OpenText™ eDirectory CE 24.4.0.1 (v9.3.0.0001) Release Notes

April 2025

OpenText eDirectory 24.4.0.1 (v9.3.0.0001) resolves a couple of previous issues and is applicable only for OpenText eDirectory 24.4(v9.3). Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure our products meet all your needs. You can post feedback in the eDirectory Community Support Forums, our community Web site that also includes product notifications, blogs, and product user groups.

For the list of software fixes and enhancements in the previous release, see the OpenText eDirectory CE 24.4 (v9.3) Release Notes (https://www.netiq.com/documentation/edirectory-93/edirectory-93-release-notes/data/edirectory-93-release-notes.html).

Please note that OpenText eDirectory 24.4.0.1 (v9.3.0.0001) is not available for download in the Software Licenses and Downloads (SLD) site. To get access to it, log a case with Technical Support and request access to the download media.

For more information about this release and for the latest release notes, see the Documentation (https://www.netiq.com/documentation/edirectory-93/) website.

What’s Resolved?

This release contains software fixes for the following issues:

Component	Issue ID	Description
ndsd	OCTCR56A695048	ndsd stops responding to requests after upgrading to eDirectory 9.3.
ndsd	OCTCR56A709357	Identity Manager servers crashing after upgrading to eDirectory 9.3.

System Requirements

For information about prerequisites, hardware requirements, and supported operating systems, see the *OpenText™ eDirectory CE 24.4 (v9.3) Installation Guide* (https://www.netiq.com/documentation/edirectory-93/edir_install/data/bookinfo.html).

Installing and Upgrading

To upgrade to OpenText eDirectory 24.4.0.1 (v9.3.0.0001), you need to be on version 9.3. To upgrade your eDirectory 9.3 server to 9.3 HF1, perform the following steps based on your platform:

Upgrading eDirectory on Linux as Root User

1. Run the following command to stop the eDirectory instance:

   ```
   ndsmanage stopall
   ```

2. Download and extract the `eDirectory-9.3.0.0001.zip` file.
3. Run the following command:

   ```
   rpm -Uvh patterns-edirectory-9.3.0.0001.x86_64.rpm novell-NDSserv-9.3.0.0001.x86_64.rpm
   ```

4. Run the following command to start the eDirectory instance:

   ```
   ndsmanage startall
   ```

Upgrading eDirectory Container Using Docker

1. Login to the eDirectory container as a root user:

   ```
   docker exec -it -u root <containername> /bin/bash
   ```

2. Run the following command to stop the eDirectory instance:

   ```
   ndsmanage stopall
   ```

3. Download and extract the `eDirectory-9.3.0.0001.zip` file.
4. Run the following commands:

   ```
   rpm –Uvh patterns-edirectory-9.3.0.0001.x86_64.rpm
   ```

   ```
   rpm -Uvh novell-NDSserv-9.3.0.0001.x86_64.rpm
   ```

5. Run the following command to start the eDirectory instance:

   ```
   ndsmanage startall
   ```

6. Exit from the eDirectory container.

NOTE: You must upgrade OpenText Identity Manager before using this version of OpenText eDirectory. For more information on the version compatibility see, OpenText Identity Manager Component Versions (https://www.netiq.com/documentation/identity-manager-4.10/system-requirements-identity-manager-4.1x/data/system-requirements-identity-manager-4.1x.html#identity_manager_components_versions) table in the

System Requirements for OpenText™ Identity Manager CE 24.4 (v4.10) (https://www.netiq.com/documentation/identity-manager-4.10/system-requirements-identity-manager-4.1x/data/system-requirements-identity-manager-4.1x.html#).
