p> <p><b>Action:</b> Check the service running on that port. Change the port in the configuration and restart sslvpn service</p>  |
| 4005010120B       | VCC has not been started. May be VCC port is invalid  | <p><b>Cause:</b> The VCC port is either invalid or some other service is running on that port</p> <p><b>Action:</b> Check <code>/etc/opt/novell/sslvpn/config.xml</code> file and verify the VCC port is valid. If it is not, change it to the correct value, delete the device from the Administration Console, then restart the JCC-proxy using the <code>/etc/init.d/novell-jcc</code> restart command.</p> |
| 2005010120C       | Failed to parse Stunnel certificate. error code = XXXX  | <p><b>Cause:</b> Stunnel Certificate is in bad format</p> <p><b>Action:</b> Recreate the Stunnel certificate in device manager and apply changes to the device</p>   |

| <b>Event Code</b> | <b>Description</b>  | <b>Remedy</b>  |
|-------------------|---|--|
| 2005010120D       | SOCKD is not running/registered... cannot add a new connection request. Failed to send disconnect notification to sockd. Failed to send the new connection notification to sockd. Failed to send servlet response to fd. Failed to send servlet init success response to fd, fd. Failed to send servlet response %x to fd %d msgType, fd. Failed to send socks response %x to fd %d msgType, fd | <p><b>Cause:</b> One of the programs of SSLVPN service is not running. And the SSLVPN Gateway is in bad state</p> <p><b>Action:</b> Restart the sslvpn service and restart the novell-tomcat where sslvpn servlet is running</p> |
| 2005010120E       | Restricting the number of policies for the role %s to %d .. because of insufficient buffer size, tmp->rolename, numRules Restricting the number of policies for the role  | <p><b>Cause:</b> Too many number of traffic rules for that particular role</p> <p><b>Action:</b> Revisit the configuration and reduce the number of traffic rules for that particular role</p>                                   |
| 2005010120F       | Error: Servlet is already registered. Servlet_connect_connection: Servlet is not registered. Received disconnect from servlet. But servlet is not registered  | <p><b>Cause:</b> Communication channel between servlet and connection manager have gone bad</p> <p><b>Action:</b> Restart the sslvpn service and restart the novell-tomcat where sslvpn servlet is running</p>                   |
| 30050101210       | Cannot add new connection. Maximum number of connections reached  | <p><b>Cause:</b> Maximum number of connections reached. No more connections can be added</p> <p><b>Action:</b> Contact system administrator</p>  |
| 50050101400       | Failed to connect to connection Manager   | <p><b>Cause:</b> Connection manager may not be running</p> <p><b>Action:</b> Start the connection using the <code>sslvpnc -up</code> command.</p>  |
| 20050101401       | Error in sending message to Connection Manager  | <p><b>Cause:</b> Connection Manager socket would have closed</p> <p><b>Action:</b> Make sure connection Manager running</p>  |
| 20050101402       | Error in receiving message  | <p><b>Cause:</b> May be connection socket would have closed</p> <p><b>Action:</b> Make sure connection Manager running</p>   |
| 20050101403       | Failed to get the lock of the connection Manager socket. Service cannot be stopped  | <p><b>Cause:</b> This happens with down command and If connmanSocket lock is not available</p> <p><b>Action:</b> Retry</p>   |
| 20050101404       | Failed to update SSLVPN Server Configuration  | <p><b>Cause:</b> This happens if the <code>config.xml</code> is not well formed</p> <p><b>Action:</b> Make sure that <code>config.xml</code> is correct and well formed</p>  |

| <b>Event Code</b> | <b>Description</b>   | <b>Remedy</b>   |
|-------------------|--|---|
| 50050101405       | Too many arguments   | <p><b>Cause:</b> User entered the more arguments than the command can use.</p> <p><b>Action:</b> Type <code>sslvpn -help</code>, read the command syntax, and use it.</p> |
| 50050101406       | Too few arguments  | <p><b>Cause:</b> User entered fewer arguments than the command requires.</p> <p><b>Action:</b> Type <code>sslvpn -help</code>, read the command syntax, and use it.</p>   |
| 50050101407       | Invalid command  | <p><b>Cause:</b> User entered the wrong command</p> <p><b>Action:</b> Type <code>sslvpn -help</code>, read the command syntax, and use it.</p>                            |
| 30050101408       | Failed to start SSL VPN service.<br>Check log(/var/log/messages) | <p><b>Cause:</b> The <code>config.xml</code> file is probably invalid.</p> <p><b>Action:</b> Check the <code>config.xml</code> file and correct it.</p>                   |
| 50050101409       | Invalid argument   | <p><b>Cause:</b> The user has entered invalid arguments.</p> <p><b>Action:</b> Use the <code>sslvpnc -help</code> command to discover the valid arguments.</p>            |

# 8

## SOAP Policy Enforcement Point (011)

The SOAP Policy Enforcement Point (PEP) interface is used by the NetWare and Linux Access Gateways for policy evaluation.

