NetIQ Identity Manager Engine 4.8.2 Hotfix 1 Release Notes

January 2021

NetIQ Identity Manager Engine 4.8.2 Hotfix 1 (4.8.2.1) resolves specific previous issues. This document outlines why you should install this hotfix.

For the list of software fixes and enhancements in the previous release, see NetIQ Identity Manager 4.8 Release Notes.

What's New?

This release includes the following software fixes:

- OCTCR28Q231587: Improved performance while migration to IDM 4.8. `(Bug 1171594)`
- OCTCR28Q232136: Introduces new ECV, the Include driver filter in subscriber initialization document that enables schema mapping through engine init parameter. `(Bug 1172357)`
- OCTCR28Q284114: Execution of Do send email or Do send email from template action generates email notification with custom SMTP header successfully.

Updating Engine

- "Prerequisites" on page 1
- "Updating This Hotfix on Linux" on page 1
- "Updating This Hotfix on Windows" on page 2

Prerequisites

You must be on Identity Manager 4.8.2 at a minimum to apply this update.

Updating This Hotfix on Linux

1 Run the following command to stop the Identity Vault:

    ```
    ndsmanage stopall
    ```

2 Download and extract the `Identity_Manager_4.8.2_HF1_Engine.zip` file from the download site (https://dl.netiq.com/index.jsp).

3 Navigate to the location where you have extracted the patch and run the following commands:

- `rpm -Uvh novell-DXMLbasenoarch.rpm`

- `rpm -Uvh novell-DXMLeventx.rpm`

4 (Conditional) If you are running this hotfix on OES Operating System, navigate to the location where you have extracted the patch and run the following commands:

- `rpm -Uvh --force novell-DXMLbasenoarch.rpm`

- `rpm -Uvh novell-DXMLeventx.rpm --nodeps`

5 Run the following command to start the Identity Vault:

`ndsmanage startall`

Updating This Hotfix on Windows

1 Back up `dxevent.dll` file from `C:\NetIQ\eDirectory\` location.

2 Back up `dirxml.jar` and `dirxml_misc.jar` files from `C:\NetIQ\eDirectory\lib\` location.

3 Stop the Identity Vault service.

4 Download and extract the `Identity_Manager_4.8.2_HF1_Engine.zip` file from the download site (https://dl.netiq.com/index.jsp).

5 Copy `dirxml.jar` and `dirxml_misc.jar` files from the extracted location to the `C:\NetIQ\eDirectory\lib\` location.

6 Copy `dxevent.dll` from the extracted location to the `C:\NetIQ\eDirectory\` location.

7 Start the Identity Vault service.

Known Issues

NetIQ Corporation strives to ensure our products provide quality solutions for your enterprise software needs. There are no new issues other than the issues mentioned in NetIQ Identity Manager 4.8 Release Notes. If you need further assistance with any issue, contact Technical Support.
