

# NetIQ SecureLogin 8.7 Hotfix 1 Release Notes

February 2019

NetIQ SecureLogin 8.7 Hotfix 1 (8.7.0.1) resolves some of the previous issues.

These improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure that our products meet all your needs.

The documentation for this product and the latest Release Notes are available on the NetIQ website in HTML and PDF formats on a page that does not require you to log in. If you have suggestions for documentation improvements, click [comment on this topic](#) at the bottom of any page in the HTML version of the documentation posted at the [NetIQ SecureLogin documentation](#) page. To download this product, see the [NetIQ Downloads](#) website.

## 1 What's New?

This release includes the **Support for Microsoft Edge**.

SecureLogin now provides single sign-on to web application running on the Edge browser using the Single Sign-on Assistant extension.

For more information about how to install the Single Sign-on Assistant extension, see [Installing the Single Sign-on Assistant Extension in Microsoft Edge](#) in the [NetIQ SecureLogin Installation Guide](#).

### 1.1 Support for Microsoft Edge

From this release, SecureLogin provides single sign-on to web application running on the Microsoft Edge browser using the Single Sign-on Assistant extension.

For more information on how to install the Single Sign-on Assistant extension, see [Installing the Single Sign-on Assistant Extension in Microsoft Edge](#) in the [NetIQ SecureLogin Installation Guide](#).

## 2 System Requirements

For information about hardware requirements, supported operating systems, and browsers, see [System Requirements for SecureLogin](#) in [NetIQ SecureLogin Quick Start Guide](#).

## 3 Installing or Upgrading

You can upgrade to SecureLogin 8.7 HotFix 1 only from SecureLogin 8.7. Upgrading to SecureLogin 8.7 HotFix 1 from versions other than SecureLogin 8.7 is not supported. For information about how to install and how to upgrade, see [NetIQ SecureLogin Installation Guide](#).

## 4 Known Issues

NetIQ Corporation strives to ensure our products provide quality solutions for your enterprise software needs. The following issues are currently researched. For release specific issues, see previous releases' release notes. If you need further assistance with any issue, please contact [Technical Support](#).

### 4.1 slnativehostAppServ.exe Fails to Load When the Microsoft Edge Browser Is Launched

**Issue:** When Edge is launched, the `slnativehostAppServ.exe` process fails to start. It prevents SecureLogin to provide single sign-on to the Microsoft Edge browser. This issue occurs randomly. (Bug 1123174)

**Workaround:** To workaround this issue, perform the following steps:

- 1 Start [Windows Task Manager](#).
- 2 Click [Processes](#) and close the following processes:
  - ♦ `InhostMessageBridge.exe`
  - ♦ `MicrosoftEdge.exe`
- 3 Restart Edge.

### 4.2 Performance Issue In Single Sign-on Assistant

**Issue:** When using the Single Sign-on Assistant extension in the Microsoft Edge browser, the processing symbol is displayed with the cursor intermittently. This behavior does not cause any issue in the single sign-on functionality. This issue occurs only in web pages that contain multiple events. (Bug 1123362)

**Workaround:** There is no workaround for this issue.

### 4.3 SecureLogin Displays An Error Message

**Issue:** SecureLogin displays the `Unable to instantiate script broker` error message. This issue occurs when a browser is running and SecureLogin is closed. The browser causes the `slnativehost.exe` process to run in the background even when SecureLogin is closed. The `slnativehost.exe` process fails to reach SecureLogin and displays this error message. (Bug 1123295)

**Workaround:** Ensure that you close all the browsers before you close SecureLogin.