Component 011

- ◆ Subgroup 01: General/Configuration
- ◆ Subgroup 02: Authorization PEP
- ◆ Subgroup 03: Identity Injection PEP
- ◆ Subgroup 04: Form Fill PEP

Messages are logged to the catalina.out for trace and application level logging when Identity Server logging is enabled.

| Event Code                   | Description                  | Remedy   |
|------------------------------|------------------------------|--|
| <b>General/Configuration</b> |                              |  |
| 501101010                    | Start Policy Soap Handler    | Policy Soap Message Handler received start command.<br><b>Cause:</b> Embedded Service Provider has been started<br><b>Action:</b> None. Informational message only.  |
| 501101011                    | Stop Policy Soap Handler     | Policy Soap Message Handler received stop command.<br><b>Cause:</b> Embedded Service Provider has been stopped<br><b>Action:</b> None. Informational message only.   |
| 101101012                    | Policy Evaluator Not Running | The Policy Evaluator has been stopped.<br><b>Cause:</b> The Embedded Service Provider has been stopped by an administrator<br><b>Action:</b> Restart the Embedded Service Provider for the device.                             |
| 101101013                    | General Failure              | General failure processing policy request.<br><b>Cause:</b> Most often caused by incorrectly formatted XML.<br><b>Action:</b> Check catalina.out for stack trace and possibly more detailed information regarding the failure. |

| Event Code | Description                    | Remedy   |
|------------|--------------------------------|--|
| 501101020  | Request Received               | <p>Soap request received.</p> <p><b>Cause:</b> Informational message which logs the type of request received</p> <p><b>Action:</b> None. Informational message used for checking soap handler interactions.</p>  |
| 501101021  | Response Sent                  | <p>Soap response sent.</p> <p><b>Cause:</b> Informational message regarding soap response to a request</p> <p><b>Action:</b> None. Informational message used for checking soap handler interactions.</p>  |
| 101101022  | Unsupported request received   | <p>A NXPES command other than configure, evaluate or terminate was received.</p> <p><b>Cause:</b> The policy engine revision is incompatible with the application.</p> <p><b>Action:</b> Validate the software installation.</p>   |
| 201101023  | Unrecognized Policy Identifier | <p>Policy evaluation was requested for an unknown policy.</p> <p><b>Cause:</b> The policy identifier known to the Access Gateway is stale.</p> <p><b>Action:</b> Most often, this problem is detected by the Access Gateway and the policies are reconfigured. If the problem persists, send an Apply or Apply Changes to the device from the CLI or Administrative Console.</p> |
| 501101030  | Configure Success              | <p>Successful policy configuration.</p> <p><b>Cause:</b> Policy configuration succeeded</p> <p><b>Action:</b> None. Informational message used for checking policy configuration.</p>  |
| 201101030  | Configure Warning              | <p>Policy Configuration Warning.</p> <p><b>Cause:</b> Policy configuration request reported a problem in retrieving configuration data from the config store</p> <p><b>Action:</b> Check the policy definitions in the Administration Console to ensure the configuration store is working properly, then reapply the configuration to the device.</p>                           |

