

# iManager 3.0 SP4 Release Notes

September 2017

iManager 3.0 SP4 resolves specific previous issues. This document outlines why you should install this service pack. Many of these improvements were made in direct response to suggestions from our customers. We thank you for your time and valuable input. We hope you continue to help us ensure our products meet all your needs. You can post feedback in the iManager Community Support Forums, our community Web site that also includes product notifications, blogs, and product user groups.

To view the complete list of resolved issues in NetIQ iManager 3.x, including all patches and service packs, refer to [TID 7016795, "History of Issues Resolved in NetIQ iManager 3.x"](#).

For more information about this release and for the latest release notes, see the [iManager Documentation](#) Web site. To download this product, see the [NetIQ Downloads](#) Web site.

- ♦ [Section 3, "Installing or Upgrading," on page 3](#)
- ♦ [Section 4, "Legal Notice," on page 3](#)

## 1 What's New

The following sections outline the enhancement and issue resolved in this release:

- ♦ [Section 1.1, "New Features," on page 1](#)
- ♦ [Section 1.2, "Operating System Support," on page 2](#)
- ♦ [Section 1.3, "Fixed Issues," on page 2](#)

### 1.1 New Features

This release introduces the following new features:

#### 1.1.1 Updates for Dependent Components

This release adds support for the following components:

- ♦ Java 1.8.0\_144 (64-bit)
- ♦ Tomcat 8.0.45

## 1.2 Operating System Support

In addition to the platforms introduced in previous releases of iManager, this release adds support for the following operating system:

- ♦ Windows 2016
- ♦ Red Hat Enterprise Linux (RHEL) 7.4

## 1.3 Fixed Issues

This release includes the following software fixes:

### 1.3.1 Resolved Security Vulnerability CVE-2017-9276

This version of iManager resolves security vulnerability [CVE-2017-9276](#).

### 1.3.2 Upgrading iManager Does Not Upgrade RPMs for novell-imanager and novell-plugin-base

**Issue:** iManager does not upgrade the RPMs for novell-imanager and novell-plugin-base while upgrading the iManager server on Linux. (Bug 870414)

**Fix:** This issue is fixed.

### 1.3.3 iManager Displays Warning Message When No Changes Are Made in the Edit User Object Window

**Issue:** iManager displays a warning message on the edit user object window. This occurs when the user clicks on the [Cancel](#) button without making any change to the user object. (Bug 1034833)

**Fix:** This issue is fixed.

### 1.3.4 iManager Does Not Displays Any Value for the Timezone Attribute

**Issue:** iManager displays empty timezone value while modifying an user attribute. (Bug 1028890)

**Fix:** This issue is fixed.

### 1.3.5 iManager Displays an Error Message While Checking Status Log

**Issue:** iManager displays an error message while checking the status log entries of the users. (Bug 1038076)

**Fix:** This issue is fixed.

### 1.3.6 iManager Does Not List the Group Members As Set In Object Selector

**Issue:** iManager does not list the group members as set in the [Object Selector](#) under [Preferences](#). (Bug 1042139)

**Fix:** This issue is fixed.

### 1.3.7 iManager Does Not Display Any Task After Selecting Multiple Objects

**Issue:** iManager does not display the list of available tasks once you select multiple objects in the View Objects window. (Bug 1049152)

**Fix:** This issue is fixed and iManager displays a warning message when multiple objects are selected.

### 1.3.8 User Cannot Uninstall Plug-Ins from the iManager Workstation

**Issue:** User cannot uninstall plug-ins from iManager workstation when both iManager 2.7 and 3.0 are installed on the same machine. (Bug 1053408)

**Fix:** This issue is fixed.

### 1.3.9 Installation of Plug-Ins for iManager Fails

**Issue:** Installation of designer plug-ins (eDirectory, PKI and NMAS) fail on iManager. (Bug 1050868)

**Fix:** This issue is fixed.

### 1.3.10 iManager Displays an Error Message While Modifying a User Object

**Issue:** iManager displays an error message while modifying a user object if the Home Directory Path has any special character. (Bug 1039060)

**Fix:** This issue is fixed.

## 2 System Requirements

For information about prerequisites, computer requirements, installation, upgrade or migration, see [Planning to Install iManager](#) in the [NetIQ iManager Installation Guide](#).

---

**NOTE:** iManager uses the modified version of `XULRunner` on Windows. The source code for the modified `XULRunner` is available under the Mozilla Public License version 2.0. For further assistance, contact [Technical Support](http://www.netiq.com/support) (<http://www.netiq.com/support>).

---

## 3 Installing or Upgrading

To upgrade to iManager 3.0 SP4, you need to be on iManager 2.7.7.x and higher.

For more information on upgrading to iManager 3.0 SP4, see the [iManager Installation Guide](#).

---

**IMPORTANT:** This version of iManager supports only eDirectory 9.0 or above. If you are upgrading iManager 2.7.7.x to 3.0 SP4, ensure that your eDirectory is also upgraded to 9.0 or above before upgrading iManager when both are installed on the same machine.

---
