

NetIQ® Identity Manager 4.5 Fan-Out Driver for Linux* and UNIX*

January 22, 2015

The documentation on this page applies to the Identity Manager Fan-Out driver when used on the following connected platforms:

- ♦ AIX*
- ♦ FreeBSD*
- ♦ HP-UX*
- ♦ SUSE® Linux
- ♦ RedHat* Linux
- ♦ Debian* Linux
- ♦ Solaris* SPARC*

For specific information about platform version support, follow the link below to the readme file.

The Fan-Out Driver, which synchronizes information from eDirectory™ to the platforms listed above, is a combination of a Core Driver and Platform Services for each supported platform.