| Event Code | Description                  | Remedy  |
|------------|------------------------------|---|
| 101101031  | Configure Failure            | <p>The policy requested is malformed or causes an exception during the configuration process.</p> <p><b>Cause:</b> This is accompanied with a possible reason for the failure.</p> <p><b>Action:</b> Check the policy configuration in the administrative console and reapply the configuration to the device.</p>  |
| 501101032  | Configure - Empty Policy Set | <p>The set of policies requested either do not apply to the policy enforcement point or the set of policies do not match the categories selected in the policy enforcement list.</p> <p><b>Cause:</b> This may be normal operation.</p> <p><b>Action:</b> If a policy is expected, check the category of the policy and make sure the policy is enabled for the device.</p> |
| 501101040  | Terminating policy           | <p>The set of policies represented by the policy ID are no longer needed and will be removed from the operating policy set.</p> <p><b>Cause:</b> This happens each time a configuration is applied to the device.</p> <p><b>Action:</b> None. This is an informational message only.</p>  |
| 501101050  | Evaluating policy            | <p>An evaluation request has been received for the set of policies represented by the policy ID.</p> <p><b>Cause:</b> This happens at least once per user session per configured policy enforcement point.</p> <p><b>Action:</b> None. This is an informational message only.</p>   |

| Event Code | Description                                 | Remedy   |
|------------|---|--|
| 501101051  | Policy Evaluation - Invalid User Error      | <p>User session received for policy evaluation was not found or contains invalid data.</p> <p><b>Cause:</b> The Identity Service Provider which authenticated the user is not accessible from the Embedded Service Provider.</p> <p><b>Action:</b> Most often, this error will automatically restart the user identification process for the Access Gateway.</p> <p>If that doesn't occur:</p> <p><b>Administrator:</b> If problem persists, check health status of Identity Service Provider and take appropriate action.</p> <p><b>End User:</b> Retry request. If not redirected to the Identity Service Provider, force a refresh of the current browser page and the Access Gateway/Embedded Service Provider will reinitiate the authentication process.</p> |
| 501101052  | Policy Evaluation - Information Query Error | <p>The Policy Evaluator is unable to gain access to information required by the policy.</p> <p><b>Cause:</b> This is accompanied with a possible reason for failure.</p> <p><b>Action:</b> As the administrator, check the health status of Identity Service Provider and take appropriate action.</p>   |
| 501101053  | Policy Evaluation - WSC Query Error         | <p>An attempt to use the WSC query mechanism of the ESP failed, the requested policy data is unavailable.</p> <p><b>Cause:</b> This is accompanied with a possible reason for failure.</p> <p><b>Action:</b> As the administrator, check the health status of Identity Service Provider and take appropriate action.</p>   |

---

# 9 Backup and Restore (010)

Backup and restore are invoked by script files:

- ♦ defbkparm.sh: Created by install. This has the default values for the scripts.
- ♦ getparams.sh: Prompts administrator for information needed to do the backup or restore operation.
- ♦ ambkup.sh: Script to run to perform a backup.
- ♦ amrestore.sh: Script to run to perform a restore.

Other programs used by backup and restore:

- ♦ ICE: This is the Novell eDirectory utility to import and export LDIF file in and out of eDirectory.
- ♦ IdifReverse: This is a program that reverses the order of the records in the LDIF file exported from eDirectory. Reversing the order of records allows the LDIF file to be imported without errors.
- ♦ certtool.jar: This is a eDirectory certificate utility that backs up and restores the CA key, server keys, and trusted roots to a zip file.

Component 010

- ♦ Subgroup 01: Backup
- ♦ Subgroup 02: Restore
- ♦ Subgroup 03: certtool (certificate backup and restore)

Messages are logged to the ambkup.log file.

---

| <i>Event Code</i> | <i>Description</i>   | <i>Remedy</i>   |
|-------------------|--|---|
| <b>Backup</b>     |  |   |
| 201001001         | Backup failed to export data from the configuration store. | <b>Cause:</b> The ICE utility failed to export directory information to an LDIF file.<br><br><b>Action:</b> Make sure that ICE is in the proper location (Linux: /opt/novell/eDirectory/bin).<br><br><b>Action:</b> Make sure that the host IP address, port, administrator, password are all correct.<br><br><b>Action:</b> Make sure the back up file is writable |

