iManager 2.7.7 Patch 10 Release Notes

March 2017

iManager 2.7.7 Patch 10 resolves specific previous issues. This document outlines why you should install this patch. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable inputs. We hope you continue to help us ensure our products meet all your needs.

For a full list of all issues resolved in NetIQ iManager 2.7, including all patches and service packs, refer to TID 7010166, "History of Issues Resolved in NetIQ iManager 2.7".

For more information about this release and for the latest Release Notes, see the iManager Documentation Web site.

For the list of software fixes and enhancements in the previous releases, see iManager 2.7.7 Patch 7 Release Notes.

To download this product, see the NetIQ Downloads Web site.

1 What's New

The following sections outline the enhancement and issue resolved in this release:

1.1 Operating System Support

In addition to the platforms introduced in previous releases of iManager, this release adds support for the following operating system:

- RHEL 7.3 (Red Hat Enterprise Linux)

1.2 Fixed Issues

This release includes software fixes for the following components:

1.2.1 The Modify User Option Is Not Displayed

Issue: iManager does not display the **Modify User** option under the list of tasks. `(Bug 932196)`

Fix: This issue is fixed.

2 System Requirements

For information about system requirements, see the *NetIQ iManager Installation Guide*.
