

# NetIQ® Identity Manager 4.5 Fan-Out Driver for Mainframes

October 28, 2014

The documentation on this page applies to the Identity Manager Fan-Out driver when used on the following connected platforms:

- ♦ z/OS\* RACF\*
- ♦ z/OS CA-ACF2\*
- ♦ z/OS CA-Top Secret\*

For specific information about platform version support, follow the link below to the readme file.

The Fan-Out Driver, which synchronizes information from eDirectory™ to the platforms listed above, is a combination of a Core Driver and Platform Services for each supported platform.