---

| <b>Event Code</b> | <b>Description</b>   | <b>Remedy</b>   |
|-------------------|--|---|
| 201001002         | Backup failed to format data for a successful restore.       | <p><b>Cause:</b> The ldifReverse utility failed to sort the LDIF records.</p> <p><b>Action:</b> Make sure that ldifReverse is in the proper location (Same directory as backup command).</p> <p><b>Action:</b> Make sure the back up file is writable</p> <p><b>Action:</b> Check for the backup file you specified with "_pre" appended to the file name.</p> <p>If the file exists, run the following command:</p> <pre>ldifReverse bkupfile_pre bkupfile</pre> <p>Replace bkupfile with the filename you specified for the backup file. It should create bkupfile which is the desired back up file.</p>   |
| 201001003         | Backup failed to export certificates to the backup zip file. | <p><b>Cause:</b> The certtool utility failed to export the certificates to a zip file.</p> <p><b>Action:</b> Make sure that certtool.jar is in the proper location (Same directory as backup command).</p> <p><b>Action:</b> Make sure the back up file is writable.</p> <p><b>Action:</b> Manually export the certificates to a zip file:</p> <pre>java -Djava.library.path=/opt/novell/lib -jar certtool.jar -edirTree your_tree - edirIP 000.000.000.000 -edirServer cn=!ServerName.0=novell -edirUser cn=admin.o=novell -edirPwd secret -bkup - file ServerName_20060828_0930.zip -pwd certsecret -trcontainer trustedRoots.access ManagerContainer.novell -caName "your_tree CA"</pre> |
| <b>Restore</b>    |  |   |
| 201002001         | Backup file does not exist.                                  | <p><b>Cause:</b> The backup file does not exist. The name of the backup file specified in answer to the prompt should not include the final the .ldif or .zip extension.</p> <p><b>Action:</b> Specify the correct name of the back up file.</p>  |
| 201002002         | Backup file does not appear to be valid.                     | <p><b>Cause:</b> An simple analysis of the backup file indicates that the LDIF file specified backup file (with .ldif appended to the name) is not a valid backup file.</p> <p><b>Action:</b> Make sure to specify a backup file that was created by the Access Manager Appliance Backup utility.</p>   |
| 201002003         | Restore failed to access the configuration store.            | <p><b>Cause:</b> The ICE utility failed to access the eDirectory configuration store.</p> <p><b>Action:</b> Make sure that ICE is in the proper location (Linux: /opt/novell/eDirectory/bin). Make sure that the host IP address, port, administrator, password are all correct.</p>  |

| <b>Event Code</b> | <b>Description</b>   | <b>Remedy</b>   |
|-------------------|--|---|
| 201002004         | Restore failed to format the current configuration store data.     | <p><b>Cause:</b> Restore was not able to save a current copy of the configuration store. A current copy of the config store is saved before the import in case the import fails.</p> <p><b>Action:</b> Make sure that ldifReverse is in the proper location (Same directory as backup command).</p>   |
| 201002005         | Restore failed to prepare the configuration store for data import. | <p><b>Cause:</b> ICE failed. Unknown reason because it has previously been invoked successfully in the restore script.</p>  |
| 201002006         | Restore failed to prepare the configuration store for data import. | <p><b>Cause:</b> ICE failed. Unknown reason because it has previously been invoked successfully in the restore script.</p>  |
| 101002007         | Restore failed to restore the backup data.                         | <p><b>Cause:</b> ICE failed. Unknown reason because it has previously been invoked successfully in the restore script.</p> <p><b>Action:</b> Check the configuration store for the following container:</p> <pre>ou=accessManagerContainer,o=novell</pre> <p>If it is not there, locate the <code>recover.ldif</code> file. It should be in the directory where you ran the restore command. Run ICE to recover the configuration store to the state it was in before you attempted the restore. Enter the following command:</p> <pre>/opt/novell/eDirectory/bin/ice -SLDIF -f recover.ldif -C -n -DLDAP - sxxx.xxx.xxx.xxx -p636 -k -dcn=admin, o=novell -wadmin_password -F</pre>            |
| 101002008         | Failed to restore certificate from backup file.                    | <p><b>Cause:</b> The java program restores the certificate failed. The java program is <code>certtool.jar</code> which provides command line access to various eDirectory certificate functions.</p> <p><b>Action:</b> See the log file (<code>ambkup.log</code>) for more specific details. The log file contains a listing of relevant parameters with each error message. Assuming the back up from which you are trying to restore was successful, failure to restore is probably an incorrectly supplied parameter. Enter the following command:</p> <pre>JAVA -classpath vcdnbkup.jar:cert tool.jar com.novell.nids.bkuputil.Util - userid cn=admin,o=novell -pwd secret - vcdnUser</pre> |
| 101002009         | Failed to reconfigure VCDN user objects.                           | <p><b>Cause:</b> The VCDN user objects were not restored with their passwords. Device Manager will not start up until the passwords have been properly set.</p> <p><b>Action:</b> This is accompanied with an error <code>x01004xxx</code>. Please refer to that error.</p>   |

