NetIQ SecureLogin 8.8 Service Pack 1 Patch 2 Release Notes

March 2022

This patch release includes a fix for CVE-2022-0778 vulnerability. This patch is supported for the 8.8.1.2 client version of the product and not applicable to the server version of the product.

NOTE: With this release, the patch release naming convention is updated. This patch is named NetIQSecureLogin-8.8.1.200 which reads as 8.8 Service Pack 1 Patch 2. This is done to allow future Hotfix releases on top of an existing patch. For example, if a Hotfix is released on top of this patch in the future, it will be named NetIQSecureLogin-8.8.1.201, that is, 8.8 Service Pack 1 Patch 2 Hotfix 1.

The documentation for this product and the latest Release Notes are available on the NetIQ website in HTML and PDF formats on a page that does not require you to log in. If you have suggestions for documentation improvements, click **comment on this topic** at the bottom of any page in the HTML version of the documentation posted at the NetIQ SecureLogin documentation page. To download this product, see the NetIQ Downloads website.
