## 1 What's New?

This is the first release of the Secure Configuration Manager Dashboard (Dashboard).

The Dashboard expands the reporting capability of Secure Configuration Manager. You can quickly determine how well each IT asset in your environment complies with Secure Configuration Manager policy templates. This high-level overview of your environment's compliance allows you to see the overall status and trends of security compliance at a single glance.

Based on your Secure Configuration Manager console user account permissions, you can remotely audit your enterprise security by reviewing your systems' compliance or risk status. When a system is out of compliance with a policy template or has a high risk score, you can browse the data for that system to see which checks in the policy template failed on exactly which endpoints.

For information about the Dashboard, see the [NetIQ Secure Configuration Manager Dashboard Guide](#).

## 2 System Requirements

For information about hardware requirements, supported operating systems, and browsers, see the [NetIQ Secure Configuration Manager Technical Information](#) web page.

## 3 Installing the Dashboard

To install the Dashboard, see "Installing the Secure Configuration Manager Dashboard" in the [NetIQ Secure Configuration Manager Dashboard Guide](#).

---

**NOTE:** The Dashboard is supported only with NetIQ Secure Configuration Manager 6.1. It is not compatible with earlier versions of NetIQ Secure Configuration Manager.

---

## 4 Contact Information

Our goal is to provide documentation that meets your needs. If you have suggestions for improvements, please email [Documentation-Feedback@netiq.com](mailto:Documentation-Feedback@netiq.com). We value your input and look forward to hearing from you.

For detailed contact information, see the [Support Contact Information](#) website.

For general corporate and product information, see the [NetIQ Corporate](#) website.

For interactive conversations with your peers and NetIQ experts, become an active member of the [Secure Configuration Manager forum](#), our community Web site that offers product forums, product notifications, blogs, and product user groups.