**certtool utility**

| <b>Event Code</b> | <b>Description</b>                                    | <b>Remedy</b>  |
|-------------------|---|--|
| 201003002         | IP address is missing.                                | <p><b>Cause:</b> The certtool.jar was launched without the -edirIP option. A script file might have been incorrectly modified.</p> <p><b>Action:</b> Make sure the -edirIP option is specified in the script when it launches the certtool utility.</p>                                  |
| 201003005         | eDirectory user id missing.                           | <p><b>Cause:</b> The certtool.jar was launched without the -eDirUser option. A script file might have been incorrectly modified.</p> <p><b>Action:</b> Make sure the -edirUser cn=admin.o=novell option is specified in the script when it launches the certtool utility.</p>            |
| 201003006         | eDirectory user password missing.                     | <p><b>Cause:</b> The certtool.jar was launched without the -edirPwd option. A script file may have been incorrectly modified.</p> <p><b>Action:</b> Make sure the -edirPwd option is specified in the script when it launches the certtool utility.</p>                                  |
| 201003009         | File name missing.                                    | <p><b>Cause:</b> The certtool.jar was launched without the -file (name of backup file) option. A script file may have been incorrectly modified.</p> <p><b>Action:</b> Make sure the -file option is specified in the script when it launches the certtool utility.</p>                  |
| 201003011         | Encryption password missing.                          | <p><b>Cause:</b> The certtool.jar was launched without the -pwd option. A script file may have been incorrectly modified.</p> <p><b>Action:</b> Make sure the -pwd option is specified in the script when it launches the certtool utility.</p>  |
| 201003013         | Name of trusted root container missing.               | <p><b>Cause:</b> The certtool.jar was launched without the -trContainer (trusted root container) option. A script file may have been incorrectly modified.</p> <p><b>Action:</b> Make sure the -trcontainer option is specified in the script when it launches the certtool utility.</p> |
| 201003040         | Failed to open backup file for writing.               | <p><b>Cause:</b> Backup was unable to create or access the backup file in which to save certificate information.</p> <p><b>Action:</b> Ensure that user running backup sufficient rights.</p>  |
| 201003041         | Failed to retrieve certificate names from eDirectory. | <p><b>Cause:</b> A PKI or eDirectory error.</p> <p><b>Action:</b> This error will be accompanied by an error string.</p>   |
| 201003042         | Failed to retrieve certificate xxxx from eDirectory.  | <p><b>Cause:</b> The certtool failed to retrieve the certificate identified in the error. Problems have been seen trying to export certificate with pending CSRs.</p> <p><b>Action:</b> This error will be accompanied by an error string.</p>   |

| <b>Event Code</b> | <b>Description</b>  | <b>Remedy</b>  |
|-------------------|---|--|
| 201003043         | Failed to write certificate xxxx to backup file.                                  | <p><b>Cause:</b> The certificate identified in the error message did not get saved to the backup file.</p> <p><b>Action:</b> An exception string included in the message my provide additional information.</p>                                  |
| 301003044         | Error closing backup.   | <p><b>Cause:</b> Likely will not cause a problem.</p> <p><b>Action:</b> Try extracting the contents of the zip file created by backup to verify the integrity of the zip file.</p>   |
| 201003045         | Failed to write trusted root xxxx to backup file.                                 | <p><b>Cause:</b> The trusted root identified in error messages did not get saved to the backup file.</p> <p><b>Action:</b> An exception string included in the message might provide additional information.</p>                                 |
| 201003046         | Failed to retrieve trusted root xxxx from eDirectory.                             | <p><b>Cause:</b> The certtool failed to retrieve the trusted root identified in the error. Likely a PKI or eDirectory error.</p> <p><b>Action:</b> This error will be accompanied by an error string.</p>  |
| 201003048         | Not all items were backed up.   | <p><b>Cause:</b> See accompanying errors.</p> <p><b>Action:</b> Refer to previous error messages to identify which certificates or trusted roots were not backed up.</p>   |
| 201003049         | Failed to retrieve the CA xxxx from eDirectory. Likely a PKI or eDirectory error. | <p><b>Cause:</b> The certtool failed to retrieve the CA key identified in the error.</p> <p><b>Action:</b> This error will be accompanied by an error string.</p>  |
| 201003050         | Failed to write CA key xxxx to backup file.                                       | <p><b>Cause:</b> The CA key identified in the error did not get written to the backup file.</p> <p><b>Action:</b> An exception string included in the message my provide additional information.</p>   |
| 201003051         | Failed to open backup file for reading.   | <p><b>Action:</b> Make sure the backup file exists. Do not include .ldif or .zip in the name of the back up file.</p> <p><b>Action:</b> Make sure the user logged in has sufficient rights to access the file.</p>                               |
| 201003052         | Not all items were restored.  | <p><b>Cause:</b> See accompanying errors.</p> <p><b>Action:</b> Refer to previous error messages to identify which certificates or trusted roots were not backed up.</p>   |
| 301003053         | Error closing backup.   | <p><b>Action:</b> This error occurred after all restore operations had completed. Should not cause any problem.</p>  |
| 201003056         | Error importing CA key: xxxx  | <p><b>Action:</b> The CA key was not restored. See the accompanying Error for more information. Likely a PKI error.</p> <p><b>Action:</b> Make sure the password you provided matches the encryption password used when backing up the data.</p> |

| <b>Event Code</b> | <b>Description</b>                                      | <b>Remedy</b>   |
|-------------------|---|---|
| 201003057         | Error importing key: xxxx                               | <p><b>Cause:</b> The CA key was not restored. See the accompanying Error for more information. Likely a PKI error.</p> <p><b>Action:</b> Make sure the password you provided matches the encryption password used when backing up the data.</p>   |
| 201003058         | Error importing trusted root: xxxx                      | <p><b>Cause:</b> The trusted root was not restored. See the accompanying Error for more information. Likely a PKI error.</p>  |
|                   | <b>VCDN configuration</b>                               |   |
| 201004001         | Failed to configure VCDN objects for data store access. | <p>The VCDN user objects were not restored with their passwords. Device Manager will not start up until the passwords have been properly set.</p> <p><b>Cause:</b> The vcdnbkup.jar utility failed to reset passwords for VCDN objects. This causes errors starting up device manager.</p> <p><b>Action:</b> Make sure /opt/volera/roma/conf/vcdn.conf file is present and has the correct information.</p> <p>To fix enter the following command in the /opt/novell/devman/bin directory:</p> <pre>java -jar vcdnbkup.jar -userid cn=admin,o=novell -pwd admin_password - vcdnUser</pre>                                       |
| 201004002         | Application Error.                                      | <p>The VCDN user objects were not restored with their passwords. Device Manager will not start up until the passwords have been properly set. Accompanied by a stack trace with more information.</p> <p><b>Cause:</b> vcdnbkup.jar utility failed to reset passwords for VCDN objects. This will cause errors starting up device manager.</p> <p><b>Action:</b> Make sure the information in /opt/volera/roma/conf/vcdn.conf file is correct:</p> <p>Fix the file by running the following command (in /opt/novell/devman/bin):</p> <pre>java -jar vcdnbkup.jar -userid cn=admin,o=novell -pwd admin_password - vcdnUser</pre> |

---

# 10 Novell Modular Authentication Class (012)

The Novell Modular Authentication Service (NMAS) Class provides access to a number of advanced authentication mechanisms available from Novell, Inc. and Novell partners.

Component 012

- ◆ Subgroup 01: General/Configuration
- ◆ Log file: catalina.out for trace and application level logging as enabled by the log settings (click *Identity Server > Edit > Logging*)

---

| Event Code                   | Description               | Remedy  |
|------------------------------|---------------------------|---|
| <b>General/Configuration</b> |                           |   |
| 301201001                    | NMAS Authentication Class | The log message language resource file could not be located.<br><b>Cause:</b> The log message language resource file was not found<br><b>Action:</b> Verify installation.   |
| 101201002                    | NMAS Authentication Class | Error getting LDAP host address.<br><b>Cause:</b> System configuration.<br><b>Action:</b> Verify installation and availability of LDAP host server.   |
| 101201003                    | NMAS Authentication Class | The NMAS_LOGIN_SEQUENCE initialization property were not provided.<br><b>Cause:</b> The NMAS_LOGIN_SEQUENCE property was not defined for the authentication class.<br><b>Action:</b> Use the management interface to add the NMAS_LOGIN_SEQUENCE property to either the class or the method, and assign it the name of a valid NMAS login sequence. |
